

No.	Subject Area	Description	Number of Topics
1	 Education & Learning	School systems, teachers, grading, homework, learning methods, attendance, exams, majors	26
2	 Technology & Innovation	Artificial intelligence, digital devices, automation, robots, internet, privacy, tech-free life	21
3	 Environment & Sustainability	Pollution, recycling, climate change, conservation, ecological taxes, public transport, green policy	17
4	 Work & Business	Job satisfaction, leadership, entrepreneurship, employee training, company policy, business ethics	18
5	 Family & Relationships	Parenting, friendship, honesty, communication, raising children, family bonds	15
6	 Health & Lifestyle	Physical and mental health, obesity, stress, leisure, exercise, work-life balance	11
7	 Government & Policy	Public funding, taxation, housing, economic growth, transport policy, national responsibility	13
8	 Society & Culture	Cultural diversity, history, heritage, social responsibility, volunteering, community engagement	15
9	 Art, Media & Entertainment	Movies, museums, traditional music, social media, advertising, journalism, art in cities	13
10	 Science & Space	Space exploration, cloning, de-extinction, scientific progress	4
11	 Urban Life & Community	Urbanization, city planning, public space, tourism, housing, rural migration	15

Contents

 Subject 1 — Education & Learning	10
 Topic 1: Should studying history be made compulsory for all university students?	10
 Topic 2: What is the best way to evaluate teachers?	10
 Topic 3: Should teachers take courses every few years to update their knowledge?	11
 Topic 4: Should schools grade students based on effort or performance?	11
 Topic 5: Is journal writing a worthwhile classroom activity?	12
 Topic 6: Should attendance in university classes be optional?	12
 Topic 7: Should teachers take students on field trips?	12
 Topic 8: Should students learn money management in school?	13
 Topic 9: Should students be assigned homework during long breaks?	13
 Topic 10: Should high school students be required to gain practical experience outside school?	13
 Topic 11: Should field trips be replaced by classroom activities?	14
 Topic 12: Should teachers focus more on teaching manners as well as academics?	14
 Topic 13: Should students work in groups with similar skill levels?	15
 Topic 14: Should schools include outdoor classes once a month?	15
 Topic 15: Should oral presentations be required in secondary school?	15
 Topic 16: Should schools focus more on developing soft skills than academic subjects? ..	16
 Topic 17: Should students continue to memorize facts in the digital age?	16
 Topic 18: Should high schools start classes later in the morning?	17
 Topic 19: Should universities do more to help students find jobs?	17
 Topic 20: Should students be encouraged to join clubs or organizations?	17
 Topic 21: Should primary school children be grouped by age or mixed ages?	18
 Topic 22: Should high school students have evening classes instead of morning ones? ...	18
 Topic 23: Should students take a gap year before university?	19
 Topic 24: Should universities prioritize research or teaching quality?	19
 Topic 25: Should universities make attendance optional?	19

 Topic 26: Should parents or teachers decide how children learn?	20
 Related Vocabulary (Education & Learning – Complete)	20
 Subject 2 — Technology & Innovation	20
 Topic 1: What is the impact of artificial intelligence (AI) on society?	20
 Topic 2: Should artificial intelligence be used to write professional texts (like manuals or articles)?	21
 Topic 3: Should we treat AI and machines with politeness and respect?	21
 Topic 4: Should AI and robots replace human workers?	22
 Topic 5: Should people limit screen time and adopt “tech-free” hours?	22
 Topic 6: Should mobile phones be banned in public places like restaurants or buses?	22
 Topic 7: Should children be exposed to technology at a young age?	23
 Topic 8: Should parents track their teenage children’s locations using apps?	23
 Topic 9: Should social media platforms require users to use real names?	23
 Topic 10: Should governments regulate social media platforms or should companies self-regulate?	24
 Topic 11: Should social media be seen as beneficial or harmful to society?	24
 Topic 12: Should people take periodic breaks from reading or watching the news?	24
 Topic 13: Should people be polite to robots and smart assistants?	25
 Topic 14: Should consumers’ online activity be tracked for targeted advertising?	25
 Topic 15: Should people adopt older technologies instead of new ones?	25
 Topic 16: What is the most common mistake when buying technology?	26
 Topic 17: Should schools use computer games for young learners?	26
 Topic 18: Should people reject new technology due to risk or complexity?	26
 Topic 19: Should intelligent machines replace customer service workers?	27
 Topic 20: Should people rely more on technology to make decisions?	27
 Topic 21: Should technology be blamed for reducing creativity?	27
 Related Vocabulary (Technology & Innovation)	28
 Subject 3 — Environment & Sustainability	28

 Topic 1: Should governments invest more in renewable energy?.....	28
 Topic 2: Should recycling be mandatory for all citizens?.....	29
 Topic 3: Should public transport be free to reduce pollution?.....	29
 Topic 4: Should single-use plastics be banned completely?.....	29
 Topic 5: Should governments impose higher taxes on polluting companies?	30
 Topic 6: Should the government fund environmental education in schools?	30
 Topic 7: Should individuals or governments take primary responsibility for protecting the environment?.....	30
 Topic 8: Should the government limit private car ownership to reduce pollution?.....	31
 Topic 9: Should environmental crimes be punished more severely?	31
 Topic 10: Should developed countries help poorer nations fight climate change?	31
 Topic 11: Should people pay higher prices for eco-friendly products?	32
 Topic 12: Should governments prioritize economic growth or environmental protection?	32
 Topic 13: Should public campaigns focus more on reducing consumption or recycling waste?	33
 Topic 14: Should public parks be expanded in cities?	33
 Topic 15: Should people be rewarded for conserving energy?	33
 Topic 16: Should large factories be moved away from cities?.....	34
 Topic 17: Should environmental protection be more important than human convenience?	34
 Related Vocabulary (Environment & Sustainability)	34
 Subject 4 — Work & Business	35
 Topic 1: Should companies focus more on employee happiness than on profit?.....	35
 Topic 2: Should people change jobs frequently to gain experience?	35
 Topic 3: Should companies require employees to attend teamwork workshops?	36
 Topic 4: Should employees be rewarded for individual or team achievements?	36
 Topic 5: Should employees have flexible working hours?	37

 Topic 6: Should companies allow employees to work remotely permanently?.....	37
 Topic 7: Should businesses be socially responsible or focus only on profit?	37
 Topic 8: Should employers monitor employees’ online activity at work?.....	38
 Topic 9: Should people prioritize job satisfaction over a high salary?	38
 Topic 10: Should companies hire based on skills or degrees?.....	39
 Topic 11: Should companies replace human managers with artificial intelligence systems?	39
 Topic 12: Should large corporations support small local businesses?	39
 Topic 13: Should governments limit the salaries of top executives?	40
 Topic 14: Should companies provide lifelong job security to employees?.....	40
 Topic 15: Should employees be promoted based on seniority or performance?	41
 Topic 16: Should businesses introduce shorter workweeks?	41
 Topic 17: Should employees’ performance be publicly ranked within companies?	42
 Topic 18: Should employees be allowed to choose their supervisors or managers?.....	42
 Related Vocabulary (Work & Business – Complete)	42
 Subject 5 — Family & Relationships	43
 Topic 1: Should parents be friends with their children?.....	43
 Topic 2: Should both parents work full time while raising children?	43
 Topic 3: Should children have household responsibilities?	44
 Topic 4: Should elderly parents live with their adult children?	44
 Topic 5: Should parents choose their children’s careers?	45
 Topic 6: Should children be allowed to make major family decisions?	45
 Topic 7: Should schools teach relationship and emotional skills?.....	45
 Topic 8: Should children spend more time with grandparents?	46
 Topic 9: Should honesty always be taught as the top family value?	46
 Topic 10: Should parents control how their children use technology?	47
 Topic 11: Should parents limit the number of extracurricular activities their children join?	47

 Topic 12: Should families eat meals together every day?	48
 Topic 13: Should parents use punishment to discipline children?	48
 Topic 14: Should parents interfere in their children’s friendships?.....	48
 Topic 15: Should parents give children full freedom in choosing their lifestyle?.....	49
 Related Vocabulary (Family & Relationships – Complete).....	49
 Subject 6 — Health & Lifestyle	49
 Topic 1: Should governments spend more on promoting healthy lifestyles than on treating illness?.....	50
 Topic 2: Should schools include daily physical education?.....	50
 Topic 3: Should governments restrict fast-food advertising?	50
 Topic 4: Should medical care be free for everyone?	51
 Topic 5: Should governments ban smoking in all public places?.....	51
 Topic 6: Should mental health be prioritized as much as physical health?	52
 Topic 7: Should people be required to take annual health checkups?.....	52
 Topic 8: Should governments tax sugary drinks to reduce obesity?	52
 Topic 9: Should employers provide exercise programs for workers?	53
 Topic 10: Should people focus more on traditional medicine or modern medicine?	53
 Topic 11: Should people retire early to enjoy life or work longer for financial stability? ..	54
 Related Vocabulary (Health & Lifestyle)	54
 Subject 7 — Government & Policy	54
 Topic 1: Should governments spend more on public transportation than on roads and highways?.....	54
 Topic 2: Should governments provide financial support to artists and musicians?	55
 Topic 3: Should governments limit the amount of money spent on election campaigns? ..	55
 Topic 4: Should governments prioritize economic growth or environmental protection? ..	56
 Topic 5: Should governments provide universal basic income (UBI)?	56
 Topic 6: Should education be completely free for everyone?	56
 Topic 7: Should governments control media content?.....	57

 Topic 8: Should the government support public housing programs?	57
 Topic 9: Should national governments or local communities make more decisions?	58
 Topic 10: Should countries spend money on space exploration or domestic issues?	58
 Topic 11: Should the government control the prices of basic goods?	58
 Topic 12: Should military service be compulsory?	59
 Topic 13: Should governments increase taxes on the wealthy?	59
 Related Vocabulary (Government & Policy)	59
 Subject 8 — Society & Culture	60
 Topic 1: Should people be required to do unpaid community service?	60
 Topic 2: Should cultural heritage sites be open to tourists?	60
 Topic 3: Should people be encouraged to live in multicultural societies?	60
 Topic 4: Should governments promote traditional festivals in modern societies?	61
 Topic 5: Should people be punished for not recycling?	61
 Topic 6: Should celebrities be considered good role models for society?	62
 Topic 7: Should people spend more time helping others or improving themselves?	62
 Topic 8: Should museums be free to the public?	63
 Topic 9: Should people be encouraged to donate to charity or pay higher taxes for welfare programs?	63
 Topic 10: Should countries protect their cultural traditions from globalization?	63
 Topic 11: Should wealthy nations be responsible for helping poor countries?	64
 Topic 12: Should people be required to vote in national elections?	64
 Topic 13: Should rich people be taxed to support cultural and social programs?	65
 Topic 14: Should cultural differences be respected even if they conflict with human rights?	65
 Topic 15: Should people be more loyal to their family or to society as a whole?	65
 Related Vocabulary (Society & Culture – Complete)	66
 Subject 9 — Art, Media & Entertainment	66
 Topic 1: Should governments fund art and cultural programs?	66

