197. Do you agree or disagree with the following statement? Children should be required to help with household tasks as soon as they are old enough to do so. Use specific reasons and examples to support your answer..... 154
198. What do you think is the most important quality of a working environment: good leaders, good colleagues, or flexible time? 155
199. Do you agree or disagree? Cell phone has changed our lives greatly. 156

200. Some people like to spend their spare time with friends, some people like to spend it alone. Which one do you prefer? 157
201. If you were to become a volunteer at the school or in the community, what kind of volunteer work would you do and why? 157
202. Do you agree or disagree with the following statement? Artists and musicians are important to our society. 158
203. Some students take notes very often during class. Other students do not take notes or rarely take notes. Which do you think is better? 159
204. Watching TV is not a good use of time. Do you agree or disagree? 159
205. Do you agree or disagree with the following statement? What a person wears can show his or her personality. 160
206. Do you prefer to listen to live music like concert, or do you prefer to listen to recorded music? 161
207. Do you prefer to learn from current people and events or from people and events in the past? 161
208. Do you like to go to one place and stay there for a long time for your vacation, or different places and spend little time at each place? 162
209. Choose ONE of the forms of the technology in the list and tell why it has great impact on people's lives in your country? Airplane, computer or television. Use specific reasons and examples to support your response. 163
210. Which is better for children: to grow up in a big city or to grow up in a small town? 163
211. Some people like to watch or listen to news every day while others do that occasionally. Which do you prefer and why? Use specific reasons and examples to illustrate your point. 164
212. Do you prefer to have fast food in a fast-food restaurant, or do you prefer to have food in other kinds of places? 164
213. Some students prefer to take an essay question where they must write an essay to a question. Other students prefer to take a test with objective/multiple-choice questions. Which type of exam question do you prefer? Give reasons and examples in your explanation. 165
214. Do you agree or disagree with the following statement? People who are 18 years old are not mature enough to vote. 166
215. Are you willing to carefully choose the gift which your friends like or choose whatever you like? 167
216. Among the following three types of books, which do you like the least? • mystery novel • science fiction • biography 167
217. Do you like to travel alone or travel with your family members? Explain why. 168
218. Do you agree or disagree with the following statement? Playing computer or video games has a negative influence on teenagers. 169
219. Some college students like to spend their free time studying another course or doing schoolwork. Others like to join a club and enjoy club activities. Which do you think is better and why? 170

220. Do you agree or disagree with the following statement? University students should learn how to manage their time more efficiently..... 170
221. Some people think it is better for students to study in a class. Others think that it is better for students to study on the Internet. Which do you think is better and why? 171
222. Some students prefer to go to universities or colleges in their hometown. Others prefer to go to universities or colleges in new cities or towns. Which do you prefer and why? Include details and examples in your explanation. 172
223. Do you prefer to take courses related to a specific career, or do you prefer to take a variety of courses? 173
224. Some people would borrow money to buy things they need. Others would save up money until they can afford it. Which would you prefer and why? 173
225. Should students start to plan their career before entering college, or should they do so until they have entered college and studied for a period of time? 174
226. Do you agree or disagree with the following statement? The Internet plays an important role in your life. Use specific examples and details to support your answer. 175
227. Do you agree or disagree with the following statement? Students nowadays work harder in their study than students in the past..... 175
228. Do you agree or disagree with this statement? People should dress according to the latest fashion..... 176
229. Given the choice, many people would prefer to live in an older or more historic building or house. Others would prefer to live in a more modern building or house. Which would you prefer, and why? 177
230. Among the following three professions, which do you respect the most: photographers, musicians, painters? Explain why. 178
231. Which do you prefer, reading paper books or reading electronic books? Explain why. 178
232. Some students prefer to live alone or live with their friends when they study abroad..... 179
233. Other students prefer to live with a local family when they study abroad. Which way do you prefer and why? 180
234. Some people prefer to listen to music while they are studying or working. Others prefer to stay in a quiet place while they are studying or working. Which way do you prefer and why? Include reasons and details in your response. 180
235. Some people like to move about and live in different places. Others like to stay at one place all their lives. Which do you prefer and why? 181
236. Among the following three types of work, which would you enjoy doing the most? • helping children with communication problems • doing community work • growing plants in the garden.. 182
237. Do you agree or disagree with the following statement? Watching sports programs on television is not a good use of time. 182
238. Some people prefer outdoor activities such as basketball. Others prefer indoor activities such as yoga. Which would you prefer and why? 183

239. Many schools require their students to complete at least 40 hours of community service. Do you agree or disagree with this requirement? Use specific details and examples to support your opinion. 183
240. Do you agree or disagree with the following statement? The success of a school largely depends on the resources it has such as textbooks and journals. 184
241. Do you agree or disagree with the following statement? Teachers should encourage students to start using computers from primary school. Give details and examples to support your response. 185
242. Do you agree or disagree that assignments handed in after the deadline should receive a lower score? 186
243. Some people like to collect old things such as newspapers. Others throw things away after they have used them. Which do you prefer and why? 187
244. Some people like to reading paper books while other like to listen to audio books. Which do you prefer and why? 187
245. People should be encouraged to visit science and art museums. Do you agree or disagree? 188
246. If you were to choose a place to live, what kind of location would you prefer and why? • a place close to school • a place close to your family • a place close to a transportation hub (airport or bus terminal, etc.) 188
247. Some people think the best way to study is to attend a lecture. Others say that it's better to read by yourself. Which way do you prefer and why? 189
248. Should employees be required to wear suits in the workplace, or should they wear casual clothes? 189
249. If a foreign tourist visits your city, where would you take this tourist? • a factory • a university • a museum. Give reasons for your answer. 190
250. Between the following two places, where would you choose to live? • a big, new place but far from your workplace and/or university • a small, old place which is near your workplace and/or university. 190
251. Which of the following three subjects would you choose to learn? Math, painting, science. Explain what you want to learn from this subject. 191
252. Do you prefer to use e-mails to communicate with your friends and family members or do you prefer to use the telephone? 192
253. If you are asked by your teacher to do community service, which of the following would you choose? Explain why. • helping children with their homework • teaching adults to use the computer • cleaning city park 192
254. Do you prefer to live in an area that is noisy but close to shops or public transportation, or an area that is quiet but far away from shops and public transportation? 193
255. Instead of printing books in paper version, the university decides to release only online version of textbooks. Do you agree or disagree with this change? 193
256. People are encouraged to use reusable bags and bring their own bags when going shopping, and there will be a fee imposed to plastic bags. Do you agree or disagree with this policy? 194

257. Now teachers tend to assign group assignments instead of individual assignments. Do you agree or disagree with this policy? 195
258. Nowadays students usually take exams in the class, but some universities allow students to take exams at home. Which one do you prefer?..... 196
259. Nowadays, many people tend to move to a new city to work or study. Do you think it is a good idea?..... 196
260. Some schools require students to finish a reading list during school breaks. Do you agree or disagree with this policy?..... 197
261. Many schools do not allow students to take their laptop computers into the classroom. Do you agree or disagree with this policy? 197
262. Some people think students should be allowed to eat in class? Do you agree or disagree with this idea? 198

1. Some people believe that we should not discuss the private activities of the popular people, like movie stars and singers. Do you agree? Why?

Agree: Discussing the private activities of popular individuals, such as movie stars and singers, should be avoided. Firstly, respecting their privacy **fosters a culture of empathy and decency**. Everyone **deserves personal space**, including public figures. Secondly, focusing **on** their private **lives can divert attention from their professional achievements and talents**. For instance, discussing an actor's personal relationships may **overshadow their artistic accomplishments**. **By keeping the spotlight on** their work, we **maintain a healthier** celebrity culture that **promotes their artistic contributions** and **respects their privacy**.

Disagree: I disagree with the notion that we should **refrain from** discussing the private activities of popular people. Firstly, their private lives often **intersect** with their public **personas**, **shaping their image and influencing their fans**. Understanding their personal choices **can provide valuable insights and lessons**. Secondly, **discussing private activities generates public discourse**, **promoting dialogue** and **fostering connections among people**. For example, discussing a singer's **charitable contributions** **can inspire others to engage in philanthropy**. By openly discussing their private activities, we can **foster a sense of community and inspire positive actions**.

2. Some elementary schools are establishing policies that prohibit teachers from giving homework to children, so all assignments are completed during the school day rather than at home after school. Do you agree with such policies?

Agree: I agree with the policies that prohibit teachers from assigning homework to elementary school children. Firstly, it allows children to **have a balanced life** by **dedicating** their after-school time to family, **extracurricular activities**, and relaxation. This **promotes their overall well-being and reduces stress**. Secondly, completing assignments during the school day ensures that students **receive immediate guidance and support** from their teachers, leading to better understanding and learning outcomes. For example, teachers can address misconceptions promptly, **fostering a more effective learning environment**.

Disagree: I disagree with the policies that **eliminate homework** for elementary school children. Firstly, homework **promotes responsibility** and **time management skills**, which are crucial for their **future academic endeavors**. It **instills discipline** and prepares them for higher education. Secondly, homework allows for **independent practice**, **reinforcing the concepts taught** in class. For instance, solving math problems at home **enhances problem-solving abilities**. Moreover, homework encourages parental involvement, as parents can **provide support** and **monitor their child's progress**.

Overall, homework plays a vital role in consolidating learning, fostering skills, and engaging parents in their child's education.

3. Do you agree or disagree with the following statement? Preserving the environment is the responsibility of the government of each country.

Agree: I agree with the statement that preserving the environment is the responsibility of the government of each country. Firstly, governments have the power to enact and enforce environmental regulations and policies that can have a significant impact on conservation efforts. They can implement measures to reduce pollution, protect natural resources, and promote sustainable practices. Secondly, governments can allocate funding and resources towards environmental initiatives such as renewable energy development and conservation programs. For example, they can invest in clean energy infrastructure and establish protected areas. Thus, the government's active involvement is crucial in ensuring the long-term preservation of the environment.

Disagree: I disagree with the statement that preserving the environment is solely the responsibility of the government of each country. While governments play a crucial role, environmental preservation requires collective effort from various stakeholders, including individuals, communities, and organizations. Firstly, individuals can make sustainable choices in their daily lives, such as reducing waste, conserving energy, and supporting eco-friendly practices. Secondly, businesses and organizations can adopt environmentally friendly policies and technologies, minimizing their ecological footprint. For instance, companies can implement recycling programs and invest in green technologies. By acknowledging individual and collective responsibility, we can create a more sustainable and resilient environment.

4. Do you agree or disagree with the following statement? Before taking a job in a particular field, students should get some experience in that field through a part-time job or summer employment.

Agree: I agree with the statement that before taking a job in a particular field, students should gain some experience through a part-time job or summer employment. Firstly, practical experience provides valuable insights into the realities of the field, allowing students to assess their interest and aptitude. It helps them make informed career choices. Secondly, hands-on experience enhances learning by applying theoretical knowledge to real-world situations. For example, working in a marketing department exposes students to marketing strategies and consumer behavior. This practical exposure complements academic learning, equipping students with relevant skills and a competitive edge in their future careers.

Disagree: I disagree with the statement that students should necessarily obtain experience in a field through part-time jobs or summer employment before taking a job in that field. Firstly, some fields may require specialized knowledge or qualifications that cannot be gained through part-time jobs or summer employment alone. For instance, medical professionals need extensive education and training, which cannot be substituted by brief work experiences. Secondly, students may not have the time or opportunity to engage in part-time jobs due to academic commitments or personal circumstances. Instead, internships or practical coursework within their academic programs can offer sufficient exposure to the field, ensuring a smooth transition into their chosen careers.

5. When taking notes during a lecture or meeting, some people prefer to write them by hand on paper. Other people prefer to take notes by typing them on a laptop or other devices. Which one do you prefer? Explain why, using details and examples.

Choice 1: I prefer taking notes by hand on paper during lectures or meetings. Firstly, handwriting allows for a more focused and attentive approach. When writing by hand, I am actively involved in the note-taking process, which helps me better absorb and comprehend the information being presented. Secondly, handwritten notes offer flexibility in customization. I can use arrows, circles, and underlines to emphasize important points. For example, when learning complex equations, I can draw diagrams to illustrate the steps. Handwriting provides a tactile experience that enhances memory retention and personalization.

Choice 2: I prefer taking notes by typing them on a laptop or other devices during lectures or meetings. Firstly, typing enables faster and more efficient note-taking. I can keep up with the speaker's pace and capture a larger amount of information in a shorter time. Secondly, digital notes offer easy organization and accessibility. I can categorize notes into folders, use search functions, and even synchronize them across multiple devices. For instance, when studying for exams, I can quickly search for specific keywords to review related concepts. Typing ensures legibility and convenience for future reference.

Choice 3: I believe that the choice of note-taking method depends on the individual and the situation. Both writing by hand and typing have their merits. Firstly, writing by hand allows for a personal and tactile connection to the material. It can be particularly beneficial for creative brainstorming or when visualizing ideas. Conversely, typing offers efficiency and versatility, especially when dealing with large amounts of information or when note-sharing is necessary. The choice can be based on factors such as the nature of the content, personal preference, and the available resources.

6. Some people prefer to be constantly busy and always have something to do. Others prefer not to be busy all the time but to spend some periods of time doing nothing. Which approach do you think is better? Explain why.

Choice 1: I believe that constantly being busy and always having something to do can be beneficial. Firstly, **staying busy promotes productivity and goal achievement**. It ensures that tasks are completed in a timely manner, maximizing efficiency. Secondly, a busy schedule can provide **a sense of purpose and fulfillment**. For example, when managing multiple projects, **I feel a sense of accomplishment** as I see progress in each endeavor. Being busy keeps me engaged and motivated to continuously strive for success.

Choice 2: I think it is better to have periods of time where one can enjoy doing nothing. Firstly, taking breaks and doing nothing **allows for relaxation and stress reduction**. It provides an opportunity to **recharge both physically and mentally**. Secondly, doing nothing can **foster creativity and problem-solving skills**. For instance, during moments of **idleness**, innovative ideas often arise and solutions to challenges can be found. Allowing time for leisure and unstructured activities **promotes well-being** and **encourages a balanced lifestyle**.

Choice 3: The best approach is to find a balance between being constantly busy and having periods of doing nothing. Firstly, staying busy can lead to productivity and accomplishment, but it's essential to avoid burnout. Taking breaks and doing nothing enables rejuvenation and prevents exhaustion. Secondly, moments of doing nothing allow for introspection and self-discovery. For example, by spending quiet time alone, I can reflect on my goals and aspirations. Balancing busyness and downtime promotes overall well-being and ensures a healthy equilibrium in life.

7. Imagine you have been offered two jobs. One job pays a very high salary but requires you to work very long hours and on weekends. The other job pays a lower salary but does not require you to work outside of regular business hours. Which job would you choose? Explain why.

Choice 1: I would choose the job that pays a very high salary but requires long hours and weekend work. Firstly, the high salary would **provide financial security and opportunities for personal growth**. It can **offer a comfortable lifestyle** and the **ability to meet financial goals**. Secondly, **the demanding work schedule may provide valuable professional experience and career advancement**. For instance, working on weekends can involve high-profile projects or interactions with influential clients. This can enhance my skills and **lead to better job prospects in the future**.

Choice 2: I would choose the job that pays a lower salary but does not require working outside regular business hours. Firstly, **work-life balance is essential for overall well-being**. Having time for personal activities, family, and hobbies **promotes a fulfilling lifestyle**. Secondly, the lower stress level associated with a regular work schedule can **lead to better mental and physical health**. For example, I can **dedicate time to exercise**, engage in social activities, or pursue personal interests. **Prioritizing work-life balance** can result in **long-term happiness and satisfaction**.

Choice 3: The job I choose would depend on my personal priorities and circumstances. If financial stability is a priority, I may opt for the high-paying job despite the long hours and weekend work. This would allow me to achieve my financial goals and secure my future. On the other hand, if work-life balance and personal well-being are my top concerns, I would choose the job with regular business hours, even if it pays a lower salary. This would provide me with more time for family, leisure, and self-care, leading to a healthier and happier lifestyle.

8. When students are reading, some choose the books from the reading list their schools give. Other choose books by themselves. Which do you prefer? Use reasons and examples to explain your opinion.

Choice 1: I prefer choosing books from the reading list provided by schools. Firstly, the reading list is carefully **curated** by educators, ensuring that the **selected books are educational and appropriate for academic development**. It ensures a well-rounded reading experience. Secondly, reading from the school's list **fosters a sense of shared knowledge** among students. For example, class discussions and assignments based on the same books **create a collaborative learning environment**. This **promotes critical thinking** and **facilitates deeper analysis of the literature**.

Choice 2: I prefer choosing books by myself. Firstly, personal choice allows me to **explore my interests and preferences**. It enables me to select books that **resonate with my individual taste, making the reading experience more enjoyable**. Secondly, self-selected books **encourage independent thinking and exploration**. For instance, I can **delve into various** genres or authors, **broadening my knowledge and expanding my horizons** beyond the prescribed reading list. Self-selected books also **promote creativity and personal growth**, as I can **discover unique perspectives and narratives**.

Choice 3: The ideal approach lies in a combination of both options. Firstly, reading books from the school's list ensures exposure to essential literary works and educational material. It provides a solid foundation for academic learning and cultivates critical thinking skills. Secondly, incorporating self-selected books allows for personal exploration and nurturing of individual interests. For example, outside of school, I can choose books that align with my hobbies or areas of curiosity. The combination of prescribed reading and personal choice leads to a well-rounded reading experience that balances academic growth and personal development.

9. Imagine that there is a proposal to lower the age at which a person can get a license to drive a car in your country. Would you agree or disagree with this proposal? Explain why.

Agree: I agree with the proposal to lower the age at which a person can get a license to drive a car in my country. Firstly, it **provides an opportunity for early development** of driving skills and familiarity

with road regulations. Starting at a younger age allows individuals to gain more experience over time, leading to better driving abilities in the long run. Secondly, it promotes independence and convenience for young adults. For example, teenagers can use their driving skills to commute to school or part-time jobs, enhancing their overall efficiency and self-reliance.

Disagree: I disagree with the proposal to lower the age at which a person can get a license to drive a car in my country. Firstly, driving requires maturity and responsibility, which typically come with age and life experiences. Younger individuals may lack the necessary judgment and decision-making skills to navigate complex traffic situations. Secondly, lowering the driving age may increase the risk of accidents and endanger both the young drivers and other road users. For instance, statistics show that inexperienced teenage drivers are more prone to accidents. Therefore, maintaining the current driving age promotes road safety and protects the well-being of all individuals on the road.

10. Some teachers have an informal style and treat their students almost like friends.

Other teachers have a more formal style and keep a professional distance from students. Which teaching style do you think is better for learning? Explain why.

Choice 1: I believe that teachers with an informal style who treat their students almost like friends are better for learning. Firstly, a friendly teacher-student relationship promotes a comfortable and supportive learning environment. It encourages students to ask questions and actively participate in discussions. Secondly, an informal style fosters better communication and understanding between the teacher and students. For example, when students feel at ease with their teacher, they are more likely to seek help or clarification. This enhances their comprehension and overall learning experience.

Choice 2: I think that teachers with a more formal style who maintain professional distance from students are better for learning. Firstly, maintaining a professional boundary ensures objectivity and fairness in assessments and evaluations. It prevents favoritism or bias in the classroom. Secondly, a formal style promotes respect and discipline among students. For instance, students are more likely to adhere to rules and classroom expectations when there is a clear distinction between teacher and friend. This creates a focused learning environment and prepares students for professional settings.

Choice 3: The ideal teaching style combines elements of both informality and formality. Firstly, building a friendly rapport with students establishes trust and a positive classroom atmosphere. This can motivate students and enhance their engagement in the learning process. Secondly, maintaining a professional distance ensures that teachers maintain authority and establish clear boundaries. For example, during assessments or disciplinary situations, a formal approach ensures fairness and impartiality. Striking a balance between informality and formality promotes a supportive yet disciplined learning environment that encourages student growth and achievement.

11. Do you agree or disagree with the following statement? People should always wear fashionable clothes. Please use specific reasons and examples to support your answer.

Agree: I agree with the statement that people should always wear fashionable clothes. Firstly, fashionable clothes can boost one's self-confidence and enhance their personal image. When people feel good about their appearance, it positively impacts their self-esteem and interactions with others. Secondly, fashion is a form of self-expression and creativity. It allows individuals to showcase their unique style and personality. For instance, wearing trendy outfits can make a bold fashion statement and help individuals stand out in a crowd. Fashionable clothes can serve as a means of artistic expression and contribute to a vibrant and diverse society.

Disagree: I disagree with the statement that people should always wear fashionable clothes. Firstly, personal comfort should take precedence over trends. Wearing clothes that align with one's comfort and individual style promotes authenticity and self-acceptance. Secondly, fashion can be subjective and constantly changing, leading to unnecessary pressure and consumerism. For example, following every fashion trend can be expensive and unsustainable for individuals with limited resources. Prioritizing personal style and comfort allows individuals to feel confident and content in their choices, regardless of current fashion trends. It promotes a more inclusive and body-positive society.

12. Many students are asked to evaluate their professors at the end of the semester. Do you think it is a good idea? Why?

Agree: I believe it is a good idea for students to evaluate their professors at the end of the semester. Firstly, student evaluations provide valuable feedback to professors, helping them identify their strengths and areas for improvement. This feedback can contribute to the professional growth and development of educators. Secondly, student evaluations empower students, giving them a voice and a platform to express their opinions and concerns. For example, students can highlight effective teaching methods or suggest adjustments to course content. Evaluations foster a collaborative learning environment and enhance the overall educational experience.

Disagree: I disagree with the idea of students evaluating their professors at the end of the semester. Firstly, students may lack the expertise and knowledge to assess the teaching abilities of their professors accurately. Evaluations can be subjective and influenced by personal biases or individual experiences. Secondly, student evaluations can potentially create an unhealthy power dynamic between students and professors, where students hold undue influence over their instructors' careers. Instead, I believe in fostering open communication and constructive dialogue between students and professors throughout the semester to address concerns and improve the learning experience.

13. Do you agree or disagree with the following statement? We should be completely honest with friends.

Agree: I agree with the statement that we should be completely honest with friends. Firstly, honesty forms the foundation of trust in friendships. Open and transparent communication strengthens the bond and fosters deeper connections. Secondly, honesty promotes personal growth and understanding. Constructive feedback and truthful conversations enable friends to support each other's development. For instance, if a friend is engaging in harmful behavior, being honest about concerns can help them make positive changes. Honesty builds strong, authentic friendships based on mutual trust and support.

Disagree: I disagree with the statement that we should always be completely honest with friends. Firstly, there are situations where honesty can cause unnecessary harm or strain in friendships. Tact and sensitivity should be considered when sharing information that could potentially hurt or damage the relationship. Secondly, being completely honest may not always be necessary or appropriate. White lies or withholding certain information can be justified to protect someone's feelings or maintain harmony in the friendship. Striking a balance between honesty and kindness ensures the preservation of healthy and harmonious friendships.

14. Do you agree or disagree with the following statement? Parents should discourage children from joining some competitive activities like sports.

Agree: I agree with the statement that parents should discourage children from joining some competitive activities like sports. Firstly, excessive focus on competitive activities can put undue pressure on children, leading to stress and burnout. Parents should prioritize their child's well-being and ensure a healthy balance between academics, extracurricular activities, and leisure time. Secondly, participating in non-competitive activities can foster creativity, personal growth, and a well-rounded development. For example, engaging in arts, music, or volunteering allows children to explore their interests, develop new skills, and cultivate a sense of empathy and social responsibility.

Disagree: I disagree with the statement that parents should discourage children from joining competitive activities like sports. Firstly, participating in competitive activities can teach valuable life lessons such as teamwork, resilience, and discipline. It helps children develop a strong work ethic and a healthy sense of ambition. Secondly, competitive activities provide opportunities for personal growth, character building, and skill development. For example, sports can teach valuable lessons about goal setting, time management, and handling success or failure. Encouraging children to engage in competitive activities promotes a well-rounded development and prepares them for challenges they may face in the future.

15. Which one do you agree? Children born with talent should be treated in a different way or they should be treated in the same way as average children.

Agree: I agree that children born with talent should be treated in a different way. Firstly, recognizing and nurturing a child's talent from an early age can help them maximize their potential. Providing specialized resources and opportunities tailored to their talents can accelerate their growth and development. Secondly, tailoring education and support to their specific talents can foster a sense of fulfillment and achievement, leading to increased motivation and dedication. For example, if a child shows exceptional aptitude in music, providing them with advanced music lessons and performance opportunities can help them excel in their passion.

Agree: I agree that children born with talent should be treated in the same way as average children. Firstly, treating all children equally promotes fairness, diversity, and the opportunity for all children to discover their unique abilities and passions. It helps create an inclusive and supportive environment where each child is valued. Secondly, a well-rounded education that encourages the exploration of various interests can lead to personal growth and holistic development. For instance, exposing all children to different subjects and activities allows them to discover their talents and interests organically.

Neutral: The approach to treating children born with talent should depend on the specific circumstances. Firstly, some children may benefit from specialized attention and resources tailored to their talents. This can accelerate their growth and provide opportunities for advanced development. However, treating all children equally also has its merits, as it promotes fairness, diversity, and encourages the exploration of various interests. The best approach may lie in a balance between recognizing and nurturing individual talents while fostering an inclusive environment that values the diverse strengths and abilities of all children.

16. Some students enjoy decorating their surroundings; others choose to keep their surroundings simple and free of any decorations. Which do you prefer and why?

Choice 1: I prefer to decorate my surroundings. Firstly, decorating creates a visually pleasing and personalized environment that reflects my personality and interests. It allows me to express my creativity and make my space unique. Secondly, decorations can enhance my mood and productivity. For example, having vibrant artwork or plants in my surroundings can create a positive and inspiring atmosphere. Decorating my space provides a sense of comfort and ownership, making it a more enjoyable and inviting place to study or relax.

Choice 2: I prefer to keep my surroundings simple and free of decorations. Firstly, a minimalistic and clutter-free environment promotes focus and reduces distractions. It allows me to maintain a clear and organized space, leading to better concentration and productivity. Secondly, simplicity creates a calming atmosphere. For instance, a clean and minimalist desk can help create a sense of serenity and tranquility. Keeping my surroundings simple allows me to create a peaceful and uncluttered space for optimal mental well-being.

Choice 3: The ideal approach lies in a balance between decoration and simplicity. Firstly, adding subtle decorations can enhance the aesthetics of my surroundings without overwhelming the space. It allows me to express my personality while maintaining a clean and organized environment. Secondly, a minimalistic approach promotes a sense of tranquility and reduces visual distractions. For example, having a clean workspace free of excessive decorations can contribute to a focused and calm mindset. Striking a balance between decoration and simplicity ensures a visually pleasing and harmonious environment conducive to productivity and well-being.

17. Some people like participating in performances like theatrical or musical shows.

Others prefer to be in audience watching those plays. Which do you prefer?

Choice 1: I prefer participating in performances like theatrical or musical shows. Firstly, being on stage allows me to **showcase my talent and passion** for the performing arts. It **provides** a platform **for self-expression and creativity**. Secondly, participating in performances **offers a unique sense of accomplishment and personal growth**. For example, the process of rehearsals and working collaboratively with fellow performers **fosters teamwork and discipline**. Being part of the performance **brings a sense of fulfillment and joy**, as I can engage with the audience and **share my talent**.

Choice 2: I prefer being in the audience watching theatrical or musical shows. Firstly, as a member of the audience, I can fully **immerse myself in the performance** and appreciate the talent and **artistry of** the performers. It allows me to **relax and enjoy** the show **without the pressure** of being on stage. Secondly, being in the audience **provides a different perspective** and allows me to **experience a variety of performances**. I can **witness the hard work and dedication** of the performers, inspiring and entertaining me in ways that participating cannot.

Choice 3: The ideal preference depends on personal interests and strengths. Firstly, participating in performances provides an opportunity to showcase individual talent and engage directly with the art form. It allows for personal growth and development within the performing arts. On the other hand, being in the audience offers the chance to appreciate and admire the skills and talents of others. It allows for a more relaxed and enjoyable experience, providing entertainment and inspiration. The choice between participating and being in the audience ultimately depends on one's personal inclination towards self-expression or appreciation of the arts.

18. If a children's museum is going to have an exhibition, which of the following subjects will be the most attractive to children? • Robot technology • Deep sea marine life • Solar system

Choice 1: The most attractive subject for children in a children's museum exhibition would likely be robot technology. Firstly, robots are fascinating and engaging to children as they represent cutting-

edge technology and innovation. Exploring the functionalities and capabilities of robots can captivate their curiosity and imagination. Secondly, interacting with robots provides a hands-on learning experience, allowing children to understand the principles of robotics and even program simple tasks. For instance, children can control robots to perform specific movements or solve puzzles, enhancing their problem-solving and critical thinking skills.

Choice 2: Deep sea marine life would be the most attractive subject for children in a children's museum exhibition. Firstly, the ocean and its mysterious creatures have always **intrigued** children. Learning about deep sea marine life can spark their interest and fascination in exploring the wonders of the underwater world. Secondly, interactive displays and educational activities that showcase marine organisms, such as touch tanks or simulated underwater environments, can provide an immersive experience. For example, children can observe and touch live sea creatures like starfish or experience virtual dives, fostering a sense of wonder and environmental awareness.

Choice 3: The most attractive subject for children in a children's museum exhibition would likely be the solar system. Firstly, the vastness of space and celestial objects captivate children's imagination. Learning about the solar system, planets, and stars can spark curiosity about the universe and our place in it. Secondly, interactive displays and models of planets, meteorites, and space exploration can provide a hands-on experience. For instance, children can touch a piece of a meteorite or simulate launching a rocket, inspiring a sense of wonder and fostering an interest in science and astronomy.

19. Children may be unwilling to learn musical instrument since they need to keep practicing. What should parents do? • Force children to learn musical instrument. • Let children choose whether to learn musical instrument.

Choice 1: Parents should force children to learn a musical instrument. Firstly, learning a musical instrument can **offer numerous benefits**, such as **improved cognitive skills and increased creativity**. By insisting on their child's musical education, parents can help them **develop a new skill and broaden their horizons**. Secondly, children may not **fully understand the long-term benefits of learning an instrument**, so **parental guidance** is crucial. For example, parents can **set a practice schedule** and **provide motivation and encouragement**, ensuring that their child **remains committed** and experiences the rewards of progress.

Choice 2: Parents should let children choose whether to learn a musical instrument. Firstly, forcing children to learn something they are not interested in may **lead to resentment and hinder their enjoyment of the process**. Allowing children to make their own decision empowers them and **fosters a sense of autonomy**. Secondly, when children have the **freedom to choose**, they are more likely to be motivated and dedicated to their musical education. For instance, if a child selects an instrument they are passionate about, they are more likely to **practice willingly** and take ownership of their learning journey.

Choice 3: The ideal approach is a combination of guidance and choice. Firstly, parents can introduce their child to different musical instruments and provide information about their benefits. This helps children make an informed decision based on their interests and preferences. Secondly, parents can encourage their child's musical exploration and provide support throughout the learning process. For example, they can offer resources, lessons, or opportunities to attend music classes or workshops. This approach respects the child's autonomy while providing guidance and resources for a successful musical journey.

20. Do you like to make a plan with friends about social activities in advance or plan it when you attend it?

Choice 1: I prefer making a plan with friends in advance for social activities. Firstly, planning in advance allows for better coordination and ensures that everyone can participate. It helps avoid conflicts and ensures that everyone's schedule aligns. Secondly, advanced planning allows for more options and opportunities to explore different activities. For instance, booking tickets for a concert or reserving a table at a popular restaurant is more feasible with advance planning, enhancing the overall experience.

Choice 2: I prefer planning social activities when I attend them with friends. Firstly, spontaneous plans can add an element of excitement and adventure to social gatherings. It allows for flexibility and the freedom to explore different options in the moment. Secondly, planning in the moment can accommodate last-minute changes or unexpected opportunities. For example, deciding on a spontaneous road trip or trying a newly opened café can lead to memorable experiences that may not have been possible with pre-planned activities.

Choice 3: The ideal approach is a combination of both. Having a general plan in advance provides a framework and ensures that everyone is on the same page. However, leaving room for flexibility and spontaneity during the actual event allows for adaptability and the exploration of unplanned opportunities. This balanced approach allows for the best of both worlds - the benefits of organized planning and the excitement of embracing spontaneous moments.

21. Do you agree or disagree with the following statement? Happiness comes from helping others rather than helping yourself. Use reasons and examples to explain your opinion.

Agree: I agree with the statement that happiness comes from helping others rather than helping yourself. Firstly, helping others fosters a sense of purpose and fulfillment. When we contribute to the well-being of others, we experience a profound sense of joy and satisfaction. Secondly, acts of kindness and altruism strengthen social connections and create a supportive community. For example, volunteering at a local charity or assisting a friend in need not only benefits others but also deepens our relationships and creates a sense of belonging. Ultimately, the happiness derived from

helping others extends beyond personal gratification and promotes a more compassionate and interconnected society.

Disagree: I disagree with the statement that happiness comes exclusively from helping others. Firstly, **self-care and personal well-being** are crucial for overall happiness. **Prioritizing one's own needs** and practicing **self-compassion** allows for emotional balance and **resilience**. Secondly, achieving personal goals and pursuing individual passions can also bring a sense of **fulfillment and contentment**. For example, **engaging in hobbies**, **pursuing career aspirations**, or **investing in personal growth** contribute to our overall happiness and well-being. While helping others is important, a **balanced approach** that includes **self-care and** personal fulfillment is essential for long-term happiness.

Neutral: The pursuit of happiness is multifaceted, and both helping others and helping oneself can contribute to overall well-being. Helping others can bring joy and a sense of purpose, fostering social connections and making a positive impact in the world. However, personal happiness also relies on self-care, self-fulfillment, and pursuing individual goals and passions. Striking a balance between selflessness and self-care allows for a more holistic approach to happiness, where both acts of kindness towards others and personal growth are valued and prioritized.

22. Do you think it's a good idea for university to ask a student to leave school if he was caught cheating in exams?

Agree: I agree that it is a good idea for universities to ask a student to leave school if they are caught cheating in exams. Firstly, **academic integrity** is the foundation of a reputable educational institution, and **cheating undermines the integrity of the academic system**. **Enforcing strict consequences** for cheating sends a clear message that dishonesty is unacceptable and protects the integrity of the institution. Secondly, **severe penalties** act as a deterrent, discouraging students from **engaging in academic dishonesty**. It **promotes a fair and competitive environment** where students are encouraged to **develop genuine knowledge and skills** rather than **resorting to unethical practices**.

Disagree: I disagree that asking a student to leave school is always the best solution for cheating in exams. Firstly, universities should **prioritize educational growth** and **personal development**. Instead of immediately dismissing a student, providing educational interventions such as counseling or academic integrity workshops can **address the root causes of** cheating and help the student learn from their mistakes. Secondly, second chances can allow students to redeem themselves and **develop a sense of responsibility and ethical behavior**. Implementing probationary measures, additional coursework, or community service can serve as alternative consequences that **promote learning and growth** without permanently ending a student's educational journey.

Neutral: The appropriate response to cheating in exams depends on the specific circumstances and institutional policies. While academic dishonesty should not be tolerated, universities should consider a range of disciplinary actions based on the severity of the offense, the student's intent, and their academic record. Some cases may warrant temporary suspension, academic penalties, or mandatory academic integrity courses. It is important for universities to find a balance between

enforcing consequences for cheating and providing opportunities for students to learn from their mistakes and reintegrate into the academic community.

23. When a friend is coming to visit your place, do you prefer a surprise visit or an informed one?

Choice 1: I prefer a surprise visit from a friend. Firstly, a surprise visit adds an element of excitement and spontaneity to the gathering. It allows for a genuine and unfiltered interaction, without any prior expectations or preparations. Secondly, surprise visits can **create lasting memories** and **strengthen the bond between friends**. For example, unexpected visits may lead to impromptu adventures or shared experiences that are cherished for years to come.

Choice 2: I prefer an informed visit from a friend. Firstly, knowing in advance allows me to prepare and **make the necessary arrangements** to **ensure a pleasant and comfortable experience** for both my friend and myself. It gives me the opportunity to **tidy up my place**, **plan activities**, and ensure that I can **dedicate quality time to my friend**. Secondly, **informing each other of the visit avoids any potential inconvenience or scheduling conflicts**, **ensuring that the visit goes smoothly**.

Choice 3: The ideal approach depends on the situation and the relationship with the friend. A surprise visit can be thrilling and bring an element of spontaneity, but it may not always be suitable for everyone or every occasion. Informed visits provide the opportunity to plan and ensure a more organized and enjoyable experience. However, occasional surprise visits can add excitement to the friendship, while informed visits allow for better preparation and mutual convenience. The choice between a surprise visit or an informed one should be based on mutual understanding and consideration for each other's preferences and circumstances.

24. Do you agree or disagree with the following statement? It is easier to teach students in primary school than it is to teach students in university.

Agree: I agree with the statement that it is easier to teach students in primary school than it is to teach students in university. Firstly, primary school students have a foundation of basic knowledge and are generally more receptive to instruction. They are at a stage of their educational journey where they are building fundamental skills and concepts. Secondly, primary school classrooms are typically smaller, allowing for more individualized attention and focused instruction. Teachers can **provide more hands-on guidance** and **closely monitor the progress of each student**, **facilitating effective learning**.

Disagree: I disagree with the statement that it is easier to teach students in primary school than it is to teach students in university. Firstly, university students **possess a higher level of maturity** and **critical thinking abilities**. They are **capable of independent learning** and **can actively engage in complex discussions and research**. Secondly, university classrooms foster a diverse and **intellectually**

stimulating environment. Students bring unique perspectives and experiences, creating opportunities for robust debates and collaborative learning. While teaching at the university level may present challenges, it offers the reward of guiding students in their pursuit of higher education and intellectual growth.

Neutral: The ease of teaching depends on various factors, and comparing primary school and university instruction is subjective. Firstly, primary school teaching requires a focus on foundational skills and concepts, while university teaching involves advanced knowledge and specialized subjects. The complexity of the material and the level of student engagement differ significantly. Secondly, teaching in both settings presents unique challenges and rewards. Primary school teachers nurture young minds and lay the groundwork for future learning, while university professors guide students through higher-level thinking and academic exploration. The ease of teaching is context-dependent, and both primary school and university instruction offer their own set of challenges and rewards.

25. Do you agree or disagree with the following statement? In order to be successful, one has to make enemies.

Agree: I agree with the statement that in order to be successful, one has to make enemies. Firstly, competition can drive individuals to excel and push beyond their limits. Having adversaries can serve as motivation to outperform and achieve success. Secondly, making enemies can signify taking a stand for one's beliefs and principles. Standing up against opposing forces or challenging the status quo can lead to personal growth and accomplishment. For example, historical figures like Mahatma Gandhi or Martin Luther King Jr. faced opposition and made enemies while striving for their visions of justice and equality.

Disagree: I disagree with the statement that one has to make enemies to be successful. Firstly, success can be achieved through collaboration and building positive relationships. Creating a supportive network of allies can open doors to opportunities and provide valuable support. Secondly, fostering a positive and cooperative environment contributes to personal growth and overall success. By nurturing connections, individuals can benefit from shared knowledge, mentorship, and collective achievements. For instance, successful entrepreneurs often emphasize the importance of building strong relationships and partnerships to achieve their goals.

Neutral: The necessity of making enemies for success depends on individual perspectives and circumstances. While some individuals may thrive on competition and find motivation in having adversaries, others may prioritize cooperation and positive relationships. Success can be attained through various approaches, including collaboration, innovation, and personal growth. The emphasis should be on finding the right balance between assertiveness and empathy, working towards one's goals while maintaining ethical principles and treating others with respect. Ultimately, the definition of success and the means to achieve it vary among individuals.

26. Some recent university graduates choose to spend a period of time doing volunteer work of community service before they start their careers. Others think it is better to start working as soon as possible after graduation. Which view do you agree with? Use details and examples to explain your answer.

Choice 1: I agree that recent university graduates should spend a period of time doing volunteer work or community service before starting their careers. Firstly, engaging in volunteer work allows graduates to contribute to society and make a positive impact. It provides an opportunity to give back to the community and address social issues. Secondly, volunteering enhances personal growth and development. It allows graduates to gain new skills, broaden their perspectives, and build empathy. For example, volunteering at a local nonprofit organization can provide valuable experiences in teamwork, leadership, and problem-solving, which are transferable to future careers.

Choice 2: I disagree and believe that recent university graduates should start working as soon as possible after graduation. Firstly, entering the workforce immediately allows graduates to apply their academic knowledge and gain practical experience in their chosen field. It enables them to establish a strong foundation for their careers and seize professional opportunities. Secondly, early employment provides financial stability and independence. Graduates can start earning an income, which can be crucial for paying off student loans or supporting themselves. For example, a graduate who secures a job in their desired field can begin building a professional network and advancing their career trajectory.

Choice 3: The ideal approach lies in finding a balance between volunteering and starting a career. Graduates can consider taking on a part-time job or an internship while dedicating some time to volunteer work. This way, they can gain valuable work experience while also making a positive impact in the community. For instance, a graduate could work part-time in their desired field and allocate weekends or evenings to volunteer at a local organization. This balanced approach allows graduates to contribute to society while also advancing their careers and personal growth.

27. There are several ways you can get to know a country without travelling abroad. Which of the following ways would you like to choose? • Reading books • Watching videos • Joining online communication groups. Choose one and explain why.

Choice 1: I would choose watching videos as a way to get to know a country without traveling abroad. Firstly, videos provide visual and auditory stimulation, allowing for a more immersive experience of the country's sights, sounds, and cultural practices. They offer a dynamic and engaging medium to explore a country's landscapes, landmarks, and traditions. Secondly, videos often include real-life footage and interviews, providing authentic insights into the lives of the country's residents. For example, travel vlogs or documentaries can showcase local customs, cuisine, and daily routines, offering a glimpse into the country's cultural fabric.

Choice 2: I would choose joining online communication groups as a way to get to know a country without traveling abroad. Firstly, online communication groups allow for direct interaction with individuals who are native to the country. Engaging in discussions and exchanging experiences with locals provides firsthand knowledge and a deeper understanding of their culture and perspectives. Secondly, online groups offer the opportunity to ask questions, seek recommendations, and receive personalized insights from people living in the country. For instance, joining a language exchange group can facilitate cultural exchange and language learning while forging meaningful connections with people from the target country.

Choice 3: I would choose reading books as a way to get to know a country without traveling abroad. Firstly, books provide detailed descriptions, historical context, and cultural analysis that offer a comprehensive understanding of a country's traditions, values, and societal dynamics. They provide an opportunity for deep exploration and intellectual engagement. Secondly, books allow readers to delve into the perspectives and experiences of authors from the country, providing a diverse range of voices and narratives. For example, novels, memoirs, and travelogues can transport readers to different regions, capturing the essence of the country and its people through vivid storytelling.

28. You are required to be a volunteer in a school beatification day, which of the following would you like to choose. • planting in campus flowers garden • picking up garbage and collecting the recyclable material • painting natural and outside arts. Give specific reasons to support your answer.

Choice 1: I would choose planting in the campus flower garden as my volunteer activity for the school beautification day. Firstly, planting flowers adds beauty and enhances the aesthetic appeal of the campus. It creates a welcoming environment for students, teachers, and visitors. Secondly, gardening promotes environmental awareness and sustainability. It allows individuals to connect with nature, learn about different plant species, and contribute to the preservation of the ecosystem. For example, planting native flowers can attract pollinators and support local biodiversity. Additionally, gardening provides a hands-on learning experience that fosters teamwork and cultivates a sense of responsibility towards the environment.

Choice 2: I would choose picking up garbage and collecting recyclable material as my volunteer activity for the school beautification day. Firstly, cleaning up the school grounds improves hygiene and safety for everyone. It creates a clean and pleasant environment for learning. Secondly, collecting recyclable materials promotes environmental sustainability and raises awareness about waste management. By separating recyclables, we reduce the amount of waste that ends up in landfills. For instance, organizing a recycling drive encourages students to adopt eco-friendly practices and develop a sense of environmental responsibility.

Choice 3: I would choose painting natural and outside arts as my volunteer activity for the school beautification day. Firstly, painting natural and outside arts adds creativity and visual appeal to the school environment. It transforms dull spaces into vibrant showcases of artistic expression. Secondly, engaging in art promotes imagination and self-expression among students. Painting murals or outdoor artworks can foster a sense of pride and ownership in the school community. For example, a mural depicting local landmarks or nature scenes can inspire a sense of connection and appreciation for the surrounding environment.

29. Do you agree or disagree that important business meetings should be held in person rather than use technology such as video conference call. Give specific reasons to support your answer.

Agree: I agree that important business meetings should be held in person rather than using technology such as video conference calls. Firstly, face-to-face meetings foster better communication and understanding. Non-verbal cues, such as body language and facial expressions, play a crucial role in conveying meaning and building rapport. This can prevent misunderstandings and facilitate effective decision-making. Secondly, in-person meetings allow for spontaneous interactions and networking opportunities. Informal conversations before or after meetings can lead to valuable connections and insights. For example, chance encounters during breaks can spark innovative ideas or collaborations.

Disagree: I disagree with the notion that important business meetings should always be held in person. Firstly, technology enables global connectivity and collaboration. Video conference calls provide a convenient and cost-effective way to conduct meetings with participants located in different regions. This saves time and resources associated with travel. Secondly, advancements in video conferencing technology, such as high-definition video and real-time document sharing, provide a seamless virtual meeting experience. For instance, screen sharing capabilities allow for effective presentations and collaboration, regardless of physical distance. Virtual meetings can be equally productive and efficient in addressing important business matters.

Neutral: The choice between in-person meetings and technology-based meetings depends on various factors. Firstly, the nature and purpose of the meeting play a role. While face-to-face interactions may be beneficial for relationship-building or negotiations, technology can be suitable for routine updates or quick discussions. Secondly, logistical considerations, such as travel costs and time constraints, should be taken into account. Ultimately, the decision should be based on the specific circumstances, the importance of personal interactions, and the available resources. A hybrid approach that combines both in-person and virtual meetings may offer the flexibility to meet diverse business needs.