 Topic 2: Should public money be used to build museums and theaters instead of sports facilities?	67
 Topic 3: Should art be taught as a compulsory subject in schools?	67
 Topic 4: Should traditional art forms be preserved in the digital age?	68
 Topic 5: Should governments control media content for accuracy and morality?.....	68
 Topic 6: Should social media platforms be responsible for users' content?	68
 Topic 7: Should advertisements for unhealthy products be banned?.....	69
 Topic 8: Should reality TV shows be restricted for young audiences?	69
 Topic 9: Should governments support local film industries?	69
 Topic 10: Should violent movies and games be censored?	70
 Topic 11: Should newspapers and magazines publish private information about public figures?	70
 Topic 12: Should famous artists and performers earn extremely high salaries?	71
 Topic 13: Should governments restrict foreign media to protect local culture?	71
 Related Vocabulary (Art, Media & Entertainment — Complete)	71
 Subject 10 — Science & Space	72
 Topic 1: Should governments invest more in space exploration or solve problems on Earth first?	72
 Topic 2: Should cloning be allowed for medical purposes?.....	72
 Topic 3: Should governments fund scientific research even if it has no immediate benefits?	73
 Topic 4: Should scientists be allowed to experiment on animals?	73
 Related Vocabulary (Science & Space)	74
 Subject 11 — Urban Life & Community.....	74
 Topic 1: Should governments focus more on improving cities or developing rural areas?	74
 Topic 2: Should governments invest more in public parks and green spaces?	74
 Topic 3: Should tall buildings be encouraged in modern cities?	75
 Topic 4: Should historic buildings be preserved or replaced with modern structures?.....	75

 Topic 5: Should cities limit the number of private cars?	76
 Topic 6: Should governments build affordable housing in city centers?	76
 Topic 7: Should public transport be free in large cities?	76
 Topic 8: Should governments control rent prices in big cities?	77
 Topic 9: Should tourism be limited in popular cities?	77
 Topic 10: Should people be encouraged to live in smaller towns instead of large cities? .	77
 Related Vocabulary (Urban Life & Community)	78

Subject 1 — Education & Learning

Topic 1: Should studying history be made compulsory for all university students?

View 1 – Yes, it should be compulsory.

Supporters argue that studying history develops **critical thinking**, **cultural awareness**, and **contextual understanding** of global issues. By analyzing causes and consequences, students learn to **evaluate evidence** and recognize **patterns of human behavior**. This knowledge enables citizens to make **informed social and political decisions**, promoting unity and civic responsibility.

View 2 – No, it should be optional.

Opponents claim that mandatory history courses may **limit academic freedom** and **overload curricula**. Students in technical or creative fields might prefer to focus on **specialized knowledge** vital for their careers. Moreover, **independent learners** can still study history voluntarily, without enforcing uniform requirements.

TOEFL Writing Note:

This response contrasts **academic breadth** vs. **specialization**. Use connectors like *while*, *however*, and *nonetheless*. Stress analytical verbs (*evaluate*, *interpret*, *contextualize*) and abstract nouns (*freedom*, *autonomy*, *responsibility*).

Topic 2: What is the best way to evaluate teachers?

View 1 – Based on student outcomes.

Many believe teachers should be evaluated through **students' test results** and **academic growth**, as this provides **quantifiable evidence** of effectiveness. Standardized outcomes ensure **accountability** and highlight which teaching methods work best, helping schools maintain consistent quality.

View 2 – Using multiple feedback sources.

Others argue that test results don't reflect the **whole teaching process**. They support **comprehensive evaluations** including **peer observations**, **student feedback**, and **self-reflection reports**. Such approaches encourage **professional development** rather than punishment and foster **collaboration** among staff.

TOEFL Writing Note:

Show balanced reasoning by comparing **efficiency** vs. **fairness**. Connect ideas using *on the other hand* and *as a result*. Include academic expressions like *pedagogical performance* and *formative assessment*.

Topic 3: Should teachers take courses every few years to update their knowledge?

View 1 – Yes, continuous learning is essential.

Supporters believe teachers must **stay updated** with the latest research and technology. Regular training ensures **teaching relevance**, **modern methodology**, and **improved student outcomes**. Education evolves rapidly; thus, lifelong learning strengthens the entire system.

View 2 – Not necessarily mandatory.

Critics argue that mandatory retraining might cause **stress and financial burden**. Some teachers already **maintain professional growth** through experience and personal study. They claim that flexibility—not obligation—motivates educators more effectively.

TOEFL Writing Note:

Contrast **innovation** vs. **autonomy**. Use cause-effect phrasing (*ensures improved outcomes*, *might cause stress*). Include verbs like *revise*, *upgrade*, *adapt*, and *implement* for advanced tone.

Topic 4: Should schools grade students based on effort or performance?

View 1 – Grade by performance.

Supporters say academic grading should reflect **objective achievement** and **knowledge mastery**. This encourages **competition**, **excellence**, and **fairness** since measurable results reveal who truly understands the content.

View 2 – Include effort as well.

Others believe **effort demonstrates perseverance and responsibility**. Students who work hard, even if their results are modest, show qualities essential for long-term success. Recognizing effort promotes **motivation** and **emotional resilience**.

TOEFL Writing Note:

Highlight contrasting evaluation philosophies — *meritocracy* vs. *growth mindset*. Use linking words like *while*, *whereas*, *consequently*, *in contrast*. Combine abstract and moral vocabulary for nuance.

Topic 5: Is journal writing a worthwhile classroom activity?

View 1 – Yes, it supports learning.

Advocates argue that journals help students **reflect, organize thoughts, and internalize lessons**. Writing regularly builds **metacognitive awareness** and **self-expression**, improving both literacy and critical thinking.

View 2 – Not necessarily useful.

Opponents claim journal writing may **consume too much class time** and **distract** from core curriculum goals. Some students treat it mechanically, offering **limited academic benefit**. Teachers might better use time for **interactive learning**.

TOEFL Writing Note:

Balance **reflective learning** vs. **instructional efficiency**. Employ connectors such as *nonetheless, on the contrary, and therefore*. Use academic words like *cognitive process* and *reflective practice*.

Topic 6: Should attendance in university classes be optional?

View 1 – Yes, it should be optional.

Some argue that adults in higher education should **manage their own learning**. Allowing students to skip classes promotes **autonomy, time management**, and respect for **individual learning styles**.

View 2 – No, attendance is essential.

Others emphasize that classroom participation fosters **discussion, collaboration, and accountability**. Regular attendance ensures **deeper understanding** and prevents academic gaps.

TOEFL Writing Note:

Contrast **independence** vs. **community engagement**. Use expressions like *self-directed learners, academic integrity, peer interaction*. Keep transitions smooth with *moreover* and *in contrast*.

Topic 7: Should teachers take students on field trips?

View 1 – Yes, field trips enhance education.

Field trips provide **hands-on learning** and **real-world experience** that textbooks cannot offer. Visiting museums or nature sites promotes **curiosity** and **practical understanding**.

View 2 – No, classroom learning is more efficient.

Others argue that trips can be **costly, time-consuming**, and sometimes **unrelated to curriculum goals**. They prefer controlled, structured classroom settings for academic focus.

TOEFL Writing Note:

Show the tension between **experiential** and **traditional learning**. Use connectors like *whereas* and *nonetheless*. Highlight verbs like *immerse*, *reinforce*, *engage* for sophistication.

Topic 8: Should students learn money management in school?

View 1 – Yes, financial literacy is essential.

Supporters believe schools must teach **budgeting**, **saving**, and **responsible spending**, preparing students for real-world independence. Early financial education prevents **debt** and promotes **economic stability**.

View 2 – No, not a school's duty.

Others argue that financial habits should be **taught by parents** or learned through experience. Schools already have **dense curricula**, and adding more may reduce focus on academic fundamentals.

TOEFL Writing Note:

Contrast **practical life skills** vs. **curricular overload**. Use advanced terms like *financial autonomy*, *economic competence*, *applied education*.

Topic 9: Should students be assigned homework during long breaks?

View 1 – Yes, it maintains academic continuity.

Homework during breaks helps students **retain knowledge** and **stay disciplined**. Continuous engagement prevents **learning loss** and prepares learners for upcoming subjects.

View 2 – No, breaks should allow rest.

Critics argue that long holidays are vital for **mental recovery**, **creativity**, and **family bonding**. Overloading students may lead to **stress and burnout**, weakening motivation.

TOEFL Writing Note:

Balance **academic consistency** vs. **well-being**. Employ cause-effect phrasing (*helps retain knowledge*, *may lead to burnout*). Keep tone neutral and reasoned.

Topic 10: Should high school students be required to gain practical experience outside school?

View 1 – Yes, it builds real-world skills.

Supporters say that internships or community work teach **responsibility**, **teamwork**, and

adaptability. Such experiences connect theory with **practical application**, preparing students for future employment.

View 2 – No, it's not suitable for everyone.

Others argue that compulsory work experience could **distract from academics** or **cause inequality**, since not all students have equal opportunities or support.

TOEFL Writing Note:

Discuss **career readiness** vs. **academic equity**. Use transitions like *while this may benefit some, on the contrary*, and include collocations like *experiential learning* and *career exposure*.

 Topic 11: Should field trips be replaced by classroom activities?

View 1 – No, field trips are essential.

Supporters argue that field trips give students **experiential learning** that deepens understanding. Visiting museums or historical sites creates **memorable connections** between theory and reality, sparking **motivation and curiosity**. Such experiences often **enhance long-term retention** of knowledge.

View 2 – Yes, classroom learning is more efficient.

Others believe field trips can be **time-consuming**, **expensive**, and sometimes **unsafe**. Teachers might achieve the same educational goals using **virtual tours** or **interactive lessons** within school, saving resources and keeping lessons structured.

TOEFL Writing Note:

Use comparison between **hands-on experience** vs. **academic efficiency**. Include advanced transitions: *whereas, consequently, nevertheless*. Avoid repetition by varying verbs: *reinforce, broaden, enrich*.

 Topic 12: Should teachers focus more on teaching manners as well as academics?

View 1 – Yes, both are essential.

Advocates say teachers shape not only students' minds but also their **character and values**. Teaching manners like **respect, cooperation, and empathy** builds **positive learning environments** and prepares students for social life beyond school.

View 2 – No, manners should be taught at home.

Critics argue that teachers' main responsibility is **academic instruction**. Schools already have heavy curricula, and adding moral education may **distract from academic goals**. Families should handle **ethical upbringing**, not schools.

TOEFL Writing Note:

Contrast **holistic education** vs. **academic specialization**. Use expressions like *moral development, behavioral standards, social etiquette*. Maintain neutral tone and logical flow.

Topic 13: Should students work in groups with similar skill levels?

View 1 – Yes, it increases efficiency.

Grouping students by ability allows teachers to **target lessons precisely**. Advanced students can **progress faster**, while beginners receive **focused support**, improving overall learning outcomes.

View 2 – No, mixed groups are better.

Others claim mixed-ability classes foster **peer learning** and **collaboration**. High achievers **mentor** weaker peers, and everyone develops **communication and empathy skills** useful beyond school.

TOEFL Writing Note:

Balance **instructional efficiency** vs. **collaborative learning**. Use logical connectors: *as a result, in contrast, for instance*. Use strong academic collocations like *differentiated instruction* and *peer scaffolding*.

Topic 14: Should schools include outdoor classes once a month?

View 1 – Yes, it encourages engagement.

Outdoor classes give students **direct contact with nature**, improving **attention and curiosity**. Learning outside the classroom fosters **creativity** and helps students **retain information** through real-world observation.

View 2 – No, they are impractical.

Opponents argue outdoor classes may be **logistically difficult, weather-dependent, and less structured**. Some subjects require **specific classroom tools** that can't be used outdoors effectively.

TOEFL Writing Note:

Show contrast between **experiential enrichment** and **practical limitations**. Use words like *stimulate, reinforce, distract, logistics, adaptability*.

Topic 15: Should oral presentations be required in secondary school?

View 1 – Yes, they build communication skills.

Public speaking improves **confidence, clarity, and organization**—skills essential for future

careers. Presentations also teach students to **analyze information** and **express opinions coherently**.

View 2 – No, they cause anxiety.

Critics note that some students experience **severe stage fright**, which may **undermine performance** and self-esteem. Alternatives like **written reports or recorded videos** can assess similar skills without stress.

TOEFL Writing Note:

Compare **skill development** vs. **emotional comfort**. Include connectors: *however, nonetheless, in contrast*. Vocabulary: *rhetorical ability, expressive fluency, performance anxiety*.

 Topic 16: Should schools focus more on developing soft skills than academic subjects?

View 1 – Yes, soft skills are crucial for success.

Supporters believe skills like **communication, teamwork, and empathy** prepare students for modern workplaces. Soft skills complement academics by shaping **adaptable, emotionally intelligent individuals**.

View 2 – No, academic subjects are fundamental.

Opponents insist that **core knowledge** in math, science, and literacy forms the foundation for all learning. Soft skills can be developed **naturally through interaction**, but academic mastery requires formal teaching.

TOEFL Writing Note:

Contrast **human-centered competencies** vs. **intellectual foundations**. Use vocabulary like *emotional intelligence, transferable skills, curriculum priorities*.

 Topic 17: Should students continue to memorize facts in the digital age?

View 1 – Yes, memory builds discipline.

Advocates argue that memorization strengthens **concentration, mental structure, and analytical recall**. Even in a digital world, having basic facts readily available enhances **problem-solving speed**.

View 2 – No, understanding is more valuable.

Critics say students should focus on **critical thinking, application, and creativity**, since information is easily accessible online. Memorization encourages **rote learning**, not genuine understanding.

TOEFL Writing Note:

Balance **cognitive training** vs. **conceptual understanding**. Use linking terms: *nonetheless, conversely, as a result*. Vocabulary: *rote memorization, cognitive processing, analytical reasoning*.

Topic 18: Should high schools start classes later in the morning?

View 1 – Yes, later start improves learning.

Research shows teenagers need more sleep for **mental focus and emotional balance**. Later classes enhance **concentration**, reduce **absenteeism**, and improve **academic performance**.

View 2 – No, early schedules teach discipline.

Some believe morning routines prepare students for **future work environments**. Early starts allow **better use of daylight hours** and encourage **time management**.

TOEFL Writing Note:

Show cause-effect structure: *improves focus / fosters responsibility*. Use connectors like *while, therefore, however*. Include words like *circadian rhythm, productivity, discipline*.

Topic 19: Should universities do more to help students find jobs?

View 1 – Yes, it's their responsibility.

Universities should provide **career counseling, internship programs, and workshops** to connect education with employment. This ensures graduates are **job-ready** and boosts **institutional reputation**.

View 2 – No, students must be proactive.

Others claim finding a job is a **personal responsibility**. Universities should focus on **academic excellence**, not employment services. Students must **apply initiative** to career planning.

TOEFL Writing Note:

Contrast **institutional accountability** vs. **individual agency**. Use transitions like *in addition, by contrast*. Vocabulary: *career placement, employability, self-reliance*.

Topic 20: Should students be encouraged to join clubs or organizations?

View 1 – Yes, they build life skills.

Participation in clubs enhances **leadership, cooperation, and networking**. Students gain **confidence and purpose**, which contributes to both personal and academic success.

View 2 – No, it should be optional.

Others argue mandatory participation may **pressure introverted students** or reduce time for studying. True motivation arises from **voluntary involvement**, not obligation.

TOEFL Writing Note:

Compare **personal development** vs. **student autonomy**. Use expressions like *extracurricular engagement, social competence, intrinsic motivation*.

 Topic 21: Should primary school children be grouped by age or mixed ages?

View 1 – By age, for structure.

Grouping by age ensures **curriculum consistency** and **psychological balance**. Students share similar **developmental stages**, which simplifies teaching.

View 2 – Mixed ages promote learning.

Others argue that mixed-age classes encourage **peer mentoring** and **collaboration**. Younger children learn faster by **observing older peers**, while older students build **leadership skills**.

TOEFL Writing Note:

Compare **developmental uniformity** vs. **social diversity**. Use terms like *cognitive maturity, peer modeling, inclusive learning*.

 Topic 22: Should high school students have evening classes instead of morning ones?

View 1 – Yes, evening classes improve focus.

Some students are more **alert and productive** later in the day. Evening programs also allow **part-time jobs** or **flexible schedules** for diverse learners.

View 2 – No, mornings are more practical.

Morning classes align with **family routines** and **community schedules**. Evening sessions may cause **safety concerns** and **fatigue**.

TOEFL Writing Note:

Use comparison structure: *While evening classes offer flexibility, morning sessions ensure consistency*. Include words like *chronotype, schedule alignment, productivity patterns*.

Topic 23: Should students take a gap year before university?

View 1 – Yes, it offers growth.

Gap years give students time for **travel, volunteering, or work experience**, fostering **independence** and **self-discovery**. They often return more **motivated and focused**.

View 2 – No, it delays progress.

Critics argue gap years may cause **academic regression** or **loss of momentum**. Some students waste the year without gaining meaningful experience.

TOEFL Writing Note:

Contrast **personal maturity** vs. **academic continuity**. Use connectors like *meanwhile, as a result, in contrast*. Vocabulary: *experiential learning, motivation, transition period*.

Topic 24: Should universities prioritize research or teaching quality?

View 1 – Focus on research.

Universities drive **innovation** and **technological progress** through research. This enhances global reputation and **attracts funding**.

View 2 – Focus on teaching.

Others insist the main mission is **educating students effectively**. Prioritizing teaching ensures **student satisfaction** and better **learning outcomes**.

TOEFL Writing Note:

Balance **institutional prestige** vs. **student-centered education**. Use academic terms like *knowledge production, pedagogical quality, institutional reputation*.

Topic 25: Should universities make attendance optional?

View 1 – Yes, promote autonomy.

Optional attendance respects students' **independence** and **responsibility** for learning. Motivated learners can **study flexibly** using digital materials.

View 2 – No, attendance builds discipline.

Regular participation ensures **engagement** and **interaction**. Classroom presence allows for **immediate feedback** and fosters community.

TOEFL Writing Note:

Reinforce **freedom vs. accountability**. Use connectors *whereas, moreover, in practice*. Vocabulary: *self-regulation, interactive learning, academic discipline*.

Topic 26: Should parents or teachers decide how children learn?

View 1 – Teachers know best.

Educators have **training and pedagogical expertise**, so they can design lessons that meet students' **cognitive needs** effectively.

View 2 – Parents should be involved.

Parents understand their children's **personalities and values**, offering **emotional support** and shaping **learning attitudes** at home.

TOEFL Writing Note:

Contrast **professional authority** vs. **parental insight**. Include academic vocabulary: *pedagogical approach, parental involvement, holistic development*.

pedagogy | academic integrity | formative assessment | lifelong learning | critical thinking | experiential learning | cognitive development | curriculum design | student autonomy | instructional strategy | professional growth | motivation | interdisciplinary study | analytical reasoning

Subject 2 — Technology & Innovation

Topic 1: What is the impact of artificial intelligence (AI) on society?

View 1 – Positive impact.

AI enhances **efficiency and productivity** in medicine, education, and business. It can **automate repetitive tasks**, reduce human error, and provide **data-driven insights** for better decisions. Supporters believe AI will create **new industries and jobs**, revolutionizing modern life.

View 2 – Negative impact.

Critics argue that AI may lead to **job loss**, **privacy invasion**, and **ethical challenges** such as bias in algorithms. Overreliance on machines could **erode human creativity** and **social interaction**.

TOEFL Writing Note:

Contrast **innovation benefits** vs. **ethical risks**. Use connectors *while, however, nonetheless*. Employ terms like *automation, data analytics, algorithmic bias, human displacement*.

Topic 2: Should artificial intelligence be used to write professional texts (like manuals or articles)?

View 1 – Yes, it increases efficiency.

Proponents claim AI can **draft content quickly**, saving time and money. Human editors can then **refine tone and accuracy**, combining **machine speed** with **human judgment**.

View 2 – No, it reduces authenticity.

Opponents argue that relying on AI for writing undermines **originality and credibility**. AI-generated texts may lack **emotional depth** or **contextual nuance**, weakening creative professions.

TOEFL Writing Note:

Discuss **productivity** vs. **authenticity**. Use vocabulary like *linguistic accuracy, creative expression, editorial oversight, originality*.

Topic 3: Should we treat AI and machines with politeness and respect?

View 1 – Yes, it promotes ethical awareness.

Supporters say that being polite to machines reinforces **human empathy** and prevents **aggressive habits** toward technology. Politeness can shape **responsible digital behavior** and smoother **human–machine interaction**.

View 2 – No, it's unnecessary.

Critics argue that machines lack **consciousness or feelings**, so politeness is **meaningless**. Teaching people to “respect” AI could **blur moral distinctions** between humans and technology.

TOEFL Writing Note:

Contrast **ethical symbolism** vs. **logical realism**. Use connectors *on the one hand, on the other, as a result*. Include terms like *anthropomorphism, behavioral conditioning, digital ethics*.

Topic 4: Should AI and robots replace human workers?

View 1 – Yes, they improve productivity.

Machines perform tasks **faster, safer, and more accurately**. Automation reduces costs and allows humans to focus on **creative and strategic work**.