30. Do you agree or disagree with the following statement? People perform better when they are under some stress or pressure. The theory is that when people are under stress, they tend to have a clearer motivation about their goals. Use details and examples to explain your answer.

Agree: I agree with the statement that people perform better when they are under some stress or pressure. Firstly, stress can act as a motivator, pushing individuals to strive for excellence and achieve their goals. When faced with deadlines or challenges, people often exhibit heightened focus and determination to overcome obstacles. Secondly, stress can enhance cognitive function and problem-solving abilities. It sharpens concentration and increases mental alertness, leading to improved performance. For example, athletes often perform at their best during high-pressure competitions, as the stress and adrenaline drive them to exceed their limits and achieve outstanding results.

Disagree: I disagree with the notion that people perform better when under stress or pressure. Firstly, excessive stress can lead to decreased productivity and burnout. It can impair decision-making abilities and hinder creative thinking. Secondly, stress can negatively impact physical and mental well-being, causing anxiety and health problems. For instance, prolonged stress can result in decreased sleep quality, which further affects performance. Instead, a balanced and supportive environment promotes better performance by fostering a sense of well-being, allowing individuals to focus and perform at their best without excessive stress.

Neutral: The relationship between stress and performance is complex and can vary among individuals. While some people thrive under pressure and achieve higher performance, others may experience a decline in productivity and well-being. The optimal level of stress differs for each person and depends on various factors such as personality, coping mechanisms, and the nature of the task. It is important to recognize individual differences and implement strategies that promote a healthy balance between challenge and support. This may include providing resources, fostering a positive work environment, and offering stress-management techniques to help individuals perform at their best.

31. If the government has a large sum of money, which area would suggest the government invest to? • Space exploration • Education • Health care

Choice 1: I would suggest that the government invest a large sum of money in education. Education is the foundation of a prosperous society and has a far-reaching impact on individuals and communities. Firstly, investing in education improves the quality of teaching and learning, leading to a well-educated and skilled workforce. This, in turn, drives economic growth and innovation. Secondly, increased funding can enhance access to education for underprivileged communities, promoting social equality and reducing disparities. For example, the government could allocate

funds to build schools in remote areas or provide scholarships for disadvantaged students, ensuring equal educational opportunities for all.

Choice 2: I would suggest that the government invest a large sum of money in health care. A robust and accessible health care system is crucial for the well-being and productivity of a nation. Firstly, increased investment can improve medical infrastructure, ensuring that people have access to high-quality health services. This includes the construction of hospitals, clinics, and medical research facilities. Secondly, investing in health care can lead to better disease prevention and management, reducing the burden on individuals and society. For instance, funding could be allocated to public health programs, vaccination campaigns, and medical research to address pressing health challenges.

Choice 3: I would suggest that the government invest a large sum of money in space exploration. While education and health care are vital, space exploration offers unique benefits. Firstly, investing in space exploration drives scientific research and technological advancements, leading to innovations with far-reaching applications. It fosters a spirit of discovery and pushes the boundaries of human knowledge. Secondly, space exploration inspires future generations, igniting interest in STEM fields and encouraging young minds to pursue careers in science and engineering. For example, the government's investment in space missions can fuel interest in space sciences, resulting in new breakthroughs and economic opportunities.

32. The school decided to cancel the long summer vacation. So students have to attend school all year with some short breaks during holidays. Do you agree or disagree? Please explain the reasons.

Disagree: I disagree with the decision to cancel the long summer vacation and have students attend school all year with short breaks during holidays. Firstly, the long summer vacation provides students with an opportunity to relax, rejuvenate, and pursue other interests outside of academics. It is a time for them to engage in recreational activities, spend quality time with family, and explore personal hobbies. Secondly, the summer break allows students to experience new environments and cultures through travel, enhancing their overall learning and development. For example, traveling during the summer break exposes students to diverse perspectives and broadens their horizons. Moreover, the break provides teachers with valuable time for professional development and curriculum planning.

Agree: I agree with the decision to cancel the long summer vacation and have students attend school all year with short breaks during holidays. Firstly, this new schedule ensures a consistent and uninterrupted learning process. Students can maintain their academic momentum without experiencing a significant learning gap during the long break. Secondly, the continuous learning approach helps students retain knowledge and build upon it gradually, leading to better academic performance and long-term retention. For example, shorter breaks throughout the year allow for

regular reinforcement of concepts and prevent the loss of knowledge over an extended period. Additionally, this schedule provides an opportunity to cover more curriculum content, enabling students to delve deeper into subjects and explore additional topics.

Neutral: The decision to cancel the long summer vacation and have students attend school all year with short breaks during holidays has both advantages and disadvantages. On one hand, the continuous learning approach allows for consistent academic progress and reduces the need for extensive review after long breaks. It can also facilitate better time management skills and discipline among students. On the other hand, the long summer vacation provides an important period of rest and relaxation, allowing students to recharge and pursue other interests. Additionally, the long break offers valuable opportunities for experiential learning through internships, community service, or personal projects. The optimal solution may be a balanced approach that incorporates shorter breaks throughout the year while preserving a portion of the summer break for leisure and enrichment activities.

33. When people acquire a new electronic device, such as a camera or a computer, they may be unsure of how it works. Some people prefer to read the directions to understand how it works. Other people prefer to experiment with the device, to try to figure it out on their own. Which do you prefer and why?

Choice 1: I prefer to read the directions to understand how a new electronic device works. Firstly, reading the directions provides a structured and systematic approach to learning about the device's features and functionalities. It ensures that I don't miss any important details or steps. Secondly, the directions often contain helpful tips and troubleshooting information, which can save time and prevent potential errors. For example, when I got a new computer, reading the manual helped me set up the software correctly and understand the various customization options available.

Choice 2: I prefer to experiment with the device and try to figure it out on my own. Firstly, hands-on exploration allows me to learn through active engagement and discovery. It encourages a sense of curiosity and experimentation, leading to a deeper understanding of the device's capabilities. Secondly, experimenting promotes problem-solving skills and adaptability. It encourages me to think critically and creatively when faced with challenges. For instance, when I got a new camera, experimenting with different settings and shooting modes helped me develop my photography skills and find the best techniques that suited my style.

Choice 3: I prefer a combination of reading the directions and experimenting with the device. Firstly, reading the directions provides a foundation of knowledge and understanding, giving me a solid starting point. It helps me grasp the basic functions and operation of the device. Secondly, experimenting allows me to apply what I have learned from the directions and explore additional features or customization options. This hands-on approach enhances my practical

understanding and builds confidence. For example, after reading the directions for a new computer, I experiment with different software applications and settings to tailor it to my specific needs and preferences.

34. The school needs to cut club subsidies. Which of the following clubs do you think should be cut in subsidies? • sports club • academic club • skiing club

Choice 1: I think the skiing club should be cut in subsidies. While skiing is a recreational activity, it is not directly tied to the academic curriculum. Allocating subsidies to academic and sports clubs can better support students' holistic development and educational pursuits. Additionally, skiing can be an expensive activity that requires specialized equipment and facilities, making it less accessible to a wider range of students. By redirecting the subsidies to academic and sports clubs, the school can promote a more inclusive and well-rounded extracurricular program.

Choice 2: I think the academic club should be cut in subsidies. While academic clubs play a crucial role in fostering intellectual growth and knowledge exchange, they often have other funding sources such as fundraising or participation fees. By reducing subsidies to the academic club, the school can allocate resources to sports clubs that promote physical health, teamwork, and competition. Supporting sports clubs also encourages a balanced lifestyle and helps students develop essential life skills such as discipline, resilience, and leadership.

Choice 3: I think the sports club should be cut in subsidies. While sports play a vital role in promoting physical health and team spirit, they often have alternative funding sources such as sponsorships or fundraising efforts. Academic clubs, on the other hand, provide opportunities for intellectual exploration and academic growth. By maintaining subsidies for academic clubs, the school can support students' pursuit of knowledge and academic excellence. Academic clubs also contribute to the overall educational experience and prepare students for future academic and professional endeavors.

35. Some countries have approved “homeschool” as part of education. Do you agree or disagree with this policy?

Choice 1: I agree with the policy of approving homeschooling as part of education. Homeschooling offers flexibility and personalized learning opportunities for students. Firstly, it allows students to learn at their own pace, catering to their individual strengths and needs. This personalized approach can lead to improved academic performance and a deeper understanding of concepts. Secondly, homeschooling provides a supportive learning environment free from distractions or negative influences that may exist in traditional school settings. For example, students who face social anxiety or bullying can benefit from homeschooling, ensuring their emotional well-being while receiving quality education.

Choice 2: I disagree with the policy of approving homeschooling as part of education. Traditional schools provide a structured and comprehensive learning environment that fosters social interaction, collaboration, and diverse perspectives. Firstly, attending school exposes students to a wider range of subjects and disciplines taught by specialized teachers. This promotes a well-rounded education that homeschooling may not always offer. Secondly, the school setting cultivates social skills, teamwork, and cultural diversity through interactions with peers from different backgrounds. These interpersonal skills are vital for personal and professional success in the future.

Choice 3: I am neutral regarding the policy of approving homeschooling as part of education. Homeschooling can be beneficial for some families and students who have specific needs or circumstances. However, it is important to ensure that homeschooled students receive a high-quality education that aligns with national standards. Adequate monitoring and assessment mechanisms should be in place to guarantee the educational outcomes and well-being of homeschooled students. Additionally, opportunities for socialization and extracurricular activities should be provided to ensure a holistic educational experience for homeschooled students.

36. Professors shouldn't allow students to record class lectures. Do you agree or disagree with this policy?

Choice 1: I agree with the policy of not allowing students to record class lectures. Firstly, recording lectures can be a distraction to both the students recording and those around them. It may disrupt the flow of the class and hinder the engagement of students. Secondly, it can discourage active participation and note-taking, as students may rely solely on the recorded material instead of engaging with the content in real-time. This can hinder their understanding and retention of the material. Additionally, professors may have concerns about the potential misuse or sharing of recorded lectures without proper authorization.

Choice 2: I disagree with the policy of not allowing students to record class lectures. Firstly, recording lectures can be beneficial for students who may miss certain parts of the lecture due to various reasons, such as illness or overlapping schedules. It allows them to review the content at their own pace and ensure they don't miss any important information. Secondly, recorded lectures serve as valuable study resources that students can revisit during exam preparation or for further understanding of complex topics. It promotes self-directed learning and provides an additional avenue for students to reinforce their learning.

Choice 3: I am neutral regarding the policy of allowing students to record class lectures. While there are potential benefits to recording lectures, such as flexibility in reviewing content and accommodating diverse learning styles, there are also concerns to consider. Professors may have valid reasons for not allowing recording, such as protecting intellectual property or maintaining the integrity of the classroom environment. It is important to strike a balance between the benefits and drawbacks, and consider alternative methods to provide students with comprehensive resources,

such as providing detailed lecture notes or making lecture recordings available through official channels.

37. Do you agree or disagree with the following statement? The purpose of art is to guide our life.

Choice 1: I agree with the statement that the purpose of art is to guide our life. Art has the power to inspire, **provoke thought, and evoke emotions**. Firstly, art can provide us with **insights and perspectives on various aspects of life**, helping us **navigate and make sense of the world around us**. It can challenge our assumptions, **broaden our horizons**, and **stimulate personal growth**. Secondly, art often explores universal themes and experiences, allowing us to connect with the shared human condition and find meaning and purpose in our own lives. For example, a **thought-provoking painting** or a **moving piece of music** can inspire **introspection** and **guide us towards self-reflection and personal transformation**.

Choice 2: I disagree with the statement that the purpose of art is to guide our life. While art can be **influential and thought-provoking**, its purpose is subjective and **multifaceted**. Firstly, art **serves as** a means of **self-expression and creativity** for artists, allowing them to share their unique perspectives and emotions with the world. Secondly, art can be appreciated for its aesthetic value, **bringing beauty and enjoyment to our lives**. It can also **serve as** a form of **entertainment and escapism**, providing a **temporary respite from the complexities and challenges of life**. Therefore, the purpose of art extends beyond solely guiding our life and encompasses **various aspects of** human experience.

Choice 3: I am neutral regarding the statement that the purpose of art is to guide our life. The purpose and interpretation of art are subjective and can vary among individuals. While art has the potential to inspire and provide guidance, its impact and significance in our lives are subjective and dependent on personal experiences and perspectives. For some, art may indeed guide their life by offering insight and inspiration, while for others, it may serve as a source of enjoyment, entertainment, or introspection. The purpose of art is diverse and can encompass a wide range of meanings and experiences.

38. Do you agree or disagree with the following statement? Good luck is as important as hard work for a person's success.

Choice 1: I agree with the statement that good luck is as important as hard work for a person's success. While **hard work and dedication** are crucial factors in achieving success, luck can play a **significant role in opening doors of opportunity and favorable circumstances**. Firstly, luck can provide unexpected opportunities and favorable outcomes that can accelerate one's progress towards success. It can **present chance encounters, fortuitous events**, or being at the **right place at the right time**. Secondly, luck can influence external factors beyond one's control, such as market conditions, economic trends, or social dynamics, which can **impact the likelihood of success**. Therefore, a combination of hard work and good luck can maximize **one's chances of achieving success**.

Choice 2: I disagree with the statement that good luck is as important as hard work for a person's success. While luck can indeed play a role in certain instances, **sustained success is primarily driven by hard work, dedication, and perseverance**. Firstly, **hard work enables individuals to develop skills, knowledge, and expertise in their chosen field**, which are **crucial foundations for long-term success**. Secondly, **consistent effort and determination contribute to overcoming challenges, learning from failures, and continuously improving oneself**. Luck may provide temporary advantages, but without the foundation of hard work, it is difficult to **sustain success in the long run**. Therefore, hard work remains the primary driver of success, with luck being more of an occasional bonus.

Choice 3: I am neutral regarding the statement that good luck is as important as hard work for a person's success. The significance of luck and hard work in determining success can vary depending on the context and individual experiences. While hard work is generally recognized as a fundamental factor in achieving success, luck can introduce unexpected opportunities or favorable outcomes that can significantly impact one's journey. However, it is essential to note that hard work provides the foundation and perseverance needed to seize and capitalize on such opportunities. The interplay between luck and hard work is complex and can differ for each individual and situation.

39. Some professors prefer to answer students' questions at the end of the lecture, and others stop at different points to answer students' questions. Which style do you think is better for learning?

Choice 1: I believe that professors who stop at different points to answer students' questions are better for learning. This style promotes active engagement and immediate clarification of doubts or confusion. Firstly, addressing questions in real-time allows students to deepen their understanding of the material and connect concepts as they arise. It enhances their ability to follow the lecture and participate actively. Secondly, timely question-and-answer sessions create an interactive and dynamic learning environment, fostering student engagement and curiosity. For example, students can seek clarification on complex topics, leading to a more comprehensive understanding of the subject matter.

Choice 2: I believe that professors who answer students' questions at the end of the lecture are better for learning. This style ensures the uninterrupted flow of information and allows students to grasp the entire lecture content before seeking clarification. Firstly, by addressing questions at the end, professors can cover the planned material without disruptions, ensuring the delivery of a coherent and organized lecture. This enables students to follow the logical progression of the content. Secondly, a designated Q&A session at the end provides an opportunity for students to reflect on the lecture as a whole and consolidate their understanding. They can ask comprehensive questions that encompass multiple aspects discussed during the lecture.

Choice 3: I am neutral regarding the style of professors answering students' questions. Both approaches have their merits depending on the nature of the lecture and the learning preferences of students. Some students may prefer immediate clarification, while others may benefit from a cumulative Q&A session at the end. Ultimately, the effectiveness of either style depends on the professor's teaching style, the complexity of the subject matter, and the dynamics of the specific classroom environment. It is essential for professors to assess their students' needs and adapt their approach accordingly to create an optimal learning experience.

40. Do you agree or disagree with the following statement? The government should spend money on projects that can encourage citizens to lead a healthier lifestyle. Please give your opinion and explanation.

Choice 1: I agree with the statement that the government should spend money on projects that can encourage citizens to lead a healthier lifestyle. Firstly, investing in initiatives such as promoting physical activity, improving access to nutritious food, and raising awareness about the importance of health can lead to reduced healthcare costs in the long run. It can help prevent chronic diseases and improve overall population health. Secondly, government-funded projects can provide resources, facilities, and educational programs that empower individuals to make healthier choices and adopt sustainable lifestyle habits. For example, building public parks, organizing health campaigns, and subsidizing gym memberships can create a supportive environment for citizens to prioritize their well-being.

Choice 2: I disagree with the statement that the government should spend money on projects that can encourage citizens to lead a healthier lifestyle. While health promotion is important, it is primarily an individual responsibility. Allocating government funds to such projects may divert resources from other critical areas like education, infrastructure, or social welfare. Personal health choices should be driven by personal motivation, and citizens should take ownership of their own well-being. Rather than relying on government initiatives, individuals can seek out existing resources and adopt healthy behaviors through self-motivation and access to accurate health information.

Choice 3: I am neutral regarding the statement that the government should spend money on projects that can encourage citizens to lead a healthier lifestyle. While health promotion is a worthy goal, the allocation of government funds should be carefully evaluated in light of competing priorities. While government-funded initiatives can have a positive impact on public health, it is important to consider the effectiveness, efficiency, and long-term sustainability of such projects. Additionally, individuals have a personal responsibility for their health, and a balanced approach that combines individual accountability and targeted government interventions may be the most effective in promoting a healthier lifestyle for citizens.

41. Some people believe that we should not discuss the private activities of the popular people, like movie stars and singers. Do you agree? Why?

Choice 1: I agree that we should not discuss the private activities of popular people like movie stars and singers. Respecting their privacy is essential for maintaining their personal space and allowing them to have a life outside of their public image. Firstly, celebrities deserve the right to privacy just like any other individual. Constant scrutiny and intrusion into their personal lives can lead to stress, mental health issues, and a loss of personal freedom. Secondly, focusing on their private activities detracts from their professional accomplishments and talents, diverting attention from their work and creative contributions.

Choice 2: I disagree that we should not discuss the private activities of popular people like movie stars and singers. Public figures, by their nature, are subject to public interest and scrutiny. Understanding their personal lives can provide insight into their character and influence on society. Firstly, public figures often use their platform to advocate for certain causes, and their private activities may align or contradict their public persona. It is important for the public to have access to this information to make informed judgments and decisions. Secondly, discussing the private activities of popular people can foster conversations about social issues, values, and societal norms.

Choice 3: I am neutral regarding the discussion of private activities of popular people. While there can be valid arguments for both privacy and public interest, the extent and nature of such discussions should be determined by ethical considerations and respect for personal boundaries. It is essential to strike a balance between the public's right to information and the individual's right to privacy. Celebrity status does not negate the need for personal space and respect, but transparency and accountability can also be important in certain circumstances. The context and relevance of private activities should be carefully evaluated before engaging in public discourse.

42. You live in a crowded city with only one green space-the city park. The government recently proposes to build a housing complex on this only green space. Do you think this is a good idea?

Choice 1: I think building a housing complex on the city park is not a good idea. The city park serves as the only green space in a crowded city, providing numerous benefits to its residents. Firstly, green spaces have a positive impact on mental and physical well-being, offering a peaceful retreat from the urban hustle and bustle. They provide opportunities for recreation, exercise, and relaxation, which are crucial for maintaining a healthy lifestyle. Secondly, the city park contributes to the overall aesthetic appeal of the city, enhancing its beauty and creating a sense of harmony in the urban environment. Removing the park for housing development would result in the loss of these valuable benefits.

Choice 2: I think building a housing complex on the city park is a good idea. The city's growing population necessitates the need for additional housing, and utilizing the city park for this purpose can address the housing shortage. Firstly, providing more housing options can improve affordability and accessibility for residents, allowing them to live closer to their workplaces and amenities. It can contribute to the city's economic growth and development. Secondly, the housing complex can incorporate green spaces within its design, such as rooftop gardens or communal gardens, ensuring the preservation of some green elements while meeting housing demands. This way, residents can still have access to green spaces, although in a different form.

Choice 3: I am neutral regarding the proposal to build a housing complex on the city park. It is important to consider the needs and priorities of the city's residents, as well as the potential impact on the environment and quality of life. A comprehensive evaluation should be conducted, considering alternative solutions and potential compromises. This may involve exploring options to increase housing availability while preserving green spaces, such as redeveloping underutilized areas or identifying alternative locations for the housing complex. The decision should aim to strike a balance between meeting housing needs and preserving the city's natural environment and recreational spaces.

43. Which one of the following fields would you like to donate your money to? • community charity • environment protection • animal rescue Explain your reasons with examples and details.

Choice 1: I would like to donate my money to community charity. Supporting community charity organizations allows me to make a direct impact on the well-being of individuals in need within my local community. Firstly, community charities often focus on providing essential services such as food, shelter, healthcare, and education to underprivileged individuals and families. By donating to these organizations, I can help address immediate needs and improve the quality of life for those facing hardship. For example, my donation could provide meals for homeless individuals or support educational programs for disadvantaged children. Secondly, community charity initiatives foster a sense of unity and social cohesion within the community, promoting inclusivity and compassion among its members. By contributing to community-driven initiatives, I can help build a stronger and more supportive community environment.

Choice 2: I would like to donate my money to environment protection. Preserving our environment is crucial for the well-being of current and future generations. Firstly, donating to environmental organizations can support initiatives that aim to conserve natural resources, protect wildlife habitats, and combat climate change. By investing in sustainable practices, reforestation efforts, or renewable energy projects, I can contribute to creating a healthier and more sustainable planet. For example, my donation could help fund the protection of endangered species or the restoration of ecosystems affected by human activities. Secondly, environmental protection initiatives have far-reaching benefits, including clean air and water, mitigating natural disasters, and ensuring the long-term survival of our planet and its diverse ecosystems.

Choice 3: I would like to donate my money to animal rescue organizations. Animals play a significant role in our ecosystems and deserve our care and protection. Firstly, supporting animal rescue organizations helps provide medical care, shelter, and rehabilitation for abused, neglected, or injured animals. By donating, I can contribute to the rescue and adoption of animals, giving them a second chance at life and promoting animal welfare. For example, my donation could help fund veterinary services or support educational programs to raise awareness about responsible pet ownership. Secondly, animal rescue initiatives contribute to creating a compassionate society that values the well-being of all living creatures. By supporting animal rescue efforts, I can contribute to building a world where animals are treated with kindness and respect.

44. Some people prefer to spend lots of money on vacation. Some people would spend little money on vacation. Which do you prefer and why?

Choice 1: I prefer to spend lots of money on vacation. Traveling is an enriching experience that allows me to explore new cultures, broaden my horizons, and create lasting memories. Firstly, by spending more money on vacation, I can afford to stay at comfortable accommodations, indulge in local cuisine, and participate in various activities and excursions. This enhances the overall quality of my travel experience and allows me to fully immerse myself in the destination. For example, I can visit iconic landmarks, try adventurous activities, or attend cultural events that require a higher budget. Secondly, spending more money on vacation enables me to prioritize relaxation and luxury, ensuring a rejuvenating and stress-free break from my daily routine.

Choice 2: I prefer to spend little money on vacation. Traveling on a budget allows me to explore and appreciate the world while being mindful of my financial resources. Firstly, by spending less money on vacation, I can discover affordable destinations and accommodation options that still offer unique experiences and cultural insights. This allows me to make the most of my limited budget and stretch my travel funds. For example, I can explore local markets, try street food, or engage in free or low-cost activities such as hiking or visiting public parks. Secondly, traveling on a budget promotes resourcefulness and encourages me to prioritize experiences over material possessions, fostering a deeper connection with the local community and cultural authenticity.

Choice 3: I am open to both spending lots of money and spending little money on vacation, depending on the circumstances and my personal preferences at the time. Each approach to vacation spending has its merits and can lead to fulfilling experiences. It is important to strike a balance between financial considerations and the desire for exploration and relaxation. By being flexible and adaptable, I can tailor my vacation experiences to suit my current financial situation and prioritize the aspects of travel that bring me the most joy and fulfillment.

45. In a workplace, should the employer constantly supervise the employees or is it better that the employer only checks the employees occasionally? Please include specific reasons and details in your response.

Choice 1: I believe that the employer should constantly supervise the employees in a workplace. Continuous supervision ensures that employees stay on track, maintain productivity, and adhere to company policies. Firstly, constant supervision allows for immediate feedback, enabling employees to address mistakes promptly and make necessary improvements. For example, if a task is not being performed correctly, immediate supervision can help identify and rectify the issue before it escalates. Secondly, constant supervision ensures consistency in work quality and prevents deviation from established standards, enhancing overall efficiency and maintaining a high level of professionalism.

Choice 2: I believe that it is better for the employer to check the employees occasionally rather than constantly supervising them. Occasional checks promote trust, autonomy, and employee growth. Firstly, occasional checks allow employees to demonstrate their skills and abilities independently, fostering creativity and innovation. For example, if employees are trusted to handle their tasks without constant supervision, they may come up with more efficient and effective solutions. Secondly, occasional checks respect employees' expertise and time management skills, resulting in increased job satisfaction and motivation. When employees have autonomy over their work, they can better manage their workload and prioritize tasks based on their strengths.

Choice 3: I believe that the optimal approach lies between constant supervision and occasional checks. Employers should establish regular check-ins and feedback sessions to maintain productivity and support employee growth. Periodic check-ins provide an opportunity for employees to discuss their progress, seek guidance, and receive constructive feedback. For example, regular one-on-one meetings can help address any challenges or concerns and align employees' work with organizational goals. This approach ensures accountability, maintains a supportive work environment, and allows employees to take ownership of their tasks while receiving necessary support and guidance.

46. Which would you prefer: start a project as early as possible or wait until the deadline?

Choice 1: I prefer to start a project as early as possible. Starting early allows for better time management and reduces stress. Firstly, it provides ample time for planning, research, and organizing resources. This results in a more thorough and well-structured project. Secondly, starting early allows for flexibility and the opportunity to seek feedback and make improvements. For example, I can review my work and make revisions if necessary. Early starts also ensure sufficient time for unforeseen circumstances, such as technical issues or unexpected delays.

Choice 2: I prefer to wait until the deadline to start a project. Waiting until the deadline can be motivating. Firstly, the impending deadline creates a sense of urgency that helps me focus and prioritize the task. This often leads to increased productivity and efficiency. Secondly, waiting until the deadline allows me to utilize my time on other important tasks or projects. For instance, I can dedicate my attention to other ongoing responsibilities before giving full attention to the project. The pressure of the deadline also helps me concentrate and deliver high-quality work.

Choice 3: I believe the best approach lies between starting a project as early as possible and waiting until the deadline. This approach allows for a balance between preparation and efficiency. Starting early provides benefits such as thorough planning and room for adjustments, ensuring a high-quality outcome. However, waiting until the deadline can serve as a motivator, pushing me to work efficiently and make quick decisions. Striking a balance ensures sufficient time for quality work while utilizing the sense of urgency to maintain productivity.

47. Some parents think they should protect students from making mistakes. Some think they should let them make mistakes. What do you think?

Choice 1: I believe parents should protect students from making mistakes. Firstly, parents have the responsibility to ensure their children's safety and well-being. By shielding them from potentially harmful mistakes, parents can provide a secure environment for their growth. Secondly, protecting students from mistakes can prevent negative consequences that may hinder their future opportunities. For example, parents can guide their children to make informed decisions and avoid detrimental actions. This approach helps foster a sense of security and confidence in children, enabling them to navigate life with greater ease.

Choice 2: I believe parents should let students make mistakes. Making mistakes is an essential part of learning and personal growth. Firstly, experiencing failures and setbacks allows students to develop resilience and problem-solving skills. By facing the consequences of their actions, they gain valuable insights and learn to adapt and improve. Secondly, making mistakes teaches students responsibility and accountability. They learn to take ownership of their choices and understand the impact of their decisions. For instance, a child who learns from their mistakes develops a sense of self-awareness and becomes better equipped to make wise choices in the future.

Choice 3: I believe a balanced approach is necessary when it comes to protecting students from making mistakes. While parents should offer guidance and support, they should also allow their children to learn from their own experiences. This approach fosters a safe and nurturing environment while encouraging personal growth and self-discovery. Parents can strike a balance by providing guidance and setting boundaries, allowing their children to explore within reasonable limits. This approach promotes autonomy and resilience, ensuring that students learn from their mistakes while receiving the necessary support.

48. Do you agree or disagree? Children should listen or read news at an early age.

Choice 1: I agree that children should listen or read news at an early age. Firstly, staying informed about current events helps children develop a broader understanding of the world around them. It exposes them to diverse perspectives, cultures, and global issues, promoting their intellectual growth. Secondly, early exposure to news cultivates critical thinking skills and encourages active engagement with the world. Children learn to analyze information, question assumptions, and form their own opinions. For example, discussing news stories with parents or classmates can enhance their communication and reasoning abilities.

Choice 2: I disagree that children should listen or read news at an early age. Firstly, news content can be complex and overwhelming for young children, potentially causing confusion or anxiety. Shielding them from certain news topics allows them to maintain their innocence and emotional well-being. Secondly, children's primary focus should be on age-appropriate learning and development, such as acquiring foundational academic skills and socializing with peers. Introducing news too early may divert their attention from essential developmental milestones.

Choice 3: I believe the appropriateness of children listening or reading news depends on their age and maturity level. Parents should carefully select age-appropriate news sources and facilitate discussions that suit their child's cognitive abilities. Gradually introducing news can help children develop an awareness of the world while ensuring their emotional well-being. Parental involvement is crucial in providing context, addressing questions, and helping children process the information. By adapting news exposure to each child's developmental stage, parents can strike a balance between knowledge acquisition and emotional readiness.

49. Some people think they should learn math at school while others think they should learn math at work. Which do you prefer?

Choice 1: I prefer learning math at school. Firstly, school provides a structured and comprehensive curriculum that covers various mathematical concepts and builds a strong foundation. Teachers can guide students through step-by-step learning and provide necessary support and explanations. Secondly, learning math at school allows for collaborative learning and peer interaction. Students can engage in group activities, discussions, and problem-solving tasks, fostering a deeper understanding of mathematical principles. For instance, working on math problems with classmates enhances critical thinking and communication skills.

Choice 2: I prefer learning math at work. Firstly, learning math in a work setting provides practical applications and real-world context. Employees can directly apply mathematical concepts to their job tasks, enhancing their problem-solving abilities. Secondly, work-based learning allows for hands-on experience and immediate feedback. Employees can learn from their mistakes and gain a deeper

understanding of math through practical application. For example, engineers use math extensively in their work, applying formulas and calculations to design structures or analyze data.

Choice 3: I believe a combination of learning math at school and work is ideal. Schools can provide a solid foundation of mathematical knowledge and skills, while the workplace offers opportunities for practical application. Both settings complement each other, fostering a holistic understanding of math. School learning lays the groundwork, introducing concepts, and developing problem-solving strategies. Work-based learning then reinforces and expands upon this knowledge through real-life scenarios. This combined approach ensures a well-rounded mathematical education, equipping individuals with both theoretical understanding and practical proficiency.

50. There is a policy that parents should not be allowed to see children's grades without their permission. Do you agree or disagree?

Choice 1: I agree that parents should not be allowed to see children's grades without their permission. Firstly, this policy respects the privacy and autonomy of the child. It recognizes their right to control and disclose their academic progress as they see fit. Secondly, it encourages open communication and trust between parents and children. By allowing children to take ownership of their grades, they are more likely to engage in honest conversations with their parents about their academic performance, leading to constructive support and growth.

Choice 2: I disagree with the policy that parents should not be allowed to see children's grades without their permission. Firstly, parental involvement in a child's education is crucial for their academic success. Being aware of their child's grades enables parents to identify areas of improvement, provide necessary support, and collaborate with teachers. Secondly, parents have a responsibility to ensure their child's educational progress and make informed decisions regarding their education. Access to grades allows parents to monitor their child's academic development and make necessary interventions when needed.

Choice 3: I believe there should be a balanced approach that respects both the child's autonomy and the importance of parental involvement. Parents and children should have open and ongoing discussions about grades, fostering a collaborative approach to education. Children should have the opportunity to share their grades willingly, fostering a sense of ownership. However, parents should also be able to request access to their child's grades when there are concerns or the need for support. This balanced approach ensures that children's privacy is respected while maintaining the benefits of parental involvement.

51. Some people like to write diaries or take photos to record what they've experienced when they're traveling, others don't do so. What's your opinion on it? Please explain with details.

Choice 1: I believe it is beneficial to write diaries or take photos when traveling. Firstly, it helps preserve memories and experiences that may fade over time. Looking back at a travel diary or photo album allows one to relive the moments and emotions associated with those experiences. Secondly, documenting travel experiences can serve as a valuable resource for sharing and storytelling. It enables individuals to share their adventures with others, inspire and educate them about different cultures and destinations. For example, sharing travel photos on social media can inspire others to explore new places.

Choice 2: I understand that some people prefer not to write diaries or take photos when traveling. Firstly, they may prioritize being fully present in the moment and enjoying the experience without the distraction of documentation. For them, creating mental memories and cherishing the experiences in their hearts is more important than physical artifacts. Secondly, some individuals may find that writing or taking photos disrupts their connection with the environment or people they encounter during their travels. They may prefer to immerse themselves fully in the present experience without the interruption of documenting it.

Choice 3: In my opinion, finding a balance between capturing moments and being fully present is essential. While writing diaries or taking photos can enhance the travel experience, it is important not to become overly consumed with documenting every detail. Finding a middle ground where one can engage in the experience while still capturing important moments allows for a meaningful and lasting connection to the journey. This can be achieved by setting aside specific times or locations for documentation, while dedicating the majority of the trip to fully experiencing and savoring the destination.

52. Do you agree or disagree with the following statement? Kids should be allowed to keep pets.

Choice 1: I agree that kids should be allowed to keep pets. Firstly, having a pet teaches children valuable life lessons such as responsibility, empathy, and compassion. Caring for a pet requires feeding, grooming, and providing a loving environment, fostering a sense of accountability. Secondly, pets can serve as companions and sources of emotional support for children. Pets offer unconditional love and can help reduce stress and anxiety. For example, a child sharing their feelings with a pet may find comfort and reassurance.

Choice 2: I disagree with the statement that kids should be allowed to keep pets. Firstly, pets require a significant commitment of time, effort, and financial resources. Children may not fully comprehend the responsibilities involved in pet care, leading to neglect or improper treatment. Secondly, some children may have allergies or sensitivities to certain types of animals, which could pose health risks. Additionally, the care and maintenance of pets may clash with the child's lifestyle or family circumstances, making it impractical or burdensome to have a pet.

Choice 3: I believe that allowing kids to keep pets should be a decision based on careful consideration of the child's maturity, readiness, and family circumstances. Parents should assess their child's ability to handle pet responsibilities and ensure they receive proper guidance and support. Additionally, considering factors such as allergies, lifestyle, and financial resources is essential. In certain situations, alternative ways of engaging with animals, such as volunteering at shelters or interacting with therapy animals, can provide similar benefits without the long-term commitment of pet ownership.

53. Do you agree or disagree that government should pass a law to fine people who use mobile phones when crossing the street?

Choice 1: I agree that the government should pass a law to fine people who use mobile phones when crossing the street. Firstly, distracted walking poses a safety risk not only to individuals themselves but also to others around them. By focusing on their phones instead of their surroundings, pedestrians may fail to notice oncoming traffic or hazards, leading to accidents. Secondly, implementing a fine can serve as a deterrent and raise awareness about the importance of pedestrian safety. Similar laws targeting distracted driving have proven effective in reducing accidents and promoting responsible behavior.

Choice 2: I disagree with the idea of passing a law to fine people who use mobile phones when crossing the street. Firstly, enforcing such a law could be challenging, as it may be difficult to determine when someone is using their phone specifically while crossing the street. Secondly, while distracted walking can be dangerous, it is not the sole factor contributing to pedestrian accidents. Other factors, such as driver negligence or inadequate infrastructure, also play a significant role. Instead of focusing on punitive measures, efforts should be directed towards educating pedestrians and drivers about shared road responsibilities.

Choice 3: I believe a balanced approach is necessary when addressing the issue of mobile phone use while crossing the street. Education and awareness campaigns can be effective in promoting responsible behavior and highlighting the potential risks of distracted walking. Additionally, improving infrastructure, such as installing pedestrian-friendly signals or creating designated phone-use zones, can help enhance safety. Rather than relying solely on fines, a comprehensive approach that combines education, awareness, and infrastructure improvements can lead to safer pedestrian environments.

54. Which one do you prefer: taking classes in the morning or in the afternoon?

Choice 1: I prefer taking classes in the morning. Firstly, I find that my mind is generally more alert and focused during the morning hours, allowing me to absorb information more effectively. Secondly, scheduling classes in the morning leaves the rest of the day free for other activities, such as studying, pursuing hobbies, or engaging in part-time work. This can help create a better work-life balance and allow for personal time in the afternoon and evening.

Choice 2: I prefer taking classes in the afternoon. Firstly, it gives me more time in the morning to prepare for the day, complete any pending assignments, or engage in physical exercise, which helps me feel energized and ready for the academic tasks ahead. Secondly, afternoon classes can provide a natural break in the day, allowing for rest and rejuvenation before diving into academic material. Additionally, some students find it easier to concentrate and retain information during the afternoon hours.

Choice 3: I believe the preference for taking classes in the morning or afternoon may vary depending on individual factors such as personal energy levels, circadian rhythm, and scheduling commitments. Some students may thrive in the morning, while others may find their productivity peak in the afternoon. To optimize learning, it is important to consider individual preferences and create a flexible schedule that accommodates different learning styles. This could involve a mix of morning and afternoon classes, allowing students to capitalize on their optimal learning periods.

55. When giving feedbacks to students, some teachers would like to talk to their students in person, while some teachers would give written comments to students. Which do you prefer and why?

Choice 1: I prefer giving feedback to students in person. Firstly, face-to-face communication allows for a more personalized and interactive exchange. It enables me to address any questions or concerns the student may have and provide immediate clarifications. Secondly, in-person feedback allows for non-verbal cues, such as facial expressions and body language, which can enhance understanding and strengthen the teacher-student relationship. Additionally, it provides an opportunity to offer constructive criticism in a supportive and empathetic manner, fostering a conducive learning environment.

Choice 2: I prefer giving written comments to students. Firstly, written feedback provides a permanent record that students can refer to whenever needed. It allows them to review and reflect on the feedback at their own pace, promoting independent learning and self-improvement. Secondly, written comments provide a clear and organized format for addressing specific areas of improvement, making it easier for students to identify and address their strengths and weaknesses. Additionally, written feedback allows for thoroughness and attention to detail, ensuring comprehensive guidance for the student's growth.

Choice 3: I believe that a combination of in-person communication and written comments can be the most effective approach for giving feedback to students. In-person discussions allow for immediate clarification and personalized interaction, while written comments provide a tangible and structured resource for students to refer to. This combination caters to different learning styles and preferences, fostering a holistic learning experience that integrates personal engagement and self-directed study.

56. The university is going to increase the price junk food, to make more money, and use the money to add more kinds of healthy food. Do you agree or disagree?

Choice 1: I agree with the university's decision to increase the price of junk food. Firstly, it serves as an incentive for students to make healthier food choices. By making junk food relatively more expensive, students are encouraged to opt for nutritious alternatives, leading to improved overall health and well-being. Secondly, the revenue generated from the increased price can be utilized to expand the availability and variety of healthy food options on campus. This ensures that students have access to nutritious meals and snacks, promoting a culture of wellness and supporting their academic success.

Choice 2: I disagree with the university's decision to increase the price of junk food. Firstly, affordability should not be a barrier to accessing food options. Increasing the price of junk food may disproportionately impact students with limited financial resources, potentially limiting their food choices. Secondly, education and awareness about healthy eating habits can be more effective in promoting healthier food choices. The university can focus on providing nutrition education and creating a supportive environment that encourages students to make informed decisions about their diet.

Choice 3: I believe a balanced approach is necessary in addressing the issue of food choices on campus. While it is important to promote healthy eating habits, punitive measures such as increasing the price of junk food may not be the most effective solution. Instead, the university can focus on education, offering nutritional information and promoting the benefits of healthy eating. Additionally, providing a range of affordable and nutritious food options can empower students to make informed choices without compromising their financial well-being.

57. Some students like teachers who often supervise their study and work, while others like teachers who allow them to study independently and check their work occasionally. Which one do you prefer? Explain your reasons.

Choice 1: I prefer teachers who often supervise my study and work. Firstly, regular supervision ensures that I stay on track and meet academic goals. It provides structure and accountability, preventing procrastination and helping me maintain a consistent study routine. Secondly, frequent supervision allows for timely feedback and guidance, which enhances my learning process and enables me to address any challenges or misconceptions promptly. Additionally, the presence of a supportive teacher fosters a positive learning environment, where I feel encouraged and motivated to strive for academic excellence.

Choice 2: I prefer teachers who allow me to study independently and check my work occasionally. Firstly, independent study promotes self-discipline and self-motivation, allowing me to take ownership of my learning. It encourages critical thinking, problem-solving, and self-directed exploration. Secondly, occasional check-ins from the teacher provide an opportunity to receive guidance and feedback, ensuring that I am on the right track and offering insights for improvement.

This approach allows for autonomy and fosters a sense of responsibility, preparing me for independent learning in higher education and beyond.

Choice 3: I believe a balance between supervision and independent study is crucial for effective learning. While regular supervision provides structure and guidance, allowing students to develop autonomy and self-regulation is equally important. A combination of teacher supervision and independent study fosters a well-rounded learning experience, where students benefit from both the support and expertise of the teacher and the opportunity to explore and take ownership of their learning. This approach cultivates a sense of responsibility, critical thinking skills, and the ability to adapt to various learning environments.

58. Some people prefer sending messages while others prefer making phone calls directly, which one do you prefer?

Choice 1: I prefer sending messages. Firstly, it allows for asynchronous communication, giving me the flexibility to respond at my convenience. This is especially beneficial when dealing with different time zones or busy schedules. Secondly, written messages provide a record of the conversation, allowing for easy reference and clarification. Additionally, it gives me time to think and compose my thoughts before responding, ensuring effective communication without the pressure of immediate responses.

Choice 2: I prefer making phone calls directly. Firstly, it allows for real-time interaction, facilitating clearer and more nuanced communication. The ability to hear tone of voice and receive immediate feedback enhances understanding and helps build stronger connections. Secondly, phone calls enable spontaneous and dynamic conversations, allowing for more effective problem-solving and decision-making. Additionally, direct conversations can help build trust and rapport, especially in situations where emotions or sensitive topics need to be addressed.

Choice 3: I believe that both sending messages and making phone calls have their advantages depending on the context. Sending messages is suitable for non-urgent matters or when a written record is necessary, while making phone calls is preferable for time-sensitive discussions or when immediate clarification and back-and-forth interaction are required. The choice between the two methods should be based on the nature of the communication, the urgency of the matter, and the preferences of the individuals involved.

59. Some people want to change their appearance, even by surgery. Do you agree or disagree? Give your reasons.

Choice 1: I disagree with the idea of changing one's appearance through surgery. Firstly, physical appearance should not define a person's worth or value. Emphasizing external beauty can perpetuate societal pressures and unrealistic standards. Secondly, focusing on inner qualities,

personal growth, and self-acceptance leads to a healthier sense of self-esteem and well-being. It is essential to cultivate a positive body image and appreciate one's uniqueness. Instead of resorting to surgery, promoting self-care, self-love, and embracing diversity can contribute to a more inclusive and compassionate society.

Choice 2: I agree that individuals have the right to change their appearance through surgery if it enhances their well-being and self-confidence. For some individuals, undergoing certain procedures can alleviate physical discomfort, correct deformities, or help them align their physical appearance with their gender identity. It is a personal choice that should be respected, as long as it is done with careful consideration, proper medical guidance, and realistic expectations. However, it is important to promote body positivity and encourage individuals to prioritize inner qualities and self-acceptance alongside any external changes.

Choice 3: I believe that the decision to undergo surgery to change one's appearance is a personal choice that should be carefully considered. It is essential to have open conversations about body image, self-esteem, and mental health to support individuals in making informed decisions. Promoting a society that values diversity and embraces individual differences can help create an environment where people feel accepted and confident, regardless of their physical appearance. Encouraging self-acceptance and fostering a culture of body positivity can reduce the desire for drastic changes through surgery.

60. If you are going to have an interview with a famous people in your community, which of the following people will you choose? • businessman • professor • artist. Give detailed information to support your answer and explain why.

Choice 1: If given the opportunity, I would choose to interview a businessman in my community. Firstly, a businessman can provide insights into entrepreneurship, leadership, and the local economy. Their experiences and strategies can offer valuable lessons for aspiring entrepreneurs. Secondly, an interview with a businessman can shed light on the challenges and opportunities specific to the community's business landscape. This knowledge can help inspire and inform individuals interested in pursuing business ventures or contributing to economic development.

Choice 2: If given the opportunity, I would choose to interview a professor in my community. Firstly, a professor can provide expertise and insights on a specific field of study, offering valuable knowledge and intellectual perspectives. Their research and academic background can enrich discussions and provide a deeper understanding of various subjects. Secondly, an interview with a professor can uncover educational trends, pedagogical approaches, and the role of education in the community. This can be beneficial for students, educators, and policymakers seeking to enhance the learning environment.

Choice 3: If given the opportunity, I would choose to interview an artist in my community. Firstly, an artist can offer creative perspectives and inspire discussions about artistic expression, cultural heritage, and the power of creativity. Their work and artistic process can ignite imagination and

foster appreciation for various art forms. Secondly, an interview with an artist can explore the role of art in community development, social change, and cultural preservation. This can stimulate conversations about the importance of supporting local artists and promoting artistic initiatives for the enrichment of the community.