View 2 – No, it causes unemployment.

Opponents warn that mass automation leads to **job displacement** and **social inequality**. Human workers also bring **emotional intelligence and adaptability**—traits robots cannot replicate.

TOEFL Writing Note:

Compare **technological progress** vs. **social stability**. Use terms like *mechanization, workforce transformation, adaptability, human capital*.

Topic 5: Should people limit screen time and adopt “tech-free” hours?

View 1 – Yes, it’s beneficial.

Taking breaks from technology helps **reduce stress, improve focus, and strengthen real-life relationships**. Tech-free time encourages **mindfulness and productivity**.

View 2 – No, it’s unrealistic today.

Others argue that digital devices are **integral to modern work and communication**. For many, complete disconnection is **impractical and inconvenient** in the globalized world.

TOEFL Writing Note:

Discuss **mental health balance** vs. **technological dependency**. Use connectors like *while, moreover, consequently*. Include words like *digital detox, attention span, mental clarity*.

Topic 6: Should mobile phones be banned in public places like restaurants or buses?

View 1 – Yes, to maintain social manners.

Phone bans can prevent **noise pollution, distractions, and impolite behavior** in shared spaces. This rule encourages **consideration and respect** for others.

View 2 – No, it limits personal freedom.

Critics argue that phones are vital for **communication and safety**. A complete ban would **infringe on personal rights** and could cause problems in emergencies.

TOEFL Writing Note:

Contrast **public etiquette** vs. **individual freedom**. Use vocabulary like *social courtesy, regulation, personal autonomy, communication necessity*.

Topic 7: Should children be exposed to technology at a young age?

View 1 – Yes, it enhances learning.

Early access to devices develops **digital literacy** and prepares children for **modern education systems**. Interactive apps can **improve reading and problem-solving** skills.

View 2 – No, it may harm development.

Critics believe overuse of screens can cause **attention problems**, **sleep disturbance**, and **reduced physical activity**. Childhood should prioritize **real-world play and interaction**.

TOEFL Writing Note:

Show cause-effect reasoning. Use connectors like *therefore*, *however*, *in contrast*. Employ terms like *screen exposure*, *cognitive development*, *early literacy*, *sensory stimulation*.

Topic 8: Should parents track their teenage children's locations using apps?

View 1 – Yes, it ensures safety.

Tracking applications help parents **protect children from danger** and **monitor their routines** responsibly. In emergencies, this technology can **save lives**.

View 2 – No, it violates privacy.

Opponents claim constant monitoring destroys **trust and independence**. Teenagers need space to **develop self-control** and **decision-making skills**.

TOEFL Writing Note:

Compare **safety** vs. **autonomy**. Use transitions like *while this may increase security, it could also undermine independence*. Include words like *surveillance*, *consent*, *parental authority*.

Topic 9: Should social media platforms require users to use real names?

View 1 – Yes, it prevents misuse.

Real-name policies could reduce **cyberbullying**, **misinformation**, and **anonymous abuse**. Accountability promotes **responsible online behavior**.

View 2 – No, anonymity protects freedom.

Some argue anonymity allows **free expression** and protects users from **harassment or political retaliation**. Mandatory identification threatens **privacy rights**.

TOEFL Writing Note:

Contrast **online accountability** vs. **freedom of speech**. Use academic phrases like *digital identity*, *data protection*, *anonymity regulation*.

 Topic 10: Should governments regulate social media platforms or should companies self-regulate?

View 1 – Governments should regulate.

Public authorities can ensure **transparency**, **data protection**, and **ethical advertising**. Official oversight prevents corporations from abusing **user data**.

View 2 – Companies should self-regulate.

Others argue that innovation requires **flexibility and independence**. Government intervention may **slow progress** and **violate free enterprise**.

TOEFL Writing Note:

Discuss **public accountability** vs. **corporate autonomy**. Use linking words *whereas*, *consequently*, *on the contrary*. Vocabulary: *data governance*, *ethical compliance*, *policy intervention*.

 Topic 11: Should social media be seen as beneficial or harmful to society?

View 1 – Beneficial.

Social media connects people globally, enabling **information exchange** and **social activism**. It supports **business marketing** and **global awareness**.

View 2 – Harmful.

However, it promotes **comparison**, **misinformation**, and **addictive behavior**. Overuse can damage **mental health** and **interpersonal relationships**.

TOEFL Writing Note:

Balance **connectivity** vs. **psychological cost**. Use terms like *digital networking*, *self-perception*, *information literacy*, *societal impact*.

 Topic 12: Should people take periodic breaks from reading or watching the news?

View 1 – Yes, for mental health.

Frequent exposure to negative news causes **anxiety and emotional fatigue**. Taking breaks helps restore **balance and perspective**.

View 2 – No, it's important to stay informed.

Citizens must **remain aware of global events** to make **educated decisions** and **participate in democracy**. Avoiding news leads to **ignorance and disengagement**.

TOEFL Writing Note:

Contrast **psychological well-being** vs. **civic awareness**. Use transitions: *meanwhile, as a result, on the other hand*.

 Topic 13: Should people be polite to robots and smart assistants?

View 1 – Yes, it shapes social behavior.

Being polite to AI assistants teaches **respectful communication habits** and prevents people from forming **rude speech patterns** in daily life.

View 2 – No, it's unnecessary.

Opponents argue robots **lack emotion**, so politeness is **pointless**. Instead, users should focus on **functionality and efficiency**, not emotional courtesy.

TOEFL Writing Note:

Compare **social conditioning** vs. **functional logic**. Include terms like *human–AI interaction, etiquette simulation, behavior modeling*.

 Topic 14: Should consumers' online activity be tracked for targeted advertising?

View 1 – Yes, it's efficient marketing.

Tracking helps companies deliver **personalized ads**, improving **user experience** and **business profitability**.

View 2 – No, it invades privacy.

Opponents say tracking violates **data privacy** and can lead to **manipulative advertising** or **identity theft**. Users deserve **informed consent**.

TOEFL Writing Note:

Contrast **economic efficiency** vs. **privacy ethics**. Use vocabulary like *data mining, consent, consumer profiling, personalization*.

 Topic 15: Should people adopt older technologies instead of new ones?

View 1 – Yes, old tech is reliable.

Older devices are often **simpler, durable**, and **less distracting**. They promote **mindful use** and reduce electronic waste.

View 2 – No, innovation drives progress.

Modern technology improves **efficiency and accessibility**. Rejecting it may hinder **communication, learning, and development**.

TOEFL Writing Note:

Contrast **simplicity and sustainability** vs. **innovation and convenience**. Use transitions *in contrast, nonetheless*. Vocabulary: *technological adoption, obsolescence, minimalism*.

 Topic 16: What is the most common mistake when buying technology?

View 1 – Focusing on trends.

Consumers often purchase **popular devices** without assessing **actual needs or compatibility**. This leads to **waste and dissatisfaction**.

View 2 – Ignoring quality and support.

Others believe the main error is neglecting **technical specifications** or **after-sale services**, resulting in **short product life** and **poor performance**.

TOEFL Writing Note:

Discuss **consumer awareness** vs. **marketing influence**. Include terms like *impulse buying, functionality, sustainability*.

 Topic 17: Should schools use computer games for young learners?

View 1 – Yes, they enhance motivation.

Educational games combine **fun and learning**, improving **memory and participation**. They make abstract concepts **easier to grasp**.

View 2 – No, they cause overexposure.

Critics claim that excessive screen time **damages eyesight, reduces attention, and discourages real social interaction**.

TOEFL Writing Note:

Balance **engagement** vs. **distraction**. Use connectors *however, conversely, as a result*. Vocabulary: *gamified learning, cognitive stimulation, overexposure*.

 Topic 18: Should people reject new technology due to risk or complexity?

View 1 – Yes, caution is wise.

Rejecting certain technologies avoids **privacy violations, addiction, and ethical misuse**. Innovation must be **regulated responsibly**.

View 2 – No, openness fosters progress.

Advocates argue that fear of change **blocks advancement**. Adopting new tools drives **innovation, competitiveness, and convenience**.

TOEFL Writing Note:

Compare **risk aversion** vs. **technological optimism**. Use words like *innovation adoption, ethical hesitation, progress mindset*.

 Topic 19: Should intelligent machines replace customer service workers?

View 1 – Yes, they increase efficiency.

Machines provide **consistent service**, handle tasks **24/7**, and reduce **human error and cost**.

View 2 – No, they remove human empathy.

Customers value **emotional understanding** and **personal connection**, which machines can't provide. Over-automation risks **customer dissatisfaction**.

TOEFL Writing Note:

Contrast **cost efficiency** vs. **human empathy**. Include academic terms: *automation in service sectors, emotional intelligence, user satisfaction*.

 Topic 20: Should people rely more on technology to make decisions?

View 1 – Yes, technology improves accuracy.

Data-driven systems reduce **bias** and **human error**, producing **objective and consistent** decisions.

View 2 – No, humans must remain in control.

Others warn that overreliance can **erode critical thinking** and **moral accountability**. Machines should **support, not replace** human judgment.

TOEFL Writing Note:

Discuss **objectivity** vs. **moral agency**. Use transitions *whereas, therefore, nonetheless*. Vocabulary: *algorithmic decision-making, human oversight, cognitive dependence*.

 Topic 21: Should technology be blamed for reducing creativity?

View 1 – Yes, it limits imagination.

Easy access to ready-made solutions **discourages original thought**. Constant connectivity reduces **mental space for reflection**.

View 2 – No, it inspires innovation.

Technology enables **digital art, design, and invention**. Creative people use new tools to **expand imagination**, not restrict it.

TOEFL Writing Note:

Contrast **creative dependence** vs. **creative empowerment**. Use terms like *innovation ecosystem, digital creativity, cognitive flexibility*.

Related Vocabulary (Technology & Innovation)

automation | artificial intelligence | data privacy | digital literacy | algorithmic bias | ethical regulation | technological advancement | innovation ecosystem | digital well-being | information overload | cognitive dependence | technological adoption | human-machine interaction | data governance

Subject 3 — Environment & Sustainability

Topic 1: Should governments invest more in renewable energy?

View 1 – Yes, it's essential for the future.

Supporters argue that renewable energy reduces **carbon emissions** and **dependence on fossil fuels**. Investing in solar and wind energy creates **green jobs** and ensures **sustainable development**. This policy protects both the **economy and the environment** long-term.

View 2 – No, it's too expensive for some nations.

Critics claim renewable energy projects require **high initial costs** and **technological expertise**. Developing countries might prioritize **basic needs** like healthcare and education before large environmental investments.

TOEFL Writing Note:

Contrast **environmental responsibility** vs. **economic capacity**. Use terms like *carbon neutrality, sustainable transition, fiscal feasibility*.

Topic 2: Should recycling be mandatory for all citizens?

View 1 – Yes, it's a civic duty.

Mandatory recycling encourages **environmental awareness** and reduces **waste in landfills**. Laws requiring separation of materials foster **collective responsibility** for a cleaner planet.

View 2 – No, education is more effective.

Opponents believe people should recycle **voluntarily**. Forcing it might cause **public resistance** and **inefficient compliance**. Educating citizens could build **lasting habits** instead.

TOEFL Writing Note:

Compare **legal enforcement** vs. **behavioral education**. Include vocabulary: *waste management, civic obligation, environmental literacy*.

Topic 3: Should public transport be free to reduce pollution?

View 1 – Yes, it encourages sustainability.

Free transport motivates people to **leave private cars**, decreasing **traffic congestion** and **air pollution**. It also promotes **social equality** by helping low-income citizens.

View 2 – No, it's financially unsustainable.

Critics argue that maintaining free transport systems requires **high taxes** and may reduce **service quality**. Some people would still prefer private vehicles for **comfort and flexibility**.

TOEFL Writing Note:

Balance **ecological benefits** vs. **economic practicality**. Use connectors *while, nonetheless, as a result*. Vocabulary: *urban mobility, emission reduction, fiscal burden*.

Topic 4: Should single-use plastics be banned completely?

View 1 – Yes, they harm the environment.

Plastic waste contaminates **oceans, wildlife, and soil**. Banning single-use plastics reduces **pollution and microplastic accumulation**. Many eco-friendly alternatives already exist.

View 2 – No, bans may disrupt industries.

Opponents say immediate bans harm **businesses and consumers**, especially in food and healthcare sectors. Governments should encourage **gradual transition** and **innovation** instead.

TOEFL Writing Note:

Contrast **environmental urgency** vs. **economic adaptation**. Use vocabulary: *biodegradable materials, waste regulation, industrial adjustment*.

Topic 5: Should governments impose higher taxes on polluting companies?

View 1 – Yes, to ensure accountability.

Polluters should pay for the **environmental damage** they cause. Taxes encourage companies to **invest in clean technologies** and reduce emissions.

View 2 – No, it may hurt economic growth.

Critics warn that higher taxes could **discourage investment** and **raise product prices**, affecting consumers and employment.

TOEFL Writing Note:

Compare **environmental justice** vs. **economic stability**. Use terms like *carbon tax*, *green innovation*, *market competitiveness*.

Topic 6: Should the government fund environmental education in schools?

View 1 – Yes, awareness starts early.

Teaching sustainability develops **responsible habits** and **ecological awareness** in children. Students learn to value **conservation and recycling** from a young age.

View 2 – No, it's not a top priority.

Others argue that schools already face **curriculum overload**. Environmental education can be taught informally through **media and family influence**.

TOEFL Writing Note:

Contrast **early education** vs. **curricular practicality**. Use phrases: *environmental literacy*, *formative influence*, *public awareness*.

Topic 7: Should individuals or governments take primary responsibility for protecting the environment?

View 1 – Governments should lead.

Only governments can **enforce environmental laws**, control **industrial pollution**, and fund **national initiatives**. Large-scale change requires **policy intervention**.

View 2 – Individuals matter most.

Personal actions—such as **recycling**, **reducing consumption**, and **saving energy**—form the foundation of collective impact. Environmental protection begins with **personal responsibility**.

TOEFL Writing Note:

Balance **systemic authority** vs. **personal accountability**. Vocabulary: *collective action, regulatory enforcement, grassroots participation*.

 Topic 8: Should the government limit private car ownership to reduce pollution?

View 1 – Yes, it's necessary for sustainability.

Fewer cars mean **cleaner air, less traffic**, and improved **urban living conditions**. Car-sharing programs can replace private ownership.

View 2 – No, it restricts freedom.

Critics believe car ownership is a **personal right** and essential for **mobility and convenience**. Governments should improve **public transport** instead of restricting citizens.

TOEFL Writing Note:

Contrast **collective environmental gain** vs. **individual mobility rights**. Use connectors *whereas, consequently, in practice*.

 Topic 9: Should environmental crimes be punished more severely?

View 1 – Yes, to deter violators.

Strict penalties for illegal dumping or deforestation show **zero tolerance** for environmental harm. This encourages **corporate responsibility** and **legal compliance**.

View 2 – No, prevention is more effective.

Others believe the focus should be on **education, monitoring**, and **early intervention**, not punishment. Sustainable change arises from **awareness, not fear**.

TOEFL Writing Note:

Discuss **deterrence** vs. **prevention**. Include vocabulary: *environmental justice, law enforcement, public compliance*.

 Topic 10: Should developed countries help poorer nations fight climate change?

View 1 – Yes, they have moral responsibility.

Wealthy countries produce most of the **historical emissions** and possess **financial and technological resources**. Helping others promotes **global fairness**.

View 2 – No, every nation must act independently.

Critics say each country should take **self-responsibility**. Relying on others can lead to **dependency** and **inefficient aid distribution**.

TOEFL Writing Note:

Contrast **global solidarity** vs. **national accountability**. Use phrases like *climate justice*, *capacity building*, *equitable action*.

Topic 11: Should people pay higher prices for eco-friendly products?

View 1 – Yes, it’s an ethical choice.

Buying sustainable goods supports **green industries** and reduces **environmental damage**. Paying more today ensures a **healthier planet** tomorrow.

View 2 – No, it’s unfair to low-income consumers.

Eco-friendly items are often **too costly**, making sustainability a **privilege** for the wealthy. Governments should **subsidize green products** instead of shifting costs to citizens.

TOEFL Writing Note:

Balance **ethical consumerism** vs. **economic accessibility**. Vocabulary: *sustainable consumption*, *green pricing*, *social equity*.

Topic 12: Should governments prioritize economic growth or environmental protection?

View 1 – Growth first.

Economic expansion provides **jobs, stability, and innovation**. Once a country is wealthy, it can **invest more effectively** in the environment.

View 2 – Protection first.

Environmental damage may become **irreversible**, undermining future prosperity. Sustainable development must balance **profit with preservation**.

TOEFL Writing Note:

Contrast **short-term growth** vs. **long-term sustainability**. Include terms: *resource depletion*, *ecological balance*, *sustainable development*.

Topic 13: Should public campaigns focus more on reducing consumption or recycling waste?

View 1 – Reducing consumption matters more.

Consuming less means **lower energy use** and **less waste generation** overall. Recycling treats symptoms, while reduction solves the **root cause**.

View 2 – Recycling is more practical.

Critics argue that total consumption cuts are **unrealistic**. Encouraging **recycling systems** can achieve **measurable impact** quickly.

TOEFL Writing Note:

Discuss **prevention vs. management**. Use connectors *nonetheless, meanwhile, by comparison*. Vocabulary: *resource efficiency, waste minimization, behavioral change*.

Topic 14: Should public parks be expanded in cities?

View 1 – Yes, they improve quality of life.

Green spaces reduce **air pollution**, encourage **exercise**, and offer **mental relaxation**. Parks promote **community interaction** and **urban biodiversity**.

View 2 – No, land should be used for housing or business.

Some believe expanding parks limits **economic development** and **housing availability**, especially in dense urban areas.

TOEFL Writing Note:

Compare **public health benefits** vs. **economic opportunity costs**. Include vocabulary: *urban planning, ecological balance, livability*.

Topic 15: Should people be rewarded for conserving energy?

View 1 – Yes, incentives encourage action.

Offering discounts or tax credits motivates citizens to **save electricity** and invest in **energy-efficient appliances**.

View 2 – No, responsibility should be intrinsic.

Opponents argue that people should conserve out of **moral duty**, not for **financial rewards**. Incentives may cause **temporary behavior**, not long-term change.

TOEFL Writing Note:

Contrast **extrinsic motivation** vs. **ethical responsibility**. Vocabulary: *energy conservation, incentive policy, behavioral sustainability*.

Topic 16: Should large factories be moved away from cities?

View 1 – Yes, it improves public health.

Relocating factories reduces **urban pollution** and **respiratory problems**. It also frees land for **housing and green spaces**.

View 2 – No, it harms local economies.

Factories provide **employment and infrastructure**. Moving them could increase **transport costs** and hurt **regional development**.

TOEFL Writing Note:

Contrast **urban well-being** vs. **industrial necessity**. Use connectors *whereas, consequently, in contrast*. Vocabulary: *industrial zoning, air quality, regional balance*.

Topic 17: Should environmental protection be more important than human convenience?

View 1 – Yes, nature must come first.

Human comfort often leads to **wasteful consumption** and **resource depletion**. Prioritizing the planet ensures **survival and long-term welfare**.

View 2 – No, balance is key.

Critics say strict environmental rules may **limit comfort and innovation**. Sustainable development means **balancing ecology and practicality**.

TOEFL Writing Note:

Discuss **ethical priority** vs. **realistic compromise**. Include words like *ecocentrism, anthropocentrism, environmental ethics*.

Related Vocabulary (Environment & Sustainability)

carbon neutrality | green innovation | ecological footprint | sustainable development | environmental literacy | renewable resources | emission reduction | waste management | conservation policy | eco-friendly consumption | biodiversity | public awareness | environmental justice | resource efficiency | urban sustainability

Subject 4 — Work & Business

Topic 1: Should companies focus more on employee happiness than on profit?

View 1 – Yes, employee well-being drives long-term success.

Many experts argue that **satisfied employees are more productive, loyal, and creative**. When workers feel valued, they develop a **sense of belonging** that boosts **collaboration and innovation**. Happy employees also serve customers more effectively, improving a company's reputation and sales. In contrast, a profit-only mindset can lead to **burnout, high turnover, and unethical behavior**. Therefore, prioritizing workplace happiness isn't just morally right—it's a **strategic investment** in sustainable success.

View 2 – No, profit must come first.

Others contend that a company's primary duty is to **generate revenue and satisfy shareholders**. Without profits, there are no salaries, benefits, or long-term jobs. Excessive focus on emotional satisfaction may distract from **efficiency and competitiveness**. Moreover, businesses operate in markets, not charities; hence, **financial stability must remain the foundation** of every corporate decision.

TOEFL Writing Note:

This topic contrasts **ethical management** with **economic pragmatism**. Use transitions like *while, in contrast, as a result*. Emphasize balance by using words like *productivity, retention, sustainability, and shareholder responsibility*.

Topic 2: Should people change jobs frequently to gain experience?

View 1 – Yes, job mobility expands skills.

Changing jobs allows individuals to **learn new systems, adapt to diverse environments, and build broader professional networks**. It promotes **career flexibility** and keeps workers **competitive** in fast-changing industries. Frequent transitions can also lead to **higher salaries and better opportunities**, especially for ambitious young professionals who seek rapid growth.

View 2 – No, stability builds expertise.