61. Among the following jobs, which one do you think is the most interesting one and why? • airplane pilot • actor • detective

Choice 1: I believe that being an airplane pilot is the most interesting job among the options. Firstly, it offers the opportunity to travel to different destinations and experience diverse cultures. The thrill of flying and the sense of freedom are captivating. Secondly, piloting requires a high level of skill, precision, and constant learning, making it intellectually stimulating and challenging. Moreover, being responsible for the safety and well-being of passengers adds a sense of purpose and fulfillment to the profession.

Choice 2: I think being an actor is the most interesting job. Firstly, it allows individuals to explore different characters and stories, delving into the realms of imagination and creativity. The process of embodying diverse roles and bringing them to life on stage or screen can be incredibly fulfilling. Secondly, acting offers the opportunity to collaborate with talented individuals, such as directors, fellow actors, and production teams, fostering a dynamic and collaborative work environment. Moreover, the ability to evoke emotions and inspire audiences is rewarding and can make a significant impact.

Choice 3: I find being a detective the most interesting job. Firstly, it involves solving complex mysteries and puzzles, providing intellectual challenges and opportunities for critical thinking. The process of gathering evidence, analyzing information, and unraveling the truth can be intellectually stimulating. Secondly, being a detective involves working on intriguing cases and dealing with suspense and suspenseful situations. The sense of accomplishment and contributing to justice can be highly rewarding and impactful.

Choice 1: I believe that universities would receive more benefits from developing research to predict weather more accurately. Firstly, accurate weather predictions are crucial for various sectors, including agriculture, transportation, and disaster management. Improved forecasting can help farmers plan their crops, enable safer and more efficient travel, and enhance preparedness for extreme weather events. Secondly, advancements in weather prediction technology and models can contribute to climate research and aid in understanding and addressing climate change. This research can have far-reaching benefits for society and the environment.

Choice 2: I think universities would receive more benefits from developing research to clean rivers and oceans. Firstly, pollution in water bodies is a pressing global issue that affects ecosystems, wildlife, and human health. Research on effective methods to clean and restore these natural resources can have significant environmental and societal impacts. Secondly, addressing water pollution can contribute to sustainable development and support industries such as fishing, tourism, and recreational activities that rely on clean water. This research can promote a healthier and more sustainable future for communities.

Choice 3: I believe that universities would receive more benefits from developing research to deal with outer space. Firstly, space exploration and research provide opportunities to expand scientific knowledge, push technological boundaries, and foster international collaborations. Studying outer space can lead to discoveries about our universe, the origins of life, and potential future habitats. Secondly, advancements in space technology and research can have practical applications, such as satellite communications, weather monitoring, and navigation systems. This research can drive innovation, inspire future generations, and contribute to scientific and technological progress.

62. If universities are given financial support to develop researches, which one do you think would receive more benefits? • To predict weather more accurately • To clean rivers and ocean • To deal with outer space

Choice 1: I believe that universities would receive more benefits from developing research to predict weather more accurately. Firstly, accurate weather predictions are crucial for various sectors, including agriculture, transportation, and disaster management. Improved forecasting can help farmers plan their crops, enable safer and more efficient travel, and enhance preparedness for extreme weather events. Secondly, advancements in weather prediction technology and models can contribute to climate research and aid in understanding and addressing climate change. This research can have far-reaching benefits for society and the environment.

Choice 2: I think universities would receive more benefits from developing research to clean rivers and oceans. Firstly, pollution in water bodies is a pressing global issue that affects ecosystems, wildlife, and human health. Research on effective methods to clean and restore these natural resources can have significant environmental and societal impacts. Secondly, addressing water pollution can contribute to sustainable development and support industries such as fishing, tourism, and recreational activities that rely on clean water. This research can promote a healthier and more sustainable future for communities.

Choice 3: I believe that universities would receive more benefits from developing research to deal with outer space. Firstly, space exploration and research provide opportunities to expand scientific knowledge, push technological boundaries, and foster international collaborations. Studying outer space can lead to discoveries about our universe, the origins of life, and potential future habitats. Secondly, advancements in space technology and research can have practical applications, such as satellite communications, weather monitoring, and navigation systems. This research can drive innovation, inspire future generations, and contribute to scientific and technological progress.

63. Your university has acquired a piece of land next to the campus. There have been three options for the use of the land. Which do you prefer? Why? • athletic facilities and stadiums • a park with nature trails • centers for students and hotel for campus guests

Choice 1: I prefer the option of athletic facilities and stadiums. Firstly, having athletic facilities would promote physical fitness, well-being, and a healthy lifestyle among students. It would provide spaces for sports activities, recreational events, and fitness programs, fostering a vibrant and active campus community. Secondly, such facilities can attract sporting events, competitions, and tournaments, enhancing the university's reputation and contributing to the local economy. Additionally, these facilities can serve as gathering spaces for students to socialize, collaborate, and develop teamwork skills.

Choice 2: I believe that a park with nature trails would be the best use of the land. Firstly, a park would provide students with a peaceful and serene environment for relaxation, reflection, and connecting with nature. It would offer opportunities for outdoor activities, picnics, and leisurely walks, promoting mental well-being and stress reduction. Secondly, nature trails would encourage physical exercise, exploration, and environmental appreciation. Students could engage in hiking, bird-watching, or simply enjoying the beauty of the natural surroundings. Moreover, a park would enhance the campus aesthetics and create a sustainable green space.

Choice 3: I think centers for students and a hotel for campus guests would be the ideal use of the land. Firstly, having dedicated centers for students would provide spaces for academic support, counseling services, and student organizations. These centers could offer resources, workshops, and activities that foster personal and professional development. Additionally, having an on-campus hotel would accommodate visiting scholars, guest lecturers, and parents, enhancing the university's reputation and facilitating interactions with external communities. It would also generate revenue for the university and create opportunities for networking and knowledge exchange.

64. The university international office is going to hold a social event. Which one of the following choices do you think is the best? • international food fair • international music festival • international film festival

Choice 1: I believe that the best social event organized by the university international office would be an international food fair. Firstly, an international food fair would provide an opportunity for students to explore and experience diverse culinary traditions from around the world. It would promote cultural exchange, broaden horizons, and foster appreciation for different cuisines. Secondly, food has the power to bring people together, creating a vibrant and inclusive atmosphere where students can interact, share stories, and celebrate diversity.

Choice 2: I think an international music festival would be the best social event organized by the university international office. Firstly, music is a universal language that transcends borders and connects people from different cultures. An international music festival would showcase a variety of musical genres, performances, and instruments, providing a platform for cultural exchange and appreciation. Secondly, music has the ability to evoke emotions, create a sense of unity, and inspire creativity. Students can enjoy live performances, participate in workshops, and engage in musical collaborations, fostering a dynamic and enriching experience.

Choice 3: I believe that an international film festival would be the best social event organized by the university international office. Firstly, films have the power to depict diverse cultures, tell compelling stories, and offer unique perspectives. An international film festival would provide an opportunity for students to explore world cinema, engage in discussions, and broaden their cultural understanding. Secondly, films can spark conversations, challenge societal norms, and promote intercultural dialogue. Students can attend screenings, interact with filmmakers, and participate in panel discussions, creating a platform for intellectual exchange and artistic appreciation.

65. The university currently requires all the students to take the physical education course to graduate. Which of the following options will you choose? • soccer • dancing

Choice 1: I would choose soccer as the physical education course option. Firstly, soccer is a popular sport played worldwide, and participating in it would promote physical fitness, coordination, and teamwork skills. Students can develop their athletic abilities, enhance their stamina, and learn the importance of collaboration and strategy on the field. Secondly, soccer encourages a sense of discipline, perseverance, and sportsmanship, teaching valuable life lessons that extend beyond the classroom. Students can experience the thrill of competition, build self-confidence, and cultivate a healthy lifestyle through regular physical activity.

Choice 2: I think dancing would be the ideal physical education course option. Firstly, dancing is a creative and expressive form of physical activity that promotes coordination, flexibility, and rhythm. Students can explore various dance styles, learn different techniques, and develop their artistic expression. Dancing also encourages self-confidence, body awareness, and emotional well-being. Secondly, dance classes provide a social and inclusive environment where students can interact, form connections, and appreciate cultural diversity through movement. It offers a joyful and engaging way to stay active and embrace the art of self-expression.

66. Which of the following areas of current events do you most like to read? • Politics • Sports • Arts and films

Choice 1: I am most interested in reading about politics in current events. Firstly, politics plays a significant role in shaping societies, influencing policies, and impacting people's lives. Staying informed about political developments allows me to understand the dynamics of power, governance, and decision-making. Secondly, political news provides insights into global affairs, international relations, and social issues. It enables me to form informed opinions, engage in critical thinking, and participate in democratic processes. Moreover, political events often have far-reaching consequences and can shape the future of nations and the world.

Choice 2: I am most interested in reading about sports in current events. Firstly, sports news provides updates on various athletic competitions, inspiring stories of athletes, and analysis of sporting events. It allows me to stay connected to the world of sports, follow my favorite teams and athletes, and engage in discussions with fellow enthusiasts. Secondly, sports offer a sense of unity,

community, and passion. Following sports news allows me to celebrate achievements, witness sporting excellence, and appreciate the positive impact of sports on individuals and societies.

Choice 3: I am most interested in reading about arts and films in current events. Firstly, arts and films offer a window into the world of creativity, imagination, and cultural expression. Following news related to arts and films allows me to explore diverse artistic forms, discover emerging talents, and appreciate the power of visual storytelling. Secondly, arts and films contribute to societal discourse, challenge norms, and reflect the human experience. Staying informed about arts and film news enables me to engage in conversations about aesthetics, cultural representation, and social issues depicted in creative works.

67. There is going to be a students' TV show. Which show would you like to watch.

Please give your reasons. • An interview with school leaders • Students' debate on political and social topics • Comedy about school life

Answer 1: I would like to watch an interview with school leaders for the students' TV show. This show can provide valuable insights into the vision, goals, and policies of the school. It allows students to directly hear from their leaders and understand their perspectives on important educational matters. For example, an interview with the school principal can shed light on upcoming initiatives, academic programs, and the overall direction of the school, fostering transparency and student engagement.

Answer 2: I would like to watch a students' debate on political and social topics for the students' TV show. This format enables students to express their opinions, engage in critical thinking, and develop strong argumentative skills. It encourages active participation and promotes awareness of current issues. For instance, a debate on topics like climate change, gender equality, or immigration can inspire students to research, analyze different viewpoints, and articulate their ideas effectively, enhancing their communication and analytical abilities.

Answer 3: I would like to watch a comedy about school life for the students' TV show. This light-hearted genre can provide entertainment and relieve academic stress. A comedy about school life often portrays relatable and humorous situations that students experience on a daily basis. It can evoke laughter, create a sense of camaraderie among students, and serve as a form of relaxation and escapism. For example, a comedy series that highlights funny moments in the classroom or comedic misunderstandings between students can bring joy and entertainment to the audience.

68. Our degree requires you to take one course, which one would you choose? •

Energy and environment • Health and nutrition • Solar system

Answer 1: I would choose the Energy and environment course. This course is essential in understanding sustainable practices and addressing global environmental challenges. It covers topics such as renewable energy, conservation, and climate change. Studying energy and the environment equips students with knowledge to make informed choices, promote environmental stewardship, and contribute to a more sustainable future. For example, learning about renewable energy sources like solar and wind power can inspire students to explore clean energy solutions in their personal and professional lives.

Answer 2: I would choose the Health and nutrition course. This course provides valuable knowledge about maintaining personal well-being and adopting healthy lifestyle habits. It covers topics such as nutrition, exercise, and disease prevention. Studying health and nutrition empowers students to make informed choices about their diet and physical activity, leading to improved overall health. For example, understanding the importance of balanced nutrition and regular exercise can help students develop healthy habits, reduce the risk of chronic diseases, and enhance their quality of life.

Answer 3: I would choose the Solar system course. Exploring the wonders of the universe and studying celestial bodies can be fascinating and enriching. The Solar system course delves into the planets, moons, asteroids, and other celestial objects within our solar system. It enables students to gain a deeper understanding of our place in the universe and the fundamental concepts of astronomy. For example, learning about the characteristics of different planets, the formation of stars, and the exploration of space can ignite curiosity and inspire a sense of wonder about the cosmos.

69. The university wants to provide students more entertainments. Three choices are provided below; which do you prefer and why? • theater performance by student actors • concert provided by professional musicians • lecture by a professor

Answer 1: I prefer a theater performance by student actors. This choice provides an opportunity for students to showcase their creativity, talent, and dedication to the performing arts. Watching a theater performance by fellow students supports and encourages artistic development within the university community. It allows students to witness the culmination of their peers' hard work, artistic expression, and storytelling abilities. Moreover, student theater performances foster a sense of community and pride in the achievements of fellow students, creating a vibrant and supportive artistic culture.

Answer 2: I prefer a concert provided by professional musicians. A concert featuring professional musicians offers a high-quality musical experience for the students. It allows them to enjoy performances by accomplished artists who have honed their craft. Attending such concerts exposes students to different genres, styles, and interpretations of music. It can inspire and evoke emotional responses through the power of live music. Additionally, professional concerts can contribute to a vibrant cultural atmosphere on campus and encourage a deeper appreciation for the arts.

Answer 3: I prefer a lecture by a professor. A lecture by a knowledgeable and experienced professor can provide intellectual stimulation and expand students' understanding of various subjects. It offers an opportunity to learn from experts in their fields and gain valuable insights into specific topics. Attending a professor's lecture allows students to engage in a structured and informative learning experience, ask questions, and deepen their knowledge. Moreover, lectures by professors provide a platform for intellectual discourse and the exchange of ideas among students and faculty members.

70. Some people believe old people should not take risks and participate in adventurous events as the young people. Do you agree? Why?

Agreeing: I agree that old people should not take risks and participate in adventurous events like young people. Firstly, their physical abilities tend to decline with age, making them more vulnerable to injuries during daring activities. Secondly, older individuals may have pre-existing health conditions that could be exacerbated by engaging in risky events. For example, mountain climbing could strain their heart or joints. Therefore, it is safer for them to partake in less risky activities such as walking or swimming. This reduces the chances of accidents and promotes their overall well-being.

Disagreeing: I disagree that old people should not take risks and participate in adventurous events like young people. Firstly, age should not be a limiting factor for pursuing one's passions and interests. Secondly, engaging in adventurous activities can provide a sense of fulfillment, boost self-confidence, and promote a healthy lifestyle. For example, older individuals who enjoy hiking can maintain their physical fitness and explore nature. Therefore, as long as they are physically capable and take necessary precautions, they should be encouraged to participate in adventurous events.

Both agreeing and disagreeing: While I understand the concern for the safety of old people, I believe they should have the freedom to choose whether or not to take risks and participate in adventurous events. Firstly, it is essential to respect their autonomy and personal preferences. Secondly, older individuals should be encouraged to engage in activities that promote their physical and mental well-being, but with consideration for their limitations and safety. For instance, they can participate in moderated adventure programs that cater to their abilities and provide necessary support. Balancing their desires with precautions ensures a fulfilling and safe experience.

71. You have been very busy and unable to prepare for the exam tomorrow. You can either stay up late to study and sleep less or just study less and get full night's sleep. Which will you prefer?

Option 1: I would prefer to stay up late and study despite getting less sleep. Firstly, adequate preparation is essential for performing well on the exam. Secondly, sacrificing sleep temporarily can be compensated for with rest afterward. For example, I can take a nap or have a relaxing day after the exam. By studying late, I ensure that I cover the necessary material and increase my chances of achieving a satisfactory result.

Option 2: I would choose to study less and get a full night's sleep. Firstly, sleep plays a crucial role in cognitive function and memory consolidation. Prioritizing rest allows for better information retention and recall during the exam. Secondly, a well-rested mind performs more efficiently, leading to improved focus and concentration. For instance, I can process information more effectively and make accurate decisions. Opting for a full night's sleep ensures a refreshed mental state, optimizing my exam performance.

Option 3: I would prefer to study less and get a full night's sleep. Firstly, sleep deprivation can impair cognitive function and hinder effective studying. Secondly, being well-rested enhances alertness and attentiveness during the exam. For example, a refreshed mind can process information more efficiently and respond accurately to questions. By prioritizing sleep, I ensure optimal mental clarity and improve my chances of performing well on the exam. Additionally, a balanced approach allows for better long-term academic progress and overall well-being.

72. Some students think that they should be graded based on participating in the class discussions, while others think that they should be graded based on written work, such as paper. Which opinion would you prefer? Why?

Option 1: I would prefer to be graded based on participating in class discussions. Firstly, active participation fosters a deeper understanding of the subject matter. Engaging in discussions encourages critical thinking, as it requires analyzing and articulating ideas in real-time. Secondly, class discussions promote collaboration and learning from peers. For instance, exchanging diverse perspectives enhances knowledge acquisition and develops communication skills. Being graded on class discussions ensures a comprehensive evaluation of my understanding and active involvement in the learning process.

Option 2: I would prefer to be graded based on written work, such as papers. Firstly, written assignments provide an opportunity for in-depth research and analysis. They require thorough exploration of the topic and the ability to present coherent arguments. Secondly, written work allows for reflection and revision, enhancing clarity and logical organization. For example, through drafting and editing, I can refine my ideas and ensure accuracy. Being graded on written work ensures a comprehensive assessment of my research, critical thinking, and writing abilities.

Option 3: I would prefer a combination of both class discussions and written work for grading. Firstly, participating in class discussions promotes active engagement and the exchange of ideas. It enhances critical thinking skills and collaboration among students. Secondly, written assignments provide an opportunity for independent research and thoughtful analysis. They allow for the development of strong writing skills and the ability to present well-structured arguments. A combined assessment approach ensures a holistic evaluation of both oral and written communication skills, promoting a well-rounded learning experience.

73. If you are to choose between two apartments to live in next semester; one apartment is near the campus but is slightly expensive, the other is a little far from the campus but is cheaper. Which one do you prefer and why?

Option 1: I would prefer the apartment near the campus despite being slightly expensive. Firstly, proximity to the campus saves time and transportation costs. It allows for easy access to classes, libraries, and other facilities. Secondly, living closer fosters a sense of community and engagement with campus life. For example, I can participate in extracurricular activities and events more conveniently. Choosing the apartment near the campus ensures convenience, an immersive academic environment, and the opportunity to make the most of my college experience.

Option 2: I would choose the cheaper apartment even if it is a little far from the campus. Firstly, cost savings are important for budget-conscious students. Opting for a cheaper option allows for financial flexibility and potential savings in the long run. Secondly, transportation options like public transit or biking can still provide a convenient commute to the campus. For instance, utilizing these alternatives can help reduce commuting expenses and maintain a manageable distance. Choosing the cheaper apartment ensures financial stability and a practical approach to living arrangements.

Option 3: I would consider various factors before making a decision. While proximity to the campus is desirable for convenience, it's crucial to evaluate the overall costs and benefits. Firstly, I would assess the additional expenses associated with living near the campus, such as higher rent or utility costs. Secondly, I would evaluate the distance of the cheaper apartment and the availability of transportation options. By considering both financial implications and convenience, I can make an informed decision that balances cost-effectiveness and practicality for my specific situation.

74. Imagine that you have been accepted by two different universities: one university is well-known for its excellent academic program, but it's expensive, while the other one is less well-known, but has offered you scholarship to pay for your tuition fee. Which university would you prefer? Explain why.

Option 1: I would prefer the university with the excellent academic program, despite its higher cost. Firstly, a well-known university often signifies a higher standard of education and access to quality resources. Secondly, attending a renowned institution can enhance my future career prospects and networking opportunities. For example, connections with distinguished professors and alumni can

open doors to internships and job opportunities. Choosing the university with the excellent academic program ensures a strong educational foundation and potential long-term benefits.

Option 2: I would choose the less well-known university that offers a scholarship to pay for my tuition fees. Firstly, financial considerations are crucial in making a decision about higher education. The scholarship allows for financial stability and reduces the burden of student loans. Secondly, a less well-known university may still provide a quality education and valuable learning experiences. For instance, smaller class sizes and personalized attention from professors can foster a supportive learning environment. Opting for the university with the scholarship ensures financial relief and the opportunity to excel academically.

Option 3: I would carefully evaluate the benefits and drawbacks of both options before making a decision. While the well-known university offers an excellent academic program, the cost could potentially burden me with substantial student debt. On the other hand, the less well-known university's scholarship provides financial relief, but I would need to thoroughly research its academic offerings and reputation. By considering the balance between academic excellence and financial stability, I can make an informed decision that aligns with my long-term goals and priorities.

75. Many people think that students study course materials more effectively by taking exams, while others think that students learn more effectively through doing other activities such as writing paper or completing projects. Which do you think is more effective for students to learn?

Option 1: I believe that taking exams is an effective way for students to study course materials. Firstly, exams assess students' understanding of the subject matter and their ability to apply knowledge. They require active recall and promote critical thinking. Secondly, the structured nature of exams helps students organize their studying process and focus on key concepts. For example, reviewing past exams and practice questions can identify areas that need further attention. By taking exams, students develop a comprehensive understanding of the material and hone their test-taking skills.

Option 2: I believe that students learn more effectively through engaging in activities such as writing papers or completing projects. Firstly, these activities foster deeper comprehension and retention of course materials. By researching, organizing, and presenting information in written form, students actively process and synthesize knowledge. Secondly, projects provide opportunities for hands-on application of concepts, promoting practical understanding. For instance, a science project allows students to conduct experiments and analyze results. Engaging in such activities encourages critical thinking, creativity, and a holistic understanding of the subject matter.

Option 3: I believe that a combination of both exams and other activities is the most effective approach for students to learn. Firstly, exams provide a structured assessment method that tests knowledge and critical thinking skills. They offer a comprehensive overview of the material. Secondly, engaging in activities like writing papers and completing projects allows for in-depth exploration and application of concepts. This hands-on approach promotes active learning and encourages creativity. By combining both methods, students can benefit from the advantages of both exams and other activities, leading to a well-rounded and effective learning experience.

76. You will need to accomplish an assignment to do a presentation. Which will you choose? • Act out a scene from a play (with a partner) • Explain your review of a novel you recently you read • Read a selection of poem

Option 1: I would choose to act out a scene from a play with a partner. Firstly, acting allows for dynamic and engaging storytelling. It brings the characters and their emotions to life, capturing the audience's attention. Secondly, collaborating with a partner enhances teamwork and communication skills. For example, through rehearsals and discussions, we can ensure a seamless performance. By choosing to act out a scene from a play, I can showcase my acting abilities and demonstrate effective collaboration in delivering a compelling presentation.

Option 2: I would choose to explain my review of a novel I recently read. Firstly, presenting a review allows me to showcase my analytical and critical thinking skills. I can discuss the plot, themes, and characters, providing insights and supporting my opinions with examples from the novel. Secondly, it gives me the opportunity to engage with the audience and share my enthusiasm for the book. By presenting a novel review, I can demonstrate my ability to articulate my thoughts effectively and engage others in a thoughtful discussion.

Option 3: I would choose to read a selection of poetry. Firstly, poetry is a powerful medium to evoke emotions and convey complex ideas in a concise manner. By reading poetry, I can explore the beauty of language and its impact on the audience. Secondly, it allows me to demonstrate my interpretation and understanding of the chosen poem. For instance, I can analyze its themes, symbolism, and literary techniques. By reading a selection of poetry, I can showcase my appreciation for the art form and engage the audience in a thoughtful exploration of the poem.

77. Which of following aspects do you think contributes most to country's success? • many business opportunities • well-rounded medical care system • a developed educational system

Option 1: A developed educational system contributes most to a country's success. Firstly, education provides the foundation for an innovative and skilled workforce, driving economic growth. Secondly, a well-educated population enhances social cohesion and fosters active citizen participation. For example, countries with high literacy rates and quality education tend to have lower crime rates and

higher civic engagement. A developed educational system empowers individuals, strengthens the economy, and promotes a prosperous society.

Option 2: A well-rounded medical care system is crucial for a country's success. Firstly, accessible and quality healthcare ensures the well-being of the population, leading to a productive workforce. Secondly, preventive care and early intervention reduce the burden on healthcare resources and promote overall public health. For instance, vaccination programs and regular check-ups prevent the spread of diseases and improve overall life expectancy. A well-rounded medical care system safeguards the nation's health, enhances productivity, and supports economic development.

Option 3: Many business opportunities contribute to a country's success. Firstly, a thriving business environment attracts investments and creates employment opportunities, stimulating economic growth. Secondly, entrepreneurship and innovation foster technological advancements and market competitiveness. For example, startup ecosystems encourage creativity and contribute to a country's global standing. Many business opportunities provide avenues for economic advancement, job creation, and sustainable development, leading to the overall success and prosperity of a country.

78. Some choose to work in a small company or organization with a few workers. Others prefer to work in a large company or organization with thousands of employees. Which do you think is better?

Option 1: Working in a small company with a few workers can be advantageous. Firstly, it allows for a closer-knit working environment, fostering strong relationships and effective collaboration. Secondly, employees often have more diverse responsibilities and opportunities to contribute to various aspects of the business. For example, in a small company, one may have the chance to work across different departments and gain valuable cross-functional experience. Working in a small company promotes a sense of ownership, flexibility, and the ability to make a significant impact.

Option 2: Working in a large company with thousands of employees has its benefits. Firstly, large companies often offer more extensive resources and infrastructure, enabling employees to access specialized tools and support. Secondly, the presence of a diverse workforce provides opportunities for networking, mentoring, and learning from colleagues with different expertise. For example, working in a large company may involve collaborating with professionals from various departments and backgrounds, fostering personal and professional growth. Working in a large company offers a wider range of career paths, opportunities for advancement, and exposure to global markets.

Option 3: Whether working in a small or large company is better depends on personal preferences and career goals. Some individuals thrive in smaller, intimate settings where they can have a direct impact and a close working relationship with colleagues. Others prefer the resources and opportunities for growth that larger organizations offer. It is important to consider factors such as company culture, personal aspirations, and the specific role and responsibilities involved. Ultimately, the choice should align with one's individual career objectives and work style preferences.

79. Do you agree or disagree with the following statement? Current celebrities (like musicians, actors/actresses, athletes) set a good example as role model for the young people.

Option 1: I agree that current celebrities can set a good example as role models for young people. Firstly, celebrities often have a platform and influence to advocate for positive causes, such as social justice or environmental sustainability. Their actions and messages can inspire young people to become engaged and make a difference in the world. Secondly, celebrities who demonstrate hard work, discipline, and perseverance in their respective fields can serve as motivational figures. For example, athletes who showcase dedication and teamwork can inspire young individuals to pursue their passions and strive for excellence.

Option 2: I disagree that current celebrities always set a good example as role models for young people. Firstly, the celebrity culture often focuses on superficial aspects, promoting materialism and unrealistic standards. This can lead to negative influences on young people's self-esteem and values. Secondly, some celebrities engage in inappropriate behavior or make poor choices, which can send the wrong message to impressionable minds. It is important for young people to have a discerning eye and critical thinking skills to differentiate between positive and negative role models.

Option 3: The influence of current celebrities as role models is subjective. Some celebrities demonstrate positive values, inspiring young people through philanthropy and activism. Others may present negative behaviors or unrealistic ideals. It's essential to evaluate the individual actions and values of celebrities, encouraging critical thinking and discernment in selecting role models. Ultimately, young people should form their own values based on a range of positive influences, including parents, teachers, and community leaders.

80. Do you agree or disagree that hiring experienced teachers is a deciding factor for the success of a school?

Option 1: I agree that hiring experienced teachers is a deciding factor for the success of a school. Firstly, experienced teachers bring a wealth of knowledge and expertise to the classroom. They have

developed effective teaching strategies and possess a deep understanding of the subject matter. Secondly, experienced teachers can effectively manage classrooms, establish a positive learning environment, and provide guidance to students. For example, their experience enables them to identify and address individual learning needs. Hiring experienced teachers ensures quality instruction, student engagement, and academic success.

Option 2: I disagree that hiring experienced teachers is the sole deciding factor for the success of a school. While experienced teachers can contribute significantly, other factors also play vital roles. Firstly, the overall school culture and leadership influence student motivation and engagement. Secondly, the curriculum, resources, and supportive learning environment also contribute to a successful school. For example, a well-designed curriculum and access to modern educational tools enhance student learning outcomes. While experienced teachers are important, a comprehensive approach that considers multiple factors is necessary for a school's success.

Option 3: Hiring experienced teachers can be a contributing factor to the success of a school, but it is not the sole deciding factor. Firstly, experienced teachers bring a wealth of knowledge and instructional skills to the classroom, positively impacting student learning outcomes. However, other factors such as effective leadership, a supportive school environment, and student engagement also play crucial roles. For example, strong leadership sets the vision and direction for the school, while a supportive environment fosters student well-being and motivation. Hiring experienced teachers is valuable, but a holistic approach that addresses various aspects of education is essential for a school's success.

81. Which campus improvement do you suggest your school make: swimming pool, cafeteria or dormitory? Please give specific reasons to support your opinion.

Option 1: I suggest that my school make improvements to the swimming pool. Firstly, a well-maintained swimming pool provides an avenue for physical fitness and recreation. It offers students the opportunity to engage in aquatic sports, improve cardiovascular health, and relieve stress. Secondly, a swimming pool can serve as a hub for community-building and social interactions. For example, swim meets and water-based activities can foster team spirit and camaraderie among students. By enhancing the swimming pool facilities, the school promotes a healthy and active lifestyle while creating a vibrant campus atmosphere.

Option 2: I suggest that my school make improvements to the cafeteria. Firstly, a well-equipped and comfortable cafeteria would enhance the overall student experience. It would provide a pleasant and inviting space for students to socialize, relax, and enjoy their meals. Secondly, an improved cafeteria can offer a wider variety of nutritious food options, catering to diverse dietary preferences and promoting healthy eating habits. For example, the cafeteria could incorporate fresh salad bars, vegetarian options, and allergy-friendly choices. By prioritizing the cafeteria, the school would foster a vibrant and inclusive campus environment that supports both physical and social well-being.

Option 3: I suggest that my school make improvements to the dormitory facilities. Firstly, a comfortable and conducive living environment in the dormitory promotes student well-being and academic success. Upgraded dormitories with spacious rooms, study areas, and modern amenities would enhance the living experience for students. Secondly, improved dormitory facilities can foster a sense of community and belonging among residents. For example, common areas for socializing and organized dormitory events can encourage interactions and friendships. By investing in the dormitories, the school creates a supportive and enriching residential experience for students.

82. Which of the following three would you choose to do in summer vacation?

Working as a • librarian • painter in an art center • life guard in the natatorium

Option 1: I would choose to work as a librarian during the summer vacation. Firstly, working as a librarian provides an opportunity to immerse myself in a world of knowledge and literature. It offers a chance to engage with books, assist patrons, and promote a love for reading. Secondly, working in a library cultivates organizational skills and attention to detail, which are valuable for future academic or professional pursuits. For example, managing library resources and helping individuals find information develop critical thinking and communication abilities. Working as a librarian combines my passion for books and learning with gaining practical skills.

Option 2: I would choose to work as a painter in an art center during the summer vacation. Firstly, working as a painter would allow me to pursue my passion for art and enhance my artistic skills. It provides a creative and stimulating environment where I can express myself through various art mediums. Secondly, working in an art center exposes me to different art forms and opportunities to collaborate with other artists, fostering artistic growth and inspiration. By choosing to work as a painter in an art center, I can combine my love for art with gaining valuable work experience.

Option 3: I would choose to work as a lifeguard in the natatorium during the summer vacation. Firstly, working as a lifeguard promotes water safety and helps ensure the well-being of swimmers. It allows me to contribute to the community by preventing accidents and responding to emergencies. Secondly, being a lifeguard offers opportunities for physical activity and staying fit. For example, regular swimming and training sessions help maintain physical health and endurance. By working as a lifeguard, I can fulfill a responsible role while enjoying an active summer by the poolside.

83. Which of the following technological developments has made the greatest impact on students' lives? • electronic books • online classes • smartphones

Option 1: I believe that smartphones have made the greatest impact on students' lives. Firstly, smartphones provide easy access to a wealth of information and educational resources. Students can quickly search for information, access e-books, and engage in self-directed learning. Secondly,

smartphones facilitate communication and collaboration among students and teachers. They enable instant messaging, online discussions, and group projects, promoting effective communication and enhancing the learning experience. For example, students can easily connect with peers and instructors for academic support and feedback. Smartphones have revolutionized how students learn, communicate, and access educational resources.

Option 2: I believe that online classes have made the greatest impact on students' lives. Firstly, online classes provide flexibility and convenience, allowing students to access education from anywhere at any time. This flexibility is especially beneficial for non-traditional students and those with other commitments. Secondly, online classes foster independent learning and self-discipline. Students must manage their time effectively, develop self-motivation, and take ownership of their education. For example, online discussions and assignments encourage active engagement and critical thinking. Online classes have transformed the traditional classroom model and opened up new educational opportunities for students.

Option 3: I believe that electronic books have made the greatest impact on students' lives. Firstly, electronic books provide students with easy access to a vast library of resources in a compact digital format. They eliminate the need for physical books and reduce the environmental impact of paper production. Secondly, electronic books offer interactive features like highlighting, note-taking, and search functions, enhancing the reading experience and facilitating efficient studying. For example, students can quickly search for specific information within a book or create digital annotations for future reference. Electronic books have revolutionized how students consume and interact with educational materials.

84. If you are going to choose a roommate, which of the following qualities is the most important to you? • Cleanliness • Friendliness • Quietness

Option 1: If I were to choose a roommate, cleanliness would be the most important quality to me. Firstly, a clean living environment promotes physical well-being and hygiene. It ensures a comfortable and healthy space for both roommates. Secondly, cleanliness fosters a sense of respect and consideration for shared spaces. For example, maintaining cleanliness in the common areas reduces conflicts and promotes a harmonious living environment. By prioritizing cleanliness, I can create a conducive living environment that promotes well-being and positive roommate dynamics.

Option 2: If I were to choose a roommate, friendliness would be the most important quality to me. Firstly, a friendly roommate contributes to a positive and welcoming living atmosphere. It facilitates open communication, understanding, and the development of a supportive relationship. Secondly, a friendly roommate encourages social interaction and the building of meaningful connections. For example, a friendly roommate may initiate conversations, activities, and outings, fostering a sense of belonging and friendship. By prioritizing friendliness, I can create a comfortable and inclusive living environment with a potential for long-lasting friendships.

Option 3: If I were to choose a roommate, quietness would be the most important quality to me. Firstly, a quiet roommate respects the need for a peaceful and conducive living environment for studying and relaxation. It promotes focus and productivity. Secondly, a quiet roommate reduces noise disruptions, allowing for better sleep and rest. For example, a quiet roommate would be mindful of noise levels during quiet hours. By prioritizing quietness, I can create a calm and tranquil living space that supports academic pursuits and overall well-being.

85. Which would you prefer: doing exercise every day or only when you are free?

Option 1: I prefer doing exercise every day. Firstly, regular exercise promotes physical health and well-being. It helps maintain a healthy weight, strengthens the immune system, and improves cardiovascular fitness. Secondly, daily exercise establishes a routine and discipline, ensuring consistent engagement in physical activity. For example, setting aside dedicated time each day for exercise helps prioritize personal health and ensures regular engagement in fitness activities. By choosing to do exercise every day, I prioritize my physical health and create a sustainable habit for long-term well-being.

Option 2: I prefer doing exercise only when I am free. Firstly, this allows flexibility in scheduling exercise around other commitments and responsibilities. It ensures that exercise does not become an additional source of stress or time constraint. Secondly, having the freedom to exercise when I am free allows for spontaneity and variety in my fitness routine. For example, I can choose different activities or sports based on my mood or availability. By opting to exercise when I am free, I maintain a balanced lifestyle and enjoy the benefits of physical activity without rigid constraints.

86. Do you agree or disagree that it is important for young people to learn some skills like cooking, sewing and taking care of children?

Option 1: I agree that it is important for young people to learn skills like cooking, sewing, and taking care of children. Firstly, learning cooking skills enables young people to develop healthy eating habits and take care of their nutritional needs. It promotes self-sufficiency and empowers them to make informed food choices. Secondly, learning sewing skills promotes creativity, resourcefulness, and sustainability. It allows young people to mend and customize their clothing, reducing waste and embracing a more environmentally friendly lifestyle. Lastly, learning to take care of children fosters empathy, responsibility, and essential caregiving skills, preparing young people for future family roles or careers in childcare.

Option 2: I disagree that it is important for young people to learn skills like cooking, sewing, and taking care of children. Firstly, in today's fast-paced society, there are readily available alternatives for cooking and sewing, such as pre-packaged meals and ready-to-wear clothing. Young people can

prioritize other essential skills or focus on their academic studies. Secondly, taking care of children is a personal choice and may not be relevant to everyone's future aspirations or lifestyles. It is more important for young people to develop skills that align with their interests and career goals, such as technology or entrepreneurship.

Option 3: I partially agree that it is important for young people to learn skills like cooking, sewing, and taking care of children. While these skills can be valuable, their importance may vary depending on individual circumstances and interests. Firstly, learning cooking skills can promote independence, health, and the ability to prepare nutritious meals. Sewing skills can foster creativity and self-sufficiency, allowing young people to express themselves and customize their belongings. However, the importance of learning to take care of children depends on personal goals and aspirations. It may be relevant for those interested in pursuing careers in education or childcare but not as critical for others.

87. Which of the following choice do you think has the greatest impact on environmental protection? • Governmental regulations • Environmental awareness groups • Individual efforts

Option 1: I believe that governmental regulations have the greatest impact on environmental protection. Firstly, government regulations can enforce strict environmental standards and policies, ensuring that industries and individuals comply with environmentally friendly practices. This can lead to significant reductions in pollution and harmful activities. Secondly, governments have the authority and resources to implement large-scale initiatives, such as renewable energy programs and conservation projects, which can have far-reaching positive effects on the environment. For example, implementing regulations on emissions can reduce air pollution and promote a cleaner and healthier environment.

Option 2: I believe that environmental awareness groups have the greatest impact on environmental protection. Firstly, these groups raise public awareness about environmental issues through education and advocacy, creating a sense of urgency and responsibility among individuals. They play a crucial role in educating the public about sustainable practices and promoting environmental stewardship. Secondly, environmental awareness groups often lead grassroots movements, organizing protests and campaigns to influence public opinion and pressure governments and businesses to adopt environmentally friendly policies. By mobilizing communities and fostering collective action, these groups can drive significant change and promote environmental protection.

Option 3: I believe that individual efforts have the greatest impact on environmental protection. Firstly, individual actions, such as reducing waste, conserving energy, and practicing sustainable consumption, can collectively make a significant difference in preserving the environment. Small lifestyle changes, when adopted by a large number of individuals, can have a substantial cumulative effect. Secondly, individual efforts can inspire others and create a ripple effect of positive change.

For example, individuals who adopt sustainable practices in their daily lives can influence their friends, family, and communities to do the same. By taking responsibility and making conscious choices, individuals can contribute to environmental protection.

88. Do you agree or disagree with the following statement? Schools need to encourage students to be more creative and use imagination to be successful person.

Option 1: I agree with the statement that schools need to encourage students to be more creative and use their imagination to become successful individuals. Firstly, creativity promotes problem-solving skills, enabling students to tackle challenges with innovative solutions. Secondly, imagination nurtures a sense of curiosity and exploration, leading to a deeper understanding of the world. For example, students who engage in creative projects develop critical thinking abilities and become more adaptable to new situations.

Option 2: I disagree with the statement that schools need to encourage students to be more creative and use their imagination to be successful individuals. Firstly, success can be achieved through a focus on academic knowledge and technical skills rather than creativity. Secondly, the current education system often prioritizes standardized testing and conformity, leaving little room for creative pursuits. For example, students may be better served by mastering foundational knowledge and skills in subjects like math and science, which are crucial for success in specialized fields.

Option 3: I partially agree with the statement that schools need to encourage students to be more creative and use their imagination to be successful individuals. Firstly, creativity and imagination can enhance problem-solving skills and innovative thinking, which are valuable for success in various domains. However, schools should also prioritize teaching practical skills and knowledge that are directly applicable to future careers. For example, while creativity may be important for some professions, others may require technical expertise or specialized training. Striking a balance between creativity and practicality can better prepare students for success in their chosen paths.

89. Do you agree or disagree with the following statement? It is more important to maintain relationship with family members than with friends.

Option 1: I agree with the statement that it is more important to maintain relationships with family members than with friends. Firstly, family provides unconditional love and support, forming the foundation of our emotional well-being. Maintaining strong family bonds contributes to a sense of belonging and security. Secondly, family members have a shared history and understanding that goes beyond friendship. For example, during challenging times, family members are often the first to offer help and guidance. By prioritizing family relationships, we nurture a support system that is integral to our overall happiness and personal growth.

Option 2: I disagree with the statement that it is more important to maintain relationships with family members than with friends. Firstly, friends can provide a unique perspective and offer diverse experiences, contributing to personal growth and development. Friendships allow for shared interests, hobbies, and activities that may not be present within the family dynamic. Secondly, friends can become a chosen family, providing support, companionship, and emotional connection. For example, friends can offer unbiased advice and understanding during challenging times. By maintaining strong friendships, we broaden our social networks and enrich our lives with different perspectives and experiences.

Option 3: I believe that both family and friends are equally important, and it is crucial to maintain relationships with both. Firstly, family relationships provide a sense of belonging, history, and support. They form the foundation of our identity and provide emotional stability. Secondly, friendships offer companionship, shared interests, and social support. Friends can provide a different perspective, offer advice, and contribute to personal growth. By nurturing relationships with both family and friends, we create a balanced support system that enhances our overall well-being and contributes to a fulfilling life.

90. Some people get to know a person by the first observation while others prefer to get to know a person by long time observation. Which one do you prefer? Explain why.

Option 1: I prefer getting to know a person through long-time observation. Firstly, it allows for a more comprehensive understanding of an individual's character, values, and behavior. Long-term observation provides the opportunity to witness how a person interacts with others, handles various situations, and demonstrates consistency over time. Secondly, it helps to build trust and establish deeper connections. Taking the time to observe allows for a gradual development of rapport and familiarity, creating a solid foundation for meaningful relationships. For example, investing time in understanding someone's long-term behavior can help in determining their trustworthiness and compatibility.

Option 2: I prefer getting to know a person through first observations. Firstly, initial observations can offer valuable insights into a person's demeanor, body language, and initial impressions. These immediate cues can provide a quick assessment of compatibility and compatibility. Secondly, first observations allow for efficient decision-making and time management. By relying on initial observations, one can quickly gauge whether a person aligns with their values, interests, or needs. For example, observing how a person interacts with others in a social setting can provide early indications of shared values or potential conflicts. By relying on first observations, one can make swift and informed decisions about potential connections.

Option 3: I believe a combination of both first observations and long-time observations is ideal for getting to know a person. Firstly, initial observations provide valuable initial impressions and

intuition, giving a glimpse into a person's character. However, long-time observations offer a deeper understanding of a person's values, behavior, and consistency over time. By combining both approaches, one can obtain a more balanced and comprehensive understanding of an individual. This enables more informed decision-making and facilitates the development of meaningful and lasting relationships based on both initial impressions and long-term compatibility.

91. Do you agree or disagree the following statement? Older doctors are more knowledgeable than young doctors? Use specific details and examples to explain why.

Option 1: I agree with the statement that older doctors are more knowledgeable than young doctors. Firstly, older doctors have accumulated more years of experience and exposure to various medical cases, which enhances their knowledge base. They have encountered a wider range of medical conditions and treatment approaches, allowing them to draw upon a wealth of practical knowledge. Secondly, older doctors often have a deeper understanding of the historical development of medical practices and can provide valuable insights based on their years in the field. For example, they may have witnessed the evolution of medical technology and advancements in treatment options. By leveraging their extensive experience, older doctors can offer valuable expertise and guidance to their patients.

Option 2: I disagree with the statement that older doctors are more knowledgeable than young doctors. Firstly, younger doctors often have access to the latest medical research and advancements, keeping them at the forefront of medical knowledge. They are more likely to be trained in the latest technologies and treatment modalities. Secondly, younger doctors may possess a fresh perspective and enthusiasm for learning, driving them to continuously update their knowledge and skills. For example, they may actively participate in conferences, research projects, and continuous medical education programs. By staying up-to-date with current practices, young doctors can provide cutting-edge and evidence-based care to their patients.

Option 3: I believe that both older and young doctors can possess valuable knowledge and expertise. While older doctors may have accumulated years of experience, younger doctors bring a fresh perspective and access to the latest medical advancements. Each group has unique strengths and can complement each other in providing comprehensive care. By collaborating and exchanging knowledge, both older and young doctors can contribute to the field of medicine and ensure the best outcomes for their patients. Ultimately, it is the combination of experience, ongoing learning, and a commitment to staying abreast of new developments that leads to effective and knowledgeable healthcare professionals.

92. Do you agree or disagree with the following statement? For being successful in business, being outgoing and friendly is very important.

Option 1: I agree with the statement that being outgoing and friendly is very important for being successful in business. Firstly, being outgoing allows individuals to establish connections and build relationships with clients, customers, and business partners. Networking and effective communication skills are key components of business success. Secondly, a friendly demeanor helps create a positive and welcoming atmosphere, fostering trust and rapport with others. For example, a friendly approach can enhance customer satisfaction and loyalty, leading to repeat business and referrals. By being outgoing and friendly, individuals can enhance their professional relationships and increase their chances of success in the business world.

Option 2: I disagree with the statement that being outgoing and friendly is very important for being successful in business. Firstly, success in business can be achieved through a variety of qualities and skills, such as expertise, innovation, and strategic thinking. While being outgoing and friendly can facilitate certain aspects of business interactions, it is not the sole determinant of success. Secondly, different business sectors and roles may require different personality traits and skills. For example, an introverted individual may excel in analytical roles or behind-the-scenes operations. Success in business should be evaluated based on a combination of factors rather than solely on outgoingness and friendliness.

Option 3: I believe that being outgoing and friendly can be beneficial but is not the only factor for success in business. Firstly, while being outgoing can aid in networking and establishing connections, success also requires other skills such as problem-solving, leadership, and adaptability. It is the combination of various qualities and abilities that contributes to overall success in business. Secondly, success in business can be defined differently based on individual goals and industry-specific requirements. Some business endeavors may prioritize technical expertise or innovation over social skills. Ultimately, a well-rounded set of skills and characteristics is essential for sustained success in the dynamic and competitive business environment.