Opponents argue that frequent job changes show **instability and lack of commitment**. Long-term employment fosters **deep expertise, trust, and leadership potential**—qualities valued by employers. Constantly moving may harm one's reputation and **limit advancement** within organizations. Building a career takes **consistency and patience**, not constant change.

TOEFL Writing Note:

Contrast **diversity of experience** vs. **depth of expertise**. Use connectors *however, nevertheless*,

over time. Include vocabulary like *career trajectory*, *professional development*, *retention rate*, *adaptability*.

Topic 3: Should companies require employees to attend teamwork workshops?

View 1 – Yes, teamwork improves performance.

Training programs strengthen **communication, cooperation, and trust** among employees. In complex organizations, collaboration is vital for **problem-solving and innovation**. Such workshops can also reduce **workplace conflict** and enhance **interpersonal understanding**, leading to smoother project management.

View 2 – No, teamwork can't be forced.

Critics argue that cooperation arises naturally when people **share common goals**, not from artificial training. Mandatory workshops may feel **superficial or unnecessary**, especially for experienced workers. Moreover, teamwork can sometimes reduce **individual accountability** and **slow decision-making**.

TOEFL Writing Note:

Balance **organizational culture building** vs. **individual efficiency**. Use academic connectors like *nonetheless*, *in practice*, *on the contrary*. Vocabulary: *collaborative synergy*, *interpersonal competence*, *organizational behavior*.

Topic 4: Should employees be rewarded for individual or team achievements?

View 1 – Reward individuals.

Personal recognition motivates workers to **excel and innovate**. When rewards are tied to **performance and effort**, employees compete healthily, leading to higher productivity. Individual incentives also help companies **identify talent** and **promote meritocracy**.

View 2 – Reward teams.

Others believe teamwork reflects **collective success**. Many projects depend on **cooperation and shared responsibility**. Team-based rewards encourage **unity and mutual support**, preventing selfish behavior and workplace jealousy.

TOEFL Writing Note:

Contrast **competitive motivation** vs. **collective harmony**. Use transitions *on the one hand*, *however*, *consequently*. Include phrases like *performance-based recognition*, *group cohesion*, *workplace morale*.

Topic 5: Should employees have flexible working hours?

View 1 – Yes, flexibility increases productivity.

Allowing workers to choose when they work improves **work-life balance** and **mental health**. Employees who can manage their own time often show **greater focus and creativity**. Remote or hybrid schedules also **reduce commuting stress** and attract skilled professionals worldwide.

View 2 – No, fixed hours ensure coordination.

Opponents argue that flexibility makes it difficult to **schedule meetings** and **monitor progress**. Inconsistent work hours can **disrupt teamwork** and reduce accountability. Certain industries, such as healthcare or manufacturing, **require structured shifts** to function efficiently.

TOEFL Writing Note:

Balance **autonomy** vs. **coordination**. Use connectors *meanwhile, whereas, on the contrary*. Vocabulary: *telecommuting, time management, organizational efficiency, employee well-being*.

Topic 6: Should companies allow employees to work remotely permanently?

View 1 – Yes, remote work increases satisfaction.

Many professionals are **more productive and focused** when working from home. It saves **time, transportation costs, and energy**, while offering a better **work-life balance**. Companies can also **hire global talent** and reduce office expenses.

View 2 – No, physical presence strengthens teamwork.

Others emphasize that remote work can **weaken company culture** and **reduce creativity** that often arises from **face-to-face collaboration**. Over time, employees may feel **isolated**, which can affect **motivation and loyalty**.

TOEFL Writing Note:

Contrast **digital flexibility** vs. **organizational cohesion**. Use transitions *in contrast, therefore, nonetheless*. Vocabulary: *telework infrastructure, professional isolation, hybrid workplace, productivity metrics*.

Topic 7: Should businesses be socially responsible or focus only on profit?

View 1 – Yes, social responsibility matters.

Modern companies are expected to **address social and environmental issues**. Engaging in community projects and ethical production improves **public image** and builds **consumer trust**. Such practices also attract **socially conscious investors** and employees.

View 2 – No, business is about profit.

Critics believe the purpose of business is to **generate wealth**, not to solve social problems.

Corporate social responsibility might **distract from efficiency** or **increase costs**, making companies less competitive. Governments, not businesses, should handle social welfare.

TOEFL Writing Note:

Contrast **ethical capitalism** vs. **economic minimalism**. Use expressions like *corporate citizenship, stakeholder expectations, brand reputation, social investment*.

 Topic 8: Should employers monitor employees' online activity at work?

View 1 – Yes, for security and productivity.

Monitoring ensures that company resources are **not misused** and that confidential data stays **protected**. It also discourages **time-wasting** and promotes professional discipline.

View 2 – No, it invades privacy.

Opponents argue that surveillance creates **distrust** and **stress**. Employees may feel **micromanaged**, reducing creativity and job satisfaction. Companies should promote **trust-based cultures** rather than constant monitoring.

TOEFL Writing Note:

Compare **organizational control** vs. **employee autonomy**. Use vocabulary like *digital surveillance, workplace ethics, trust-based management*.

 Topic 9: Should people prioritize job satisfaction over a high salary?

View 1 – Yes, satisfaction ensures well-being.

A fulfilling job leads to **emotional stability and motivation**. People who enjoy their work are **healthier and more creative**, even if they earn less. **Purpose and passion** often matter more than money for long-term happiness.

View 2 – No, salary provides security.

Opponents argue that financial stability enables **comfort, education, and independence**. Without adequate income, job satisfaction may fade due to **stress and insecurity**. A high salary can also provide opportunities for **personal growth** and **future investment**.

TOEFL Writing Note:

Contrast **intrinsic motivation** vs. **financial necessity**. Use connectors *however, on the contrary, in addition*. Include words like *work-life balance, economic stability, fulfillment*.

Topic 10: Should companies hire based on skills or degrees?

View 1 – Skills matter more.

In modern industries, **practical experience** and **problem-solving ability** often outweigh academic credentials. Employers need adaptable workers who can **apply knowledge creatively**.

View 2 – Degrees still matter.

Academic qualifications ensure **theoretical foundation** and **professional credibility**. They also reflect **discipline and long-term effort**. Hiring based only on skills may lead to **unequal evaluation standards**.

TOEFL Writing Note:

Contrast **merit-based skill assessment** vs. **formal qualification**. Use academic words like *competency, credentialism, applied expertise*.

Topic 11: Should companies replace human managers with artificial intelligence systems?

View 1 – Yes, AI can manage more efficiently.

Supporters claim that **artificial intelligence systems** can make **data-driven decisions** without emotional bias. They can analyze productivity metrics, detect inefficiencies, and provide **real-time feedback** to employees. AI-based management reduces **human error**, ensures fairness, and saves labor costs. Moreover, algorithms can predict market trends or staff needs, enabling **smarter resource allocation**.

View 2 – No, leadership requires empathy and judgment.

Critics argue that true management depends on **human insight, emotional intelligence, and adaptability**. Machines cannot understand **motivation, conflict, or moral dilemmas** the way people can. AI may handle data, but it cannot **inspire, comfort, or mentor** employees. Over-automation might also lead to **alienation** and loss of workplace identity.

TOEFL Writing Note:

This topic contrasts **algorithmic precision** with **human leadership**. Use transitions *while, on the contrary, nonetheless*. Vocabulary: *emotional intelligence, managerial empathy, algorithmic oversight, workplace morale*.

Topic 12: Should large corporations support small local businesses?

View 1 – Yes, cooperation strengthens the economy.

Proponents believe that large firms can **mentor smaller businesses**, share resources, or form

ethical partnerships that sustain communities. Supporting small suppliers stimulates **innovation** and **local employment**. Such collaboration enhances **corporate image** and builds **long-term trust** among consumers.

View 2 – No, competition drives progress.

Opponents argue that business should remain **competitive**, not cooperative. Helping smaller rivals may **reduce efficiency** and **distort the market**. Big corporations succeed because they **innovate and scale**, not because they protect weaker players. Economic systems thrive on **competition, not dependency**.

TOEFL Writing Note:

Balance **economic cooperation** vs. **market competition**. Use connectors *therefore, in contrast, meanwhile*. Include vocabulary: *market dynamics, community partnership, fair competition, local entrepreneurship*.

 Topic 13: Should governments limit the salaries of top executives?

View 1 – Yes, for fairness and equality.

Executive pay has reached levels many see as **socially unjust**. High salaries often fail to reflect actual performance and **widen the income gap**. Setting reasonable limits would promote **equity and accountability** while ensuring that company profits benefit the entire workforce.

View 2 – No, limits harm competition.

Critics argue that salary caps discourage **ambitious leadership** and **global competitiveness**. Talented executives may move to other countries or private sectors, reducing national innovation. Compensation should be determined by **market value**, not government regulation.

TOEFL Writing Note:

Contrast **economic equality** vs. **competitive freedom**. Use vocabulary: *income disparity, executive compensation, talent migration, regulatory intervention*.

 Topic 14: Should companies provide lifelong job security to employees?

View 1 – Yes, it ensures loyalty and stability.

Guaranteeing long-term employment promotes **trust and motivation**. Employees who feel secure are **more productive, loyal, and emotionally stable**. Job security also strengthens communities by **reducing unemployment anxiety** and encouraging workers to **invest in skills** confidently.

View 2 – No, flexibility benefits both sides.

Others argue that lifetime employment discourages **innovation and efficiency**. Companies need

the flexibility to **adapt to markets**, hire new talent, or restructure teams. Likewise, employees should remain **agile and open** to career changes instead of expecting permanent positions.

TOEFL Writing Note:

Discuss **stability** vs. **flexibility**. Use connectors *on the other hand, consequently, nonetheless*. Vocabulary: *organizational adaptability, workforce security, employment stability, economic restructuring*.

 Topic 15: Should employees be promoted based on seniority or performance?

View 1 – Seniority deserves respect.

Many believe long-term service demonstrates **loyalty, patience, and institutional knowledge**. Promoting senior workers maintains **morale and respect for experience**. It also prevents **favoritism** and creates **predictable career paths**.

View 2 – Performance should decide.

Critics insist that promotions must reward **ability, innovation, and measurable results**. Merit-based advancement motivates employees to **excel and compete fairly**. Seniority alone does not guarantee **competence or leadership potential**.

TOEFL Writing Note:

Contrast **traditional hierarchy** vs. **merit-based culture**. Use transitions *whereas, however, as a result*. Vocabulary: *institutional experience, meritocracy, workplace motivation, equitable advancement*.

 Topic 16: Should businesses introduce shorter workweeks?

View 1 – Yes, shorter weeks increase productivity.

Studies show that **four-day workweeks** can improve **employee morale, focus, and efficiency**. Workers with more rest are **healthier, more creative**, and less likely to quit. This policy also supports **family life and mental well-being**, aligning profit with compassion.

View 2 – No, it reduces output.