93. Do you agree or disagree with the following statement? Students learn more when teachers assign a lot of homework. Use specific details and examples to explain why.

Option 1: I agree with the statement that students learn more when teachers assign a lot of homework. Firstly, homework provides opportunities for independent practice and consolidation of learning. It allows students to apply concepts learned in class and reinforce their understanding. Secondly, homework fosters self-discipline, time management, and responsibility. It encourages students to develop good study habits and take ownership of their learning. For example, completing assignments and engaging with the material outside of class can deepen understanding and promote retention of knowledge. By assigning a lot of homework, teachers provide students with additional practice and opportunities for growth.

Option 2: I disagree with the statement that students learn more when teachers assign a lot of homework. Firstly, excessive homework can lead to stress, burnout, and decreased motivation. It may overload students with repetitive or excessive tasks, compromising their overall well-being. Secondly, the quality of homework matters more than the quantity. Meaningful and targeted assignments that align with learning objectives can be more effective in promoting understanding and retention. For example, engaging students in project-based or interactive assignments that require critical thinking and creativity can be more beneficial than simply assigning large volumes of repetitive tasks. By focusing on the quality and purpose of homework, teachers can maximize learning outcomes.

Option 3: I believe that the impact of assigning a lot of homework on student learning depends on various factors. Firstly, the type of homework and its alignment with learning goals determine its effectiveness. Meaningful and well-designed assignments can enhance understanding and promote independent learning. However, excessive and repetitive tasks may lead to diminishing returns. Secondly, students have different learning styles and needs. Some may benefit from more practice and reinforcement, while others may require a more diverse range of learning experiences. By tailoring homework assignments to individual student needs and balancing the workload, teachers can optimize learning opportunities and outcomes.

94. Do you agree or disagree with the following statement? A boss or a manager should not form close friendship with their employees.

Option 1: I agree with the statement that a boss or a manager should not form close friendships with their employees. Firstly, maintaining professional boundaries promotes fairness and objectivity in the workplace. It ensures that decisions regarding promotions, evaluations, and disciplinary actions are based on merit and performance rather than personal relationships. Secondly, establishing a professional distance fosters a healthy work environment and reduces the potential for favoritism or conflicts of interest. For example, maintaining a professional relationship allows for clear communication and effective leadership. By prioritizing professionalism, bosses and managers can create a productive and harmonious work atmosphere.

Option 2: I disagree with the statement that a boss or a manager should not form close friendships with their employees. Firstly, fostering positive relationships based on trust and mutual respect can enhance team morale and cooperation. It can create a sense of camaraderie and loyalty among employees, leading to increased job satisfaction and productivity. Secondly, close friendships can promote open communication and empathy, allowing for better understanding of employees' needs and concerns. For example, a manager who develops close friendships may be more attuned to the well-being and work-life balance of their team members. By forming genuine connections, bosses and managers can create a supportive and engaged work environment.

Option 3: I believe that the ideal approach lies in striking a balance between maintaining professionalism and forming meaningful connections with employees. While it is important for bosses and managers to maintain a level of professionalism, developing respectful and cordial relationships with employees can foster a positive work culture. This involves demonstrating empathy, being approachable, and showing genuine interest in the well-being and professional growth of employees. By establishing a supportive and professional environment, bosses and managers can cultivate trust and effective communication, leading to enhanced job satisfaction and productivity.

95. Do you agree or disagree? Government should not allow violence and bad language in television programs.

Option 1: I agree with the statement that the government should not allow violence and bad language in television programs. Firstly, television plays a significant role in shaping societal norms and values, especially among young audiences. Allowing violence and bad language can promote a culture of aggression and undermine the development of empathy and respectful communication. Secondly, television programs should uphold certain standards of decency and provide a safe and appropriate viewing environment for all audiences. By regulating content, the government can protect the well-being and moral development of its citizens.

Option 2: I disagree with the statement that the government should not allow violence and bad language in television programs. Firstly, freedom of expression is a fundamental right, and artistic creativity should not be stifled by excessive censorship. It is essential to strike a balance between artistic freedom and responsible content creation. Secondly, viewers have the choice to exercise parental control and make informed decisions about the programs they watch. By empowering individuals to make their own choices, the government respects personal freedom while still encouraging responsible media consumption.

Option 3: I believe that the government should place restrictions on violence and bad language in television programs to ensure the well-being and moral values of society. While artistic freedom is important, there is a need to protect vulnerable audiences, especially children, from harmful and inappropriate content. By setting guidelines and regulations, the government can promote responsible media production and consumption. This approach respects the importance of freedom of expression while prioritizing the welfare of citizens and upholding societal values.

96. Which type of professor do you prefer: an interesting professor with a strict grading policy or a boring professor with a loose grading policy?

Option 1: I prefer an interesting professor with a strict grading policy. Firstly, an interesting professor can make the learning experience engaging and enjoyable, fostering a positive classroom

environment. Their passion for the subject matter can inspire students and enhance their motivation to learn. Secondly, a strict grading policy ensures that students are held to high academic standards, promoting a strong work ethic and a sense of achievement. It encourages students to strive for excellence and pushes them to reach their full potential. By combining an interesting teaching style with a strict grading policy, students can have an enriching and challenging learning experience.

Option 2: I prefer a boring professor with a loose grading policy. Firstly, a boring professor with a loose grading policy may provide a less engaging classroom experience, but it allows for flexibility and reduced stress in terms of academic performance. It provides a relaxed learning environment that allows students to explore the subject matter at their own pace. Secondly, a loose grading policy may provide students with more opportunities for experimentation and creativity without the fear of harsh consequences for mistakes. This can foster a more relaxed and open-minded approach to learning, allowing students to explore their interests more freely.

Option 3: I believe that the ideal professor combines both interesting teaching methods and a fair grading policy. An interesting professor can make the subject matter come alive, capturing students' attention and making learning enjoyable. Simultaneously, a fair grading policy ensures that students are assessed based on their understanding and effort, providing a clear framework for academic progress. By finding a balance between engagement and accountability, students can benefit from both an interesting learning experience and a fair evaluation system.

97. Do you agree or disagree with the following statement? It is easier to be an adult than it is to be a child.

Option 1: I agree with the statement that it is easier to be an adult than it is to be a child. Firstly, adults have more control over their lives and can make independent decisions. They have the ability to choose their career, manage their finances, and make important life choices. Secondly, adults have more life experience and knowledge to navigate challenges and solve problems. They have acquired skills and expertise over time, which can help them handle various situations. By virtue of their autonomy and life experience, adults may find it easier to navigate the complexities of life compared to children.

Option 2: I disagree with the statement that it is easier to be an adult than it is to be a child. Firstly, children are not burdened with the responsibilities and pressures that adults face, such as financial obligations and work-related stress. They can focus on their education and personal growth without the additional complexities of adult life. Secondly, children have a natural curiosity and adaptability, which allows them to learn and explore the world with a sense of wonder. They have fewer societal expectations and can embrace creativity and imagination more freely. The innocence and simplicity of childhood can make it a relatively carefree and enjoyable phase of life.

Option 3: I believe that comparing the ease of being an adult versus being a child is subjective and depends on individual circumstances and perspectives. Each life stage comes with its own set of challenges and joys. While adults have more responsibilities, they also have more control over their choices and greater independence. On the other hand, children may face challenges related to their physical and emotional development, but they also enjoy the carefree nature of childhood. The experience of being an adult or a child varies for each individual, and it is difficult to make a generalized statement about which is easier.

98. Your university will sponsor one of the following activities for students: • an outdoor camp night • a music festival to experience the local culture • a computer game contest in the dorm. Which do you think is the best and why?

Option 1: I believe that an outdoor camp night would be the best activity sponsored by the university. Firstly, it provides an opportunity for students to connect with nature and engage in outdoor activities, promoting physical and mental well-being. It offers a break from academic routines and allows students to unwind and relax. Secondly, the camp night fosters a sense of community and camaraderie among students. It encourages social interaction, teamwork, and the development of friendships. By organizing an outdoor camp night, the university can create a memorable and enriching experience for students.

Option 2: I believe that a music festival to experience the local culture would be the best activity sponsored by the university. Firstly, it offers students the chance to immerse themselves in the local culture and appreciate the diversity of musical expressions. It can foster cultural understanding and appreciation among students from different backgrounds. Secondly, the music festival provides a platform for local artists and musicians to showcase their talent and gain recognition. It promotes creativity and artistic expression within the university community. By organizing a music festival, the university can create a vibrant and inclusive environment for students.

Option 3: I believe that a computer game contest in the dorm would be the best activity sponsored by the university. Firstly, it caters to the interests and preferences of a significant number of students who enjoy gaming. It provides an opportunity for students to showcase their skills, compete, and engage in friendly competition. Secondly, the computer game contest promotes critical thinking, problem-solving, and strategic decision-making. It can foster a sense of healthy competition and enhance cognitive abilities. By organizing a computer game contest, the university can create a fun and engaging activity that appeals to a specific segment of the student population.

99. What kind of activity do you think that children do to cultivate a sense of responsibility? • keeping a pet • doing house chores • helping take care of their younger sisters or brothers. Use specific details and examples in your response.

Option 1: I believe that keeping a pet can help cultivate a sense of responsibility in children. Taking care of a pet requires regular feeding, grooming, and providing a safe environment. Children learn the importance of being consistent and reliable in fulfilling these responsibilities. For example, they have to ensure that the pet is fed at the appropriate times, taken for walks, and given attention and care. This experience teaches children about empathy, compassion, and the importance of meeting the needs of others.

Option 2: I believe that doing house chores can help cultivate a sense of responsibility in children. Assigning age-appropriate tasks such as cleaning their room, doing the dishes, or helping with laundry teaches children the importance of contributing to the household and taking ownership of their living environment. By completing these tasks regularly, children learn the value of organization, cleanliness, and teamwork. They develop a sense of accountability and understand that their actions contribute to the well-being of the family as a whole.

Option 3: I believe that helping take care of younger siblings can help cultivate a sense of responsibility in children. Assisting with the care of younger siblings, such as feeding, playing, or helping with homework, instills a sense of responsibility and caregiving. Children learn to prioritize the needs of others, develop patience and empathy, and understand the importance of being reliable and attentive. For example, they may take on the responsibility of ensuring their younger siblings are safe, entertained, and provided with necessary support.

100. Some people prefer to solve a challenge all by themselves. Others prefer to depend on other people's help. Which do you prefer and why? Include details and examples in your explanation.

Option 1: I prefer to solve a challenge all by myself. Firstly, tackling a challenge independently allows me to develop problem-solving skills and self-reliance. It enables me to think critically, explore different perspectives, and come up with creative solutions. For example, when facing a difficult academic task, I prefer to study on my own, conduct research, and develop my own understanding of the subject matter. This process enhances my learning and builds my confidence. Secondly, solving challenges independently fosters a sense of personal accomplishment and growth. It allows me to take ownership of my achievements and build resilience in the face of adversity.

Option 2: I prefer to depend on other people's help when solving a challenge. Firstly, seeking assistance from others can bring fresh insights and perspectives. Collaborating with peers or seeking guidance from mentors allows me to tap into a collective pool of knowledge and expertise. For example, when working on a complex group project, I value the input and collaboration of team members as it can lead to more comprehensive and innovative solutions. Secondly, depending on others' help fosters teamwork and collaboration skills, which are vital in

many aspects of life. It teaches me the importance of effective communication, compromise, and leveraging diverse strengths for collective success.

Option 3: I believe that the best approach is a combination of both. Some challenges may require independent thinking and problem-solving, while others benefit from collaboration and assistance. It is essential to assess each situation and determine the most effective approach. For instance, when working on personal projects or pursuing individual goals, I may choose to solve challenges independently. However, when facing complex or multifaceted tasks that require diverse expertise, I am open to seeking help from others. This flexible approach allows me to adapt to different situations and maximize the outcomes of my efforts.

101. When students have questions about an assignment for class, some prefer to ask their professors for help, while others would rather ask fellow students. Which do you prefer?

Option 1: I prefer asking my professors for help. Firstly, professors possess extensive knowledge and expertise in their respective fields, making them valuable sources of information. Their guidance ensures accurate and reliable answers to my queries. For example, when I had questions about a complex research assignment, my professor clarified the requirements and guided me through the process. Secondly, seeking assistance from professors allows me to build a professional relationship and engage in meaningful academic discussions. Additionally, professors can provide valuable insights and advice beyond the immediate assignment, enhancing my overall understanding of the subject matter.

Option 2: I prefer asking fellow students for help. Firstly, students often share similar perspectives and experiences, making them relatable sources of support. They may have encountered similar challenges and can provide practical insights and tips. For instance, when I had questions about a math problem, a classmate explained a different approach that helped me understand the concept better. Secondly, discussing assignments with fellow students promotes collaboration and peer learning. It creates an environment of shared knowledge and encourages active participation, leading to a deeper understanding of the material.

Option 3: I prefer a combination of asking professors and fellow students for help. Each has their own strengths and expertise. Depending on the nature of the question, I might seek clarification from my professor to ensure accuracy, and then discuss it with classmates to gain different insights and approaches. This allows me to benefit from both the professional guidance of professors and the collaborative learning environment fostered by fellow students. By utilizing both resources, I can enhance my understanding and improve my academic performance.

102. Some people prefer to have their schedules fully and specifically arranged. Some people, however, prefer to leave themselves a lot of free time. Which do you prefer and why?

Option 1: I prefer to have my schedule fully and specifically arranged. Firstly, a structured schedule helps me stay organized and maximize my productivity. By planning and allocating specific time slots for various tasks and activities, I can effectively manage my time and ensure that all important commitments are met. This allows me to maintain a sense of control and reduces the likelihood of procrastination. Secondly, a well-structured schedule promotes discipline and accountability. It enables me to prioritize my responsibilities and allocate sufficient time for important tasks, while also allowing for breaks and leisure activities. With a clear plan, I can achieve a balance between productivity and self-care, leading to better overall well-being and success.

Option 2: I prefer to leave myself a lot of free time in my schedule. Firstly, it allows for flexibility and spontaneity, giving me the freedom to pursue new opportunities or take breaks when needed. This approach reduces the feeling of being overwhelmed and allows for relaxation and rejuvenation. Secondly, having free time enables me to explore my creativity and engage in hobbies or interests that are not necessarily bound by a strict schedule. For example, I can spend extra time pursuing artistic endeavors or engaging in recreational activities that bring me joy and fulfillment. This flexibility fosters a sense of balance and promotes overall well-being.

Option 3: I prefer finding a balance between a fully arranged schedule and free time. I acknowledge the importance of structure and productivity that comes with a well-planned schedule. However, I also recognize the need for flexibility and personal time. By maintaining a structured schedule for essential tasks and commitments, I can ensure productivity and efficiency. At the same time, I allow myself pockets of free time for spontaneous activities, relaxation, and personal growth. This approach provides a sense of control over my time while also allowing for opportunities to explore new experiences and enjoy leisure activities.

103. Do you agree or disagree with the following statement? Students should do some part-time jobs before they attend college. Please use specific reasons and examples to support your answer.

Option 1: I agree that students should do some part-time jobs before they attend college. Firstly, part-time jobs provide valuable real-world experience and practical skills that cannot be gained solely through academic studies. Students develop a strong work ethic, time management skills, and the ability to balance responsibilities. For example, working in a retail setting teaches customer service and teamwork, while a tutoring job hones communication and leadership skills. Secondly, part-time jobs can help students become financially independent and learn the value of money. Earning their own income instills a sense of responsibility and teaches financial literacy, preparing students for the financial demands of college life.

Option 2: I disagree that students should do some part-time jobs before they attend college. Firstly, students already face academic pressure and the transition from high school to college can be challenging. Adding the burden of a part-time job may lead to increased stress and affect their ability to perform well academically. Secondly, the college experience is a time for students to focus on their studies, explore their interests, and engage in extracurricular activities. By not working during this period, students can fully immerse themselves in their education and take advantage of the resources and opportunities available on campus.

Option 3: I believe that it depends on the individual circumstances and goals of the student. Some students may benefit from part-time jobs before college as they develop important life skills and gain financial independence. However, for others, focusing solely on academics and extracurricular activities may be more beneficial to achieving their goals. Ultimately, the decision should be based on the student's ability to manage their time effectively, maintain academic performance, and prioritize their personal and educational needs.

104. Do you think it is important for people to learn about local history?

Option 1: I think it is important for people to learn about local history. Firstly, understanding local history provides a sense of identity and belonging. It allows individuals to connect with their community and develop a deeper appreciation for their roots. For example, learning about significant events or figures in local history can foster a sense of pride and cultural awareness. Secondly, studying local history promotes a better understanding of societal progress and challenges. It provides valuable insights into how communities have evolved over time and the lessons that can be learned from past experiences. This knowledge can inform present decision-making and contribute to the preservation of local heritage.

Option 2: I believe that learning about local history is not essential. Firstly, individuals may prioritize other areas of study or personal interests that align more closely with their career goals or passions. For example, someone pursuing a career in science may not see the direct relevance of studying local history to their chosen field. Secondly, in the age of globalization and interconnectedness, focusing solely on local history may limit one's understanding of broader historical trends and global perspectives. It may be more valuable to study world history or specific topics with wider implications that can foster a more comprehensive understanding of the world.

Option 3: I think it depends on the individual's personal interests and circumstances. For some individuals, learning about local history may hold great significance and provide a deeper understanding of their community and heritage. It can be an enriching experience that promotes cultural appreciation and community engagement. However, for others, their interests and priorities may lie in different areas, and they may find greater value in exploring other subjects of personal

significance or relevance to their chosen career path. Ultimately, the importance of learning about local history can vary based on individual perspectives and goals.

105. A big corporation is planning to invest in a factory in your hometown. This factory will create many job opportunities for people, but also will bring a lot of pollution at the same time. Do you agree or disagree with the plan?

Option 1: I agree with the plan to invest in a factory in my hometown. While the factory may bring some pollution, the creation of job opportunities is a significant benefit. The increased employment opportunities can stimulate the local economy, reduce unemployment rates, and improve the standard of living for many individuals in the community. Additionally, with proper regulations and environmental management, the pollution can be mitigated through sustainable practices, such as implementing advanced technology and emission control measures.

Option 2: I disagree with the plan to invest in a factory in my hometown. Although the job opportunities created by the factory are beneficial, the negative impact of pollution on the environment and public health cannot be overlooked. The pollution may harm the ecosystem, contribute to air and water pollution, and pose health risks to the community. Instead, alternative investments that prioritize environmentally friendly industries or renewable energy sources should be considered, ensuring sustainable development while still providing job opportunities for the local population.

Option 3: I believe that finding a balance between job creation and environmental impact is crucial. While the factory may bring job opportunities, steps should be taken to mitigate its potential pollution. Stricter environmental regulations, investment in cleaner technologies, and regular monitoring can help minimize the negative effects on the environment. It is essential for the corporation to prioritize sustainability and actively work towards reducing pollution while providing employment opportunities for the local population. This way, both economic growth and environmental protection can be achieved simultaneously.

106. Some people prefer talking about their opinion immediately when they get the topic, while others prefer to wait and listen to others before they talk about their own opinion. Which one do you prefer and why?

Option 1: I prefer talking about my opinion immediately when I get the topic. Firstly, sharing my opinion right away allows me to express my initial thoughts and contribute to the discussion from the start. It enables me to actively engage with the topic and provide my unique perspective. For example, in a group discussion, sharing my opinion immediately can stimulate further conversation and generate diverse viewpoints. Secondly, expressing my thoughts early on helps me maintain a

sense of authenticity and avoid being influenced by others' opinions. It allows me to articulate my ideas freely and confidently.

Option 2: I prefer waiting and listening to others before talking about my own opinion. Firstly, by patiently listening to others' viewpoints, I gain a broader understanding of the topic. It allows me to consider different perspectives, gather more information, and evaluate the merits of various arguments. This approach promotes a more comprehensive and well-rounded discussion. Secondly, waiting to share my opinion enables me to reflect and refine my thoughts. It gives me the opportunity to critically analyze the information presented and formulate a more informed and thoughtful response. By actively listening, I can contribute more effectively to the conversation.

Option 3: I believe that it depends on the specific situation and context. Sometimes, sharing my opinion immediately is beneficial to initiate a discussion or express a strong viewpoint. Other times, waiting and listening to others' opinions first allows me to gather insights and contribute in a more collaborative manner. The approach I choose depends on the dynamics of the group, the complexity of the topic, and my level of familiarity with the subject matter. Adapting to different situations and being open to both immediate expression and patient listening enables me to engage effectively in various conversations.

107. Do you agree or disagree with the statement? It's never acceptable to interrupt other people when they are talking.

Response 1:

I agree that it's never acceptable to interrupt others while they are speaking. Firstly, interrupting shows a lack of respect for the speaker and disrupts the flow of conversation. Secondly, it hinders effective communication as the speaker's ideas may not be fully expressed. For example, during a business meeting, interrupting a colleague may lead to misunderstandings. In a social setting, interrupting can make others feel disregarded. Therefore, it's crucial to patiently listen and wait for our turn to speak, ensuring smooth and respectful communication.

Response 2:

I strongly believe that interrupting others while they are talking is never acceptable. Firstly, interrupting displays rudeness and disregard for the speaker's thoughts and opinions. Secondly, it hampers effective communication and can create misunderstandings. For instance, during a classroom discussion, interrupting a classmate may prevent them from expressing their ideas clearly. In a family gathering, interrupting someone can be seen as disrespectful. Therefore, it is important to patiently listen and allow others to speak without interruption, fostering better communication and understanding.

Response 3:

I completely agree with the statement that interrupting others while they are speaking is never acceptable. Firstly, interrupting is impolite and shows a lack of respect for the speaker's perspective. Secondly, it disrupts the natural flow of conversation and can hinder effective communication. For instance, interrupting a friend during a heartfelt conversation can make them feel unheard and undervalued. In a professional setting, interrupting a colleague may hinder collaboration. Thus, it is crucial to patiently wait for our turn to speak, maintaining a respectful and harmonious environment for communication.

108. One of your friends decided to study more courses in order to graduate one year earlier. Do you agree or disagree?

Agree response:

I agree with my friend's decision to study more courses and graduate earlier. Firstly, it saves time and allows for an early entry into the job market, increasing career prospects. Secondly, it reduces the financial burden by eliminating one year of tuition and living expenses. For example, my friend will have a head start in their career and start earning sooner, contributing to financial stability. Therefore, studying additional courses to graduate earlier can offer practical advantages and pave the way for a successful future.

Disagree response:

I disagree with the idea of taking more courses to graduate earlier. Firstly, it can lead to excessive workload and stress, which may harm academic performance. Secondly, it limits opportunities for personal growth, such as engaging in extracurricular activities or internships. For instance, my friend may miss out on valuable experiences that contribute to a well-rounded education. Therefore, it is important to maintain a balanced approach to studies, considering both academic and personal development for a fulfilling college experience.

Both-sided response:

The decision to study more courses to graduate earlier can be viewed from different perspectives. On one hand, it offers advantages like saving time and reducing expenses, allowing for an early start in the job market. On the other hand, it may lead to increased stress and compromise personal growth opportunities. Striking a balance is crucial, considering factors like workload, mental well-being, and the value of holistic education. It is essential to carefully assess individual circumstances and make a decision that aligns with one's goals and priorities.

109. Your university decided to allow local communities to attend classes on campus; they could enter into the class but can't ask questions and don't have assignments. Do you agree or not?

Agree response:

I agree with my university's decision to allow local communities to attend classes on campus without the ability to ask questions or have assignments. Firstly, it promotes community engagement and fosters a sense of inclusivity. Secondly, it provides an opportunity for individuals to gain knowledge and exposure to higher education. For example, community members attending classes can enhance their understanding of various subjects. Therefore, this initiative strengthens the bond between the university and the local community, creating a mutually beneficial relationship.

Disagree response:

I disagree with the university's decision to allow local communities to attend classes on campus without the ability to ask questions or have assignments. Firstly, it may disrupt the learning environment, as community members not having assignments might not be fully invested in the class. Secondly, it could create inequality among students, as they have different privileges. For instance, it may lead to resentment among regular students who have to adhere to academic requirements. Therefore, it is important to maintain consistency and fairness in educational practices.

Both-sided response:

The decision to allow local communities to attend classes on campus without asking questions or having assignments has its pros and cons. On one hand, it promotes community engagement and provides access to education for a wider audience, fostering inclusivity. On the other hand, it may disrupt the learning environment and create inequality among students. Striking a balance is crucial, such as offering specific community-oriented programs or designated classes for community members while maintaining the academic integrity of regular classes. It is essential to consider the impact on both the university community and the local community to make an informed decision.

110. Do you agree or disagree? Physical exercise is more important for older people than young people.

Agree response:

I agree that physical exercise is more important for older people than young people. Firstly, regular exercise helps older individuals maintain strength, flexibility, and mobility, promoting better overall health. Secondly, it can reduce the risk of age-related health issues such as heart disease, osteoporosis, and cognitive decline. For example, engaging in activities like walking or swimming can improve cardiovascular fitness and preserve cognitive function. Therefore, prioritizing physical exercise in older age can enhance their quality of life and contribute to healthy aging.

Disagree response:

I disagree that physical exercise is more important for older people than young people. Firstly, both age groups benefit from physical activity for their overall health and well-being. Secondly, young individuals can establish healthy habits early on, preventing the onset of various health conditions in later years. For instance, regular exercise in youth can reduce the risk of obesity, diabetes, and cardiovascular diseases. Therefore, it is crucial to promote physical exercise among all age groups to maintain optimal health throughout the lifespan.

Both-sided response:

The importance of physical exercise varies between older and young people. On one hand, regular exercise is crucial for older individuals as it helps maintain strength, flexibility, and overall health, reducing the risk of age-related health issues. On the other hand, young people can benefit from physical activity by establishing healthy habits early on, preventing the onset of various health conditions. Therefore, while physical exercise holds importance for both age groups, the focus may differ based on specific needs and health considerations. Promoting a balanced approach to exercise that caters to the needs of all age groups is essential for overall well-being.

111. Do you agree or disagree with the following statement? It is acceptable that someone uses others' influence to get a job.

Agree response:

I disagree with the statement that it is acceptable for someone to use others' influence to get a job. Firstly, it undermines meritocracy and fair competition, as individuals should be hired based on their qualifications and abilities. Secondly, it can lead to a lack of diversity and hinder equal opportunities for all candidates. For example, someone using influence to secure a job may prevent a more deserving candidate from obtaining the opportunity. Therefore, it is important to uphold ethical practices in the job market and prioritize fair selection processes.

Disagree response:

I agree with the statement that it is acceptable for someone to use others' influence to get a job. Firstly, personal connections and networking play a significant role in career advancement. Secondly, utilizing the influence of others can help individuals access opportunities that may otherwise be inaccessible. For example, a recommendation from a respected professional can open doors and provide valuable exposure. Therefore, leveraging connections and influence can be a strategic approach to navigating the competitive job market and securing desirable positions.

Both-sided response:

The acceptability of using others' influence to get a job is a matter of perspective. On one hand, it can be seen as unfair, as it bypasses merit-based selection processes and may lead to nepotism or favoritism. On the other hand, personal connections and influential endorsements can provide valuable opportunities, especially in a highly competitive job market. Striking a balance is important, where merit and qualifications should be the primary factors in hiring decisions, while acknowledging the role that networking and influential connections can play in career advancement. Ethical considerations and transparency in recruitment processes are key to ensuring fairness and equal opportunities.

112. If you are an interviewer, which of the following aspects of the job seeker will you consider? Why? • Performance during the interview • Education • Work experience

Response 1:

As an interviewer, I would consider performance during the interview as the primary aspect. Firstly, it provides direct insights into the job seeker's communication skills, problem-solving abilities, and cultural fit within the organization. Secondly, it allows me to assess their enthusiasm and motivation for the role. For example, a candidate who demonstrates excellent communication skills and presents thoughtful responses during the interview is likely to excel in collaborative work environments. Therefore, performance during the interview serves as a reliable indicator of a candidate's potential for success.

Response 2:

If I were an interviewer, I would consider work experience as a significant aspect when evaluating job seekers. Firstly, work experience provides practical knowledge and skills relevant to the job, ensuring a smooth transition into the role. Secondly, it demonstrates the candidate's ability to handle job responsibilities and adapt to the work environment. For instance, a candidate with prior experience in a similar position can bring valuable insights and contribute to the team from day one. Therefore, work experience plays a crucial role in assessing a candidate's readiness for the job.

Response 3:

As an interviewer, I would prioritize education when evaluating job seekers. Firstly, education forms the foundation of knowledge and expertise required for the job. It demonstrates the candidate's ability to acquire and apply relevant concepts and theories. Secondly, it showcases the candidate's commitment and dedication to learning. For example, a candidate with a relevant degree in engineering shows the necessary technical understanding for an engineering role. Therefore, education serves as an essential criterion in assessing a candidate's qualifications and potential for growth in the position.

**113. Do you prefer to be friends with peers or friends of different ages?**

Response 1:

I prefer to be friends with peers who are of similar age. Firstly, having friends of the same age allows for shared experiences and relatability, fostering a deeper understanding and connection. Secondly, peers often have similar interests and hobbies, making it easier to engage in activities together. For example, bonding over common experiences like school or work can strengthen the friendship. Therefore, being friends with peers provides a sense of belonging and camaraderie, contributing to a fulfilling social life.

Response 2:

I prefer to have friends of different ages rather than being exclusively friends with peers. Firstly, friendships with individuals of different ages offer diverse perspectives and insights, enriching personal growth and expanding horizons. Secondly, intergenerational friendships promote learning and mentorship opportunities, where both parties can share knowledge and experiences. For instance, learning from the wisdom of an older friend or offering guidance to a younger friend can be mutually beneficial. Therefore, having friends of different ages fosters a well-rounded social network and facilitates continuous learning.

Response 3:

I appreciate the value of both friendships with peers and friendships with individuals of different ages. Being friends with peers provides a sense of camaraderie and relatability, which can be comforting and enjoyable. On the other hand, friendships with individuals of different ages offer unique perspectives and opportunities for personal growth. Therefore, having a diverse social circle that includes both peers and individuals of different ages can provide a well-rounded support system and enhance one's understanding of the world. Striking a balance between the two types of friendships allows for a rich and fulfilling social life.

114. Do you prefer to choose regular working hours or work more freely at home?

Response 1:

I prefer the flexibility of working more freely at home rather than adhering to regular working hours. Firstly, working remotely allows for a better work-life balance as it eliminates commuting time and offers the freedom to structure the day according to personal preferences. Secondly, it promotes increased productivity and focus, as individuals can create a comfortable and customized work environment. For example, working from home enables me to avoid distractions and allocate time

efficiently. Therefore, the flexibility of working remotely offers numerous benefits for productivity and overall well-being.

Response 2:

I prefer the structure of regular working hours over the freedom of working at home. Firstly, having set working hours helps establish a routine, enhancing time management skills and discipline. Secondly, it enables effective collaboration and communication with colleagues, fostering teamwork and productivity. For instance, being physically present in the office allows for spontaneous discussions and quick problem-solving. Therefore, adhering to regular working hours provides a structured environment that promotes efficient work processes and seamless coordination.

Response 3:

I see the value in both regular working hours and the flexibility of working at home. Regular working hours provide structure and a sense of routine, ensuring better time management and work-life balance. On the other hand, working freely at home offers the flexibility to create a personalized work environment and adapt working hours to individual preferences. Striking a balance between the two can be ideal, with a mix of regular working hours for effective collaboration and designated work-from-home days for increased focus and flexibility. This hybrid approach allows for both structure and freedom, maximizing productivity and well-being.

115. Some people think that the library should be quiet. Some people think that social activities should be provided for students to meet friends and have meetings. What do you think?

Response 1:

I believe that libraries should primarily maintain a quiet atmosphere. Firstly, a quiet environment in libraries allows for focused studying and concentration, enhancing productivity and academic performance. Secondly, it accommodates individuals who prefer solitude and silence for effective learning. For example, students can delve into their studies without distractions in a serene library environment. However, providing designated spaces for social activities elsewhere on campus can still facilitate student interactions and meetings, ensuring a balance between quiet study spaces and social engagement.

Response 2:

I believe that libraries should offer a combination of quiet study areas and spaces for social activities. Firstly, social activities in libraries create opportunities for students to meet friends, collaborate on projects, and engage in group discussions, fostering a sense of community. Secondly, it promotes holistic development by encouraging social skills and networking. For instance, a library with designated areas for group work and meetings can accommodate the diverse needs of students.

Therefore, a balanced approach that provides both quiet spaces and areas for social activities can cater to a variety of student preferences and facilitate a well-rounded learning environment.

Response 3:

I believe that libraries should primarily maintain a quiet ambiance, while social activities for students can be facilitated in other areas on campus. Firstly, a quiet library environment supports focused studying and concentration, ensuring a conducive atmosphere for academic success. Secondly, it respects the needs of students who prefer a tranquil space for learning. However, creating designated spaces for social activities outside the library, such as student lounges or communal areas, allows students to meet friends, have discussions, and engage in social interactions. This approach maintains a peaceful library while providing opportunities for social engagement elsewhere.

116. Even if you are older, you can get a university degree. Do you disagree with this view?

Agree response:

I agree that even if you are older, you can pursue a university degree. Firstly, education should be accessible to individuals of all ages, promoting lifelong learning and personal growth. Secondly, older students often bring valuable life experiences and perspectives to the classroom, enriching discussions and creating a diverse learning environment. For example, an older student who decides to pursue a degree in psychology may offer unique insights based on their life experiences. Therefore, age should not be a limiting factor in obtaining a university degree.

Disagree response:

I disagree with the view that older individuals can't obtain a university degree. Firstly, education should be a lifelong journey, and age should not restrict one's access to knowledge and personal development. Secondly, older students often demonstrate strong motivation and dedication, bringing a unique perspective to their studies. For instance, an older student pursuing a degree in business may contribute valuable insights based on their professional experience. Therefore, universities should embrace and support individuals of all ages in their pursuit of education.

Both-sided response:

The belief that older individuals can or cannot obtain a university degree depends on various factors. On one hand, older individuals can pursue a degree and benefit from education's transformative power, enhancing personal growth and career opportunities. Their life experiences can enrich classroom discussions and offer practical insights. On the other hand, there might be challenges related to adjusting to the academic environment and balancing responsibilities. However, with proper support and a flexible learning approach, older students can overcome these challenges and

successfully obtain a university degree. It is essential to foster inclusivity and provide equal opportunities for education at all stages of life.

117. School campus newspapers need to add a new section; which one do you think will make students feel interested? • local restaurant reviews • tips on travelling • film recommendation

Response 1:

I believe that adding a local restaurant reviews section to school campus newspapers will make students feel interested. Firstly, students are often eager to explore their local surroundings and try new dining experiences. Secondly, restaurant reviews can provide valuable insights and recommendations, helping students discover hidden gems and make informed dining choices. For example, featuring reviews of student-friendly and budget-friendly eateries can cater to the specific needs and interests of the student community. Therefore, a local restaurant reviews section can engage students and enhance their campus experience.

Response 2:

I think that including tips on traveling in school campus newspapers will capture students' interest. Firstly, many students have a desire to explore new destinations and embark on exciting adventures. Secondly, travel tips can provide valuable guidance on budgeting, packing, and safety, assisting students in planning their own trips. For instance, featuring articles on budget travel or off-the-beaten-path destinations can inspire students to explore the world. Therefore, a travel tips section can ignite students' wanderlust and encourage them to broaden their horizons.

Response 3:

I believe that featuring a film recommendation section in school campus newspapers will engage students. Firstly, movies are a popular form of entertainment among students, and recommendations can help them discover new films across various genres. Secondly, film recommendations can initiate conversations and foster a sense of community through shared interests. For example, featuring reviews of critically acclaimed movies or highlighting upcoming releases can generate excitement among students. Therefore, a film recommendation section can cater to students' recreational interests and promote cultural engagement.

118. Do you agree or disagree? Children should take part in sports team to be more socially developed.

Agree response:

I agree that children should take part in sports teams to enhance their social development. Firstly, participating in sports teams provides opportunities for children to interact and collaborate with their peers, fostering teamwork and cooperation. Secondly, it helps children develop important social skills such as communication, leadership, and sportsmanship. For example, being part of a soccer team can teach children the value of working together towards a common goal. Therefore, engaging in sports teams offers a platform for social interaction, personal growth, and the cultivation of essential social skills.

Disagree response:

I disagree that children must participate in sports teams to be socially developed. Firstly, there are various avenues for social development, and not all children may have an interest or aptitude for sports. Secondly, other activities such as art, music, or community service can also contribute to social growth. For instance, participating in a choir or volunteering at a local organization can foster teamwork and empathy. Therefore, children can achieve social development through diverse activities beyond sports teams.

Both-sided response:

The involvement of children in sports teams can have both positive and negative effects on their social development. On one hand, participating in sports teams offers valuable opportunities for social interaction, teamwork, and the development of sportsmanship. It allows children to learn important skills such as communication and collaboration, fostering personal growth and social integration. On the other hand, some children may not enjoy or excel in sports, and their social development can be equally nurtured through other activities such as arts, music, or community service. Therefore, while sports teams can be beneficial for social development, it is essential to recognize and encourage a diverse range of activities that cater to the varied interests and talents of children.

119. If the government wants to invest in the following three areas, what do you think is the most worthwhile? • land exploration • education • health care

Response 1:

In my opinion, investing in education is the most worthwhile among the three areas. Firstly, education serves as the foundation for individual growth, innovation, and societal progress. It equips individuals with knowledge, skills, and critical thinking abilities necessary for personal and professional success. Secondly, a well-educated population contributes to a thriving economy and social stability. For example, investing in quality education can reduce inequality and empower individuals to lead fulfilling lives. Therefore, prioritizing education ensures long-term development and prosperity for a nation.

Response 2:

I believe that investing in health care is the most worthwhile among the three areas. Firstly, health is a fundamental human right, and access to quality health care is crucial for the well-being and productivity of citizens. Secondly, a strong health care system leads to better overall public health, reduced mortality rates, and increased life expectancy. For instance, investing in preventive care and healthcare infrastructure can improve the quality of life for individuals and communities. Therefore, prioritizing health care ensures a healthier and more resilient society.

Response 3:

From my perspective, investing in land exploration is the most worthwhile among the three areas. Firstly, land exploration contributes to scientific advancements, technological innovation, and resource discovery. It opens up possibilities for economic growth, environmental sustainability, and energy independence. Secondly, understanding and responsibly utilizing land resources can address pressing global challenges like climate change and food security. For example, investing in sustainable agricultural practices can ensure long-term food production. Therefore, prioritizing land exploration facilitates progress and enables solutions to pressing societal and environmental issues.

120. Some people think with the development of technology and Internet, libraries will disappear while others think libraries are always necessary. Which idea do you agree with, and please give specific details to support your opinion.

Agree response:

I agree that libraries are always necessary, despite the development of technology and the Internet. Firstly, libraries serve as essential community spaces that offer more than just access to books. They provide a quiet and conducive environment for studying, research, and learning. Secondly, libraries offer resources beyond what the Internet provides, such as rare books, archives, and specialized databases. For example, academic libraries house extensive collections that are vital for in-depth research. Therefore, libraries remain crucial in preserving knowledge, promoting intellectual growth, and fostering a sense of community.

Disagree response:

I disagree with the notion that libraries will disappear with the advancement of technology and the Internet. Firstly, online resources cannot fully replicate the experience of browsing physical books and discovering unexpected gems. Secondly, libraries serve as inclusive spaces that provide access to information for all, regardless of socioeconomic status or digital literacy. For instance, public libraries offer internet access and computer facilities to bridge the digital divide. Therefore, libraries continue to play a vital role in promoting literacy, supporting lifelong learning, and ensuring equal access to knowledge.

Both-sided response:

The impact of technology and the Internet on the future of libraries can be viewed from different perspectives. On one hand, technological advancements offer convenient access to vast amounts of information online. Digital resources are accessible anytime, anywhere, and facilitate quick information retrieval. On the other hand, libraries provide unique benefits that technology cannot fully replace. They offer curated collections, professional assistance, and a physical space for studying and community engagement. For example, libraries host educational programs, author talks, and book clubs that foster intellectual and social connections. Therefore, while the role of libraries may evolve, they remain relevant by adapting to changing needs and complementing the digital landscape.

121. Among the following jobs, which do you is most interesting one and why? • airplane pilot • actor • detective

Response 1:

I find the job of an airplane pilot to be the most interesting among the three options. Firstly, piloting an airplane offers a unique sense of adventure and the opportunity to travel to different destinations. Secondly, it requires a high level of skill, precision, and problem-solving abilities, making it intellectually stimulating. For example, pilots must navigate through various weather conditions and ensure the safety of passengers. Therefore, the job of an airplane pilot combines a passion for flying, continuous learning, and the thrill of exploration.

Response 2:

I believe the job of an actor is the most interesting among the three options. Firstly, acting allows individuals to immerse themselves in diverse roles and tell compelling stories, offering a creative outlet and personal growth. Secondly, it provides opportunities to work with talented artists and be part of dynamic productions. For instance, actors can bring characters to life and evoke emotions in audiences. Therefore, the job of an actor combines artistic expression, collaboration, and the power to inspire and entertain.

Response 3:

I consider the job of a detective to be the most interesting among the three options. Firstly, being a detective involves solving complex mysteries and puzzles, stimulating critical thinking and analytical skills. Secondly, it offers a chance to contribute to justice and make a positive impact on society. For example, detectives play a vital role in investigating crimes and ensuring public safety. Therefore, the job of a detective combines intellectual challenges, social significance, and the satisfaction of bringing closure to cases.

122. Female and male university students should have separate residence halls. Do you agree or disagree?

Agree response:

I disagree with the idea that female and male university students should have separate residence halls. Firstly, co-ed residence halls promote a diverse and inclusive living environment, fostering cross-gender friendships and cultural exchange. Secondly, it prepares students for real-world experiences where they will interact and collaborate with individuals of different genders. For example, co-ed residence halls encourage mutual respect and understanding, cultivating a sense of unity among students. Therefore, it is important to provide co-ed residence halls that support social growth, promote inclusivity, and reflect the realities of the broader society.

Disagree response:

I agree that female and male university students should have separate residence halls. Firstly, separate residence halls provide a sense of privacy and security for students, especially in terms of personal space and facilities. Secondly, it minimizes distractions and creates a conducive environment for academic focus. For instance, separate residence halls can reduce potential conflicts and disturbances that may arise from living in close proximity. Therefore, having separate residence halls can contribute to students' overall well-being and academic success.

Both-sided response:

The issue of whether female and male university students should have separate residence halls has valid arguments on both sides. On one hand, co-ed residence halls promote gender equality, encourage social interactions, and facilitate diversity. Such an environment fosters mutual understanding and prepares students for a diverse society. On the other hand, separate residence halls can provide a sense of privacy, security, and focused academic environment for students. It also addresses concerns related to cultural or religious beliefs. Striking a balance by offering a variety of housing options, including co-ed and single-gender halls, can cater to the diverse needs and preferences of students.

123. Which of the following creative activities do you like to get involved in? • Pottery making • Writing • Art creation. Choose one and explain why.

Response 1:

I enjoy getting involved in pottery making as a creative activity. Firstly, pottery allows for a hands-on experience, where I can shape and mold clay into unique and functional pieces. Secondly, it provides a sense of relaxation and mindfulness, as I immerse myself in the therapeutic process of creating pottery. For example, the tactile sensation of working with clay can be both calming and rewarding. Therefore, pottery making offers a creative outlet that combines artistic expression with a tangible and practical outcome.

Response 2:

I am inclined towards writing as a creative activity that I enjoy getting involved in. Firstly, writing allows me to express my thoughts, emotions, and imagination through words, providing a form of self-expression. Secondly, it fosters creativity, critical thinking, and storytelling skills. For instance, writing short stories or poems enables me to construct narratives and evoke emotions in readers. Therefore, writing offers a versatile and personal form of artistic expression that can be both introspective and engaging.

Response 3:

Art creation is the creative activity that I find most appealing to get involved in. Firstly, art creation offers boundless opportunities for self-expression and experimentation with various mediums and techniques. Secondly, it allows me to translate my thoughts and emotions into visual representations, fostering a deeper connection with my inner world. For example, painting or drawing enables me to convey moods, ideas, and perspectives. Therefore, art creation serves as a gateway to explore my creativity and engage in a visual dialogue with the world around me.

124. Which one would you like to choose for your final project? • Having a presentation • Writing a paper • Preparing a video

Response 1:

For my final project, I would choose to have a presentation. Firstly, presenting allows for direct communication and engagement with the audience, enabling me to convey my ideas effectively. Secondly, it provides an opportunity to showcase my public speaking and presentation skills, which are valuable in many professional settings. For example, delivering a well-structured and persuasive presentation can leave a lasting impression on the audience. Therefore, choosing a presentation for my final project allows me to demonstrate both my knowledge on the topic and my ability to communicate it effectively.

Response 2:

I would prefer to choose writing a paper as my final project. Firstly, writing a paper allows for in-depth research and analysis, providing an opportunity to delve into the subject matter. Secondly, it enhances critical thinking and academic writing skills, which are valuable for future academic pursuits. For instance, writing a well-researched and coherent paper demonstrates a strong understanding of the topic. Therefore, opting for a written paper as my final project enables me to showcase my research abilities and effectively communicate my findings.

Response 3:

Preparing a video would be my choice for the final project. Firstly, creating a video allows for creativity and visual storytelling, engaging the audience in a dynamic way. Secondly, it combines various media elements such as visuals, audio, and narration, offering a comprehensive and immersive experience. For example, a well-edited video can effectively convey information and evoke emotions. Therefore, selecting video creation as my final project provides an opportunity to showcase my multimedia skills and present the topic in an engaging and visually compelling manner.

125. Do you agree or disagree with this statement? We should help our friends only when they ask for help.

Agree response:

I disagree with the statement that we should help our friends only when they ask for help. Firstly, genuine friendship involves understanding and anticipating the needs of others. Secondly, offering support without waiting for a direct request strengthens relationships and fosters a sense of trust and care. For example, proactively offering assistance during difficult times can provide much-needed comfort and reassurance. Therefore, helping our friends even before they ask for help demonstrates empathy, compassion, and a willingness to go beyond explicit requests.

Disagree response:

I agree with the statement that we should help our friends only when they ask for help. Firstly, respecting personal boundaries and autonomy is important in maintaining healthy relationships. Secondly, assuming that someone needs help without their explicit request can be intrusive and may undermine their sense of independence. For example, allowing friends to reach out when they require assistance empowers them to voice their needs and ensures that support is provided on their terms. Therefore, waiting for a request for help allows for mutual respect and preserves the dynamics of friendship.

Both-sided response:

The approach to helping friends is subjective and can vary depending on the situation and individual preferences. On one hand, offering help without being asked demonstrates care, thoughtfulness, and a proactive approach to supporting friends. It can strengthen bonds and alleviate potential burdens. On the other hand, respecting personal boundaries and waiting for explicit requests ensures that assistance is provided in a manner that respects the autonomy and preferences of friends. Striking a balance between proactive support and respecting boundaries allows for mutual understanding and maintaining healthy friendships.

126. The university decides to remodel the dormitory and add a new space to it. Which space do you recommend to add in your dormitory? • Café • Study room • Game room

Response 1:

I recommend adding a café to the dormitory. Firstly, a café provides a social space where students can relax, socialize, and enjoy refreshments. It promotes a sense of community and offers a casual environment for students to unwind. Secondly, having a café on-site saves time and provides convenience, especially during busy study periods. For example, students can grab a quick coffee or snack without leaving the dormitory premises. Therefore, adding a café enhances the overall living experience for students.

Response 2:

I suggest adding a study room to the dormitory. Firstly, a dedicated study room provides a quiet and focused environment for students to concentrate on their academic work. It allows for effective time management and reduces distractions. Secondly, a study room promotes collaboration and peer learning among students. For instance, students can engage in group study sessions, exchange ideas, and support each other academically. Therefore, adding a study room would facilitate a conducive learning environment and foster academic success.

Response 3:

I propose adding a game room to the dormitory. Firstly, a game room offers recreational opportunities and helps students relax and unwind. It provides a space for social interaction and bonding among residents. Secondly, engaging in games promotes stress relief and enhances mental well-being. For example, students can play table tennis or foosball to relieve academic pressure. Therefore, adding a game room in the dormitory encourages a healthy work-life balance and supports the overall well-being of students.

127. All people should be required to stop working and retire by age 65. Do you agree or disagree?

Agree response:

I agree that all people should be required to stop working and retire by age 65. Firstly, mandatory retirement allows older individuals to enjoy their golden years and focus on personal pursuits, hobbies, and spending time with family. Secondly, it opens up employment opportunities for younger generations, reducing unemployment rates and promoting intergenerational fairness. For example, younger individuals can enter the workforce and contribute their skills and energy. Therefore, mandatory retirement at age 65 ensures a balanced distribution of employment opportunities and promotes a fulfilling retirement for older individuals.

Disagree response:

I disagree with the idea that all people should be required to stop working and retire by age 65. Firstly, individuals have different financial situations and retirement plans, and some may choose or need to work longer for financial stability or to support their families. Secondly, mandatory retirement can lead to a loss of valuable skills, knowledge, and experience in the workforce. For example, experienced professionals can continue to contribute to their fields and mentor younger colleagues. Therefore, flexibility in retirement age allows individuals to make personal choices and ensures the retention of expertise in the workforce.

Both-sided response:

The topic of mandatory retirement age at 65 has valid arguments on both sides. On one hand, requiring all people to stop working and retire at age 65 allows individuals to enjoy their retirement years and make way for younger generations in the workforce. This promotes a balanced distribution of employment opportunities and ensures financial security for older individuals. On the other hand, mandatory retirement disregards the individual circumstances and choices of older workers. Some may be financially capable and willing to continue working, contributing their skills and experience to the workforce. Therefore, a flexible approach that considers individual preferences and abilities would be more appropriate.

128. Your friend wants to come to your country. What things do you suggest he do and not do to be polite and respectful?

- Not Answered

129. If you have more money, do you want to spend your money on objects like clothes and electronic devices or spend your money on experience?

Response 1:

If I have more money, I would choose to spend it on experiences rather than material objects. Firstly, experiences offer personal growth and broaden perspectives. They allow for cultural immersion, learning new skills, and stepping out of comfort zones. For example, traveling to different countries exposes one to diverse cultures and fosters a deeper understanding of the world. Secondly, experiences create lasting memories and provide opportunities for connection and bonding with others. Participating in group activities or attending events can forge meaningful relationships and create shared stories.

Response 2:

If I have more money, I would prefer to spend it on objects like clothes and electronic devices. Firstly, acquiring new clothes and electronic devices can enhance one's quality of life and productivity. Upgrading to modern gadgets enables efficient work and communication. Secondly, stylish clothes contribute to self-confidence and positive self-image. For instance, wearing well-fitting and fashionable attire can boost self-esteem and make a favorable impression in professional or social settings.

Response 3:

If I have more money, I would opt to strike a balance between spending on objects like clothes and electronic devices and investing in experiences. Firstly, acquiring useful gadgets and quality clothes can improve daily comfort and productivity. Upgrading to the latest smartphone or having a versatile wardrobe can enhance efficiency and boost confidence. Secondly, investing in experiences such as travel or attending cultural events allows for personal growth, expanding horizons, and creating cherished memories. Finding a balance between material objects and experiences ensures a well-rounded and fulfilling lifestyle.

130. Which of the following areas of current events do you most like to read about? • Politics • Sports • Arts and films

Response 1:

Among the areas of current events, I most enjoy reading about politics. Firstly, staying informed about political developments helps me understand societal issues, policies, and their potential impact. It allows for informed discussions and the ability to participate in the democratic process. Secondly, political news often shapes the world we live in, influencing economies, international relations, and social justice. For example, understanding political events can foster awareness and drive advocacy for positive change.

Response 2:

Among the areas of current events, I am particularly interested in reading about sports. Firstly, following sports news allows me to stay connected to my favorite teams, athletes, and tournaments. It provides an escape from daily routines and offers a sense of community among fans. Secondly, sports news covers inspiring stories of athletes' dedication, teamwork, and triumphs, serving as a source of motivation and inspiration. For example, reading about athletes overcoming challenges can be both uplifting and motivating.

Response 3:

Among the areas of current events, I find reading about arts and films most captivating. Firstly, staying updated on the latest artistic and cinematic creations exposes me to diverse forms of expression, creativity, and cultural experiences. It broadens my horizons and nurtures an

appreciation for various art forms. Secondly, arts and film news often highlight emerging talents, award ceremonies, and thought-provoking works, fostering a deeper understanding of the artistic world and its societal impact. For example, learning about impactful films can spark important conversations and promote cultural understanding.

131. Some students prefer to study for exam at night. Other students prefer to study during the day. Which one do you prefer? Explain why.

Response 1:

Personally, I prefer studying during the day rather than at night. Firstly, studying during the day allows me to take advantage of natural daylight, which provides a well-lit and refreshing environment for focused learning. Secondly, daytime studying aligns with the typical academic schedule, allowing me to review lecture materials immediately after attending classes. For example, I can consolidate information while it is still fresh in my mind and seek clarification from instructors during office hours. Therefore, studying during the day enhances productivity, promotes effective learning, and maintains a balanced routine.

Response 2:

Contrary to some students, I prefer studying at night for exams. Firstly, studying at night offers a quiet and less distracting atmosphere as most people are asleep. It allows for focused concentration and uninterrupted study sessions. Secondly, nighttime studying fits my personal preference as I feel more mentally alert during those hours. For instance, my mind is often more receptive to absorbing and retaining information during the night. Therefore, studying at night optimizes my learning efficiency and enables me to achieve better academic outcomes.

Response 3:

When it comes to studying for exams, I don't have a strict preference for either day or night. Firstly, studying during the day provides the advantage of natural light, which can create a vibrant and refreshing study environment. It also aligns well with the typical academic schedule, allowing for immediate review of lecture materials. However, studying at night offers a serene atmosphere with reduced distractions and heightened focus. For example, the tranquility during nighttime can promote deep concentration and enhance information retention. Therefore, my choice depends on the specific circumstances and personal energy levels.

132. Some people speak out in class, others prefer to listen and quietly observe. Which do you think leads to greater success in school? Explain why you think so.

Response 1:

In my opinion, actively speaking out in class leads to greater success in school. Firstly, engaging in classroom discussions and voicing opinions demonstrates active participation and critical thinking. It allows for a deeper understanding of the subject matter through active dialogue with peers and instructors. Secondly, speaking out helps clarify doubts and seek explanations, which enhances learning comprehension. For instance, active participants can receive immediate feedback and personalized guidance. Therefore, being actively involved in class fosters a stimulating learning environment, encourages academic growth, and ultimately leads to greater success in school.

Response 2:

I believe both speaking out and quietly observing can lead to success in school. Firstly, actively participating in class discussions enhances critical thinking, communication skills, and confidence. It promotes engagement and active learning. Secondly, quietly observing allows students to absorb information from lectures and gain insights from others' contributions. For example, observing different perspectives can broaden one's understanding of a topic. Therefore, a combination of both speaking out and quietly observing can create a well-rounded learning experience, leading to academic success.

Response 3:

Quietly observing in class can lead to greater success in school. Firstly, it allows students to focus on listening and absorbing information from lectures and discussions. It minimizes distractions and fosters better concentration. Secondly, taking notes and actively listening help students retain key points for later review. For instance, attentive observation aids in thorough understanding and retention of complex concepts. Therefore, quietly observing provides students with valuable learning opportunities, leading to academic success through active listening and focused engagement.

133. Students are asked to write a final project about the famous historical city where you live. Which way do you choose? • video the famous buildings • visit the old people • Research and write a paper

Response 1:

I would choose to research and write a paper about the famous historical city where I live. Firstly, conducting research allows me to explore the city's rich history, architecture, and cultural significance. It provides a thorough understanding of its past and present. Secondly, writing a paper enables me to present my findings coherently and analytically. For example, I can delve into historical records and documents to support my arguments. Therefore, researching and writing a paper allows me to showcase my academic skills and provide a comprehensive account of the city's historical heritage.

Response 2:

I prefer to video the famous buildings in the historical city where I live. Firstly, filming the buildings visually captures their grandeur and architectural features. It offers an immersive experience for viewers. Secondly, creating a video allows me to present information creatively, incorporating visuals and narration. For instance, I can film the buildings from various angles to highlight their unique aspects. Therefore, making a video showcases my creativity and provides an engaging way to explore and appreciate the historical city's iconic landmarks.

Response 3:

I would choose to visit the old people in the historical city where I live. Firstly, interacting with the elderly allows me to learn firsthand about the city's history and traditions. They can share personal stories and experiences that are not available in textbooks. Secondly, spending time with older residents fosters a sense of community and respect for their knowledge. For example, listening to their memories of the city's past can enrich my understanding of its evolution. Therefore, visiting the old people provides a unique and human-centered perspective for my final project.

134. Many people prefer to read books in electronic format on a computer screen or other devices. Some other people prefer to read books on paper printed copies. Which way do you prefer? Why?

Response 1:

I prefer reading books in electronic format on a computer screen or other devices. Firstly, e-books are portable and convenient, allowing me to carry multiple books without added weight. It suits my on-the-go lifestyle. Secondly, e-books often offer features like adjustable font sizes and night mode, enhancing reading comfort. For example, I can read in low-light environments without strain. Therefore, reading e-books provides flexibility and comfort for my reading experience.

Response 2:

I prefer reading books on paper printed copies. Firstly, the physical aspect of paper books creates a more authentic reading experience. The smell and feel of the pages add to the joy of reading. Secondly, paper books offer a break from screen time, reducing eye strain and potential distractions. For instance, I can read a paper book before bedtime without disrupting my sleep with screen exposure. Therefore, reading paper books promotes a pleasurable and relaxing reading routine.

Response 3:

I have no strict preference between reading books in electronic format or on paper printed copies. Firstly, reading e-books offers convenience and versatility, allowing me to access a vast collection instantly. It suits my busy lifestyle and traveling. Secondly, paper books provide a nostalgic and sensory experience, which I enjoy during leisure time. For example, I like browsing bookstores and

finding hidden gems. Therefore, my choice depends on the circumstances and the type of reading experience I seek.

135. Do you agree or disagree with the following statement? With the popularity of the technology that focuses on entertainment, people read fewer books than before.

Response 1 (Agree):

I agree with the statement that with the popularity of entertainment-focused technology, people read fewer books than before. Firstly, digital devices offer a wide range of entertainment options, such as movies, games, and social media, which attract people's attention away from reading. Secondly, the convenience of accessing entertainment content on smartphones and tablets makes it more appealing than traditional book reading. For example, people can easily stream movies or play games on their devices during leisure time, reducing their time spent on reading books.

Response 2 (Disagree):

I disagree with the statement that technology focusing on entertainment leads to people reading fewer books. Firstly, the availability of e-books and audiobooks on digital platforms has made reading more accessible and convenient. It encourages people to read on the go using their electronic devices. Secondly, technology has facilitated online book clubs and reading communities, which promote reading and discussion among book enthusiasts. For instance, online platforms allow people to share their thoughts and recommendations, fostering a reading culture.

Response 3 (Both-sided):

The impact of technology on people's reading habits can be both positive and negative. Firstly, the popularity of entertainment-focused technology can distract individuals from reading books. With the prevalence of social media, video streaming, and gaming, people may allocate less time to reading. However, technology also introduces new avenues for book consumption. E-books and audiobooks, readily available on digital devices, enable people to read more conveniently. Therefore, while technology may discourage traditional book reading, it also offers alternative formats that encourage people to engage with literary content.

136. The university wants to provide students more entertainments and three choices are provided below; which do you prefer and why? • A theater performance by the student actors • A concert provided by a professional musician • A lecture by a professor

Response 1:

I prefer a theater performance by student actors. Firstly, it promotes and nurtures the talents of fellow students, fostering a sense of community and support within the university. It encourages artistic expression and creativity among students. Secondly, a theater performance offers a refreshing and entertaining break from academic pressures, providing a well-deserved moment of relaxation. For example, watching a play performed by peers adds a sense of familiarity and connection to the university experience. Therefore, a student-led theater performance offers both entertainment and an opportunity for students to showcase their skills.

Response 2:

I would choose a concert provided by a professional musician. Firstly, professional musicians offer high-quality performances, showcasing their expertise and captivating the audience. It provides an enriching musical experience that can inspire and elevate students' appreciation for the arts. Secondly, attending a concert fosters a shared cultural experience among students, creating a sense of unity and enjoyment. For instance, a live concert by a renowned artist can leave a lasting impression and become a cherished memory. Therefore, a concert by a professional musician offers a memorable and uplifting entertainment option for the university.

Response 3:

I prefer a lecture by a professor. Firstly, a lecture by a professor provides an educational and intellectually stimulating experience. It allows students to delve deeper into academic subjects, expanding their knowledge and critical thinking skills. Secondly, attending a lecture fosters a direct connection with the university's academic community, creating a sense of academic engagement and curiosity. For example, students can interact with the professor and ask questions, promoting an interactive learning environment. Therefore, a professor's lecture offers an entertaining and informative experience that aligns well with the university's educational mission.

137. Friends may disagree with each other, and still maintain friendship. Do you agree with or disagree with this idea, why?

Response 1 (Agree):

I agree with the idea that friends may disagree with each other and still maintain their friendship. Firstly, disagreements are a natural part of human interactions, and having differing opinions can lead to healthy discussions and personal growth. It allows friends to learn from each other and gain new perspectives. Secondly, a strong foundation of trust and understanding can withstand disagreements, fostering resilience in the friendship. For example, friends who respect each other's views can navigate conflicts with empathy and open-mindedness, strengthening their bond. Therefore, embracing differences and maintaining respect in disagreements contributes to lasting and meaningful friendships.

Response 2 (Disagree):

I disagree with the idea that friends can always maintain their friendship despite disagreements. Some disagreements may be too severe or fundamental, leading to irreparable rifts in the friendship. Firstly, certain disagreements can challenge core values and beliefs, creating a divide that cannot be easily resolved. Secondly, unresolved conflicts may lead to lingering resentment, affecting the trust and closeness between friends. For example, a disagreement over a sensitive topic like politics or ethics can strain the friendship to the point of separation. Therefore, while some friendships can withstand disagreements, others may not survive substantial conflicts.

Response 3 (Both-sided):

The impact of disagreements on friendships can vary depending on the individuals involved and the nature of the disagreement. Firstly, minor disagreements can actually strengthen friendships by promoting open communication and understanding. Friends who can respectfully discuss their differences often grow closer as a result. Secondly, while some friendships can endure more significant disagreements, others may face challenges in maintaining the same level of closeness. For example, a prolonged and intense disagreement may create emotional distance between friends. Therefore, while some friendships may thrive despite disagreements, others may require effort and compromise to preserve the relationship.

138. Which of the following three activities do you prefer to do with a group of people rather than alone? • Eat a meal • Listen to music • Do homework

Response 1:

I prefer to eat a meal with a group of people rather than alone. Firstly, dining with others creates a lively and sociable atmosphere. It allows for engaging conversations and strengthens bonds among friends or family members. Secondly, group meals offer a chance to share and taste different dishes, expanding culinary experiences. For instance, trying various cuisines together can be a delightful and educational experience. Therefore, eating a meal with others enhances the dining experience and promotes a sense of togetherness.

Response 2:

I prefer to listen to music with a group of people. Firstly, sharing music with others fosters a collective appreciation for different genres and artists. It facilitates enjoyable discussions and music recommendations. Secondly, experiencing live performances or music events as a group adds excitement and memorable moments. For example, attending a concert together creates lasting memories and a shared sense of enjoyment. Therefore, listening to music with others enriches the musical experience and creates a sense of camaraderie.

Response 3:

I prefer doing homework alone. Firstly, working individually allows me to concentrate without distractions, leading to better focus and productivity. It enables me to complete tasks efficiently. Secondly, doing homework alone encourages self-reliance and problem-solving skills. For instance, I can tackle challenges and find solutions independently. Therefore, doing homework alone offers a conducive environment for learning and personal growth.

139. In your opinion, which of the following behavior is the most negative one displayed by children? • Being selfish • Speaking impolitely • Being loud

Response 1:

In my opinion, the most negative behavior displayed by children is being selfish. Firstly, selfishness can lead to conflicts and strained relationships with peers, as it involves prioritizing one's needs over others. It hinders the development of empathy and cooperation. Secondly, being selfish may lead to a lack of consideration for others' feelings and well-being. For instance, not sharing toys or refusing to help others can create a negative and isolating environment. Therefore, addressing and promoting a sense of empathy and sharing is essential in shaping positive behaviors among children.

Response 2:

In my opinion, the most negative behavior displayed by children is being loud. Firstly, excessive noise can disrupt learning environments and social settings, causing discomfort for others. It may lead to difficulties in focusing and communicating effectively. Secondly, being loud can be perceived as disrespectful, as it disregards the need for a peaceful and harmonious atmosphere. For example, shouting in public places may disturb others and cause irritation. Therefore, encouraging children to be mindful of their volume and considerate of others' space is vital in fostering positive social interactions.

Response 3:

In my opinion, the most negative behavior displayed by children is speaking impolitely. Firstly, using disrespectful language can harm relationships with peers and adults, leading to conflicts and misunderstandings. It may create a negative and hostile environment. Secondly, impolite speech can negatively impact a child's social development, as it discourages effective communication and empathy. For example, speaking rudely to classmates can lead to isolation and difficulty forming meaningful friendships. Therefore, addressing and correcting impolite speech is crucial in fostering positive interactions and promoting respectful behavior among children.

140. What would you most like to take a course in? • Mathematics • Painting • Science

Response 1:

I would most like to take a course in mathematics. Firstly, mathematics is a fundamental subject that enhances problem-solving and analytical skills. It provides a strong foundation for various academic disciplines and real-life applications. Secondly, studying mathematics fosters critical thinking and logical reasoning. For example, solving complex equations can stimulate intellectual growth. Therefore, taking a course in mathematics offers valuable learning opportunities and enhances cognitive abilities.

Response 2:

I would most like to take a course in painting. Firstly, painting allows for creative expression and artistic exploration. It offers a therapeutic outlet for emotions and imagination. Secondly, studying painting can improve visual perception and manual dexterity. For instance, mastering brush strokes enhances artistic techniques. Therefore, taking a course in painting provides a fulfilling and enriching experience in the realm of arts and creativity.

Response 3:

I would most like to take a course in science. Firstly, science offers a profound understanding of the natural world and the principles governing it. It answers fundamental questions about the universe. Secondly, studying science promotes curiosity and a thirst for knowledge. For example, conducting experiments and observing natural phenomena instill a sense of wonder. Therefore, taking a course in science fosters intellectual growth and expands one's understanding of the world.

141. Do you agree or disagree? It is important for a child to spend a short period of time living far away from home, visiting relatives and friends.

Response 1 (Agree):

I agree that it is important for a child to spend a short period of time living far away from home, visiting relatives and friends. Firstly, such experiences promote cultural awareness and broaden a child's perspective. It allows them to experience different traditions and lifestyles. Secondly, being away from home encourages independence and adaptability. For example, staying with relatives in a different city can foster self-reliance. Therefore, these experiences contribute to a child's personal growth and understanding of the world.

Response 2 (Disagree):

I disagree that it is essential for a child to spend a short period of time living far away from home. Firstly, being away from familiar surroundings may cause emotional stress and homesickness in some children. It can lead to feelings of discomfort and insecurity. Secondly, building strong family bonds and a sense of belonging is crucial for a child's emotional development. For instance, spending quality time with immediate family members helps nurture

a sense of security. Therefore, the focus should be on fostering a supportive and nurturing environment at home.

Response 3 (Both-sided):

The importance of a child spending a short period of time living far away from home depends on the individual and the circumstances. Firstly, such experiences can promote personal growth and independence for some children. Exposure to different environments and people can enhance their adaptability and social skills. Secondly, for others, maintaining strong family connections and a stable home environment is essential for emotional well-being. For example, regular interactions with extended family can provide a sense of cultural identity and support. Therefore, while some children may benefit from time away, others may thrive within their close-knit family environment.

142. Your friends are planning to take a part-time job while attending the university. Do you think it is a good idea? Why?

Response 1 (Agree):

I believe taking a part-time job while attending the university is a good idea. Firstly, it allows students to gain valuable work experience and develop essential skills that can complement their academic learning. It enhances their resume and increases their employability after graduation. Secondly, a part-time job can provide financial independence, easing the burden of education expenses on students and their families. For example, earning a salary can help cover living costs and contribute to personal growth. Therefore, balancing work and studies can be beneficial for students' professional and financial development.

Response 2 (Disagree):

I think taking a part-time job while attending the university might not be a good idea for everyone. Firstly, juggling work and studies can lead to increased stress and reduced focus on academic performance. It may hinder a student's ability to excel in their coursework. Secondly, some students may struggle to manage their time efficiently, leading to burnout and exhaustion. For instance, long work hours can take away from crucial study and leisure time. Therefore, students should carefully consider their individual capabilities before committing to a part-time job.

Response 3 (Both-sided):

The decision to take a part-time job while attending the university depends on various factors. Firstly, for some students, a part-time job can provide valuable practical experience and financial independence. It can help them build essential skills and manage their expenses responsibly. Secondly, for others, the demands of academic coursework may require undivided attention and time. Balancing work and studies may become overwhelming, affecting academic performance.

Therefore, students should evaluate their priorities and time management skills before deciding on a part-time job.

143. There are two invitations. One is a party with your friends and the other is having a dinner party with your parents. Which one would you prefer and why?

Response 1:

I would prefer the party with my friends. Firstly, spending time with friends allows for a more relaxed and enjoyable atmosphere. It provides an opportunity to bond, share laughter, and create cherished memories. Secondly, socializing with peers fosters a sense of camaraderie and strengthens friendships. For example, celebrating special moments together can strengthen the friendship bond. Therefore, choosing a party with friends offers a fun and engaging experience that promotes a strong social connection.

Response 2:

I would prefer having a dinner party with my parents. Firstly, family gatherings create a warm and loving environment, nurturing family bonds. It allows for meaningful conversations and strengthens the family unit. Secondly, sharing a meal with parents promotes a sense of appreciation and gratitude for their support and guidance. For instance, showing appreciation during a family dinner can create an atmosphere of love and understanding. Therefore, opting for a dinner party with parents offers a meaningful and heartwarming experience.

Response 3:

Both invitations are appealing, but I would choose the dinner party with my parents. Firstly, family gatherings provide an opportunity to reconnect and share experiences with loved ones. It fosters a sense of belonging and emotional support. Secondly, having a dinner party with parents allows for intimate conversations and the chance to show appreciation for their love and care. For example, celebrating special occasions together creates lasting memories. Therefore, choosing a dinner party with parents offers a balanced and meaningful experience that strengthens family ties.

144. Do you agree or disagree with the following statement? It is never too late to get a degree in university.

Response 1 (Agree):

I agree with the statement that it is never too late to get a degree in university. Firstly, education is a lifelong journey, and obtaining a degree can open doors to new opportunities and career advancements at any age. Secondly, pursuing higher education later in life allows individuals to follow their passions and fulfill personal goals. For example, many people successfully complete their

degrees while balancing work and family commitments. Therefore, age should not be a barrier, and one can pursue a degree at any stage in life.

Response 2 (Disagree):

I disagree with the statement that it is never too late to get a degree in university. Firstly, as one gets older, there might be increased responsibilities and time constraints, making it challenging to devote the necessary time and energy to academic pursuits. Secondly, some degree programs have age limitations or specific prerequisites that may pose obstacles for older learners. For instance, certain medical or engineering programs may require physical fitness or prior educational qualifications. Therefore, pursuing a degree later in life may not always be feasible.

Response 3 (Both-sided):

The possibility of obtaining a degree in university later in life depends on individual circumstances and goals. Firstly, for some people, pursuing higher education at an older age can be a fulfilling experience that enriches their knowledge and skills. It offers personal growth and intellectual stimulation. Secondly, for others, practical considerations such as financial constraints or family responsibilities may limit the feasibility of returning to university. For example, balancing tuition fees and supporting dependents can be challenging. Therefore, while it is indeed possible to get a degree at any age, practical considerations should also be taken into account.

145. Some people prefer to buy new books while some people would like to buy used books. Which one do you prefer?

Response 1:

I prefer to buy new books. Firstly, new books offer the joy of owning a pristine copy with no wear or tear. It provides a fresh reading experience with crisp pages. Secondly, purchasing new books supports authors and the publishing industry, contributing to the creation of more literary works. For example, royalties from new book sales help authors continue their writing careers. Therefore, buying new books allows for a delightful reading experience and supports the literary community.

Response 2:

I prefer to buy used books. Firstly, used books are more budget-friendly, allowing me to access a broader range of titles without overspending. It is a cost-effective way to indulge in literature. Secondly, buying used books is environmentally friendly, as it reduces the demand for new book production and saves paper resources. For instance, reusing books minimizes waste and promotes sustainability. Therefore, purchasing used books offers an economical and eco-conscious approach to reading.

Response 3:

Both new and used books have their merits, and my preference depends on the context. Firstly, for my favorite authors or recently released titles, I prefer buying new books to enjoy the latest editions. It supports authors and publishers, ensuring a fresh reading experience. Secondly, for classic or older books, I opt for used copies, appreciating the charm of previously owned books while saving money. For example, collecting vintage editions adds character to my bookshelf. Therefore, my choice varies based on the book's value and my personal interest.

146. If university plans to add a new course that is not being offered to students, which of the following courses, in your opinion, would attract more students? • Sound engineering and recording • History of rock music • Film studies

Response 1:

In my opinion, the course on sound engineering and recording would attract more students. Firstly, the field of sound engineering is highly relevant and appealing to aspiring musicians and audio enthusiasts. It offers practical skills and knowledge for recording and producing music. Secondly, the demand for professional sound engineers in the entertainment industry is on the rise. For example, sound engineers are sought after in recording studios, live events, and film productions. Therefore, offering a course in sound engineering and recording would likely attract a considerable number of students interested in pursuing careers in music and audio technology.

Response 2:

I believe the course on film studies would attract more students. Firstly, film studies offer a comprehensive understanding of cinema and its artistic elements, appealing to those passionate about visual storytelling and the film industry. It provides insights into film history, theory, and analysis. Secondly, the influence of cinema on contemporary culture and society makes film studies an intriguing subject. For instance, exploring iconic movies and influential directors captivates students' interest. Therefore, offering a course in film studies would likely attract a diverse group of students interested in cinema and media arts.

Response 3:

The course on the history of rock music would likely attract more students. Firstly, rock music has a massive and dedicated fan base, drawing enthusiasts from various backgrounds. The course provides a captivating exploration of rock's evolution, cultural impact, and iconic artists. Secondly, rock music's role in shaping popular culture makes it a compelling subject for students interested in music and history. For example, analyzing influential rock bands and their contributions ignites students' enthusiasm. Therefore, offering a course on the history of rock music would likely appeal to a wide range of students with a passion for music and cultural studies.

147. Some are willing to own and manage their own company, and some prefer to work in others' companies. Which do you prefer and why?

Response 1:

I prefer to own and manage my own company. Firstly, having my own business allows for greater control and autonomy over decision-making and direction. It enables me to implement my ideas and vision. Secondly, being an entrepreneur offers the potential for unlimited growth and financial success. For example, successful businesses can lead to significant profits and personal fulfillment. Therefore, owning and managing my own company aligns with my ambition for independence and the desire to create a positive impact through my entrepreneurial ventures.

Response 2:

I prefer to work in others' companies. Firstly, working in an established company provides stability and a structured environment. It offers job security and opportunities for career advancement. Secondly, being a part of a team allows for collaboration and learning from experienced professionals. For example, working with colleagues fosters skill development and a sense of camaraderie. Therefore, working in others' companies aligns with my preference for a stable career path and the chance to excel within a supportive organizational setting.

Response 3:

Both owning and managing my own company and working in others' companies have their merits, and my preference depends on personal circumstances. Firstly, owning a business allows for creative freedom and the potential for substantial financial gains. It caters to individuals seeking entrepreneurship and innovation. Secondly, working in established companies offers stability and a structured work environment, which may appeal to those prioritizing work-life balance. Therefore, my preference is context-dependent, considering factors like personal goals, risk tolerance, and career aspirations.

148. Do you agree or disagree with the following statement? One of the best ways to learn about a country's culture is through watching television shows in that country.

Response 1 (Agree):

I agree with the statement that one of the best ways to learn about a country's culture is through watching television shows in that country. Firstly, television shows often **reflect the daily lives, traditions, and values of the people**, providing an **authentic glimpse** into their culture. **It showcases their language, customs, and societal norms**. Secondly, different genres of television programs, such as dramas, comedies, and documentaries, offer diverse perspectives on various aspects of the country's culture. For example, historical dramas can **shed light on** the nation's past, while reality

shows depict contemporary lifestyles. Therefore, television shows **can be a valuable tool for cultural exploration.**

Response 2 (Disagree):

I disagree with the statement that television shows are one of the best ways to learn about a country's culture. Firstly, television content can sometimes **be sensationalized or influenced by stereotypes**, leading to a **skewed** representation of the culture. It may **not accurately portray the cultural intricacies and complexities**. Secondly, relying solely on television shows may **limit the depth of understanding** compared to immersive experiences like visiting the country, interacting with locals, and engaging in cultural activities. For instance, participating in cultural festivals **provides firsthand insights into the country's traditions**. Therefore, while television shows can provide some cultural insights, they may not be **the most comprehensive or reliable source**.

Response 3 (Both-sided):

The effectiveness of learning about a country's culture through television shows depends on various factors. Firstly, well-researched and authentic television programs can indeed offer valuable cultural insights. Documentaries and educational shows, for example, can provide in-depth knowledge about the nation's history, art, and customs. Secondly, however, some entertainment-based shows may present a superficial or exaggerated portrayal of the culture, leading to misconceptions. Therefore, while television shows can be a starting point for cultural exploration, combining multiple sources like books, travel, and interacting with locals ensures a more comprehensive understanding of a country's culture.

149. Some people suggest students eat and drink during classes. Do you think it is a good idea?

Agreeing: Yes, allowing students to eat and drink during classes can be beneficial. Firstly, it helps maintain their energy levels, leading to better concentration. For example, a quick snack can prevent hunger distractions. Secondly, sipping water keeps them hydrated, enhancing cognitive function. Studies show hydrated students perform better. For instance, staying focused during long lectures becomes easier. Furthermore, some students have medical conditions requiring snacks at regular intervals. In conclusion, permitting eating and drinking in class supports students' well-being and academic performance.

Disagreeing: No, I don't believe students should eat and drink during classes. Firstly, it can cause disruptions and distract both the eater and classmates. For example, the sound of unwrapping snacks can be bothersome. Secondly, it may create a mess in the classroom, affecting the learning environment. Spilled drinks or food wrappers can lead to uncleanliness. Moreover, it could lead to an unhealthy habit of mindless eating. In summary, maintaining a focused and tidy classroom atmosphere is vital for effective learning.

Both-sided: The idea of students eating and drinking during classes has merits and drawbacks. On one hand, snacks can provide a quick energy boost, aiding concentration during lengthy lessons. Moreover, drinking water improves cognitive function. For example, students remain alert during discussions. On the other hand, it might cause disruptions and untidiness, impacting the learning environment negatively. For instance, excessive noise from eating could disturb others. Striking a balance by allowing controlled snack breaks could support students' well-being without compromising the classroom environment.

150. Some people learn more in the morning. Some others learn more in the afternoon. Which one is better for you?

Agreeing: Personally, I find morning learning more effective. Firstly, my mind is fresh and alert after a good night's sleep, leading to better retention of information. For example, I grasp concepts quickly during morning lectures. Secondly, there are fewer distractions in the morning, allowing me to focus better on studies. Fewer noises and interruptions create an ideal learning environment. Additionally, it aligns with a regular daily routine, promoting consistency in learning habits.

Disagreeing: In contrast, I prefer afternoon learning. Firstly, my brain tends to be more active and receptive during the afternoon, making it easier to understand complex topics. For example, I find it challenging to concentrate early in the morning. Secondly, I have more time to review and practice after morning classes, reinforcing my understanding. This additional practice enhances my retention. Furthermore, afternoon learning aligns better with my personal schedule and commitments.

Both-sided: The question of whether morning or afternoon learning is better depends on personal preferences and individual circumstances. Some people, like me, find morning learning beneficial due to a fresh and focused mind. However, others may feel more attentive and receptive during the afternoon. Considering one's natural body rhythm and daily schedule can lead to an optimal learning experience. Flexibility in scheduling classes could cater to the diverse needs and preferences of students, ensuring effective learning for everyone.

151. Some people think it is more important to spend time with family rather than study or work. Which opinion would you prefer? Why?

Agreeing: I strongly believe that spending time with family is more important than excessive focus on study or work. Firstly, family bonds are essential for emotional well-being and support. For instance, sharing experiences and emotions with loved ones creates a strong support system. Secondly, quality time with family fosters a sense of belonging and happiness, reducing stress and enhancing overall productivity. Moreover, family time helps maintain a healthy work-life balance, preventing burnout and improving relationships.

Disagreeing: While I value family time, I believe a balance between spending time with family and dedicating effort to study or work is crucial. Firstly, education and career aspirations are essential for personal growth and success. For example, acquiring new skills through study can lead to better opportunities. Secondly, fulfilling responsibilities at work is necessary for financial stability and career advancement. Moreover, achieving professional goals can also benefit the family in the long run.

Both-sided: The importance of spending time with family versus focusing on study or work varies depending on individual circumstances. While family time is vital for emotional well-being and support, pursuing education and work goals can lead to personal growth and financial stability. Striking a balance between the two is ideal. Allocating quality time for family activities while also dedicating focused effort to study and work ensures a fulfilling life that encompasses both personal relationships and professional achievements.

152. Some students prefer to choose a career before getting into college. Other students prefer to choose a career after taking some university courses. Which one do you prefer and why?

Response 1:

I prefer choosing a career before entering college for two main reasons. Firstly, early career planning ensures that I can select relevant courses and gain the necessary skills from the start. For example, if I aim to become a computer engineer, I can focus on programming courses. Secondly, it provides a clear direction and motivates me to work towards achieving my goals. By knowing my career path beforehand, I can make the most of my college experience and pursue internships aligned with my aspirations.

Response 2:

I favor choosing a career after taking some university courses due to two significant reasons. Firstly, college offers exposure to diverse subjects and fields, helping me explore my interests and passions. It allows me to understand my strengths and weaknesses better. Secondly, real-life experiences gained through internships or practical courses aid in making informed career decisions. For instance, working in a marketing internship may reveal my affinity for marketing. Therefore, delaying the decision lets me make a well-informed and suitable career choice.

Response 3:

Both approaches have their merits. Choosing a career before college provides clarity and focus from the beginning, aiding in efficient course selection and skill development. On the other hand, selecting a career after university courses allows exploration of diverse subjects, helping students

make informed decisions based on personal experiences. Some students may benefit from early planning, while others may find value in exploring their interests during college. Ultimately, the most suitable approach varies for each individual.

153. Which of the following functions of smart phones is the most beneficial to students? • taking photos • listening to the music • recording lectures

Response 1:

Recording lectures is the most beneficial function for students due to two primary reasons. Firstly, it helps them review important information and grasp complex concepts better. For instance, recording scientific explanations aids comprehension. Secondly, it allows students to focus more during lectures, as they don't need extensive note-taking. Consequently, this feature enhances learning efficiency and academic performance.

Response 2:

Listening to music proves to be the most advantageous function for students. Firstly, music helps reduce stress and improves focus while studying. For example, listening to classical music can create a conducive learning environment. Secondly, music enhances mood and motivation, making studying a more enjoyable experience. Thus, this function contributes to a positive and productive learning atmosphere.

Response 3:

Taking photos emerges as the most beneficial function for students. Firstly, students can capture important information presented on boards or slides for later review. For example, photographing diagrams aids in understanding complex concepts. Secondly, photos serve as visual cues, facilitating memory retention. By having visual references, students can better recall information during exams or assignments. Consequently, this feature enhances the learning process and academic performance.

154. Some people go to exercise outside or go to gym every day while others do exercise or go to gym when they have free time. Which opinion would you prefer? Why?

Response 1:

I prefer exercising or going to the gym daily for two main reasons. Firstly, consistent daily exercise establishes a routine, making it easier to stay motivated and committed. Secondly, daily exercise ensures regular physical activity, contributing to better overall health and fitness. For instance, a

daily workout routine boosts cardiovascular endurance and muscle strength. As a result, this approach leads to long-term health benefits and a healthier lifestyle.

Response 2:

I favor exercising or going to the gym when I have free time for two significant reasons. Firstly, this approach offers flexibility, allowing me to fit exercise around my busy schedule. It reduces the pressure of committing to a strict daily routine. Secondly, exercising when free time is available ensures I can fully focus and enjoy the workout without time constraints. For example, on weekends, I can indulge in longer and more enjoyable exercise sessions. Therefore, this approach promotes a balanced lifestyle and prevents exercise from becoming a chore.

Response 3:

Both opinions have merits. Exercising daily establishes a disciplined routine, leading to better consistency and health benefits. On the other hand, exercising when free time is available offers flexibility and reduces stress related to adhering to a daily schedule. The choice depends on individual preferences and lifestyle. Some may find daily exercise more suitable to maintain regular physical activity, while others may appreciate the freedom to exercise when they have leisure time.

155. Your degree requires that you choose a history course. Which of the following courses would you prefer? • Art history • Twentieth-century world history • Science history Choose ONE of the three courses. Use specific details and examples to explain why.

Response 1:

I would prefer to take the "Science history" course for two main reasons. Firstly, it explores the development of scientific discoveries and innovations, providing insights into how they shaped the world. Secondly, studying the history of science enhances my understanding of scientific principles and methods. For instance, learning about the discovery of the double helix structure of DNA highlights the significance of genetics in modern medicine. Therefore, this course aligns with my passion for science and offers valuable knowledge for future research or careers in the field.

Response 2:

Among the three courses, I would choose "Art history" for two significant reasons. Firstly, studying art history allows me to appreciate and understand the evolution of artistic expressions across different cultures and time periods. It deepens my appreciation for artistic achievements. Secondly, analyzing famous artworks and understanding the artistic context helps me gain insights into historical events and cultural values. For example, Renaissance artworks reveal societal changes during that period. Thus, this course enriches my cultural awareness and aesthetic sensibility.

Response 3:

I prefer "Twentieth-century world history" for two main reasons. Firstly, it covers a significant period marked by transformative events and global changes, allowing me to gain a deeper understanding of modern societies. Secondly, studying twentieth-century world history offers insights into the political, economic, and social dynamics that shape our present-day world. For example, analyzing the impact of World Wars and decolonization helps me comprehend contemporary international relations. Therefore, this course aligns well with my interest in current affairs and provides valuable knowledge for the future.

156. Do you agree or disagree with the following statement? It is important for children to learn to draw or paint.

Response 1 (Agree):

I agree with the statement that it is important for children to learn to draw or paint for two main reasons. Firstly, artistic activities foster creativity and imagination, helping children express themselves freely. Secondly, drawing and painting develop fine motor skills and hand-eye coordination, contributing to overall cognitive development. For example, drawing a scene from nature allows children to connect with their surroundings. Thus, learning to draw or paint enhances a child's cognitive abilities and encourages self-expression, which are crucial for their holistic growth.

Response 2 (Disagree):

I disagree with the statement because not all children may have an inherent interest or talent in drawing or painting. For some, other activities like sports or music may serve as a better outlet for creativity and self-expression. Rather than focusing solely on drawing or painting, it is essential to offer a diverse range of activities to cater to each child's unique interests and strengths. Encouraging exploration of various activities allows children to discover and develop their passions, promoting a well-rounded development.

Response 3 (Both-sided):

There are merits to both perspectives. Learning to draw or paint can benefit children in some ways, as it fosters creativity and improves fine motor skills. For those with artistic interests, it provides a valuable outlet for self-expression. However, it is equally essential to recognize that not all children may enjoy or excel in drawing or painting. Offering a variety of activities, including sports, music, and crafts, ensures that each child finds a suitable medium to explore and develop their talents and interests. Thus, a balanced approach is essential for children's overall growth and development.

**157. Which do you think is better: watching the news or reading the news?
Explain why.**

Response 1 (Watching the news):

I believe watching the news is better for two main reasons. Firstly, visual news presentations engage multiple senses, making it easier to comprehend complex information. The combination of images, videos, and audios enhances understanding. Secondly, news anchors often provide context and analysis, helping viewers grasp the significance of events. For instance, seeing footage of a natural disaster creates a powerful impact. Therefore, watching the news offers a comprehensive and immersive experience, ensuring better awareness and informed decision-making.

Response 2 (Reading the news):

I think reading the news is better for two significant reasons. Firstly, reading allows individuals to process information at their own pace, enabling better retention and understanding. Readers can revisit specific details for better comprehension. Secondly, written news articles often provide in-depth analysis and background information, offering a more comprehensive view. For example, reading an investigative report delves into the nuances of a topic. Thus, reading the news offers a deeper understanding and fosters critical thinking.

Response 3 (Both-sided):

Both watching and reading the news have their advantages. Watching the news provides a dynamic and engaging experience through visual and auditory elements, making it easier to absorb information quickly. Additionally, news anchors offer insights and context during broadcasts. On the other hand, reading the news allows individuals to process information at their own pace, facilitating better comprehension and retention. Moreover, written articles often provide in-depth analysis and background information. A balanced approach that combines both methods ensures a well-rounded understanding of current events and issues.

158. If you can have a part-time job at the university, what position would you choose: a lab assistant, a campus tour guide or a library assistant? Please give specific reasons.

Response 1 (Lab Assistant):

If given the opportunity to have a part-time job at the university, I would choose to be a lab assistant for two main reasons. Firstly, working as a lab assistant allows me to gain hands-on experience in my field of study, which complements my academic learning. I can apply theoretical knowledge to practical experiments, enhancing my understanding. Secondly, being a lab assistant improves my problem-solving and teamwork skills as I collaborate with professors and fellow students on various projects. For example, assisting in research experiments sharpens my analytical abilities. Therefore, this position aligns well with my academic and career aspirations.

Response 2 (Campus Tour Guide):

I would prefer to be a campus tour guide for two significant reasons. Firstly, as a tour guide, I get to interact with prospective students and their families, providing valuable information about the university and its facilities. This enhances my communication and public speaking skills, which are essential for personal growth. Secondly, conducting campus tours fosters a sense of pride and connection to my university. Sharing my positive experiences and knowledge with others boosts my enthusiasm for the institution. Therefore, being a campus tour guide aligns well with my passion for communication and promoting a welcoming campus environment.

Response 3 (Library Assistant):

The position of a library assistant appeals to me for two main reasons. Firstly, it provides a quiet and conducive environment for me to focus on my studies during downtime. As a student, having access to a resourceful library promotes academic excellence. Secondly, working in the library allows me to improve my organizational skills as I help arrange and categorize books and materials. For instance, cataloging new books sharpens my attention to detail. Therefore, being a library assistant complements my academic pursuits while enhancing my organizational abilities.

159. Some people prefer to learn about current events through watching television news programs. Others prefer to read about current events in newspaper or on the Internet. Which one do you prefer? Why?

Response 1:

I prefer learning about current events through watching television news programs for two main reasons. Firstly, visual news presentations engage multiple senses, making it easier to comprehend complex information. The combination of images, videos, and audios enhances understanding. Secondly, news anchors often provide context and analysis, helping viewers grasp the significance of events. For example, seeing footage of a natural disaster creates a powerful impact. Therefore, watching the news offers a comprehensive and immersive experience, ensuring better awareness and informed decision-making.