Opponents argue that shorter workweeks might lead to **missed deadlines** and **reduced competitiveness**, especially in industries that depend on **continuous production**. Managing projects and clients may become more complex.

TOEFL Writing Note:

Compare **quality-oriented productivity** vs. **quantity-based efficiency**. Use connectors *in contrast, therefore, yet*. Vocabulary: *compressed schedule, output optimization, employee welfare, work efficiency*.

Topic 17: Should employees' performance be publicly ranked within companies?

View 1 – Yes, it encourages motivation.

Public ranking promotes **healthy competition** and **transparency**. Employees understand their strengths and areas for improvement. Recognition for high performance boosts **motivation and ambition**, helping companies identify leaders.

View 2 – No, it creates pressure and conflict.

Opponents say public ranking increases **stress and resentment**. Employees may feel **humiliated** or **unfairly compared**. Instead of teamwork, competition might generate **jealousy** and **mental burnout**.

TOEFL Writing Note:

Contrast **transparency-driven motivation** vs. **psychological well-being**. Include vocabulary: *performance appraisal, workplace anxiety, competitive culture, recognition system*.

Topic 18: Should employees be allowed to choose their supervisors or managers?

View 1 – Yes, it enhances trust.

Choosing one's supervisor can build **mutual respect and communication**. When employees feel comfortable with their leader, **cooperation and productivity improve**. Such a democratic system can reduce **workplace conflict** and create a sense of **ownership** over management decisions.

View 2 – No, it's impractical.

Opponents argue that such freedom could **undermine organizational structure**. Employees might choose managers who are **lenient rather than competent**, reducing accountability. Leadership appointments should remain based on **merit, not popularity**.

TOEFL Writing Note:

Discuss **democratic participation** vs. **organizational hierarchy**. Use connectors *while, in contrast, hence*. Vocabulary: *leadership alignment, participatory management, organizational discipline*.

Related Vocabulary (Work & Business – Complete)

organizational adaptability | meritocracy | leadership empathy | executive compensation | corporate governance | employee retention | workforce flexibility | workplace transparency | job

mobility | incentive systems | managerial hierarchy | performance evaluation | stakeholder ethics | productivity optimization | professional stability
organizational culture | job mobility | employee retention | corporate ethics | remote productivity | career trajectory | telecommuting | stakeholder responsibility | work-life balance | professional development | performance evaluation | incentive structure | workplace autonomy | competitive market | managerial strategy

Subject 5 — Family & Relationships

Topic 1: Should parents be friends with their children?

View 1 – Yes, friendship builds trust.

Many modern parents believe that being a friend to their child promotes **open communication and emotional closeness**. When children view parents as approachable, they are more likely to **share personal challenges and seek guidance**. This friendship fosters **mutual understanding** and **reduces generation gaps**, helping young people make wiser choices. Moreover, a friendly atmosphere encourages **emotional stability** and **confidence**, which are vital for healthy development.

View 2 – No, parental authority is essential.

Critics argue that parenting must involve **discipline and boundaries**, not just friendship. When parents act like peers, children may **lose respect for rules and responsibility**. Authority provides **structure and security**, teaching young people the importance of **accountability and respect**. A balanced relationship—caring but firm—may work best.

TOEFL Writing Note:

Contrast **emotional intimacy** vs. **disciplinary authority**. Use transitions like *while*, *in contrast*, *moreover*. Vocabulary: *emotional openness*, *behavioral boundaries*, *mutual respect*, *parental authority*.

Topic 2: Should both parents work full time while raising children?

View 1 – Yes, it supports financial stability and equality.

Supporters claim that dual-income families enjoy **better financial security**, enabling parents to provide **education, healthcare, and comfort**. Moreover, shared employment promotes **gender**

equality, empowering women to pursue their careers. Working parents also become **role models**, showing children the value of independence and hard work.

View 2 – No, full-time work reduces family connection.

Opponents argue that long work hours may limit **emotional interaction** and **parental supervision**. Children may feel neglected or form **weaker emotional bonds**. Part-time work or flexible schedules could help parents **balance family life** without sacrificing income entirely.

TOEFL Writing Note:

Balance **economic equality** vs. **emotional presence**. Use connectors *however, consequently, in practice*. Vocabulary: *dual-income household, work-life balance, parental engagement, emotional development*.

 Topic 3: Should children have household responsibilities?

View 1 – Yes, chores teach responsibility.

Giving children tasks like cleaning or cooking develops **self-discipline, cooperation, and independence**. It also teaches them to **value family effort** and **respect shared spaces**. Chores help children become **more organized and capable adults**.

View 2 – No, childhood should be carefree.

Critics argue that children already face **academic pressure** and should have **time for play and creativity**. Excessive chores may cause **stress** or reduce study time. Parents can teach responsibility through **guidance and example** instead.

TOEFL Writing Note:

Contrast **practical life training** vs. **emotional well-being**. Use connectors *while, nonetheless, therefore*. Vocabulary: *domestic responsibility, cooperative learning, developmental balance*.

 Topic 4: Should elderly parents live with their adult children?

View 1 – Yes, it strengthens family bonds.

Living together enables **emotional support and intergenerational care**. Elderly parents can assist with **childcare** and share **wisdom and traditions**. For children, co-residence fosters **gratitude and family unity**.

View 2 – No, independence benefits everyone.

Opponents argue that shared living may cause **conflicts over privacy, habits, and finances**. Modern families value **autonomy**, and older adults may prefer **independent lifestyles** supported by technology or community housing.

TOEFL Writing Note:

Discuss **interdependence** vs. **independence**. Use transitions *however, in contrast, moreover*. Vocabulary: *intergenerational relationship, family cohesion, personal autonomy, caregiving responsibilities*.

Topic 5: Should parents choose their children's careers?

View 1 – Yes, parents know best.

Parents possess **life experience** and understand the **job market** better than young people. Their guidance can prevent **risky decisions** and ensure a **stable career path**. They often act from **love and long-term concern**.

View 2 – No, children should decide freely.

Critics argue that forced choices may lead to **unhappiness and low motivation**. Passion and interest determine **success and satisfaction**. Allowing freedom nurtures **creativity and confidence**.

TOEFL Writing Note:

Contrast **experience-based guidance** vs. **personal autonomy**. Use vocabulary like *vocational choice, intrinsic motivation, parental expectation, self-determination*.

Topic 6: Should children be allowed to make major family decisions?

View 1 – Yes, it promotes confidence.

Including children in family decisions builds **communication skills** and **mutual respect**. When their opinions are valued, they feel **empowered** and learn **responsibility and negotiation**.

View 2 – No, they lack maturity.

Opponents note that children often think **emotionally rather than rationally**. Complex choices involving money or relocation require **adult judgment**. However, parents may consider their input in **minor matters** to maintain engagement.

TOEFL Writing Note:

Compare **empowerment** vs. **emotional immaturity**. Include words like *decision-making capacity, participatory dialogue, family inclusiveness*.

Topic 7: Should schools teach relationship and emotional skills?

View 1 – Yes, emotional education is vital.

Students should learn **communication, empathy, and conflict resolution**. Emotional

intelligence improves **mental health** and **academic performance**. Schools can prepare students for **healthy relationships** and responsible citizenship.

View 2 – No, this is a family’s role.

Critics say schools should focus on **academic content**. Parents and communities are better positioned to teach **values and emotional habits**. Expanding school responsibility could **overload curricula**.

TOEFL Writing Note:

Contrast **holistic education** vs. **academic focus**. Vocabulary: *emotional literacy, social skills training, family-based education, affective learning*.

 Topic 8: Should children spend more time with grandparents?

View 1 – Yes, it enriches family life.

Grandparents provide **emotional warmth, stability, and wisdom**. Interacting with them strengthens **identity and cultural continuity**. Children also gain **compassion and respect for aging**.

View 2 – No, generational gaps may cause conflict.

Opponents argue that **different values or outdated views** can create misunderstandings. Modern parents may prefer **professional childcare** or **peer-based learning** environments.

TOEFL Writing Note:

Discuss **cultural transmission** vs. **modern independence**. Use connectors *meanwhile, consequently, whereas*. Vocabulary: *intergenerational bond, cultural heritage, familial influence, generational perspective*.

 Topic 9: Should honesty always be taught as the top family value?

View 1 – Yes, honesty builds character.

Truthfulness forms the foundation of **trust and integrity** in all relationships. Teaching honesty encourages **ethical behavior** and **emotional transparency**. It strengthens **communication** and long-term family harmony.

View 2 – No, kindness sometimes matters more.

Critics argue that absolute honesty may hurt feelings or cause **unnecessary conflict**. Teaching children to be **tactful and considerate** can preserve relationships without deceit.

TOEFL Writing Note:

Contrast **moral integrity** vs. **social sensitivity**. Include vocabulary: *ethical conduct, white lies, emotional diplomacy, moral nuance*.

Topic 10: Should parents control how their children use technology?

View 1 – Yes, control is necessary for safety.

Technology exposes children to **inappropriate content and addiction risks**. Parental supervision ensures **safe browsing** and **time management**. Setting limits protects **mental health and focus**.

View 2 – No, children must learn self-control.

Opponents argue that strict control hinders **digital literacy and independence**. Guidance should focus on **education and trust**, not restriction. Children should gradually **develop responsibility** for online behavior.

TOEFL Writing Note:

Compare **protective regulation** vs. **guided autonomy**. Vocabulary: *digital citizenship, online safety, parental monitoring, responsible use*.

Topic 11: Should parents limit the number of extracurricular activities their children join?

View 1 – Yes, balance prevents exhaustion.

Many experts argue that too many activities can cause **stress, fatigue, and loss of focus** in children. When schedules are overloaded, children may struggle to **manage homework, sleep, and relaxation**. Limiting extracurricular involvement allows them to **develop deeper interests** rather than superficial participation in everything. It also gives families more **quality time together**, promoting **mental well-being and stability**.

View 2 – No, diverse experiences develop talent.

Others claim that multiple activities help children **discover passions and strengths** early. Exposure to sports, music, and social clubs fosters **confidence, teamwork, and leadership**. Childhood is the best time to explore, and parents should **encourage curiosity**, not restrict it.

TOEFL Writing Note:

Contrast **balance and focus** vs. **diversity and exploration**. Use transitions *while, in contrast, as a result*. Vocabulary: *overcommitment, cognitive development, holistic growth, parental guidance*.

Topic 12: Should families eat meals together every day?

View 1 – Yes, shared meals strengthen connection.

Dining together promotes **communication, unity, and emotional bonding**. It allows family members to **discuss daily experiences**, solve problems, and **express affection**. Studies show that families who eat together have **healthier diets** and **stronger relationships**.

View 2 – No, modern schedules make it unrealistic.

Opponents argue that busy routines and long work hours make daily family meals **impractical**. Forcing the habit might cause **stress and guilt**. Instead, families can connect through **flexible moments** such as weekend meals or shared leisure time.