Response 2:

I prefer reading about current events in newspapers or on the Internet for two significant reasons. Firstly, written sources allow me to process information at my own pace, ensuring better comprehension and retention. I can revisit specific details for a deeper understanding. Secondly, newspapers and online articles often provide in-depth analysis and background information, offering a more comprehensive view. For example, reading an investigative report delves into the nuances of a topic. Thus, reading the news fosters critical thinking and a deeper understanding of current affairs.

Response 3:

Both methods have their merits. Watching television news programs provides a dynamic and engaging experience through visual and auditory elements, making it easier to absorb information quickly. Additionally, news anchors offer insights and context during broadcasts. On the other hand, reading newspapers or online articles allows individuals to process information at their own pace, facilitating better comprehension and retention. Moreover, written sources often provide in-depth analysis and background information. A balanced approach that combines both methods ensures a well-rounded understanding of current events and issues.

160. Which of the following ways is the best in getting to know Italian culture? • watching Italian movies • learning Italian cooking • attending Italian lectures or classes

Response 1:

Watching Italian movies is the best way to get to know Italian culture for two main reasons. Firstly, movies showcase various aspects of Italian life, such as traditions, customs, and societal norms. It provides an immersive experience, allowing me to witness the culture in action. Secondly, through movies, I can understand Italian language, gestures, and expressions, which are crucial elements of their culture. For example, classic Italian films portray the rich history and artistry of the country. Therefore, watching Italian movies offers an enjoyable and informative glimpse into their culture.

Response 2:

Learning Italian cooking is the best way to immerse oneself in Italian culture for two significant reasons. Firstly, Italian cuisine reflects their history, regional diversity, and values, providing a delicious insight into their way of life. By preparing traditional dishes, I can appreciate the cultural significance of each ingredient and cooking technique. Secondly, cooking fosters a sense of community, as it is often a social activity. For instance, making pasta with an Italian friend enhances cultural exchange. Thus, learning Italian cooking offers a flavorful and interactive way to explore their culture.

Response 3:

Attending Italian lectures or classes is the best way to get to know Italian culture. Firstly, formal education provides a structured and comprehensive understanding of various aspects of Italian life, including history, art, and language. Lectures offer insights from experts, enriching the learning experience. Secondly, attending classes fosters interaction with peers, creating a supportive environment for cultural exploration. For example, discussing Italian literature with classmates deepens cultural appreciation. Therefore, attending Italian lectures or classes ensures a well-rounded and in-depth immersion into their captivating culture.

161. Some people prefer to do shopping in large grocery stores or department stores. Others prefer to do shopping in small grocery stores. Which do you prefer and why? Use specific reasons and examples to support your response.

Response 1:

I prefer doing shopping in large grocery stores or department stores for two main reasons. Firstly, these stores offer a wider variety of products and brands, catering to diverse preferences and needs. For example, large stores have a vast selection of fresh produce, international foods, and household items. Secondly, they often provide better deals and discounts due to their large-scale operations. By shopping in bulk, I can save money and fulfill all my shopping needs in one place. Therefore, large grocery stores and department stores offer convenience, variety, and cost-effectiveness, making them my preferred choice for shopping.

Response 2:

I prefer doing shopping in small grocery stores for two significant reasons. Firstly, small stores offer a more personalized and intimate shopping experience. The staff often knows their customers, providing personalized recommendations and assistance. Secondly, small stores may carry locally sourced or unique products that promote sustainability and support local businesses. For instance, buying fresh produce from a nearby farmer's market fosters a sense of community. Therefore, shopping in small grocery stores allows me to forge connections, make conscious choices, and contribute to the local economy.

Response 3:

Both options have their merits. Shopping in large grocery stores or department stores offers convenience and a wide variety of products under one roof, making it suitable for busy individuals seeking efficiency. On the other hand, small grocery stores provide a more personalized and community-oriented experience, promoting sustainability and supporting local businesses. The choice depends on personal preferences and shopping goals. Some may prioritize convenience and product variety, while others may value a closer connection with local vendors and unique shopping experiences.

162. If you are a teacher of a tutor group and you are going to take students to a study trip, where would you take them to? • science museum • local farm • theater performance

Response 1:

As a teacher, I would take my tutor group to a science museum for two main reasons. Firstly, a science museum provides interactive exhibits, engaging students and fostering their curiosity about

the natural world. For instance, hands-on experiments and demonstrations make complex scientific concepts easily understandable. Secondly, visiting a science museum encourages interest in STEM subjects, inspiring potential future scientists and engineers. By observing real-world applications of science, students develop a deeper appreciation for its relevance in everyday life.

Response 2:

If I were a teacher, I would opt for a study trip to a local farm for two significant reasons. Firstly, a farm visit offers an educational and hands-on experience, connecting students with nature and agriculture. For example, they can learn about sustainable farming practices and food production processes. Secondly, being on a farm cultivates environmental awareness, as students witness firsthand the importance of preserving natural resources and ecosystems. This trip fosters a sense of responsibility towards the environment and promotes sustainable living practices.

Response 3:

As a teacher leading a study trip, I would take my tutor group to a theater performance for two main reasons. Firstly, theater offers a unique form of art and storytelling, exposing students to diverse perspectives and cultures. For instance, watching a historical play provides insights into different eras and societal norms. Secondly, attending a theater performance enhances students' creativity and imagination, sparking their interest in the performing arts. This experience can inspire aspiring actors or ignite a passion for theater and drama.

163. Do you think it is a good idea for parents to give children money if they have good grades in school? Please include details and examples in your explanation.

Response 1:

I believe it is a good idea for parents to reward children with money for good grades in school for two main reasons. Firstly, offering financial incentives motivates children to excel academically. It instills a sense of achievement and encourages them to strive for excellence in their studies. For example, receiving a monetary reward for achieving high marks in exams reinforces the importance of hard work and dedication. Secondly, it teaches valuable lessons about the relationship between effort and reward, preparing children for future challenges where hard work pays off. In this way, monetary rewards can serve as positive reinforcement, fostering a strong work ethic and academic success.

Response 2:

I disagree with the idea of parents giving children money for good grades in school for two significant reasons. Firstly, external rewards like money may undermine intrinsic motivation for learning. Children might focus on the reward rather than a genuine interest in studying, leading

to shallow learning experiences. Secondly, it may create an unhealthy association between academic performance and monetary gains. Children might become solely focused on getting good grades for material benefits, rather than valuing the joy of learning and personal growth. Instead, parents can encourage their children's efforts by providing praise, recognition, and quality time together to celebrate their achievements.

Response 3:

The idea of parents giving children money for good grades in school can be viewed from both perspectives. On one hand, financial rewards can serve as an effective short-term motivation for academic performance. It can incentivize children to study harder and achieve better results, leading to improved grades. For example, offering a monetary incentive for each 'A' grade can encourage students to put in extra effort and maintain focus on their studies. On the other hand, some argue that intrinsic motivation, such as a genuine interest in learning and personal growth, should be nurtured instead of relying solely on external rewards. A balance between occasional incentives and promoting a love for learning can be a more holistic approach to encouraging academic success.

164. Teaching quality is very important to a university. What about other significant factors? Which one would you choose in the first place and why? • Size • Price • Location

Response 1 (Size):

Apart from teaching quality, "Size" is a significant factor to consider when choosing a university. Firstly, a smaller-sized university can offer a more personalized learning experience with smaller class sizes, allowing for better student-teacher interaction. Secondly, a close-knit campus community fosters a sense of belonging and provides ample opportunities for extracurricular involvement. For example, participating in clubs becomes more accessible in a smaller university setting, enhancing the overall college experience. Therefore, a smaller-sized university ensures a supportive and engaging environment for students.

Response 2 (Price):

While teaching quality is vital, "Price" is another crucial factor to prioritize when selecting a university. Firstly, considering affordability is essential to avoid accumulating excessive student loan debt. A lower-cost university ensures a more financially secure future upon graduation. Secondly, affordable tuition enables access to a wider pool of educational resources, such as study abroad programs and internships. For instance, reduced financial burdens allow students to explore valuable learning experiences beyond the classroom. Thus, choosing a university with reasonable tuition fees promotes a sound financial foundation for the future.

Response 3 (Both-sided):

While teaching quality is essential, both "Location" and "Price" are significant factors when selecting a university. Regarding location, a university situated in a vibrant city offers cultural diversity and access to various opportunities, fostering personal growth. Conversely, a university in a more rural area provides a serene environment conducive to focused study. As for price, considering affordability ensures a stable financial future. Nevertheless, students may weigh the benefits of a higher-priced university if it offers unique programs or scholarships. Ultimately, the choice depends on individual preferences and long-term goals.

165. When learning to use a new product, some people prefer to read the instruction manual. Others prefer to figure out how to use the product on their own. Which do you prefer and why? Give details and examples to support your response.

Response 1 (Reading the instruction manual):

I prefer reading the instruction manual when learning to use a new product for two main reasons. Firstly, the manual provides clear and detailed step-by-step guidance, ensuring I understand the product's features thoroughly. For instance, when setting up a new electronic device, the manual helps me avoid mistakes and ensures proper functioning. Secondly, reading the manual saves time and minimizes frustration, as I can quickly access relevant information without guesswork. Therefore, relying on the instruction manual ensures a smooth and efficient learning process, maximizing the product's benefits.

Response 2 (Figuring out on my own):

I prefer figuring out how to use a new product on my own for two significant reasons. Firstly, hands-on exploration allows me to learn through trial and error, which I find more engaging and effective. For example, when I bought a new smartphone, I experimented with its features, discovering shortcuts and functions not mentioned in the manual. Secondly, discovering functionalities independently fosters problem-solving skills and boosts my confidence in using technology. By exploring on my own, I feel a sense of accomplishment and become more adept at using the product efficiently.

Response 3 (Both-sided):

Both approaches have their merits. Reading the instruction manual provides clear guidance, ensuring proper usage and preventing potential mistakes. For example, assembling furniture using the manual ensures stability and safety. On the other hand, figuring out how to use a product on my own allows for hands-on exploration, fostering problem-solving skills and adaptability. When I started using a new camera, trial and error helped me discover various shooting modes beyond what the manual covered. A balanced approach, incorporating both methods, ensures a comprehensive understanding of the product's features.

166. Do you agree or disagree with the following statement? Building zoos helps to protect animals. Please give your answer with specific examples and details.

Response 1 (Agreeing):

I agree with the statement that building zoos helps to protect animals for two main reasons. Firstly, zoos provide a controlled environment where endangered species can be bred and conserved. For instance, the successful breeding programs for pandas in zoos have contributed to the preservation of their dwindling population. Secondly, zoos offer educational opportunities for the public to learn about different species and the importance of wildlife conservation. By raising awareness and promoting empathy towards animals, zoos inspire people to support conservation efforts and protect animal habitats.

Response 2 (Disagreeing):

I disagree with the statement that building zoos helps to protect animals for two significant reasons. Firstly, zoos often fail to provide natural habitats and adequate space for animals to thrive. Animals in captivity may suffer from stress, behavioral issues, and health problems due to confined living conditions. For example, elephants, which typically roam vast distances in the wild, may experience physical and psychological distress in limited zoo enclosures. Secondly, some zoos engage in unethical practices, such as capturing animals from the wild or supporting breeding for profit. Instead, promoting wildlife conservation through protected natural reserves and sustainable practices would be more effective in safeguarding animal populations.

Response 3 (Both-sided):

Building zoos can have both positive and negative impacts on animal protection. On one hand, zoos play a vital role in raising awareness about endangered species and conservation efforts. For instance, zoos often conduct educational programs to inform the public about the challenges faced by certain animal species, motivating people to support conservation initiatives. On the other hand, some zoos may struggle to provide adequate living conditions for animals, which could lead to physical and psychological stress. Striking a balance between ethical care and education is crucial for zoos to effectively contribute to animal protection.

167. Which of the following activities should a university value most? • Volunteer service • Athletic achievement • Academic performance

Response 1 (Volunteer Service):

A university should value volunteer service most for two main reasons. Firstly, engaging in volunteer activities demonstrates a commitment to community and social responsibility. Students who actively participate in volunteer service exhibit qualities of compassion and empathy, contributing positively to society. Secondly, volunteer work enhances students' interpersonal and leadership skills through collaboration with diverse groups and managing projects. For instance, organizing a charity event

builds teamwork and organizational abilities. Prioritizing volunteer service fosters well-rounded individuals who contribute meaningfully to their communities.

Response 2 (Athletic Achievement):

A university should value athletic achievement most for two significant reasons. Firstly, excelling in sports promotes physical fitness and a healthy lifestyle among students. Regular participation in sports enhances overall well-being and fosters a sense of discipline. Secondly, athletic achievements boost school spirit and create a vibrant campus culture. For example, winning championships instills pride and encourages more students to participate in sports. Prioritizing athletic achievement encourages a balanced approach to education, focusing not only on academics but also on fostering physical and mental well-being.

Response 3 (Academic Performance):

A university should value academic performance most for two main reasons. Firstly, academic excellence is the core purpose of higher education, preparing students for professional careers and lifelong learning. Emphasizing academic performance ensures that students receive a high-quality education and are equipped with essential knowledge and skills. Secondly, academic achievements reflect a student's dedication, perseverance, and intellectual growth. For instance, scoring top grades demonstrates a strong work ethic and mastery of subjects. Prioritizing academic performance promotes a culture of academic excellence, motivating students to strive for their best potential.

168. Do you prefer big family or small family? Please give your answer with specific examples and details.

Response 1 (Small family):

I prefer a small family for two main reasons. Firstly, a small family allows for more intimate and meaningful connections among family members. For instance, I grew up in a small family, and this closeness enabled us to support and understand each other better. Secondly, a small family reduces household responsibilities, leading to a more manageable and relaxed environment. With fewer members, there is less stress in managing daily tasks and more time for quality interactions. Overall, a small family promotes stronger bonds and a peaceful living atmosphere.

Response 2 (Big family):

I prefer a big family for two significant reasons. Firstly, a big family offers a lively and vibrant atmosphere filled with constant social interactions. For example, during family gatherings, there are numerous relatives to share experiences and celebrate together, creating unforgettable memories. Secondly, having more family members provides a wider network of support and assistance during challenging times. Relatives can lend a helping hand or offer valuable advice. Thus, a big family fosters a sense of belonging and offers a strong support system.

Response 3 (Both-sided):

Both big and small families have their merits. In a small family, intimate connections and reduced household responsibilities create a close-knit and relaxed atmosphere. For example, I enjoyed sharing my thoughts freely with my parents and received individualized support. On the other hand, a big family brings vivacity and shared experiences during family gatherings, enriching social interactions. For instance, family reunions with cousins provide a diverse and enjoyable environment. Ultimately, the preference between big and small families depends on individual values and the type of social dynamics one seeks.

169. Do you agree with the statement: employees should be allowed to listen to music at work?

Response 1 (Agreeing):

I agree with the statement that employees should be allowed to listen to music at work for two main reasons. Firstly, music can enhance productivity and focus. Research suggests that listening to music can create a positive work environment, reducing stress and increasing motivation. For example, instrumental music can help employees concentrate on tasks, leading to improved efficiency. Secondly, allowing music at work can boost employee morale and job satisfaction. When employees have the freedom to listen to music they enjoy, it creates a more enjoyable work atmosphere, leading to increased job satisfaction and potentially reducing turnover.

Response 2 (Disagreeing):

I disagree with the statement that employees should be allowed to listen to music at work for two significant reasons. Firstly, music can be distracting and hinder productivity. Different employees have varied music preferences, leading to potential conflicts or noise disruptions in the workplace. Secondly, certain tasks may require full concentration, and music could interfere with complex decision-making or critical thinking. For example, in professions such as accounting or law, employees need quiet environments to focus on intricate details. Therefore, limiting music at work can enhance focus and efficiency.

Response 3 (Both-sided):

Both allowing and restricting music at work have valid points. Allowing music can boost employee morale and create a more enjoyable work atmosphere. It can also enhance productivity and reduce stress for tasks that do not require deep concentration. For instance, during routine data entry or administrative tasks, background music may be beneficial. However, in tasks demanding full attention and critical thinking, restricting music can foster better focus and prevent distractions. Striking a balance between the two approaches, based on the nature of the job and individual preferences, can lead to a harmonious work environment.

170. Some people prefer jobs working with computers or other technology, others like jobs working with no such technology. Which do you think is better and why?

Response 1:

I believe that jobs working with computers or other technology are better for two main reasons. Firstly, technological advancements have transformed industries, making tech-related jobs more relevant and in demand. As technology continues to evolve, these jobs offer greater job security and growth opportunities. For example, working in software development allows individuals to innovate and contribute to groundbreaking projects. Secondly, technology enhances efficiency and productivity, enabling employees to accomplish tasks faster and with more precision. This results in a more streamlined work process and increased productivity, benefiting both employees and employers.

Response 2:

I believe that jobs working with no technology can also be better for two significant reasons. Firstly, some individuals prefer a simpler and less digitally-dependent work environment. Such jobs may offer a more hands-on and creative experience, appealing to those seeking a non-tech-oriented career. For instance, working in artisanal craftsmanship allows for artistic expression and personal fulfillment. Secondly, technology-heavy jobs may lead to increased screen time and potential health issues. Jobs with no technology involvement may promote a healthier work-life balance and reduce the risk of digital fatigue.

Response 3:

The debate between jobs involving technology and those without technology hinges on individual preferences and career aspirations. For some, technology-driven jobs offer exciting opportunities for innovation and professional growth. In contrast, others may find fulfillment in jobs where technology is minimal, focusing on traditional craftsmanship or hands-on experiences. The ideal choice depends on an individual's skills, interests, and goals. Striking a balance between the two can also be advantageous, as combining technology with non-tech aspects may create diverse and rewarding career paths.

171. Some people prefer to wash dishes by a dish washer. Others prefer to wash dishes by hands. Which do you prefer and why?

Response 1 (Jobs with technology):

I believe jobs working with computers or other technology are better for two main reasons. Firstly, technology enhances efficiency and productivity in various industries. For example, in the healthcare

sector, electronic medical records streamline patient care processes, reducing administrative burdens. Secondly, technological skills are in high demand, leading to more career opportunities and competitive salaries. Proficiency in technology opens doors to innovative roles and remote work options. Embracing technology prepares individuals for the future job market, ensuring job security and adaptability in an ever-evolving digital world.

Response 2 (Jobs without technology):

I believe jobs working with no technology are better for two significant reasons. Firstly, technology can lead to increased screen time and potential health issues, such as eye strain and sedentary lifestyles. Jobs devoid of technology promote more active and diverse work environments. Secondly, manual labor jobs or nature-based roles foster a deeper connection to the physical world and the environment. For example, working in agriculture allows individuals to appreciate the beauty of nature and contribute to sustainable practices. Jobs without technology offer a more balanced and fulfilling lifestyle beyond the digital realm.

Response 3 (Both-sided):

Both jobs involving technology and jobs with no such technology have merits. Jobs with technology offer increased efficiency and competitiveness in the job market, preparing individuals for the digital age. However, overreliance on technology can lead to health issues and disconnect from the physical world. On the other hand, jobs without technology promote active lifestyles and a deeper connection to nature. Yet, they may lack the efficiency and convenience that technology offers. A balance between the two approaches, incorporating technology where beneficial and appreciating the value of nature-based roles, ensures a diverse and adaptable workforce.

172. Do you agree or disagree the statement that we should let children use the computers or other electronic devices as early as they can?

Response 1 (Agreeing):

I agree with the statement that we should let children use computers or other electronic devices as early as they can for two main reasons. Firstly, **early exposure to technology fosters digital literacy and prepares children for the modern world.** With technology being an **integral part of daily life,** starting early allows them to develop essential skills for future success. Secondly, educational apps and programs can **enhance learning experiences, making education more interactive and engaging.** For instance, **interactive language learning apps** can improve language skills. **Early access to technology equips children with valuable tools** for their **academic and personal growth.**

Response 2 (Disagreeing):

I disagree with the statement that we should let children use computers or other electronic devices as early as they can for two significant reasons. Firstly, **excessive screen time at a young age can**

negatively impact a child's physical and mental development. Studies suggest that prolonged exposure to screens may lead to sleep disturbances and hinder social interactions. Secondly, young children benefit more from hands-on play and real-life experiences, which stimulate their creativity and imagination. Instead of relying on screens, encouraging outdoor activities and traditional play promotes holistic development and emotional well-being.

Response 3 (Both-sided):

Both allowing and restricting early access to computers or electronic devices have valid points. Introducing technology early can help children develop digital literacy and familiarity with modern tools, essential for future success. For example, educational apps can support language learning and cognitive skills. However, moderation is crucial, as excessive screen time may lead to health issues and hinder other forms of learning and development. Balancing technology use with outdoor play and hands-on experiences ensures a holistic approach to a child's growth, nurturing their technological prowess while fostering creativity and social skills.

173. The university plans to turn long summer holiday into several short holidays. Do you think it's a good idea?

Response 1 (Agreeing):

I agree that turning the long summer holiday into several short holidays is a good idea for two main reasons. Firstly, short holidays provide students with more frequent breaks, preventing burnout and improving overall well-being. Students can recharge and return to their studies with renewed focus and energy. Secondly, short holidays offer opportunities for diverse activities and experiences throughout the year. For instance, students can explore internships, part-time jobs, or travel during different breaks, enhancing their practical skills and enriching their personal growth.

Response 2 (Disagreeing):

I disagree that turning the long summer holiday into several short holidays is a good idea for two significant reasons. Firstly, the long summer break allows students to engage in more extended projects, research, or internships, fostering in-depth learning and skill development. Secondly, short holidays may disrupt continuity in learning and hinder students' progress in certain subjects. For example, students may not have sufficient time to delve deeply into complex topics or complete comprehensive coursework. Preserving the long summer holiday provides ample time for meaningful learning experiences and academic achievements.

Response 3 (Both-sided):

The idea of turning the long summer holiday into several short holidays has merits and drawbacks. Short holidays can prevent burnout and provide students with more diverse experiences throughout the year. On the other hand, the long summer break allows for in-depth learning opportunities and extended projects. A balanced approach could involve a combination of both short and long holidays, ensuring students benefit from rejuvenating breaks and extended periods for

comprehensive learning and skill development. Ultimately, the university should consider student needs and academic goals when making this decision.

174. Which kind of extracurricular activity would you like to attend if you have a chance? • writing essays for students' newspaper • joining a hiking club • working in the dormitories discipline committee

Response 1 (Writing essays for students' newspaper):

If given the chance, I would like to attend the extracurricular activity of writing essays for the students' newspaper for two main reasons. Firstly, it provides an opportunity to develop strong writing and communication skills. As a contributor to the newspaper, I can improve my writing style and effectively convey ideas to a broader audience. Secondly, working on the newspaper fosters a sense of community and involvement on campus. By contributing articles and covering important events, I can actively participate in campus life and keep fellow students informed.

Response 2 (Joining a hiking club):

If given the chance, I would prefer to join a hiking club for two significant reasons. Firstly, participating in outdoor activities like hiking promotes physical fitness and overall well-being. Exploring nature and engaging in physical challenges would be a refreshing break from academic routines. Secondly, joining a hiking club allows me to build friendships with like-minded individuals who share a passion for adventure and the great outdoors. Through group hikes, I can create lasting memories and enjoy a sense of camaraderie with fellow club members.

Response 3 (Working in the dormitories discipline committee):

If given the chance, I would consider working in the dormitories discipline committee for two main reasons. Firstly, being part of the committee enables me to contribute positively to the residential community. By upholding rules and resolving conflicts, I can help create a harmonious living environment for all dorm residents. Secondly, serving on the committee develops leadership and problem-solving skills. Handling disciplinary matters requires fair judgment and effective communication, which would be valuable experiences for personal growth and future responsibilities.

175. Do you agree or disagree with the following statement? Stories of famous people on TV have no relevance to ordinary people.

Response 1 (Agreeing):

I agree with the statement that stories of famous people on TV have no relevance to ordinary people for two main reasons. Firstly, the lives of celebrities often involve extraordinary experiences and privileges that are far removed from the everyday reality of ordinary people. For example, their extravagant lifestyles and fame are not relatable to the average person. Secondly, the media often

exaggerates and sensationalizes celebrity stories, making them less authentic and relatable. As a result, ordinary people may find it challenging to connect with and draw meaningful lessons from these narratives.

Response 2 (Disagreeing):

I disagree with the statement that stories of famous people on TV have no relevance to ordinary people for two significant reasons. Firstly, celebrities often overcome challenges and obstacles similar to those faced by ordinary individuals. Their stories of perseverance and success can be inspiring and motivating. Secondly, some famous personalities use their platforms to advocate for social causes and bring attention to important issues. By learning from their experiences and contributions, ordinary people can gain insights and drive positive change in their own lives and communities.

Response 3 (Both-sided):

The relevance of stories of famous people on TV to ordinary people can vary. While some celebrity stories may seem distant and unrelatable, others can inspire and have real-life applications. The media's portrayal and storytelling style play a crucial role in influencing the perceived relevance. It is essential to distinguish between sensationalized accounts and authentic narratives that carry meaningful lessons. Some famous personalities use their influence for positive impact, resonating with ordinary people and encouraging personal growth. Ultimately, the relevance of these stories depends on the content, context, and individual perspectives.

176. Some people like to get advice from parents or grandparents, while some people like to get help from their peers. Which do you prefer and why? Please include specific reasons and examples to support your answer.

Answer 1:

I prefer getting advice from my parents or grandparents for two primary reasons. Firstly, their vast life experience and knowledge offer valuable insights that peers might lack. For example, when facing a challenging academic decision, my grandfather's advice helped me make a well-informed choice. Secondly, the bond with family members **fosters a sense of trust and security**, enabling open and honest discussions. Their unconditional support provides emotional reassurance during difficult times, helping me overcome obstacles with greater confidence.

Answer 2:

I prefer seeking help from my peers for two significant reasons. Firstly, they understand the current challenges faced by individuals in their age group. When dealing with academic pressures or social issues, my friends' advice is relatable and tailored to my unique situation. Secondly, peer advice often includes diverse perspectives and innovative solutions. For instance, when facing a technology-

related problem, my friends' tech-savvy insights led me to find an efficient solution. Their practical knowledge and shared experiences make their advice valuable and relevant.

Answer 3:

I find value in seeking advice from both parents and peers, as each offers unique benefits. From parents and grandparents, I gain wisdom and experience accumulated over time. When making long-term decisions, their insights provide a broader perspective. Conversely, peers offer immediate and relatable support for day-to-day challenges. Whether it's dealing with coursework or personal issues, their empathy and shared experiences create a strong support network. Striking a balance between seeking guidance from both generations enriches my decision-making process and fosters personal growth.

177. Some people prefer to make detailed plans for the future. Others prefer to concentrate on present things and don't make any plans at all. Which way do you prefer? Please use specific reasons to support your answer.

Response 1:

I prefer making detailed plans for the future for two main reasons. Firstly, having a clear vision and specific goals helps me stay focused and motivated. By setting achievable milestones, I can track my progress and work towards long-term objectives. For instance, creating a study plan for my academic goals enables me to manage time efficiently and excel in my courses. Secondly, planning allows me to anticipate potential challenges and devise strategies to overcome them, leading to **a more organized and successful future.**

Response 2:

I prefer concentrating on present things and not making detailed plans for two significant reasons. Firstly, focusing on the present allows me to embrace spontaneity and seize opportunities that arise naturally. By being open to new experiences, I can discover unexpected passions and talents. For instance, while exploring different hobbies, I found a love for photography. Secondly, living in the moment reduces unnecessary stress and anxiety about the future. Instead of being fixated on specific plans, I prioritize personal growth and embrace the journey of life as it unfolds.

Response 3:

I prefer adopting a balanced approach between making detailed plans for the future and concentrating on present things. Planning for the future provides structure and direction, ensuring I work towards my aspirations. However, I also recognize the importance of living in the present to enjoy life's spontaneity and embrace opportunities. Balancing both perspectives allows me to pursue my long-term goals while appreciating the joys of the present moment. For instance, I maintain a

study schedule for my academic ambitions while leaving room for exploring new interests and socializing with friends.

178. Do you agree or disagree with the following statement? Wealthy people should be required to help poor people. Please answer the question with specific examples and details.

Response 1 (Agreeing):

I agree with the statement that wealthy people should be required to help poor people for two main reasons. Firstly, wealth inequality can perpetuate social disparities and hinder overall development. By mandating assistance from the affluent, impoverished communities can receive essential resources, such as education and healthcare. For instance, philanthropic contributions from billionaires have funded educational programs, enabling underprivileged students to access quality education. Secondly, a more equitable society benefits everyone, as it reduces crime rates and fosters economic growth. Requiring wealthy individuals to contribute to societal welfare promotes a sense of collective responsibility and empathy.

Response 2 (Disagreeing):

I disagree with the idea that wealthy people should be required to help poor people for two significant reasons. Firstly, imposing mandatory assistance may undermine personal freedoms and individual choices. Instead, fostering a culture of voluntary giving allows wealthy individuals to contribute according to their values and priorities. For example, when celebrities voluntarily support charitable causes close to their hearts, it demonstrates genuine compassion. Secondly, some wealthy individuals already contribute to society through taxes and private initiatives. Encouraging voluntary giving respects their autonomy and encourages a spirit of generosity without imposing obligations.

Response 3 (Both-sided):

The question of whether wealthy people should be required to help poor people is complex and merits a balanced perspective. While mandatory assistance can address pressing societal needs, it may not be the ideal solution. Requiring wealthy individuals to contribute through taxes and redistribution programs can help alleviate poverty and support underprivileged communities. However, fostering a culture of voluntary giving also empowers individuals to support causes they are passionate about. Encouraging a mix of mandatory and voluntary contributions ensures a more comprehensive approach to addressing wealth inequality and societal challenges.

179. What kind of job will you choose: a job through which you can get a lot of money or a job through which you can get great personal satisfaction? Use specific reasons and examples to support your answer.

Response 1:

I would choose a job that provides great personal satisfaction. Firstly, job satisfaction leads to a happier and more fulfilling work life, which positively impacts overall well-being. It fosters a sense of purpose and passion for the work. Secondly, personal satisfaction often results in increased productivity and dedication, as individuals are motivated to excel in their field. For example, a person passionate about environmental conservation may work tirelessly to make a positive impact. Therefore, personal satisfaction leads to a more rewarding and meaningful career journey.

Response 2:

I would choose a job that offers great personal satisfaction. Firstly, finding joy and fulfillment in my work would lead to a more balanced and contented life. It aligns with my values and interests. Secondly, job satisfaction can lead to long-term career success as it drives me to continually improve and excel in my chosen field. For instance, enjoying my work as a graphic designer would inspire me to create innovative and impactful designs. Therefore, personal satisfaction contributes to a more purposeful and rewarding professional life.

Response 3:

I would prioritize a job that provides personal satisfaction. Firstly, job satisfaction enhances overall mental and emotional well-being. It promotes a positive work environment and reduces stress levels. Secondly, a fulfilling job can lead to higher job retention and commitment. For example, an individual passionate about teaching will be dedicated to nurturing students' growth. Therefore, personal satisfaction creates a sense of fulfillment and pride in one's career, making it a more fulfilling and enriching journey.

180. Some people prefer to write many short assignments for a semester, others prefer to write one or two long assignments for a semester. Which do you prefer? Explain why.

Response 1:

I prefer to write many short assignments for a semester. Firstly, short assignments offer more frequent opportunities to showcase my understanding of different topics and concepts. It allows for a continuous learning process throughout the semester. Secondly, managing multiple short assignments improves time management skills, as I can break down tasks into manageable portions. For example, completing weekly essays enables me to stay organized and on track. Therefore,

writing many short assignments helps me stay engaged, learn consistently, and develop effective time management skills.

Response 2:

I prefer to write one or two long assignments for a semester. Firstly, longer assignments provide a chance to delve deeply into a subject and conduct extensive research. It fosters in-depth understanding and critical thinking. Secondly, focusing on a few substantial projects allows for greater creativity and attention to detail. For instance, writing a comprehensive research paper enables me to present a well-rounded argument. Therefore, working on one or two long assignments enhances my analytical and research abilities, resulting in higher-quality outputs.

Response 3:

Both approaches have their merits, but I prefer writing many short assignments for a semester. Firstly, shorter assignments enable me to cover a broader range of topics, expanding my knowledge base. It provides exposure to diverse subjects. Secondly, regular feedback from multiple short assignments allows for continuous improvement throughout the semester. For example, incorporating feedback on regular essays helps me refine my writing skills. Therefore, writing many short assignments enhances my overall learning experience and helps me become a well-rounded student.

181. Some people prefer to live in places where climate does not change very much, while others prefer to live in places where climate changes with seasons. Which one do you prefer? Why?

Response 1:

I prefer to live in places where the climate changes with seasons. Firstly, experiencing different seasons adds variety and excitement to life. Each season offers unique activities and traditions. Secondly, the changing climate allows for a diverse range of outdoor activities, from skiing in winter to hiking in summer. For example, enjoying the vibrant colors of autumn foliage is a delightful experience. Therefore, living in a place with changing seasons provides a dynamic and enriching lifestyle.

Response 2:

I prefer to live in places where the climate does not change much. Firstly, stable weather conditions offer predictability and consistency, making it easier to plan daily activities. Secondly, living in a place with a constant climate reduces the need to invest in season-specific clothing and equipment. For instance, not having to buy winter coats or summer gear saves money and storage space. Therefore, a more consistent climate provides convenience and simplicity in daily life.

Response 3:

Both options have their appeal, but I prefer living in places where the climate changes with seasons. Firstly, experiencing diverse weather conditions brings a sense of novelty and allows me to appreciate the beauty of nature's transformations. It adds excitement and variety to daily life. Secondly, seasonal changes influence local cultures and traditions, providing opportunities to participate in seasonal festivals and activities. For example, celebrating spring festivals or enjoying winter sports contributes to a vibrant and engaging lifestyle. Therefore, living in a place with changing seasons enriches my overall living experience.

182. Some people prefer to celebrate special occasions like birthdays with their friends, others prefer to be alone at such occasions. Which do you prefer? Use examples and details to support your response.

Response 1:

I prefer to celebrate special occasions like birthdays with my friends. Firstly, being with friends creates a joyful and festive atmosphere, making the celebration more memorable and enjoyable. Sharing laughter and happiness with loved ones enhances the experience. Secondly, celebrating with friends fosters a sense of belonging and strengthens relationships. For example, organizing a birthday party with friends creates lasting memories and deepens our bond. Therefore, celebrating special occasions with friends brings warmth and connection, making the moments even more special.

Response 2:

I prefer to be alone during special occasions like birthdays. Firstly, spending time alone allows for self-reflection and personal growth. It offers a chance to introspect and set new goals for the upcoming year. Secondly, solitude provides a peaceful and serene environment to enjoy the occasion in my own way, free from external pressures. For instance, spending a quiet day reading, meditating, or pursuing personal interests brings inner contentment. Therefore, being alone on special occasions enables me to recharge and cherish moments of self-discovery.

Response 3:

Both options have their appeal, but I prefer a balanced approach. Celebrating special occasions like birthdays with friends and family while also setting aside some time for solitude provides the best of both worlds. Firstly, celebrating with loved ones creates cherished memories and strengthens bonds. It brings joy and shared experiences. Secondly, spending moments alone allows for personal reflection and relaxation. For example, enjoying a quiet morning walk or writing in a journal offers peace and tranquility. Therefore, striking a balance between socializing and solitude ensures a well-rounded and fulfilling celebration.

183. Which one of the three occupations do you think is the hardest? • Government worker • Doctor • Police officer. Please state your reasons with specific details.

Response 1:

Among the three occupations, I believe being a doctor is the hardest. Firstly, doctors deal with life-and-death situations daily, making critical decisions that can impact patients' lives. The pressure to provide accurate diagnoses and timely treatments is immense. Secondly, doctors often work long and irregular hours, sacrificing personal time and sleep to be available for emergencies. For example, during pandemics, doctors face overwhelming workloads and high levels of stress. Therefore, the demanding responsibilities and constant need to be alert and focused make being a doctor one of the most challenging occupations.

Response 2:

In my opinion, being a police officer is the hardest among the three occupations. Firstly, police officers face significant risks to their safety and well-being while enforcing the law and maintaining public order. They confront potentially dangerous situations, risking injury or harm to protect others. Secondly, dealing with criminal activities and handling sensitive cases can take a toll on their mental and emotional health. For instance, investigating violent crimes can be emotionally draining. Therefore, the demanding nature of policing, coupled with the need to maintain composure under pressure, makes it a highly challenging profession.

Response 3:

Each occupation has its own challenges, but being a government worker is the hardest among the three. Firstly, government workers often face bureaucracy and red tape, which can hinder efficiency and progress. Navigating complex administrative processes can be time-consuming and frustrating. Secondly, government workers must navigate political pressures and public scrutiny while striving to meet the needs of their constituents. For example, making decisions that satisfy diverse interests requires careful consideration. Therefore, the complexities of working in a government role, with multiple stakeholders and ever-changing policies, make it a challenging occupation.

184. Among the following three professions, which do you think make the biggest contribution to society? Teachers, farmers, doctors.

Response 1:

I believe teachers make the biggest contribution to society. Firstly, teachers **play a crucial role in shaping the future generation by imparting knowledge and values**. They inspire and educate young minds, equipping them with essential skills for their personal and professional growth. Secondly, teachers have a lasting impact on individuals and society, fostering critical thinking and promoting

social cohesion. For example, a dedicated teacher can motivate students to pursue higher education and make positive contributions to society. Therefore, the **profound influence** of teachers on individuals and society makes their **contribution invaluable**.

Response 2:

In my view, doctors make the biggest contribution to society. Firstly, doctors save lives and **improve the health and well-being of individuals**, directly impacting the overall **welfare** of society. Their medical expertise and dedication to patient care are invaluable. Secondly, medical advancements and research by doctors contribute to the prevention and treatment of diseases, benefiting the entire community. For example, the discovery of vaccines has significantly reduced the prevalence of deadly diseases. Therefore, the significant role doctors play in preserving and improving lives makes their contribution indispensable.

Response 3:

While all three professions make important contributions, I believe farmers play a significant role in society. Firstly, farmers ensure a stable food supply, meeting the basic needs of the population. Their hard work and dedication in cultivating crops and raising livestock sustain communities. Secondly, agriculture is the backbone of the economy, supporting various industries and livelihoods. For example, farming provides raw materials for food processing and other sectors. Therefore, farmers' role in ensuring food security and contributing to economic prosperity makes their impact on society substantial.

185. Do you agree or disagree with the following question. In order to stay happy, you must have a job that you love doing.

Response 1:

I agree with the statement that in order to stay happy, you must have a job that you love doing. Firstly, a job that aligns with your **passion and interests** brings **a sense of fulfillment** and purpose to your life. It allows you to **derive joy** from your work and **feel enthusiastic about your daily tasks**. Secondly, when you love your job, you are more likely to **excel in your field**, **leading to professional growth and career success**. For example, a passionate artist will continuously strive to improve their skills and produce exceptional artwork. Therefore, having a job that you love contributes significantly to your **overall happiness and well-being**.

Response 2:

I disagree with the notion that you must have a job that you love doing in order to stay happy. Firstly, happiness can **stem from various aspects of life**, not solely from your job. People can find joy in hobbies, relationships, or **personal accomplishments** outside of work. Secondly, some individuals may have financial responsibilities or limitations that compel them to pursue jobs they are not

passionate about. For instance, someone may choose a stable job to support their family's needs. Therefore, while a fulfilling job can enhance happiness, it is not the sole determinant of overall well-being.

Response 3:

Both perspectives have their merits. While having a job that you love doing can contribute significantly to happiness, it may not be the sole factor. Firstly, job satisfaction positively influences mental and emotional well-being, allowing individuals to find meaning and enjoyment in their daily work. Secondly, other life factors, such as strong social connections, physical health, and a balanced lifestyle, also contribute to happiness. For example, a supportive network of friends and family can bring immense joy. Therefore, while a fulfilling job is valuable, overall happiness is influenced by a combination of factors in one's life.

186. Some people prefer to have classes during the day and do part-time jobs in the evening while others prefer to have classes in the evening and do part-time jobs during the day. Which do you prefer?

Response 1:

I prefer to have classes during the day and do part-time jobs in the evening. Firstly, having classes during the day allows me to be more focused and attentive as I am naturally more alert and energetic in the daytime. It enhances my learning experience and academic performance. Secondly, working in the evening provides flexibility to manage my job without conflicting with class schedules. For example, I can dedicate my evenings to gain practical work experience while devoting my daytime to studies. Therefore, this arrangement enables me to strike a balance between education and work effectively.

Response 2:

I prefer to have classes in the evening and do part-time jobs during the day. Firstly, evening classes allow me to have a more relaxed and productive morning, preparing myself mentally for the day. It also accommodates those who are night owls and prefer studying when their concentration is at its peak. Secondly, doing part-time jobs during the day ensures a steady income and financial stability. For instance, I can work in a local cafe or retail store, earning money to cover my expenses and support my education.

Response 3:

Both options have their merits, but I prefer having classes during the day and doing part-time jobs in the evening. Firstly, daytime classes provide a structured routine, making it easier to plan my study hours and manage time effectively. This allows me to allocate specific time for assignments and exam preparation. Secondly, working in the evening allows me to explore various job opportunities,

such as tutoring or freelance work. For example, I can offer tutoring services to students seeking academic help during the evenings. Therefore, this schedule gives me the best of both worlds - a focused learning environment during the day and diverse job options in the evening.

187. Do you agree or disagree with the following statement? Power and money is the symbol of success.

Response 1:

I disagree with the statement that power and money are the sole symbols of success. Success is a multifaceted concept that encompasses various aspects of life. Firstly, personal fulfillment and happiness are essential components of success. Achieving one's goals, pursuing passions, and maintaining healthy relationships contribute to a sense of accomplishment. Secondly, making a positive impact on others and leaving a lasting legacy can also be seen as a measure of success. For instance, individuals who dedicate their lives to philanthropy and social causes are often regarded as successful. Therefore, success extends beyond power and money.

Response 2:

I partially agree with the statement that power and money can be symbols of success. While they can be indicators of accomplishment in certain contexts, they do not represent the entirety of success. Firstly, financial stability and professional achievements can provide individuals with opportunities and resources to pursue their goals and aspirations. Secondly, the ability to influence and make a difference in society can be associated with power. However, success should also be evaluated based on personal growth, happiness, and meaningful relationships. For example, someone who leads a fulfilling and purposeful life with strong connections may be considered successful despite not possessing immense power or wealth.

Response 3:

I disagree that power and money alone represent the symbol of success. Success is a broader concept that encompasses various dimensions. Firstly, personal fulfillment and self-actualization contribute to a sense of success. Achieving personal goals, cultivating positive relationships, and maintaining a balanced lifestyle are essential factors. Secondly, making a meaningful impact on society and leaving a positive legacy can be considered success. For instance, individuals who dedicate themselves to social causes or contribute to scientific advancements are often regarded as successful. Therefore, success encompasses more than power and money, emphasizing personal growth and societal contribution.

188. Some people like get a job during summer vacation. Others think it is better to take a class. Which do you prefer and why?

Response 1:

I prefer to get a job during summer vacation. Firstly, having a summer job allows me to **gain practical work experience**, which is valuable for my future career. It provides **an opportunity to learn new skills and build a professional network**. Secondly, earning money from the job enables me **to save for future educational expenses or personal interests**. For example, I can contribute to my college fund or plan a trip with friends. Therefore, a summer job **offers a balance of personal development and financial benefits**.

Response 2:

I prefer to take a class during summer vacation. Firstly, attending a summer class allows me to **advance my academic knowledge and stay engaged in learning**. It provides a chance to explore subjects of interest or fulfill degree requirements more efficiently. Secondly, learning during summer keeps my mind active and prepared for the upcoming academic year. For instance, taking a language course helps me improve language skills and be **better prepared for future studies or job opportunities**. Therefore, summer classes **contribute to intellectual growth and academic progress**.

Response 3:

I can see merits in both options, but I prefer to get a job during summer vacation. Firstly, a summer job allows me to gain real-world experience and develop essential professional skills. It provides exposure to different industries and work environments, helping me make informed career choices. Secondly, earning money from the job offers financial independence and the chance to save for future endeavors. For example, I can use the earnings to support my studies or invest in personal projects. Therefore, a summer job offers a practical and financially rewarding experience.

189. Do you agree or disagree with the following statement? The most important lessons cannot be learned in classrooms.

Agree:

I agree with the statement that the most important lessons cannot be learned in classrooms alone. Firstly, **real-life experiences** provide practical knowledge and problem-solving skills. For example, managing personal finances teaches financial responsibility. Secondly, interpersonal skills like empathy are developed through interactions with diverse people. Volunteering in a community showcases this, fostering a deeper understanding of others' struggles. Thus, combining classroom education with life experiences creates a holistic learning approach.

Disagree:

I disagree with the statement as classrooms offer valuable lessons. Firstly, formal education imparts fundamental knowledge and critical thinking abilities. **Engaging in academic debates sharpens cognitive skills**. Secondly, classrooms provide a structured environment for skill development and

academic growth. Group projects enhance teamwork and communication. Therefore, the classroom setting **is essential for foundational learning**.

Both-sided:

I believe that while classrooms provide crucial knowledge, real-life experiences complement learning. In classrooms, students gain theoretical knowledge and analytical skills. Participating in academic discussions improves critical thinking. However, life experiences offer practical lessons. For instance, traveling exposes individuals to diverse cultures, promoting adaptability and empathy. Integrating classroom education with experiential learning creates a well-rounded education.

190. Do you agree or disagree with the following statement? College education should only be available to people who have done well in secondary school.

Disagree:

I disagree with the statement that college education should only be available to those who have excelled in secondary school. Firstly, academic success does not necessarily reflect an individual's potential or passion for a particular field. Some students may excel later in life due to personal growth and experiences. Secondly, restricting college access based solely on secondary school performance may perpetuate inequality and limit opportunities for those with disadvantaged backgrounds. Providing college education to a diverse range of individuals ensures **equal access to learning** and **fosters a more inclusive society**.

Agree:

I agree with the statement that college education should be primarily available to people who have performed well in secondary school. Firstly, strong academic performance indicates a higher likelihood of success in higher education, ensuring students are adequately prepared for the rigor of college-level courses. Secondly, limited college spots necessitate prioritizing students with a track record of academic achievement. Offering college access to top-performing students encourages excellence and promotes healthy competition. However, considering other factors, such as personal circumstances and potential, should also be part of the admission process.

Both-sided:

The question of whether college education should only be available to high-achieving secondary school students is complex and has valid arguments on both sides. On one hand, admitting students based on academic performance ensures that those with a proven track record of success are adequately prepared for higher education. This can enhance the overall quality of college programs and contribute to a competitive learning environment. On the other hand, some students may not excel academically in secondary school due to various factors, such as personal challenges or learning styles. Denying them access to college solely based on grades may limit their potential and

perpetuate inequality. A balanced approach, considering academic performance along with other criteria like motivation, potential, and diverse backgrounds, can promote a more inclusive and equitable college education system.

191. Do you like to be taught by experienced teachers or by new teachers?

Response 1:

I prefer to be taught by experienced teachers. Firstly, experienced teachers possess in-depth knowledge and expertise in their subject area, which leads to a **more comprehensive understanding of the topics**. Their teaching methods **have been refined over time**, ensuring effective and engaging lessons. For instance, in my history class, an experienced teacher brought historical events to life with engaging stories and examples. Secondly, experienced teachers have a better **grasp of student needs** and can **provide personalized support** to help students succeed.

Response 2:

I prefer being taught by new teachers. Firstly, new teachers often bring fresh perspectives and innovative teaching approaches that make the learning process more exciting. **Their enthusiasm for the subject can inspire students to explore new concepts**. For instance, a new science teacher in my school introduced hands-on experiments that made learning enjoyable and memorable. Secondly, new teachers are **open to feedback and adaptable**, allowing them to **incorporate student suggestions** and preferences into their teaching methods, creating a **collaborative and interactive learning environment**.

Response 3:

I have no strong preference between experienced and new teachers. Both have their advantages. Experienced teachers bring years of knowledge and effective teaching techniques, providing a strong foundation for learning. On the other hand, new teachers can bring fresh insights and enthusiasm, making classes engaging. For example, my experienced math teacher helped me master complex concepts, while a new English teacher sparked my interest in literature through creative discussions. A mix of experienced and new teachers creates a diverse learning experience, blending traditional methods with innovative approaches.

192. Do you agree or disagree with the following statement? It is good for students to attend a university or college in a foreign country. Explain why.

Response 1:

I agree with the statement that it is good for students to attend a university or college in a foreign country. Firstly, studying abroad exposes students to diverse cultures and perspectives, broadening

their worldview and enhancing their cultural understanding. This fosters tolerance and appreciation for different customs. For example, during my study abroad experience, I made friends from various backgrounds, and we exchanged knowledge about our cultures. Secondly, studying abroad challenges students to become more independent and adaptable, as they navigate new environments, which prepares them for future global opportunities and challenges.

Response 2:

I disagree with the statement. Attending a university or college in a foreign country can be challenging for some students. Language barriers and cultural differences may hinder effective learning and social integration. For example, international students may find it hard to follow lectures in a foreign language. Additionally, being far from family and familiar support networks can lead to feelings of isolation and homesickness, affecting academic performance. Instead, students can gain international exposure through exchange programs or global collaborations without the need for a full degree abroad.

Response 3:

I see both advantages and disadvantages in attending a university or college in a foreign country. On one hand, studying abroad offers unique learning opportunities, as students immerse themselves in a different educational system and culture. This exposure enhances adaptability and intercultural communication skills, which are valuable in a globalized world. However, challenges like language barriers and adapting to a new environment can be daunting for some students. It is essential for prospective students to weigh the benefits against potential difficulties and consider personal preferences before making the decision to study abroad.

193. Some people prefer to make decisions quickly. Others prefer to take their time. Which do you prefer and why? Use specific reasons and examples to support your response.

Response 1:

I prefer to make decisions quickly. Making swift decisions allows me to seize opportunities and stay ahead in fast-paced situations. For example, during a group project at university, I quickly volunteered to take up a challenging task, leading to a successful outcome. Decisiveness also enhances efficiency and productivity, as I can act promptly without prolonged deliberation. However, I do consider important decisions thoughtfully, weighing pros and cons. Overall, quick decision-making empowers me to be proactive and adaptable in both academic and personal endeavors.

Response 2:

I prefer taking my time when making decisions. By carefully analyzing options and considering potential consequences, I can make well-informed choices. For instance, when selecting a major in university, I took my time researching various fields and consulting academic advisors, leading to a decision that aligns with my passions and career goals. Taking time to make decisions **reduces the likelihood of impulsive choices**, ensuring more thoughtful and well-rounded outcomes. Although this approach may take longer, it provides **a sense of confidence and minimizes regrets**.

Response 3:

I believe the best approach is to strike a balance between quick decision-making and taking time when necessary. In situations that require immediate action, such as emergencies or time-sensitive opportunities, quick decision-making is crucial. On the other hand, complex decisions, like career choices or major life decisions, deserve thorough consideration. For example, when choosing between job offers, I carefully evaluated the job roles, benefits, and company culture before making a well-considered decision. This approach allows me to be efficient when needed while ensuring that important choices are made wisely and deliberately.

194. Some people prefer to be a leader in a group project, while others prefer to be a supporting member in a group project. Which do you prefer and why? Use examples and details in your explanation.

Response 1:

I prefer to be a leader in a group project. As a leader, I can guide and inspire the team, ensuring everyone stays focused and motivated. For instance, during a university group presentation, I took the lead role, assigning tasks based on individual strengths and coordinating the overall effort. Being a leader allows me to take responsibility for the project's success, making strategic decisions and resolving conflicts promptly. Additionally, leadership positions provide valuable opportunities to enhance communication and organizational skills, qualities essential in both academic and professional settings.

Response 2:

I prefer to be a supporting member in a group project. By playing a supporting role, I can contribute to the team's success without the pressure of overseeing every aspect. For example, in a research project, I excelled at gathering data, analyzing information, and presenting findings coherently. As a supporting member, I focus on executing tasks efficiently, collaborating with others, and offering valuable insights. This approach enables me to be a reliable team player, fostering a positive and cooperative atmosphere. Moreover, supporting roles allow me to learn from diverse perspectives and build strong relationships within the group.

Response 3:

I believe both leadership and supporting roles have their merits, and my preference depends on the project's nature and team dynamics. In situations where I possess expertise or experience, I am more comfortable taking on a leadership position to guide the team effectively. On the other hand, if I recognize that someone else in the group is better suited for a leadership role, I am willing to assume a supporting position to contribute my skills and ideas. Flexibility and adaptability to various roles allow me to contribute to the group's success while valuing collective efforts and cooperation.

195. Some people prefer to do one job or project at one time. Other people prefer to do several jobs or projects at the same time. Which do you prefer and why?

Response 1:

I prefer to focus on one job or project at a time. Concentrating on a single task allows me to dedicate my full attention and effort, leading to better quality outcomes. For instance, during my university studies, I found that completing one assignment before moving on to the next enabled me to thoroughly research and produce well-structured papers. This approach also helps me stay organized and avoid feeling overwhelmed by multitasking. By immersing myself in one project, I can achieve greater productivity and efficiency, leading to a sense of accomplishment.

Response 2:

I prefer to handle several jobs or projects simultaneously. Juggling multiple tasks allows me to stay engaged and challenged, preventing boredom and stagnation. For example, at work, managing multiple projects simultaneously helps me develop effective time management skills and prioritize tasks efficiently. This approach also enables me to capitalize on varying skills and interests, keeping me motivated and energized. While multitasking can be demanding, it enhances my ability to adapt to different situations and improves my problem-solving skills. Embracing a diverse workload helps me grow both personally and professionally.

Response 3:

I believe the optimal approach lies in a balance between focusing on one job or project at a time and handling several tasks simultaneously. For complex or time-sensitive projects, concentrating on one at a time ensures thoroughness and meticulousness. On the other hand, managing multiple tasks can be advantageous when dealing with smaller or less demanding responsibilities. By combining both methods, I can maintain productivity and efficiency while ensuring the quality of my work. This adaptive approach allows me to tailor my work style based on the specific requirements and demands of each job or project.

196. Do you agree or disagree with the following statement? Personality changes as one grows older.

Response 1:

I agree with the statement that personality changes as one grows older. Life experiences, responsibilities, and challenges contribute to personal growth and development. As individuals age, they may become more patient, understanding, and empathetic. For example, with more life experiences, people tend to gain wisdom and learn to handle situations with maturity. Personal relationships and family responsibilities can also influence one's personality, making them more nurturing and compassionate. Thus, as people age, they often undergo gradual changes in their personality traits.

Response 2:

I disagree with the statement that personality changes significantly as one grows older. While some aspects of personality may evolve with time, the core traits often remain relatively stable. For instance, a naturally introverted person may still lean towards introversion as they age. While life experiences can influence behavior and attitudes, fundamental personality characteristics tend to endure. People may refine their existing traits but rarely undergo drastic personality shifts. Thus, it is more accurate to say that personality remains relatively consistent with age.

Response 3:

I believe that personality changes to some extent as one grows older. Life experiences and exposure to different environments can shape one's character. As individuals encounter new challenges and responsibilities, they may develop resilience and adaptability. For example, a reserved person might become more outgoing and confident over time through exposure to social interactions. However, certain core traits might remain unchanged. In essence, while some aspects of personality are subject to change, others remain relatively stable throughout life's journey.

197. Do you agree or disagree with the following statement? Children should be required to help with household tasks as soon as they are old enough to do so. Use specific reasons and examples to support your answer.

Response 1:

I agree with the statement that children should be required to help with household tasks as soon as they are old enough to do so. Early involvement in household chores instills a sense of responsibility and discipline in children. When kids contribute to tasks like cleaning, setting the table, or doing laundry, they learn valuable life skills and develop a strong work ethic. For instance, my younger sibling started helping with basic chores at the age of five, and this not only eased the burden on my parents but also taught them the importance of teamwork and cooperation.

Response 2:

I disagree with the statement that children should be required to help with household tasks as soon as they are old enough to do so. Childhood is a crucial time for learning and exploration, and children should have ample time for play and education. Pushing them into household tasks at a very young age might burden them and hinder their overall development. While it's essential to teach children responsibility, it should be done gradually, taking their age and maturity into account. Instead, parents can introduce simple tasks as they grow older, making it a positive and educational experience.

Response 3:

I believe that children should be encouraged but not necessarily required to help with household tasks as soon as they are old enough to do so. Introducing age-appropriate chores can be beneficial in teaching responsibility and teamwork. However, it's crucial to strike a balance and not overwhelm them with tasks. Assigning chores that are too challenging may lead to frustration and resistance. For example, my parents encouraged me to help with basic tasks as a young child, which helped build a sense of responsibility without putting excessive pressure on me. Gradually increasing the complexity of chores can nurture their skills and independence over time.

198. What do you think is the most important quality of a working environment: good leaders, good colleagues, or flexible time?

Response 1:

In my opinion, good leaders are the most important quality of a working environment. A strong leadership team can inspire and guide employees, fostering a positive and productive atmosphere. Good leaders provide clear direction, offer support, and encourage professional growth. They create a sense of trust and respect, leading to higher job satisfaction and better performance among employees. For instance, I experienced this firsthand when I had a supportive manager who motivated the team to achieve goals and recognized our contributions, making the workplace a more enjoyable and efficient environment.

Response 2:

I believe that good colleagues are the most important quality of a working environment. Working alongside supportive and cooperative colleagues can significantly impact job satisfaction and overall happiness. Positive work relationships create a sense of camaraderie and make the workplace enjoyable. When colleagues collaborate and help each other, it leads to increased productivity and creativity. For example, in my previous job, my colleagues were always ready to offer assistance and share ideas, which made the workplace dynamic and motivating.

Response 3:

In my view, flexible time is the most important quality of a working environment. Flexibility in working hours allows employees to achieve a better work-life balance, reducing stress and burnout. This freedom empowers individuals to manage their time efficiently, leading to increased job satisfaction and productivity. For instance, with flexible hours, employees can adapt their work schedules to personal needs or unforeseen circumstances, creating a more accommodating and supportive work environment. It also helps attract and retain talent, as it accommodates diverse lifestyles and individual preferences.

199. Do you agree or disagree? Cell phone has changed our lives greatly.

Response 1:

I strongly agree that cell phones have changed our lives greatly. These devices have revolutionized communication, making it easier to stay connected with friends, family, and colleagues no matter the distance. Cell phones have also transformed how we access information, enabling quick and convenient access to the internet and various applications. Moreover, they have become indispensable tools for many daily tasks, including managing schedules, navigation, and online shopping. For instance, I rely on my cell phone for work communication, social interactions, and accessing news and entertainment, which has significantly impacted how I navigate daily life.

Response 2:

I disagree with the idea that cell phones have changed our lives greatly. While cell phones have undoubtedly brought technological advancements, their impact on our lives may not be as profound as suggested. People have always found ways to communicate, and cell phones have simply facilitated this process. Additionally, while cell phones provide convenience, they have also introduced challenges, such as distractions and overreliance on technology. While they are helpful tools, other aspects of our lives, such as human interactions and personal experiences, remain equally significant in shaping our experiences and perspectives.

Response 3:

I believe that cell phones have indeed changed our lives significantly. The widespread use of cell phones has transformed how we interact, communicate, and access information. With the rise of smartphones, we carry a powerful computer in our pockets, allowing us to stay connected, work remotely, and access a wealth of knowledge instantly. However, while cell phones have enhanced our lives in many ways, they have also raised concerns about privacy, digital addiction, and their impact on social interactions. Striking a balance in their use is essential to fully benefit from their advantages while minimizing potential drawbacks.

200. Some people like to spend their spare time with friends, some people like to spend it alone. Which one do you prefer?

Response 1:

I prefer to spend my spare time with friends. Interacting with friends brings joy, laughter, and a sense of belonging. Socializing allows us to share experiences, exchange ideas, and support each other through challenges. For example, going out for coffee with friends helps me unwind and creates lasting memories. Being with friends also fosters personal growth and helps develop empathy and understanding by learning from different perspectives.

Response 2:

I prefer to spend my spare time alone. Being alone gives me the opportunity to recharge, reflect, and focus on personal interests. Solitude provides a peaceful environment to engage in activities like reading, writing, or pursuing hobbies. For instance, I enjoy taking solitary walks in nature, which helps me relax and clear my mind. Furthermore, spending time alone allows me to set my own pace and explore my individuality without external influences.

Response 3:

I enjoy a balance of spending spare time with friends and alone. Being with friends brings a sense of connection and shared experiences, which is essential for a fulfilling social life. On the other hand, solitude allows for self-reflection and introspection, enabling personal growth and recharging. For instance, I appreciate spending weekends with friends to enjoy fun activities and then using alone time during weekdays to focus on personal projects and interests. This combination ensures both social interactions and self-care, contributing to a well-rounded and fulfilling life.

201. If you were to become a volunteer at the school or in the community, what kind of volunteer work would you do and why?

Response 1:

If I were to become a volunteer, I would choose to work with underprivileged children in the community. I believe every child deserves access to quality education and support. By volunteering at schools or community centers, I can assist in providing educational resources, tutoring, and mentorship to these children. It gives me the opportunity to make a positive impact on their lives, empowering them for a better future. Additionally, working with children brings joy and fulfillment, knowing that I am contributing to their growth and development.

Response 2:

As a volunteer, I would be interested in environmental conservation projects in the community. Protecting the environment is crucial for the well-being of our planet and future generations. By participating in initiatives like clean-up drives or tree planting, I can contribute to a sustainable and greener community. Environmental volunteering allows me to connect with like-minded individuals and raise awareness about environmental issues. Being part of such projects gives a sense of purpose and fulfillment, knowing that my actions contribute to preserving the planet.

Response 3:

If I were to volunteer, I would choose to work with elderly people in the community. Many seniors experience loneliness and may need assistance with daily tasks. As a volunteer, I can offer companionship, help with chores, and engage them in activities to keep their minds active. This work allows me to show respect and gratitude to the older generation, who have valuable life experiences to share. Volunteering with seniors creates a sense of community and compassion, fostering intergenerational connections and promoting empathy.

202. Do you agree or disagree with the following statement? Artists and musicians are important to our society.

Answer 1:

I firmly agree that artists and musicians play a crucial role in our society. Firstly, they enrich our culture and heritage by creating beautiful artworks and music. Secondly, they express emotions and thoughts, giving a voice to society's feelings and concerns. For example, famous artists have captured historical events through their paintings. Moreover, their creations provide entertainment and joy, bringing people together and promoting unity among diverse communities.

Answer 2:

Without a doubt, artists and musicians hold immense importance in our society. Firstly, they inspire us with their creativity and imagination, encouraging us to think outside the box. Secondly, they contribute to the economy through their artworks and performances, creating jobs in the art industry. For instance, music concerts attract large audiences, stimulating local businesses. Additionally, artists often use their platform to raise awareness about social issues, initiating positive changes in society.

Answer 3:

Absolutely, artists and musicians are indispensable to our society. Firstly, their works serve as a reflection of our collective identity, preserving our history and values for future generations. Secondly, they promote emotional well-being by offering solace and inspiration to individuals during difficult times. For example, a touching song can comfort someone facing adversity. Furthermore,

artists and musicians bring diversity and innovation, making our society more vibrant and culturally enriched.

203. Some students take notes very often during class. Other students do not take notes or rarely take notes. Which do you think is better?

Response 1:

I believe taking notes during class is beneficial for students. Firstly, note-taking helps improve concentration and active listening, ensuring that important information is not missed. Secondly, reviewing notes later aids in better retention of the material. For example, when I take notes, I can refer back to them while studying for exams, making the learning process more efficient. Taking notes also encourages critical thinking as I jot down key concepts and connect ideas. Overall, note-taking enhances the learning experience and promotes academic success.

Response 2:

Both approaches have their merits. Some students prefer not to take notes and focus solely on listening, allowing them to fully engage with the instructor. On the other hand, taking notes can help reinforce understanding and retention of the material. However, it depends on individual learning styles. Personally, I prefer taking selective notes, jotting down essential information and key points. This way, I strike a balance between active listening and capturing critical information, making my learning experience more effective.

Response 3:

In my opinion, taking notes during class is advantageous for students. It helps maintain focus and attention, preventing distractions. Additionally, note-taking aids in organizing and summarizing complex information, making it easier to review later. For instance, when I take detailed notes, I can revisit the content at my own pace, reinforcing my understanding. However, some students might benefit from alternative learning strategies, such as audio recording or visual aids, depending on their learning preferences and the nature of the subject.

204. Watching TV is not a good use of time. Do you agree or disagree?

Response 1:

I partially agree with the statement. While excessive TV watching can be a time-waster, it can also offer educational and informative content. For instance, watching documentaries and educational programs can expand knowledge on various subjects. However, spending too much time on entertainment shows can be detrimental to productivity and overall well-being. Therefore, it's

essential to strike a balance between TV viewing and other meaningful activities like reading, exercising, or pursuing hobbies.

Response 2:

I disagree with the statement. TV can be a valuable source of entertainment and relaxation, providing a break from daily stresses. Moreover, it can offer educational programs and news, keeping viewers informed about current events and fostering knowledge. Moderation is the key; managing time wisely allows for both productive activities and leisure. Engaging in thoughtful TV viewing, coupled with other enriching pursuits, can lead to a well-rounded and enjoyable lifestyle.

Response 3:

I agree with the statement to some extent. While TV can be a means of relaxation, excessive watching can lead to time wastage and decreased productivity. Instead of solely relying on TV for entertainment, I believe in diversifying activities. Engaging in hobbies, socializing with friends, or pursuing personal development opportunities can be more fulfilling. However, selective and purposeful TV viewing, such as watching informative documentaries or discussing shows with family, can be a healthy way to unwind without letting it consume excessive time.

205. Do you agree or disagree with the following statement? What a person wears can show his or her personality.

Agree: I agree that what a person wears can show his or her personality. Clothing choices often reflect individual tastes, preferences, and values. For example, someone who dresses in colorful and eccentric outfits may be seen as creative and outgoing, while a person who prefers simple and elegant clothing may be perceived as sophisticated and reserved. Clothing can also be a form of self-expression, allowing people to showcase their identity and cultural background through traditional attire.

Disagree: I disagree that what a person wears can always accurately reflect his or her personality. While clothing can provide some insights into a person's style and interests, it may not fully capture their complex personality traits. People may dress differently depending on the occasion or social context, and their wardrobe choices may not always align with their true inner selves. Additionally, some individuals may consciously choose to wear clothing that deliberately conceals or alters their personality, making it challenging to make accurate judgments based solely on appearance.

Both-sided: The relationship between what a person wears and their personality can be complex. In some cases, clothing choices may provide valuable insights into a person's character and interests. However, it is essential to consider that fashion trends, social norms, and personal circumstances can influence wardrobe decisions. While clothing can hint at certain aspects of a person's

personality, it is crucial not to make sweeping judgments solely based on appearances. Getting to know someone on a deeper level through meaningful conversations and interactions is the key to understanding their true personality.

206. Do you prefer to listen to live music like concert, or do you prefer to listen to recorded music?

Response 1:

I prefer listening to live music like concerts for two main reasons. Firstly, the electrifying atmosphere and energy of **live performances create a unique and memorable experience**. Secondly, witnessing musicians perform in real-time, showcasing their talent and passion, adds to the enjoyment. For example, attending a rock concert and feeling the pulsating beats of the drums makes the music come alive.

Response 2:

While live concerts are exhilarating, I also enjoy listening to recorded music for several reasons. Firstly, **it offers convenience and accessibility**. It allows me to enjoy my favorite songs anytime and anywhere, whether during travel or relaxing at home. Moreover, recorded music **offers a diverse range of genres and artists**, allowing me to explore new music easily. For instance, I can discover indie bands and classical compositions with just a few clicks.

Response 3:

Both live and recorded music have their appeal, catering to different moods and occasions. I prefer live music for its immersive experience and interaction with artists. Attending concerts with friends is an exciting social activity. On the other hand, recorded music is convenient and suits individual moments of relaxation. Whether attending a live performance or enjoying recorded music, both forms contribute to my love for music and its role in shaping emotions and memories.

207. Do you prefer to learn from current people and events or from people and events in the past?

Response 1:

I prefer learning from current people and events for two main reasons. Firstly, **contemporary knowledge is up-to-date and relevant**, reflecting the current state of the world. Secondly, modern technology allows us to access information quickly and efficiently. For example, online platforms provide real-time updates on scientific discoveries and global events, enabling **me to stay informed and adapt to the fast-changing world**.

Response 2:

Learning from people and events in the past also has its advantages. Historical figures and events offer valuable lessons and insights into human experiences and past civilizations. Studying history helps us understand our roots and the evolution of societies. Additionally, historical accounts provide a rich source of wisdom and cautionary tales. For instance, **examining historical mistakes can prevent us from repeating them.**

Response 3:

Both present and past learning have their merits. While current knowledge keeps us informed and adaptable, studying the past offers a broader perspective and a deeper understanding of human history. Integrating both approaches allows us to make informed decisions for the future while appreciating the contributions and struggles of those who came before us. A balanced approach to learning from both current and historical sources enriches our knowledge and wisdom.

208. Do you like to go to one place and stay there for a long time for your vacation, or different places and spend little time at each place?

Response 1:

I prefer going to one place and staying there for a long time for my vacation. Firstly, it allows me to fully immerse myself in the culture and atmosphere of the destination. I can explore the local attractions in-depth and **build meaningful connections with the locals.** Secondly, staying in one place **reduces the stress of constant travel and allows for a more relaxing and rejuvenating experience.**

Response 2:

On the other hand, traveling to different places and spending little time at each has its appeal. It offers the opportunity to experience diverse cultures, landscapes, and cuisines within a short period. Moving around allows me to cover more ground and see various attractions, which can be **exhilarating and enriching.**

Response 3:

Both options have their merits. Staying in one place offers a deeper connection and understanding of the location, while traveling to different places provides a diverse and dynamic adventure. The choice depends on the type of experience one seeks and the time available for the vacation.

209. Choose ONE of the forms of the technology in the list and tell why it has great impact on people's lives in your country? Airplane, computer or television. Use specific reasons and examples to support your response.

1. Airplane:

The airplane has a profound impact on people's lives in my country. Firstly, it enables fast and convenient travel, connecting distant regions and promoting tourism. Secondly, it facilitates international trade, leading to economic growth. For instance, fresh produce can be exported quickly, benefiting farmers and consumers alike. Thus, the airplane has revolutionized travel and business, making it an indispensable technology in our lives.

2. Computer:

The computer plays a crucial role in people's lives in my country. Firstly, it improves communication, allowing us to **stay connected with loved ones worldwide**. Secondly, it enhances productivity at work, enabling quick completion of tasks. For example, in my job, we use computers to analyze data efficiently, leading to better decision-making. Overall, the computer has transformed how we communicate and work, making it an essential technology in our lives.

3. Television:

Television has a significant impact on people's lives in my country. Firstly, it serves as a source of information and education, keeping us updated on current events and providing valuable knowledge. Secondly, it entertains and brings families together, fostering a sense of unity. For instance, we watch educational shows as a family, which **sparks discussions and learning**. Therefore, television has transformed our access to information and entertainment, making it a valuable technology in our lives.

210. Which is better for children: to grow up in a big city or to grow up in a small town?

1. Growing up in a big city can offer children several advantages. Firstly, they **have access to better educational opportunities with a variety of schools and extracurricular activities**. Secondly, **the cultural diversity exposes them to different perspectives, promoting tolerance and understanding**. For example, they can interact with kids from various backgrounds in school, **fostering a sense of inclusivity**. However, growing up in a small town has its benefits too.

2. Growing up in a small town has its own merits. Firstly, children can experience a close-knit community, **fostering strong social bonds and a sense of belonging**. Secondly, the environment is generally safer, allowing for more outdoor activities and exploration. For instance, **kids can freely**

play outside without constant concerns about safety. Nonetheless, growing up in a big city also has its positive aspects.

3. While growing up in a big city offers opportunities, small towns have their charms. Firstly, the pace of life is often slower, promoting a less stressful and more relaxed childhood. Secondly, the sense of community in small towns encourages active participation in local events, leading to a more fulfilling social life. For example, children can engage in various community programs, cultivating a sense of responsibility and empathy. Still, each setting provides unique benefits for children's upbringing.

211. Some people like to watch or listen to news every day while others do that occasionally. Which do you prefer and why? Use specific reasons and examples to illustrate your point.

1. I prefer to watch or listen to the news every day. Firstly, staying updated daily helps me remain informed about current events and developments worldwide. It allows me to participate in meaningful discussions with friends and colleagues, contributing to a well-informed society. For example, when discussing global issues, I can share relevant news stories, adding credibility to my arguments. Secondly, regular news consumption enables me to make informed decisions in my personal and professional life. Whether it's about investment choices or voting in elections, being well-informed is crucial.

2. I occasionally watch or listen to the news. While staying informed is essential, it can become overwhelming to keep up daily. Instead, I prefer to consume news in small doses to prevent information overload. Additionally, occasional news-watching gives me time to reflect on current events, promoting a deeper understanding. For instance, after a significant news report, I take time to research and explore different viewpoints before forming my opinions. This approach allows me to stay informed without feeling mentally exhausted.

3. I prefer to watch or listen to the news every day, but I focus on reputable sources. Consistent news consumption helps me maintain awareness of ongoing events that impact society. Moreover, credible news outlets ensure the information is accurate and unbiased, enabling me to form well-rounded opinions. For instance, following daily news from reliable organizations helps me understand global economic trends, which benefits my career as an economist. By being selective with my news sources, I can stay informed effectively without being overwhelmed by irrelevant or sensationalized content.

212. Do you prefer to have fast food in a fast-food restaurant, or do you prefer to have food in other kinds of places?

1. I prefer to have food in other kinds of places. Firstly, eating at different establishments allows me to explore a variety of cuisines, enhancing my culinary experiences. Trying new dishes from various restaurants or cafes adds excitement to my meals. Secondly, dining in other places often provides a more relaxed and enjoyable atmosphere, allowing me to savor the meal without feeling rushed. For example, I love having dinner at cozy family-owned restaurants where I can enjoy both delicious food and a warm ambiance.

2. I prefer to have food in a fast-food restaurant for certain occasions. Firstly, fast-food restaurants offer quick service, which is convenient when I'm on a tight schedule or need a speedy meal. Secondly, the standardized menu ensures consistency in taste, especially when traveling to different locations. For instance, during road trips, fast-food restaurants provide a familiar option for a quick bite. However, I do enjoy exploring local eateries for unique dining experiences.

3. I equally enjoy both options. Eating at fast-food restaurants offers convenience, especially during busy days when I need a quick and familiar meal. On the other hand, dining at other kinds of places provides a more diverse and enriching culinary experience. For instance, I often opt for fast food during workdays but prefer exploring local restaurants with friends and family during weekends. Having a balance between the two allows me to appreciate the advantages of both fast-food establishments and other eateries.

213. Some students prefer to take an essay question where they must write an essay to a question. Other students prefer to take a test with objective/multiple-choice questions. Which type of exam question do you prefer? Give reasons and examples in your explanation.

Answer 1:

Personally, I prefer essay questions over objective/multiple-choice questions. Firstly, essay questions allow me to demonstrate my critical thinking skills and express my thoughts in a more detailed and nuanced manner. I can provide supporting evidence and elaborate on my ideas, showcasing a deeper understanding of the topic. For instance, in a history exam, I can analyze different perspectives and draw well-reasoned conclusions in an essay. Secondly, essay questions provide an opportunity for creativity and personal expression, enabling me to showcase my unique writing style and voice.

Answer 2:

I lean towards objective/multiple-choice questions as my preferred type of exam question. Firstly, they offer a clear and concise format, which helps in organizing my thoughts and providing focused responses. The options provided help to narrow down potential answers and eliminate ambiguity. For example, in a science exam, multiple-choice questions enable me to apply my knowledge and

quickly select the correct answer. Secondly, objective questions provide a fair and standardized evaluation method, reducing potential subjectivity in grading.

Answer 3:

I have a slight preference for essay questions as they allow for a more comprehensive assessment. Firstly, essay questions provide an opportunity to demonstrate in-depth knowledge and understanding of a topic. I can delve into complex concepts, present arguments, and provide supporting examples, showcasing a higher level of analysis and synthesis. For instance, in a literature exam, I can explore the themes, character development, and literary devices in an essay. Secondly, essay questions encourage critical thinking and creativity, fostering a deeper engagement with the subject matter and promoting independent thought.

214. Do you agree or disagree with the following statement? People who are 18 years old are not mature enough to vote.

Answer 1:

I disagree with the statement that people who are 18 years old are not mature enough to vote. At 18, individuals become legal adults, **gaining various responsibilities and rights**, including the right to vote. Firstly, at this age, many **young adults are well-informed about social and political issues, thanks to education and access to information**. Secondly, voting **empowers young people to participate in shaping their society** and ensures their voices are heard in the democratic process. For example, numerous young voters have actively contributed to **promoting environmental awareness** and **advocating for social justice issues**.

Answer 2:

I disagree with the idea that 18-year-olds lack the maturity to vote. Turning 18 marks a significant milestone when individuals are considered mature enough to **make crucial life decisions**, such as **enlisting in the military** or **signing legal contracts**. Firstly, **young people today are more engaged and aware of political matters due to advancements in technology and education**. Secondly, voting at 18 **encourages civic responsibility and active citizenship, fostering a sense of belonging and participation** in the democratic system. For instance, many young voters have shown a **keen** interest in voting for leaders who champion issues like education and job opportunities.

Answer 3:

I strongly disagree that 18-year-olds lack the maturity required for voting. At this age, individuals have completed their formal education, which includes learning about civics and the importance of democratic participation. Firstly, denying them the right to vote undermines the principles of democracy, which aim to include all citizens in decision-making. Secondly, many 18-year-olds are actively involved in community service and social causes, displaying a level of maturity and

responsibility. For example, young activists have led movements for equality and human rights, proving their capability to make informed decisions at the ballot box.

215. Are you willing to carefully choose the gift which your friends like or choose whatever you like?

Agreeing:

I completely agree that it is essential to carefully choose a gift that my friends will like. Firstly, considering their preferences shows **thoughtfulness and consideration for their feelings**, which **strengthens our bond**. For example, my friend loves photography, so I gifted them a camera accessory, which made them genuinely happy. Secondly, selecting a gift based on their likes ensures that **it will be meaningful and useful to them**, increasing the chances of it being cherished for a long time.

Disagreeing:

While I value my friends' likes and interests, I believe choosing a gift based solely on their preferences might limit the opportunity to **introduce them to new experiences**. Firstly, **surprising them with something they never considered could spark curiosity and excitement**. For instance, I gifted a friend who enjoys cooking a unique spice set, and they discovered new flavors they now love. Secondly, choosing a gift based on my own interests could lead to sharing experiences together, fostering a stronger connection.

Both-sided:

The question of whether to choose a gift my friends like or one based on my preferences has valid arguments on both sides. Firstly, carefully selecting a gift based on their likes shows that I value and understand their interests, which can strengthen our friendship. For example, my friend loves art, so I gifted them a painting kit that they appreciated and used enthusiastically. On the other hand, choosing a gift based on my own preferences might also have its merits. It allows me to share my passions and hobbies, potentially introducing them to new experiences. For instance, I gifted a book I loved to a friend, and we ended up discussing it and bonding over shared interests. Ultimately, the decision depends on the individual's preferences and the specific dynamics of the friendship.

216. Among the following three types of books, which do you like the least? • mystery novel • science fiction • biography

Response 1:

Among the three types of books, I like biographies the least. Firstly, they often lack the thrilling plots found in mystery novels or science fiction, making them less captivating. Secondly, biographies may

focus on historical figures that I have little interest in, making it challenging to engage with the content. For instance, reading a biography about a renowned scientist might not excite me if I prefer more imaginative stories. Thus, I tend to gravitate towards mystery novels and science fiction for more enjoyable reading experiences.

Response 2:

Out of the three book types, I find biographies the least appealing. Firstly, they tend to follow a linear narrative, lacking the suspense and excitement of mystery novels or science fiction. Secondly, reading about real-life figures may not always resonate with my interests or preferences. For example, I might not find a particular historical figure's life story as captivating as a thrilling detective mystery. Therefore, I usually prefer the imaginative and adventurous plots found in mystery and science fiction books.

Response 3:

My least favorite among the three types of books is biographies. Firstly, they often lack the intrigue and suspense of mystery novels or science fiction stories. Secondly, biographies may focus on individuals from a distant era, making it difficult to relate to their experiences. For example, I might struggle to connect with the life of an ancient explorer compared to immersing myself in a thrilling mystery or an imaginative science fiction adventure. Thus, I tend to enjoy mystery novels and science fiction more than biographies.

217. Do you like to travel alone or travel with your family members? Explain why.

Response 1 (Travel Alone):

I prefer traveling alone for two main reasons. Firstly, it grants me the freedom to explore on my terms. I can choose destinations, activities, and schedules without **compromise**. This flexibility enhances my travel experience. Secondly, solo travel fosters personal growth and self-reliance. When I visited Spain alone, I navigated through unfamiliar places, boosting my confidence. Additionally, I made new friends from different cultures, broadening my horizons. Overall, traveling solo **empowers me to embrace independence** and **enrich my understanding of the world**.

Response 2 (Travel with Family Members):

I enjoy traveling with my family members due to two primary reasons. Firstly, family trips **create stronger bonds and lasting memories**. **Sharing experiences with loved ones** brings joy and strengthens our relationships. Secondly, having family members around provides a sense of security and support. During our trip to Thailand, my parents offered guidance on local customs, easing

cultural adjustments. Moreover, my sister's company made the journey more enjoyable. In conclusion, traveling with family ensures cherished moments and a sense of togetherness.

Response 3 (Both-Sided Answer):

Choosing between solo travel and traveling with family members depends on the situation. Solo travel appeals to me when seeking independence and personal growth. The ability to customize the journey and challenge myself in new environments is invaluable. For example, during my solo trip to Australia, I explored breathtaking landscapes without time constraints. On the other hand, traveling with family brings its unique advantages. Family trips foster stronger connections and shared experiences, making them memorable and heartwarming. When we visited France together, we laughed, learned, and appreciated each other's company. Ultimately, both types of travel have their merits, and the choice depends on my goals and the experience I seek at a particular time.

218. Do you agree or disagree with the following statement? Playing computer or video games has a negative influence on teenagers.

Agreeing response:

I agree that playing computer or video games can have a negative influence on teenagers for two primary reasons. Firstly, excessive gaming can lead to reduced physical activity, contributing to health issues like obesity and postural problems. Secondly, prolonged gaming sessions may interfere with academic performance, as it can lead to poor time management and lack of focus on studies. For example, I know a friend who struggled with grades due to spending excessive time on video games.

Disagreeing response:

I disagree that playing computer or video games always has a negative influence on teenagers. Two main reasons support this viewpoint. Firstly, gaming can foster teamwork and social skills when played with friends, enhancing communication and cooperation. Secondly, certain video games promote problem-solving and strategic thinking abilities, which can be beneficial in real-life situations. As an illustration, my cousin improved their analytical skills and decision-making through strategy-based games.

Both-sided response:

The impact of playing computer or video games on teenagers is a complex issue with both positive and negative aspects. On one hand, excessive gaming can lead to negative consequences, such as reduced physical activity and potential academic challenges. On the other hand, moderate gaming can offer social benefits, promoting teamwork and communication skills. Additionally, some video games can enhance cognitive abilities and problem-solving skills.

Encouraging responsible gaming habits and a balanced approach can ensure that teenagers enjoy the benefits of gaming while mitigating its potential negative influences.

219. Some college students like to spend their free time studying another course or doing schoolwork. Others like to join a club and enjoy club activities. Which do you think is better and why?

Response 1 (Studying Another Course):

Studying another course is beneficial for two reasons. Firstly, it deepens knowledge and fosters expertise in chosen fields. Additional courses allow exploration of specific interests and development of specialized skills for future careers. Secondly, it enhances academic performance overall. Reinforcing learning through extra studies boosts confidence and proficiency in primary subjects. For instance, taking advanced math classes improved my problem-solving abilities in various subjects. Investing time in studying contributes to personal growth and academic success.

Response 2 (Joining a Club):

Joining a club is advantageous for two reasons. Firstly, it promotes well-rounded development beyond academics. Engaging in sports, arts, or volunteering improves teamwork, leadership, and time management skills. Secondly, clubs offer social opportunities and a sense of community. Building relationships and networking enrich college experiences. For example, participating in a debate club enhanced my public speaking skills and led to lasting friendships. Embracing club activities cultivates valuable life skills and lasting memories.

Response 3 (Both-Sided Answer):

Both spending free time studying another course and joining a club have their merits. Studying another course enhances knowledge and expertise in specific fields, paving the way for future careers. Conversely, joining a club fosters well-rounded development and offers social opportunities. It improves teamwork, leadership, and time management skills. Additionally, clubs provide a sense of community and lasting friendships. Striking a balance between academics and extracurricular activities allows students to excel academically while enjoying personal growth and social experiences.

220. Do you agree or disagree with the following statement? University students should learn how to manage their time more efficiently.

Agreeing response:

I wholeheartedly agree that university students should learn how to manage their time more efficiently for two compelling reasons. Firstly, effective time management empowers students to allocate sufficient time for studying, assignments, and extracurricular activities, leading to better academic performance. Secondly, mastering time management skills prepares students for the demands of the professional world, where meeting deadlines is crucial. For example, I improved my grades significantly by using a planner and setting clear study goals.

Disagreeing response:

While time management is important, I disagree that university students should focus solely on learning to manage their time more efficiently. Two main reasons support this stance. Firstly, some students thrive in spontaneous environments and may find rigid time schedules restricting their creativity and productivity. Secondly, it is equally vital for students to develop critical thinking and problem-solving skills, which are not directly addressed by time management alone. For instance, my friend excelled in their studies despite having an unconventional study routine.

Both-sided response:

The importance of time management for university students is undeniable, but there are pros and cons to consider. On one hand, learning time management enables students to be organized, focused, and achieve academic success. On the other hand, overly rigid time management may lead to increased stress and burnout, affecting students' well-being and creativity negatively. Striking a balance by incorporating flexible time management techniques and promoting a holistic approach to education that includes problem-solving and critical thinking skills can best prepare students for both academic excellence and personal growth.

221. Some people think it is better for students to study in a class. Others think that it is better for students to study on the Internet. Which do you think is better and why?

Response 1:

I believe that studying in a class is better for students for two main reasons. Firstly, in-class learning promotes direct interaction and engagement with teachers and peers, allowing for immediate clarification of doubts and stimulating discussions. Secondly, the structured environment of a classroom provides a focused and disciplined atmosphere conducive to learning. For instance, during in-class sessions, I benefited from real-time feedback from my teachers and had the opportunity to collaborate with classmates on group projects.

Response 2:

In my opinion, studying on the Internet is better for students due to two significant reasons. Firstly, online resources offer a vast array of educational materials, allowing students to explore diverse

topics and access up-to-date information easily. Secondly, studying on the Internet provides flexibility in terms of time and location, enabling students to learn at their own pace. For example, I could access online courses and tutorials that were not available in my local area, expanding my learning opportunities.

Response 3:

Both studying in a class and studying on the Internet have their advantages, and the choice depends on individual preferences and circumstances. In-class learning offers face-to-face interactions, fostering social skills and immediate support from teachers. On the other hand, studying on the Internet provides a self-directed learning experience, allowing students to tailor their studies to their own interests and schedule. By combining the benefits of both approaches, such as participating in classroom discussions while utilizing online resources for additional research, students can enhance their learning experience effectively.

222. Some students prefer to go to universities or colleges in their hometown. Others prefer to go to universities or colleges in new cities or towns. Which do you prefer and why? Include details and examples in your explanation.

Response 1:

I prefer going to a university or college in a new city or town for two compelling reasons. Firstly, studying in a new place exposes me to diverse cultures, ideas, and experiences, broadening my horizons and helping me develop a more open-minded perspective. Secondly, being away from my hometown encourages self-reliance and independence, as I learn to navigate unfamiliar environments and make important decisions. For instance, when I moved to a different city for college, I embraced new friendships, tried various cuisines, and gained a sense of maturity and adaptability.

Response 2:

In my view, attending a university or college in my hometown is the better option for two main reasons. Firstly, staying close to family and friends provides a strong support system during challenging academic and personal times. Secondly, it offers a cost-effective solution, avoiding the expenses of relocating and living in a new city. For example, by studying in my hometown, I could focus on my studies without worrying about the financial burden of accommodation and travel costs.

Response 3:

Both options of attending a university or college in my hometown or a new city have their merits, and the choice depends on individual preferences and priorities. Studying in a new city offers exciting opportunities for personal growth and independence, while studying in my hometown provides the comfort of familiar surroundings and a close-knit support network. By carefully

considering my academic and personal goals, I can make a well-informed decision that aligns with my aspirations and values.

223. Do you prefer to take courses related to a specific career, or do you prefer to take a variety of courses?

Response 1:

I prefer to take courses related to a specific career for two main reasons. Firstly, specialized courses provide in-depth knowledge and skills directly applicable to my chosen career path, increasing my employability and professional growth. Secondly, focusing on specific courses allows me to develop expertise in a particular field, positioning me as a valuable asset in the job market. For instance, by taking specialized courses in computer programming, I gained the necessary skills to pursue a career as a software developer.

Response 2:

I prefer to take a variety of courses for two compelling reasons. Firstly, exploring diverse subjects exposes me to different perspectives, broadening my understanding of the world and enhancing my critical thinking abilities. Secondly, diverse courses foster a well-rounded education, equipping me with transferable skills and knowledge applicable across various industries. For example, taking courses in humanities, sciences, and business helped me develop a multidisciplinary approach to problem-solving and improved my communication and analytical skills.

Response 3:

Both approaches of taking courses related to a specific career or a variety of courses have their merits, and the choice depends on individual goals and interests. Taking courses related to a specific career allows for targeted skill development and specialization, while a variety of courses offers a broader knowledge base and the opportunity to explore different areas of interest. By carefully considering my long-term career aspirations and personal inclinations, I can strike a balance that combines specialized knowledge with a well-rounded education.

224. Some people would borrow money to buy things they need. Others would save up money until they can afford it. Which would you prefer and why?

Response 1:

I prefer saving up money until I can afford to buy things for two main reasons. Firstly, saving allows me to avoid accumulating debt and interest payments, ensuring financial stability in the long run. Secondly, the act of saving instills discipline and financial responsibility, helping me develop better money management habits. For instance, by patiently saving for a few months, I purchased a laptop

without any financial burden, and it gave me a sense of accomplishment and control over my finances.

Response 2:

In my view, borrowing money to buy things I need is a more practical approach for two compelling reasons. Firstly, it allows me to acquire essential items immediately, addressing urgent needs or opportunities without delay. Secondly, well-managed borrowing can help build a positive credit history, which may be beneficial in the future for significant investments, such as buying a house. For example, I borrowed money to invest in a certification course that led to a higher-paying job, making it a wise financial decision.

Response 3:

Both approaches of borrowing money and saving up have their merits, and the choice depends on the urgency of the need and individual financial circumstances. Saving up money ensures financial security and eliminates the burden of debt, promoting responsible spending. On the other hand, borrowing money can provide immediate access to necessary items or opportunities, aiding in personal or career growth. By carefully evaluating the situation and considering the long-term impact, I can make informed decisions that align with my financial goals and values.

225. Should students start to plan their career before entering college, or should they do so until they have entered college and studied for a period of time?

Agreeing response:

I believe students should start planning their career before entering college for two main reasons. Firstly, early career planning allows students to set clear goals and choose relevant courses that align with their aspirations, maximizing their learning experience. Secondly, it gives them a head start in building relevant skills and seeking internships or part-time jobs related to their chosen field. For example, by planning my career before college, I knew to focus on engineering courses, which helped me secure an internship in a renowned engineering firm during my first year.

Disagreeing response:

In my view, students should begin career planning after entering college and studying for a period of time for two compelling reasons. Firstly, experiencing various subjects and courses in college can help students identify their true interests and passion, leading to more informed career decisions. Secondly, college provides ample opportunities for networking and career counseling, which can guide students towards the most suitable career paths. As an example, after exploring different majors and attending career fairs, I discovered my passion for marketing and shifted my career focus accordingly.

Both-sided response:

Both approaches to career planning have their merits, and the choice depends on individual preferences and circumstances. Starting career planning before entering college allows students to have a clear direction and make more informed college choices. Conversely, deferring career planning until after entering college offers the advantage of firsthand experience and exposure to diverse subjects and career options. A balanced approach, incorporating initial career exploration before college and refining plans based on college experiences, can lead to well-rounded career decisions that suit the individual's interests and strengths.

226. Do you agree or disagree with the following statement? The Internet plays an important role in your life. Use specific examples and details to support your answer.

Agreeing response:

I strongly agree that the Internet plays an important role in my life for two compelling reasons. Firstly, **it serves as an invaluable tool for communication**, connecting me with friends and family worldwide through social media and video calls. Secondly, **the Internet offers limitless educational resources**, aiding my studies with access to online courses and academic materials. For instance, during the pandemic, the Internet became my primary means of **staying connected with loved ones and continuing my education remotely**.

Disagreeing response:

I disagree with the idea that the Internet plays an important role in my life due to two main reasons. Firstly, I value face-to-face interactions more than virtual connections, as they foster deeper and meaningful relationships. Secondly, I find relying on the Internet for information can sometimes lead to misinformation and distractions. As an example, I prefer reading physical books and attending seminars for **authentic knowledge** and networking opportunities.

Both-sided response:

The Internet undeniably holds significance in my life, but there are pros and cons to consider. On one hand, it offers convenience and efficiency, enabling me to connect with people worldwide, access vast information, and enhance productivity. On the other hand, excessive online engagement may lead to social isolation and information overload. By striking a balance, I use the Internet for communication, learning, and entertainment while prioritizing meaningful in-person connections and critical evaluation of online content.

227. Do you agree or disagree with the following statement? Students nowadays work harder in their study than students in the past.

Agreeing response:

I agree that students nowadays work harder in their studies than students in the past for two compelling reasons. Firstly, **modern education systems are more competitive and demanding, placing higher expectations on** students to excel academically. Secondly, the availability of online resources and digital tools **enables students to access a vast amount of information** and study materials, **motivating them to strive for higher achievements.** For example, I observe my classmates dedicating more hours to research and self-study to **stay ahead in their coursework.**

Disagreeing response:

I disagree that students nowadays work harder in their studies than students in the past due to two main reasons. Firstly, technological advancements have made information more accessible, reducing the time needed for research and assignments. Secondly, students in the past **faced more stringent academic systems,** where **rote learning** and memorization were prevalent. As an illustration, my grandparents often mention the hours they spent memorizing textbooks, indicating a more rigorous educational approach in the past.

Both-sided response:

The comparison between the study efforts of students nowadays and students in the past is multifaceted. On one hand, modern students have access to advanced technology and online resources, which can facilitate learning and research. This accessibility might suggest that students today work harder as they are exposed to a broader range of academic materials. On the other hand, students in the past had to overcome more rigid academic structures and limited resources, making their dedication and hard work equally commendable. The determination and work ethic of students are influenced by various factors, including the educational context and individual motivations.

228. Do you agree or disagree with this statement? People should dress according to the latest fashion.

Agreeing response:

I agree that people should dress according to the latest fashion for two main reasons. Firstly, following current fashion trends **allows individuals to express their creativity** and personality through clothing, **enhancing self-confidence and style.** Secondly, being fashion-forward can **foster a sense of belonging and acceptance in social circles,** **promoting positive interactions and connections.** For instance, by staying updated with fashion trends, I feel more empowered and connected with others who share similar interests.

Disagreeing response:

I disagree that people **should always dress according to** the latest fashion for two compelling reasons. Firstly, fashion trends can be fleeting and **constantly changing**, making **it challenging and expensive to keep up with the latest styles**. Secondly, personal style should be a reflection of individual tastes and preferences, not solely influenced by societal trends. As an example, I prefer timeless and classic pieces that suit my personality rather than adhering strictly to ever-changing fashion fads.

Both-sided response:

The concept of dressing according to the latest fashion is subjective and depends on individual values and circumstances. Following fashion trends can be exciting and enjoyable, allowing people to experiment with new styles and keep their wardrobe fresh. However, placing excessive importance on the latest fashion can lead to materialistic and consumer-driven behavior. Striking a balance by incorporating personal style with occasional fashion updates can help individuals feel confident, express themselves, and maintain a more sustainable and mindful approach to clothing choices.

229. Given the choice, many people would prefer to live in an older or more historic building or house. Others would prefer to live in a more modern building or house. Which would you prefer, and why?

Response 1:

I prefer to live in a more modern building or house for two compelling reasons. Firstly, modern buildings often incorporate **advanced technology and energy-efficient features**, providing a **comfortable** and environmentally friendly living environment. Secondly, they are designed with contemporary **aesthetics** and functionality, **offering convenient amenities** and open spaces. For example, in a modern apartment, I can **control appliances remotely and enjoy a spacious**, well-lit living area that enhances my overall living experience.

Response 2:

On the other hand, some people may prefer living in an older or more historic building or house for two main reasons. Firstly, older buildings often boast unique architectural charm and historical significance, **creating a sense of nostalgia and cultural appreciation**. Secondly, they **may offer larger living spaces** and **intricate** details that are not common in modern constructions. For instance, living in a historical house with vintage architecture **provides a sense of connection to the past**.

Response 3:

Both living in a more modern building and residing in an older or more historic house have their merits. A modern building provides practicality and contemporary comfort, whereas an older building exudes character and a sense of heritage. Ultimately, the choice depends on individual preferences and values. For me, the convenience and eco-friendly aspects of modern living outweigh

the appeal of historical architecture, making a modern building my preferred choice for comfortable and sustainable living.

230. Among the following three professions, which do you respect the most: photographers, musicians, painters? Explain why.

Response 1:

Among the three professions, I respect musicians the most for two compelling reasons. Firstly, music has the power to **evoke emotions and connect people on a deeper level**, making musicians influential in shaping cultures and societies. Secondly, musicians often spend countless hours perfecting their craft and honing their skills, demonstrating dedication and passion. For instance, witnessing a musician captivate an audience through their performance is a **testament** to the impact of music in our lives.

Response 2:

I hold photographers in the highest regard for two main reasons. Firstly, through their lenses, photographers **capture moments in time, preserving memories that last a lifetime**. Secondly, they possess a unique artistic eye, transforming ordinary scenes into extraordinary visual narratives. For example, the work of a talented photographer can **evoke nostalgia and emotions**, making them an essential contributor to our visual culture.

Response 3:

Painters are the profession I respect the most, and there are two primary reasons for this admiration. Firstly, painters have the ability to express their thoughts, emotions, and imagination on canvas, **creating beautiful and thought-provoking art**. Secondly, their dedication to mastering different techniques and experimenting with colors **showcases a deep commitment to their craft**. For instance, a renowned painter's masterpiece can inspire and leave a lasting impact on viewers.

231. Which do you prefer, reading paper books or reading electronic books? Explain why.

Response 1:

I prefer reading paper books for two main reasons. Firstly, the physical sensation of holding a book and flipping through its pages creates a more immersive reading experience. Secondly, paper books offer a break from screen time, **reducing eye strain** and promoting a sense of relaxation. For example, reading a paperback novel in a cozy corner allows me to **disconnect from the digital world and fully immerse myself in the story**.

Response 2:

On the other hand, I prefer reading electronic books for two compelling reasons. Firstly, e-books provide the convenience of carrying multiple books in one device, making it easier to read on the go. Secondly, electronic books often offer adjustable font sizes and backlighting, allowing for personalized reading settings. As an illustration, during travel, I can bring my entire library with me on a single e-reader, enhancing accessibility and saving space.

Response 3:

Both reading paper books and electronic books have their merits, and the choice depends on the situation and personal preferences. Paper books provide a nostalgic and sensory experience, while e-books offer convenience and versatility. I enjoy the tangible feel of paper books during leisurely reading at home but opt for electronic books when traveling or reading academic materials. By embracing both formats, I can enjoy the benefits of each while satisfying my diverse reading needs.

232. Some students prefer to live alone or live with their friends when they study abroad.

Response 1:

When studying abroad, some students prefer to live alone for two compelling reasons. Firstly, living alone provides a sense of independence and autonomy, allowing students to create their own schedules and routines. Secondly, it offers a quiet and focused environment, conducive to studying and academic pursuits. For instance, during my study abroad experience, living alone enabled me to concentrate on coursework and personal growth without distractions.

Response 2:

On the other hand, some students prefer to live with their friends when studying abroad for two main reasons. Firstly, living with friends fosters a supportive and comforting atmosphere, easing the challenges of adapting to a new country and culture. Secondly, it promotes social interactions and shared experiences, creating lasting memories and friendships. As an example, sharing an apartment with my friends during my study abroad journey allowed us to explore the city together and form a strong support system.

Response 3:

Both living alone and living with friends while studying abroad have their merits, and the choice depends on individual preferences and circumstances. Living alone provides privacy and focus, while living with friends offers companionship and a sense of belonging. Some students may prefer the tranquility of solitary living, while others may seek the camaraderie and shared adventures that come with living with friends. By considering their needs and goals, students can make a well-informed decision that enhances their study abroad experience.

233. Other students prefer to live with a local family when they study abroad. Which way do you prefer and why?

Response 1:

I prefer living with a local family when studying abroad for two compelling reasons. Firstly, it offers a unique cultural immersion experience, allowing me to practice the language and learn about local traditions. Secondly, living with locals provides a supportive environment, offering guidance on navigating the new surroundings. For example, when I studied abroad in Spain, my host family introduced me to authentic Spanish cuisine and helped me explore the city, making my experience enriching and memorable.

Response 2:

On the other hand, I would prefer living independently when studying abroad for two main reasons. Firstly, it fosters personal growth and self-reliance, as I learn to manage daily tasks and challenges on my own. Secondly, living independently allows me to connect with a diverse group of international students, forming global friendships. As an example, during my study abroad in Australia, I shared an apartment with students from different countries, which enriched my cultural understanding and expanded my global network.

Response 3:

Both living with a local family and living independently have their merits, and the choice depends on individual preferences and goals. Living with a local family offers cultural immersion and a supportive environment, while living independently provides personal growth and a diverse social network. Some students may prioritize cultural integration and choose to live with locals, while others may seek independence and opt for living independently to embrace a more adventurous and self-directed experience.

234. Some people prefer to listen to music while they are studying or working. Others prefer to stay in a quiet place while they are studying or working. Which way do you prefer and why? Include reasons and details in your response.

Response 1:

I prefer to stay in a quiet place while studying or working for two compelling reasons. Firstly, a quiet environment allows me to concentrate and maintain focus on the task at hand without distractions. It promotes deep thinking and enhances productivity. Secondly, silence creates a calming atmosphere, reducing stress and promoting a sense of tranquility. For instance, when I study in a quiet room, I find it easier to absorb information and retain knowledge.

Response 2:

On the other hand, some people prefer to listen to music while studying or working, and there are two main reasons for this preference. Firstly, music can create a motivating and energizing atmosphere, making tedious tasks more enjoyable. Secondly, certain types of music, such as instrumental or ambient, can help drown out external noises and aid concentration. For example, I have friends who listen to instrumental music while working on assignments, claiming it improves their workflow.

Response 3:

Both studying or working in a quiet place and listening to music have their merits. A quiet environment promotes focus and relaxation, while music can boost motivation and create an enjoyable atmosphere. Some individuals may prefer quietness for tasks requiring deep concentration, while others may find music helpful for repetitive or less demanding activities. Personal preferences and the nature of the task at hand influence the choice of environment, allowing individuals to optimize their productivity and comfort.

235. Some people like to move about and live in different places. Others like to stay at one place all their lives. Which do you prefer and why?

Response 1:

I prefer to move about and live in different places for two compelling reasons. Firstly, exploring new locations and cultures broadens my horizons and enriches my life experiences. It fosters adaptability and open-mindedness, helping me embrace diversity. Secondly, living in different places allows me to build a diverse network of friends and professional connections. For instance, during my travels, I have met people from various backgrounds, which has expanded my perspective and provided valuable insights.

Response 2:

On the other hand, some people prefer to stay at one place all their lives, and there are two main reasons for this preference. Firstly, staying in one place provides a sense of stability and familiarity, creating a strong sense of community and belonging. Secondly, deep roots in one location allow for long-lasting relationships and support systems. For example, individuals who have lived in the same neighborhood for years often form strong bonds with their neighbors and find comfort in familiar surroundings.

Response 3:

Both preferences of moving about and staying at one place have their merits, and the choice depends on individual values and lifestyle preferences. Moving about offers adventure and continuous learning, while staying in one place provides stability and strong social connections. Some people may prioritize exploring new horizons and embracing change, while others may value the comfort and sense of belonging that comes with long-term residence in one place. By embracing either lifestyle, individuals can find fulfillment and contentment based on their unique aspirations.

236. Among the following three types of work, which would you enjoy doing the most? • helping children with communication problems • doing community work • growing plants in the garden

1. I would enjoy growing plants in the garden the most. Firstly, gardening provides a therapeutic experience, reducing stress and promoting well-being. Secondly, witnessing plants thrive due to my care is fulfilling. For example, nurturing a small seed into a blooming flower gives a sense of accomplishment.

2. I would prefer doing community work. Firstly, it fosters a sense of belonging and strengthens social bonds. Secondly, helping others in the community improves the overall quality of life. For instance, participating in a local clean-up campaign enhances the neighborhood's appearance.

3. I would find joy in helping children with communication problems. Firstly, it allows me to make a positive impact on a child's future by improving their language skills. Secondly, it is fulfilling to see a child gain confidence and overcome communication barriers. For example, I once tutored a child with a speech impediment, and after consistent support, their communication skills significantly improved.

237. Do you agree or disagree with the following statement? Watching sports programs on television is not a good use of time.

1. I disagree with the statement that watching sports programs on television is not a good use of time. Firstly, sports can be entertaining and serve as a stress-reliever, promoting mental well-being. Secondly, they inspire teamwork and dedication, encouraging viewers to adopt a healthier lifestyle. For instance, witnessing athletes' dedication can motivate individuals to take up sports and exercise regularly.

2. I agree with the statement that watching sports programs on television is not a good use of time. Firstly, excessive screen time can lead to a sedentary lifestyle, impacting physical health negatively. Secondly, it may detract from more productive activities like studying or spending time with family.

For example, spending hours watching sports might reduce time available for educational pursuits or bonding with loved ones.

3. I'm neutral on the statement. While watching sports programs can be entertaining and enjoyable, it depends on how much time is spent on it. Moderation is key to ensuring it doesn't interfere with more important responsibilities or activities. Additionally, some individuals may find value in watching sports for the sense of camaraderie and shared passion with friends and family, which can strengthen relationships. However, it is essential to balance this leisure activity with other aspects of life.

238. Some people prefer outdoor activities such as basketball. Others prefer indoor activities such as yoga. Which would you prefer and why?

1. I would prefer outdoor activities like basketball. Firstly, it allows me to connect with nature and breathe fresh air, enhancing my overall well-being. Secondly, outdoor sports like basketball are more dynamic and provide opportunities to interact with others, fostering social connections. For example, playing basketball with friends not only promotes physical fitness but also strengthens friendships. Moreover, the sense of accomplishment from scoring a basket or winning a match adds excitement and boosts confidence, making it a fulfilling experience overall.

2. I would choose indoor activities like yoga. Firstly, practicing yoga indoors offers a peaceful and focused environment, aiding relaxation and reducing stress. Secondly, it provides an opportunity for self-reflection and personal growth. For instance, yoga helps improve flexibility and mindfulness, benefiting both physical and mental health. Moreover, with various yoga classes available online, I can easily follow guided sessions at my convenience, making it a flexible and accessible choice for me.

3. I'm torn between outdoor basketball and indoor yoga. Outdoor basketball appeals to me as it allows me to enjoy fresh air and engage with friends. On the other hand, indoor yoga offers a serene atmosphere, promoting relaxation and self-improvement. While basketball provides physical challenges and teamwork experiences, yoga facilitates mental clarity and inner peace. Ultimately, I'd choose based on my mood and the weather, balancing both activities to lead a healthy and balanced lifestyle.

239. Many schools require their students to complete at least 40 hours of community service. Do you agree or disagree with this requirement? Use specific details and examples to support your opinion.

Agree:

I agree with the requirement for students to complete at least 40 hours of community service. Firstly, community service instills a sense of responsibility and empathy in students, making them more compassionate individuals. For example, volunteering at a local soup kitchen exposes students to the struggles of the less fortunate, encouraging them to give back to society. Secondly, community service offers valuable real-world experiences, enhancing students' practical skills and social awareness. For instance, participating in environmental clean-up drives educates students on the importance of conservation and sustainability.

Disagree:

I disagree with the requirement for students to complete at least 40 hours of community service. Firstly, academic curriculum and extracurricular activities already demand significant time and commitment. Adding mandatory community service might lead to burnout and hinder academic performance. Secondly, students have diverse interests and talents; forcing them into community service might not align with their passions and aspirations. For instance, an introverted student might thrive better in academic pursuits than in social activities.

Both-sided:

The requirement for students to complete at least 40 hours of community service has both merits and drawbacks. On one hand, community service instills a sense of responsibility and empathy, making students more compassionate individuals. Engaging in activities like tutoring disadvantaged children demonstrates kindness and social consciousness. On the other hand, some students may struggle to balance academic commitments and community service. For example, those with part-time jobs might face challenges managing time effectively. A flexible approach, offering opportunities for voluntary community service, could strike a balance, allowing students to contribute without overwhelming them.

240. Do you agree or disagree with the following statement? The success of a school largely depends on the resources it has such as textbooks and journals.

Agree:

I agree with the statement that the success of a school largely depends on the resources it has, such as textbooks and journals. Firstly, quality learning materials enhance students' understanding and knowledge retention. Access to well-structured textbooks facilitates effective teaching and learning. Secondly, research journals enable educators and students to stay updated with the latest advancements in their fields. For instance, a well-equipped school library with various academic resources supports students' academic growth and fosters a thriving learning environment.

Disagree:

I disagree with the statement that the success of a school solely depends on its resources like textbooks and journals. While these materials are valuable, successful schools rely on various other factors as well. Effective teaching methods, dedicated teachers, and engaged students play pivotal roles in achieving success. Moreover, a supportive and stimulating learning environment, strong community engagement, and extracurricular activities also contribute significantly to a school's success. These aspects collectively create a conducive atmosphere for students to excel academically and personally.

Both-sided:

The success of a school involves a complex interplay of multiple factors, including its resources like textbooks and journals. These materials indeed support academic excellence by providing essential information and promoting effective teaching. For example, access to diverse journals helps students deepen their knowledge and fosters a culture of research. However, a school's success also depends on various other elements. Effective educators, who inspire and guide students, create a positive impact. Additionally, a supportive and engaged community and extracurricular opportunities enrich the learning experience and contribute to a successful school overall.

241. Do you agree or disagree with the following statement? Teachers should encourage students to start using computers from primary school. Give details and examples to support your response.

Agree:

I agree that teachers should encourage students to start using computers from primary school. Firstly, **early exposure to computers enhances students' digital literacy**, a crucial skill in the modern world. Understanding technology from a young age prepares them for **future academic and professional endeavors**. For example, **learning basic computer operations**, such as typing and using educational software, helps students **become more efficient in their studies**. Moreover, computers **provide interactive learning opportunities**, making lessons more engaging and promoting active participation among students. **Access to educational websites and online resources** also widens their knowledge base beyond traditional textbooks.

Disagree:

I disagree that teachers should encourage students to start using computers from primary school. Firstly, young children are still developing essential motor and cognitive skills, and **excessive screen time might hinder their overall development**. Second, **relying on computers** too early might **diminish their ability to learn through traditional methods**, like pen and paper, which are crucial for developing fine motor skills. For example, writing by hand **fosters creativity and improves memory retention**. Instead, primary education should focus on building a strong foundation in core subjects, with limited computer use until later stages when children are better equipped to handle technology responsibly.

Both-sided:

The question of whether teachers should encourage students to start using computers from primary school has both advantages and disadvantages. On one hand, early computer exposure can foster digital literacy and prepare students for the technology-driven world. For instance, learning to use educational software can make lessons more interactive and enjoyable. On the other hand, excessive computer use at a young age might hinder a child's physical and cognitive development. Striking a balance between incorporating technology in the curriculum and preserving traditional teaching methods can ensure that students benefit from the advantages of computers without neglecting other vital aspects of their education.

242. Do you agree or disagree that assignments handed in after the deadline should receive a lower score?

Agree:

I agree that assignments handed in after the deadline should receive a lower score. Firstly, **meeting deadlines is an essential skill in academic and professional settings**. **Docking points for late submissions reinforces the importance of time management**. Secondly, **adhering to deadlines ensures a fair assessment for all students and maintains the integrity of the evaluation process**. For example, a student who submits late may have an advantage over others if they had extra time to refine their work. Implementing a penalty for late submissions **promotes a sense of responsibility and accountability among students**.

Disagree:

I disagree that assignments handed in after the deadline should receive a lower score. Sometimes, students may **face unforeseen circumstances or emergencies that disrupt their schedules**. Penalizing late submissions may not consider genuine reasons for the delay. Moreover, **focusing solely on deadlines may overshadow the actual quality of the work**. **Assessing the content and effort put into the assignment** should be the primary consideration, as it reflects the student's understanding of the subject matter. In such cases, **providing constructive feedback and support** could be more beneficial than punitive measures.

Both-sided:

The question of whether assignments handed in after the deadline should receive a lower score has merits on both sides. On one hand, adhering to deadlines instills discipline and time management skills in students, essential for their future academic and professional success. A penalty for late submissions also ensures a fair evaluation process for all students. On the other hand, unforeseen circumstances may affect a student's ability to meet deadlines, and penalizing late submissions might not consider genuine reasons for the delay. In such cases, it's essential to balance accountability with understanding and offer support to students facing challenges.

243. Some people like to collect old things such as newspapers. Others throw things away after they have used them. Which do you prefer and why?

1. I prefer to collect old things like newspapers. Firstly, it offers **valuable historical insights, connecting me with the past**. For example, old newspapers document significant events and cultural changes. Secondly, **collecting creates a sense of nostalgia and appreciation for heritage**. Preserving newspapers from different eras brings a tangible connection to history, enhancing my knowledge.

2. I prefer to throw things away after use. Firstly, decluttering promotes an organized living space, reducing stress. Secondly, it contributes to a cleaner environment by reducing waste. For instance, recycling used items conserves resources and lessens pollution. Simplifying my life by disposing of unneeded possessions leads to a more sustainable lifestyle.

3. I am neutral on this matter. Collecting old things like newspapers preserves history and cultural insights, which I find fascinating. On the other hand, decluttering maintains an organized living space and supports environmental sustainability. Balancing both practices allows me to cherish certain items with sentimental value while responsibly discarding others to promote a more efficient and eco-friendly lifestyle.

244. Some people like to reading paper books while other like to listen to audio books. Which do you prefer and why?

1. I prefer reading paper books. Firstly, the physical interaction with the pages creates a deeper connection with the content, **enhancing comprehension and memory retention**. Secondly, reading paper books reduces screen time, promoting better eye health and preventing digital fatigue. For instance, spending time away from screens allows me to relax and focus on the story without distractions.

2. **I prefer listening to audiobooks**. Firstly, **audio books offer convenience as I can listen while doing other tasks like commuting or exercising**. Secondly, the narrators' expressive storytelling brings the characters and plot to life, **making the experience more engaging**. For example, **listening to an audiobook during a long journey transforms it into an enjoyable and productive time**.

3. I am neutral on this matter. Both reading paper books and listening to audiobooks have their advantages. Paper books provide a tangible and immersive experience, allowing for better comprehension and reduced screen time. On the other hand, audiobooks offer convenience and flexibility, making it easy to multitask while enjoying a good story. Depending on my mood and schedule, I appreciate both methods for their unique benefits.

245. People should be encouraged to visit science and art museums. Do you agree or disagree?

Agree:

I agree that people should be encouraged to visit science and art museums. Firstly, museums offer valuable educational experiences, **fostering a deeper understanding of the world**. For example, science museums present interactive exhibits that make complex concepts accessible and engaging. Secondly, art museums expose visitors to diverse cultures and artistic expressions, broadening their horizons. Viewing masterpieces can **evoke emotions and inspire creativity**. Encouraging museum visits nurtures curiosity and critical thinking, **promoting lifelong learning**.

Disagree:

I disagree with the notion that people should be encouraged to visit science and art museums. While museums offer educational experiences, they may not cater to everyone's interests. Some individuals may find the exhibits **unengaging or overwhelming**. Moreover, there are alternative ways to learn about science and art through books, online resources, or workshops. Encouraging diverse learning opportunities allows individuals to explore their interests freely and in ways that best suit their learning styles.

Both-sided:

Encouraging people to visit science and art museums has both benefits and limitations. Museums provide valuable educational experiences, fostering curiosity and understanding of the world. For instance, interactive exhibits in science museums make complex concepts accessible. Art museums expose visitors to diverse cultural expressions, inspiring creativity. However, some individuals may not find museums engaging or may prefer alternative learning methods. Balancing museum visits with other educational opportunities ensures that individuals can explore subjects in ways that cater to their unique interests and learning preferences.

246. If you were to choose a place to live, what kind of location would you prefer and why? • a place close to school • a place close to your family • a place close to a transportation hub (airport or bus terminal, etc.)

1. I would prefer a place close to school. Firstly, living near the school reduces commuting time and expenses, allowing me to focus more on my studies and extracurricular activities. Secondly, it fosters **a sense of community among classmates and facilitates group study sessions**, promoting academic success. For example, being able to **participate in after-school clubs and events becomes convenient when living nearby**.

2. I would prefer a place close to my family. Firstly, living near family members provides a strong support system, offering emotional and practical assistance when needed. Secondly, it fosters a sense of belonging and connection to my roots. For instance, sharing meals and spending time together strengthens family bonds and creates cherished memories.

3. I would prefer a place close to a transportation hub. Firstly, living near a transportation hub enhances accessibility and mobility, making it easier to travel for work or leisure. Secondly, it provides convenience for visiting friends and exploring new places. For example, having quick access to airports or bus terminals allows for efficient travel, reducing travel-related stress and expenses.

247. Some people think the best way to study is to attend a lecture. Others say that it's better to read by yourself. Which way do you prefer and why?

1. I prefer attending lectures as the best way to study. Firstly, lectures provide live interactions with the instructor, enabling immediate clarifications and deeper insights into complex topics. Secondly, lectures offer a structured learning environment, helping me stay focused and organized. For example, during a physics lecture, the professor's explanations and visual aids enhanced my understanding of challenging concepts.

2. I prefer reading by myself. Firstly, self-study allows me to learn at my own pace, ensuring better comprehension and retention of information. Secondly, it promotes independent thinking and problem-solving skills, as I actively engage with the material. For instance, while studying history, reading primary sources gave me a broader perspective on historical events and allowed me to form my interpretations.

3. I am neutral on this matter. Both attending lectures and self-study have their advantages. Lectures offer immediate clarification and a structured learning environment. Conversely, self-study allows for flexible pacing and enhances critical thinking. Depending on the subject and my learning preferences, I choose either method. Combining both approaches maximizes my understanding and academic success.

248. Should employees be required to wear suits in the workplace, or should they wear casual clothes?

1. Employees should be required to wear suits in the workplace. Firstly, formal attire like suits fosters a professional image, instilling confidence and respect among clients and colleagues. Secondly, dressing professionally signifies dedication and commitment to one's job. For example, wearing a suit during client meetings demonstrates professionalism and leaves a positive impression.

2. Employees should be allowed to wear casual clothes. Firstly, relaxed dress codes promote a more comfortable and inclusive work environment. Employees can **focus better on their tasks when not constrained by formal attire**. Secondly, casual clothes encourage individuality and creativity, enhancing team dynamics. For instance, a more relaxed dress code **allows employees to express their personal style**, contributing to a diverse and vibrant workplace culture.

3. A balanced approach is ideal. Implementing a dress code that allows casual clothes on certain days and formal attire on specific occasions strikes a balance. This policy ensures a professional image when needed, such as during client meetings, while granting flexibility and comfort during regular workdays. Maintaining a smart-casual dress code accommodates employee preferences and creates a positive and productive workplace atmosphere.

249. If a foreign tourist visits your city, where would you take this tourist? • a factory • a university • a museum. Give reasons for your answer.

1. I would take the foreign tourist to a museum. Firstly, museums **offer a rich cultural experience, showcasing the city's history and art**. Visitors can learn about **local traditions and significant events that shaped the city's identity**. Secondly, museums often provide interactive exhibits and guided tours, offering an educational and engaging visit. For example, a museum might **display historical artifacts and artworks, providing a unique insight into the city's past**.

2. I would take the tourist to a university. Firstly, universities are hubs of knowledge and innovation, reflecting the city's academic prowess. Touring the campus introduces the tourist to cutting-edge research and academic excellence. Secondly, universities often have cultural exchange programs and diverse student populations, **offering a glimpse into the city's multiculturalism**. For instance, attending a campus event or lecture enhances the tourist's understanding of the city's intellectual vibrancy.

3. I would take the tourist to a factory. Firstly, visiting a factory provides **an insight into the city's industrial growth and economic strength**. Observing the manufacturing process showcases the city's contributions to various industries. Secondly, factory tours often include interactive displays, giving the tourist a hands-on experience. For example, witnessing the production of local products like textiles or machinery offers a unique perspective on the city's industrial heritage.

250. Between the following two places, where would you choose to live? • a big, new place but far from your workplace and/or university • a small, old place which is near your workplace and/or university

1. I would choose to live in a big, new place but far from my workplace and/or university. Firstly, the big city offers a **wide range of opportunities**, such as **job prospects and cultural experiences**. Secondly, living in a new place presents the chance for personal growth and exploration. For example, adapting to a **new environment fosters independence and adaptability**, which are essential skills for future endeavors.

2. I would choose to live in a small, old place near my workplace and/or university. Firstly, the **convenience of proximity reduces commuting time and allows for a better work-life balance**. Secondly, a small, old place often **exudes charm and character**, providing a cozy and familiar atmosphere. For instance, living in a close-knit community fosters strong relationships and a **sense of belonging**.

3. I am neutral on this matter. Living in a big, new place far from the workplace and/or university offers exciting opportunities and exposure to diverse experiences. On the other hand, residing in a small, old place near the workplace and/or university provides convenience and a sense of community. Depending on personal preferences and priorities, both options offer unique advantages, and the choice ultimately **depends on individual circumstances and aspirations**.

251. Which of the following three subjects would you choose to learn? Math, painting, science. Explain what you want to learn from this subject.

1. I would choose to learn math. Firstly, mastering math concepts and **problem-solving skills** would enhance my analytical and **logical thinking abilities**. Secondly, math is fundamental in various fields, including science, engineering, and finance. For instance, understanding mathematical principles allows me to interpret data and make informed decisions in real-life situations.

2. I would choose to learn painting. Firstly, mastering painting techniques would allow me to express my **creativity and emotions through art**. Secondly, learning different art styles and approaches would broaden my artistic skills and perspectives. For example, understanding color theory and composition can elevate my artwork to a new level. Painting offers a meditative and therapeutic outlet, and I want to cultivate this skill to create meaningful and visually captivating pieces.

3. I would choose to learn science. Firstly, studying science deepens my understanding of the natural world, from the smallest particles to the vast cosmos. Secondly, **scientific knowledge drives innovation and technological advancements**. For example, learning about genetics can lead to breakthroughs in medicine. Science also **nurtures a curiosity for exploration and fosters critical thinking skills**, enabling me to address complex challenges and contribute to society's progress.

252. Do you prefer to use e-mails to communicate with your friends and family members or do you prefer to use the telephone?

1. I prefer to use e-mails to communicate with my friends and family members. Firstly, e-mails offer the convenience of asynchronous communication, allowing me to respond at my convenience without interrupting my daily activities. Secondly, e-mails provide a written record of conversations, making it easy to refer back to important details or agreements. For instance, I can easily retrieve travel plans or shared documents. E-mails also offer the flexibility to express thoughts and emotions in a well-thought-out manner, ensuring clear and effective communication.

2. I prefer to use the telephone to communicate with my friends and family members. Firstly, phone calls provide real-time interaction, creating a sense of immediacy and connection. Hearing their voices fosters emotional closeness, especially with distant loved ones. Secondly, the telephone allows for spontaneous conversations and quick decision-making. For example, discussing plans for a surprise birthday party is more efficient over the phone. **The telephone bridges the physical distance and fosters a more personal and emotional connection.**

3. I am neutral on this matter. Both e-mails and the telephone offer distinct advantages. E-mails provide the convenience of asynchronous communication, making it easy to refer back to important information. On the other hand, phone calls offer real-time interaction, creating a more immediate and personal connection. Depending on the context and urgency of the communication, I choose either method to maintain meaningful connections with my friends and family members.

253. If you are asked by your teacher to do community service, which of the following would you choose? Explain why. • helping children with their homework • teaching adults to use the computer • cleaning city park

1. I would choose to help children with their homework. Firstly, assisting children with their studies can have a significant impact on their academic performance and **boost their confidence**. It allows me to make a positive difference in their educational journey. Secondly, tutoring children **fosters a sense of fulfillment** as I witness their progress and growth. For example, seeing a **struggling student** improve their grades **brings a sense of accomplishment and motivates me to continue supporting their learning**. Helping children with their homework is a rewarding way to give back to the community and invest in the next generation's success.

2. I would choose to teach adults to use the computer. Firstly, **computer literacy** is increasingly essential in the modern world, and helping adults acquire these **skills opens up new opportunities for them**. Secondly, teaching computer skills empowers adults to connect with others, access information, and **engage in online activities**. For example, showing them how to use email **enables better communication with loved ones**. Equipping adults with computer knowledge **enhances their digital independence and participation in today's interconnected society**.

3. I would choose to clean the city park. Firstly, cleaning the park benefits the entire community by providing a clean and safe recreational space. A well-maintained park fosters a sense of pride and encourages people to spend time outdoors. Secondly, volunteering for park cleaning promotes environmental stewardship, raising awareness of the importance of preserving green spaces. For instance, organizing park clean-up events inspires others to take responsibility for the environment and protect natural resources for future generations. Cleaning the city park contributes positively to the community's well-being and environmental sustainability.

254. Do you prefer to live in an area that is noisy but close to shops or public transportation, or an area that is quiet but far away from shops and public transportation?

1. I prefer to live in an area that is noisy but close to shops or public transportation. Firstly, the convenience of easy access to shops and public transportation saves time and effort on daily errands and commuting. It allows for a more efficient and productive lifestyle. Secondly, the bustling atmosphere in a lively neighborhood provides various cultural experiences and social interactions. For instance, living near shops and public transportation enables me to explore new places, try different cuisines, and attend community events.

2. I prefer to live in a quiet area far away from shops and public transportation. Firstly, the tranquility and peaceful environment promote relaxation and reduce stress. It offers a serene and conducive setting for focus and concentration. Secondly, living in a quieter area encourages physical activity and outdoor pursuits. For example, going for leisurely walks or bike rides in a peaceful neighborhood enhances well-being and connects me with nature. The benefits of a calm and undisturbed living environment outweigh the inconvenience of distance from shops and public transportation.

3. I am neutral on this matter. Both options have their advantages. Living in a noisy area close to shops and public transportation offers convenience and a vibrant lifestyle. On the other hand, residing in a quiet area far from shops and public transportation provides a peaceful and relaxing living environment. Depending on personal preferences and lifestyle, either option can be appealing. Balancing the advantages of accessibility and liveliness with the benefits of tranquility and nature ensures a well-suited living experience.

255. Instead of printing books in paper version, the university decides to release only online version of textbooks. Do you agree or disagree with this change?

Agree:

I agree with the university's decision to release only online versions of textbooks. Firstly, digital textbooks are more environmentally friendly as they reduce paper consumption, contributing to sustainability efforts. Secondly, online textbooks offer convenience and portability, allowing students to access the material anytime, anywhere, using their devices. For example, studying on-the-go with a tablet or laptop ensures efficient use of study time.

Disagree:

I disagree with the university's decision to release only online versions of textbooks. Firstly, some students may prefer physical books for better concentration and note-taking. Secondly, not all students have access to reliable internet or electronic devices. For instance, students from low-income backgrounds might face difficulties in accessing online materials. Providing both digital and printed options ensures inclusivity and caters to diverse learning preferences.

Both-sided:

The university's decision to release only online versions of textbooks has both advantages and disadvantages. Digital textbooks are environmentally friendly and offer convenience for on-the-go studying. On the other hand, physical books provide a better reading experience for some students and accommodate those without reliable internet access or electronic devices. A compromise would be to offer students the choice between digital and printed versions to cater to diverse learning preferences and ensure equitable access to learning materials.

256. People are encouraged to use reusable bags and bring their own bags when going shopping, and there will be a fee imposed to plastic bags. Do you agree or disagree with this policy?

Agree:

I agree with this policy. Firstly, encouraging the use of reusable bags helps reduce plastic waste and its harmful impact on the environment. It promotes sustainable practices and conserves natural resources. Secondly, imposing a fee on plastic bags serves as an incentive for individuals to opt for eco-friendly alternatives. For example, in countries where such policies are implemented, there has been a significant reduction in plastic bag usage and litter. This policy fosters environmental consciousness and contributes to a cleaner and greener planet.

Disagree:

I disagree with this policy. Firstly, imposing a fee on plastic bags may disproportionately affect low-income individuals, as reusable bags can be more expensive. Secondly, some people may forget to bring their reusable bags, leading to inconvenience and additional costs. For instance, during unexpected shopping trips, not having a reusable bag might result in the necessity of purchasing

one. Instead of a fee, the government could focus on educating the public about the importance of reducing plastic waste and promoting voluntary adoption of reusable bags.

Both-sided:

The policy of encouraging reusable bags and imposing a fee on plastic bags has both positive and negative aspects. On one hand, promoting the use of reusable bags contributes to environmental conservation and reduces plastic waste. Additionally, the fee serves as a deterrent for excessive plastic bag usage. On the other hand, the policy might create financial challenges for some individuals and inconvenience for those who forget to bring reusable bags. Striking a balance between encouraging eco-friendly practices and ensuring equitable access to reusable bags would be a more comprehensive approach.

257. Now teachers tend to assign group assignments instead of individual assignments. Do you agree or disagree with this policy?

Agree:

I agree with this policy. Firstly, group assignments promote collaboration and teamwork skills, essential in the real world. It allows students to learn from each other's strengths and develop effective communication. Secondly, working in groups fosters a sense of responsibility, as students rely on each other to contribute to the project's success. For example, in a group presentation, each member plays a vital role, ensuring a comprehensive and well-rounded outcome. Group assignments prepare students for future professional settings that often require collective efforts and cooperation.

Disagree:

I disagree with this policy. Firstly, group assignments might lead to uneven distribution of workload, causing resentment among group members. Some may contribute more than others, leading to an unfair grading system. Secondly, individual assignments allow students to showcase their independent problem-solving abilities and creativity. For instance, in a solo research project, students can delve deeply into a topic of personal interest and present unique insights. Balancing both group and individual assignments would provide a more holistic approach to students' learning and assessment.

Both-sided:

Assigning both group and individual assignments has its merits and drawbacks. Group assignments promote collaboration and teamwork skills, preparing students for future work environments. They also foster a sense of responsibility and shared accomplishments. On the other hand, individual assignments allow students to demonstrate their independent thinking and creativity while avoiding potential conflicts in group dynamics. Combining both assignment types would offer a

comprehensive approach, allowing students to develop both teamwork and individual problem-solving abilities. This way, students can be well-rounded and equipped for diverse challenges in their academic and professional lives.

258. Nowadays students usually take exams in the class, but some universities allow students to take exams at home. Which one do you prefer?

1. I prefer taking exams in the class. Firstly, in-class exams provide a controlled and standardized environment, ensuring fairness in the assessment process. It reduces the chances of academic dishonesty and cheating. Secondly, taking exams in the class allows for immediate clarification of doubts from the instructor, promoting a deeper understanding of the subject matter. For example, if a student has questions during the exam, they can seek clarification promptly. In-class exams also help students develop time management and test-taking skills, which are essential for future academic and professional endeavors.

2. I prefer taking exams at home. Firstly, taking exams at home allows for a comfortable and familiar environment, reducing test anxiety and stress. It enables students to perform at their best without the pressure of a formal classroom setting. Secondly, flexible scheduling for home exams accommodates students with different learning styles and preferences. For instance, some students might perform better in a quiet and private space where they can concentrate effectively. Home exams also promote independent thinking and self-discipline, as students manage their time and resources.

3. I am neutral on this matter. Both in-class and at-home exams have their advantages. In-class exams ensure a standardized environment and immediate instructor support, reducing chances of cheating. On the other hand, at-home exams offer comfort and flexibility, accommodating individual preferences and reducing test anxiety. A combination of both exam types can be beneficial, allowing students to experience diverse assessment methods and ensuring fairness in evaluations. Universities could consider a hybrid approach, employing in-class and at-home exams strategically to enhance students' learning experience and performance.

259. Nowadays, many people tend to move to a new city to work or study. Do you think it is a good idea?

1. I think it is a good idea to move to a new city for work or study. Firstly, relocating to a new city opens up opportunities for personal growth and development. It allows individuals to experience different cultures, meet new people, and broaden their perspectives. Secondly, moving to a new city often means accessing better job prospects and educational institutions, enhancing career prospects and academic achievements. For example, studying at a renowned university can lead to better career opportunities in the future.

2. I think it depends on the individual's circumstances. For some, moving to a new city might bring exciting opportunities and personal growth. However, for others, leaving behind their support system and familiar surroundings could be challenging. It is essential to consider factors like job stability, social connections, and personal preferences before making the decision. For instance, someone with strong family ties might find it difficult to adjust to a new city, whereas an adventurous and independent person might thrive in the new environment.

3. I think it might not always be a good idea to move to a new city for work or study. While it can bring new opportunities, it also involves leaving behind friends, family, and a familiar support network. The process of adjusting to a new city, finding accommodation, and building new relationships can be challenging and overwhelming for some individuals. Moreover, the cost of living and job market conditions in the new city may not always be favorable. Careful consideration and research are essential before making such a significant decision.

260. Some schools require students to finish a reading list during school breaks.

Do you agree or disagree with this policy?

1. I agree with this policy. Requiring students to finish a reading list during school breaks promotes continuous learning and intellectual growth. It prevents academic regression during extended breaks and keeps students engaged with educational material. Additionally, reading expands students' knowledge, vocabulary, and critical thinking skills, enhancing their overall academic performance.

2. I disagree with this policy. School breaks should be a time for relaxation and leisure, allowing students to recharge their energy and creativity. Forcing students to complete a reading list during breaks may lead to burnout and decreased motivation for reading. Students should have the freedom to pursue their interests and activities during their time off, which can also contribute to personal development and well-being.

3. I am neutral on this matter. Requiring students to finish a reading list during school breaks can have both positive and negative impacts. On one hand, it promotes continuous learning and keeps students academically engaged. On the other hand, it may hinder their ability to enjoy a stress-free break and explore other hobbies and interests. A balanced approach would be to offer optional reading lists for students who are interested in further academic enrichment while allowing others the freedom to relax and recharge during breaks.

261. Many schools do not allow students to take their laptop computers into the classroom. Do you agree or disagree with this policy?

1. I disagree with this policy. Allowing students to take their laptop computers into the classroom has several benefits. Firstly, laptops enable access to a vast array of educational resources, enhancing the learning experience. Secondly, digital note-taking and organization tools on laptops can improve students' efficiency and productivity. For instance, they can easily organize class materials and review notes more effectively. Embracing technology in the classroom prepares students for the digital age and fosters a more dynamic and interactive learning environment.

2. I agree with this policy. Prohibiting laptops in the classroom can foster better focus and attention among students. With laptops, there is a higher risk of distractions, such as social media or unrelated websites. By eliminating laptops, students are more likely to engage actively in the learning process, participate in class discussions, and maintain eye contact with the instructor. It also reduces the possibility of academic dishonesty during exams, as students cannot access unauthorized materials on their laptops.

3. I think this policy has both merits and drawbacks. Allowing laptops in the classroom can be beneficial for educational resources and digital organization. However, it may lead to distractions and reduced attention among some students. A balanced approach could be to regulate laptop use, such as permitting them for specific educational purposes but limiting them during lectures or exams. This way, students can reap the benefits of technology while maintaining a focused and attentive learning environment.

262. Some people think students should be allowed to eat in class? Do you agree or disagree with this idea?

1. I agree with the idea that students should be allowed to eat in class. Allowing students to eat in class can have several advantages. Firstly, it helps meet their nutritional needs and sustains energy levels throughout the day, promoting better concentration and focus on learning. Secondly, some students may have busy schedules with limited breaks, and eating in class allows them to manage their time effectively. As long as students are respectful of their classmates and maintain cleanliness, eating in class can be a practical and beneficial policy.

2. I disagree with the idea of allowing students to eat in class. Eating in class can lead to distractions and disrupt the learning environment. The smell and noise of food consumption might distract both the student eating and their classmates. Additionally, some students may have allergies or dietary restrictions, making it difficult to accommodate various food choices in a shared space. Encouraging students to eat during designated break times ensures a focused and organized classroom environment conducive to learning.

3. I have mixed feelings about this idea. While I understand the practicality of allowing students to eat in class, it may also lead to potential disruptions and health concerns. However, implementing

specific guidelines, such as eating only during designated times and consuming food that is not distracting or allergenic, could strike a balance. Allowing students to have light and quiet snacks during long class sessions might be reasonable, as long as it does not interfere with the learning process or the well-being of other students.