TOEFL Writing Note:

Balance **tradition and bonding** vs. **modern practicality**. Use vocabulary: *family cohesion, interpersonal dialogue, routine flexibility, emotional nourishment*.

Topic 13: Should parents use punishment to discipline children?

View 1 – Yes, discipline ensures respect.

Reasonable punishment teaches children **boundaries and consequences**. It helps them distinguish right from wrong and **develop self-control**. Without discipline, children may grow **irresponsible or disrespectful**.

View 2 – No, positive reinforcement works better.

Critics argue that punishment can cause **fear, resentment, or emotional harm**. Encouraging good behavior through **reward and dialogue** creates **trust and understanding**. Discipline should guide, not intimidate.

TOEFL Writing Note:

Contrast **authority and correction** vs. **motivation and empathy**. Use transitions *however, on the other hand, consequently*. Vocabulary: *behavioral reinforcement, corrective discipline, emotional regulation, child psychology*.

Topic 14: Should parents interfere in their children's friendships?

View 1 – Yes, guidance prevents bad influence.

Parents often have the wisdom to identify **toxic or risky relationships**. Intervening can protect children from **peer pressure, bullying, or negative habits**. Responsible oversight ensures **healthy social development**.

View 2 – No, children must choose friends freely.

Opponents believe friendship teaches **independence and social judgment**. Interference may

cause **rebellion** or **mistrust**. Children learn important lessons by managing **conflict and loyalty** on their own.

TOEFL Writing Note:

Compare **protective involvement** vs. **social autonomy**. Use vocabulary: *peer influence, relational independence, parental intervention, social maturity*.

 Topic 15: Should parents give children full freedom in choosing their lifestyle?

View 1 – Yes, freedom fosters individuality.

Allowing children to make lifestyle choices—such as clothing, hobbies, or interests—promotes **confidence and creativity**. It helps them **discover identity** and develop **independent thinking**, essential for adulthood.

View 2 – No, children need moral guidance.

Critics argue that unlimited freedom may lead to **poor choices and confusion**. Parents must set **ethical and practical boundaries** to ensure children grow responsibly. Freedom without structure can turn into **indiscipline and insecurity**.

TOEFL Writing Note:

Contrast **personal expression** vs. **structured morality**. Include vocabulary: *individual autonomy, value formation, parental oversight, identity development*.

 Related Vocabulary (Family & Relationships – Complete)

parental guidance | emotional bonding | self-discipline | intergenerational harmony | autonomy | communication | empathy | responsibility | work-life balance | nurturing environment | trust | social maturity | moral guidance | individuality | family cohesion | child development | intergenerational connection | parental authority | emotional intelligence | work-life balance | family cohesion | autonomy | discipline | cultural continuity | trust and honesty | conflict resolution | empathy | respect | shared responsibility | family communication | nurturing environment

 Subject 6 — Health & Lifestyle

Topic 1: Should governments spend more on promoting healthy lifestyles than on treating illness?

View 1 – Yes, prevention is more effective.

Supporters argue that encouraging people to exercise, eat balanced diets, and avoid harmful habits like smoking can **reduce long-term healthcare costs**. Preventive campaigns build **public awareness** and lead to **healthier populations**. For example, promoting fitness programs and nutrition education lowers the risk of **chronic diseases** such as diabetes and heart failure. Prevention also enhances **productivity** and improves quality of life.

View 2 – No, treatment remains essential.

Critics say many illnesses are **unavoidable** and require **medical intervention**. Government resources must ensure **accessible hospitals, trained doctors, and modern equipment**. While prevention matters, neglecting treatment could endanger vulnerable groups who are already ill.

TOEFL Writing Note:

Contrast **preventive health policy** vs. **medical accessibility**. Use vocabulary: *public health investment, disease prevention, healthcare infrastructure, lifestyle modification*.

Topic 2: Should schools include daily physical education?

View 1 – Yes, physical education improves health and focus.

Daily sports help students develop **fitness, teamwork, and discipline**. Exercise improves **mental concentration**, reduces stress, and prevents obesity. Students who are physically active often perform better academically and socially.

View 2 – No, it may distract from academics.

Opponents argue that extra physical classes can **reduce time for core subjects** and may not suit students with **different physical abilities**. Schools could instead offer **optional programs** after hours, balancing physical and academic needs.

TOEFL Writing Note:

Compare **holistic development** vs. **academic focus**. Use transitions *however, consequently, on the contrary*. Vocabulary: *motor coordination, physical literacy, academic balance, preventive education*.

Topic 3: Should governments restrict fast-food advertising?

View 1 – Yes, it protects public health.

Advertising strongly influences **children's eating habits**. Restricting unhealthy food marketing can **reduce obesity** and **encourage better nutrition**. Governments have a duty to **regulate industries** that harm public well-being, similar to tobacco controls.

View 2 – No, consumers must decide freely.

Critics argue that restricting ads limits **personal freedom and business rights**. Education, not censorship, should guide people's choices. Individuals should learn to **consume responsibly** rather than rely on government control.

TOEFL Writing Note:

Contrast **public regulation** vs. **individual responsibility**. Use connectors *while, in contrast, therefore*. Vocabulary: *consumer autonomy, regulatory ethics, nutritional awareness, persuasive marketing*.

Topic 4: Should medical care be free for everyone?

View 1 – Yes, healthcare is a basic right.

Proponents argue that access to medical care ensures **social equality** and **human dignity**. Free healthcare protects vulnerable citizens and promotes **national well-being**. Health should not depend on income; therefore, governments must guarantee **universal access**.

View 2 – No, it may lower efficiency.

Critics believe free systems lead to **overuse, higher taxes, and lower-quality service**. People might visit hospitals unnecessarily, burdening the system. A **balanced model**, combining public funding and private options, may work better.

TOEFL Writing Note:

Balance **social justice** vs. **economic efficiency**. Include vocabulary: *universal healthcare, welfare policy, cost-effectiveness, equitable access*.

Topic 5: Should governments ban smoking in all public places?

View 1 – Yes, it protects non-smokers.

Smoking bans reduce **secondhand smoke exposure** and encourage smokers to quit. Public spaces should prioritize **collective health** over individual habit. Such policies also **save healthcare costs** and improve air quality.

View 2 – No, it limits personal choice.

Opponents argue that adults have the **freedom to decide** what to do with their bodies. Instead of total bans, governments could create **designated smoking zones** to respect both smokers and non-smokers.

TOEFL Writing Note:

Contrast **collective protection** vs. **personal liberty**. Vocabulary: *public health regulation, addiction control, secondhand exposure, personal autonomy*.

Topic 6: Should mental health be prioritized as much as physical health?

View 1 – Yes, mental health is equally vital.

Mental illnesses affect **productivity, relationships, and overall well-being**. Governments and workplaces must offer **psychological counseling** and raise **awareness** to remove stigma. Ignoring mental health creates long-term **social and economic costs**.

View 2 – No, physical health still requires more attention.

Critics argue that mental health treatment remains **difficult to measure** and sometimes **subjective**. Limited resources should first address urgent physical needs like disease control and hospital care.

TOEFL Writing Note:

Compare **holistic healthcare** vs. **resource prioritization**. Use transitions *nonetheless, in contrast, consequently*. Vocabulary: *emotional resilience, psychological well-being, stigma reduction, integrated healthcare*.

Topic 7: Should people be required to take annual health checkups?

View 1 – Yes, it helps early detection.

Regular checkups identify **diseases at early stages**, allowing **timely treatment** and longer lives. Preventive screening reduces national healthcare costs and encourages people to adopt **healthier habits**.

View 2 – No, it should remain voluntary.

Opponents argue that mandatory checkups invade **personal privacy** and may **overburden hospitals**. Some people live healthy lifestyles and should not be forced into medical procedures.

TOEFL Writing Note:

Contrast **preventive surveillance** vs. **personal choice**. Use vocabulary: *early diagnosis, medical ethics, health autonomy, preventive care*.

Topic 8: Should governments tax sugary drinks to reduce obesity?

View 1 – Yes, taxation changes behavior.

High taxes on sugary drinks discourage **excessive consumption** and promote **healthier alternatives**. Revenue from these taxes can fund **nutrition programs** and **public campaigns**.

View 2 – No, education is more effective.

Critics say taxes unfairly affect **low-income families** and may not change habits. Instead,

governments should focus on **informative labeling** and **healthy food access** to empower personal decisions.

TOEFL Writing Note:

Discuss **economic intervention** vs. **educational empowerment**. Vocabulary: *health policy, fiscal regulation, behavioral economics, dietary awareness*.

 Topic 9: Should employers provide exercise programs for workers?

View 1 – Yes, it improves morale and productivity.

Workplace exercise reduces **stress and absenteeism** while increasing **energy and concentration**. Healthier employees perform better and demonstrate **greater loyalty** to the company.

View 2 – No, it's not the company's duty.

Opponents claim that exercise is a **personal responsibility**. Corporate resources should focus on **business efficiency**, not private health choices. Offering gyms may not be cost-effective if employees don't participate.

TOEFL Writing Note:

Contrast **corporate well-being initiatives** vs. **individual responsibility**. Vocabulary: *occupational health, wellness program, employee engagement, productivity outcomes*.

 Topic 10: Should people focus more on traditional medicine or modern medicine?

View 1 – Traditional medicine offers holistic healing.

It considers the **body, mind, and spirit**, often with fewer side effects. Herbal treatments and natural therapies respect **cultural heritage** and strengthen **preventive care**.

View 2 – Modern medicine ensures scientific reliability.

Critics emphasize that traditional methods often lack **clinical evidence**. Modern medicine provides **tested, regulated treatments** and **lifesaving technologies**. Combining both systems could yield the best results.

TOEFL Writing Note:

Compare **cultural tradition** vs. **scientific validation**. Use connectors *while, in contrast, moreover*. Vocabulary: *holistic treatment, clinical research, complementary medicine, therapeutic effectiveness*.

Topic 11: Should people retire early to enjoy life or work longer for financial stability?

View 1 – Early retirement promotes happiness.

Finishing work earlier allows people to **travel, volunteer, or spend time with family**. Retiring before old age ensures they enjoy **health and freedom** while they can.

View 2 – Working longer provides security.

Opponents believe longer careers guarantee **steady income and mental engagement**. Working keeps people **socially active** and reduces the risk of **financial insecurity**.

TOEFL Writing Note:

Contrast **quality of life** vs. **economic stability**. Vocabulary: *retirement planning, life satisfaction, financial independence, active aging*.

Related Vocabulary (Health & Lifestyle)

preventive healthcare | mental resilience | public health policy | emotional stability | universal access | lifestyle modification | behavioral change | addiction control | holistic treatment | nutritional awareness | psychological well-being | physical fitness | chronic disease prevention | wellness program | work-life balance

Subject 7 — Government & Policy

Topic 1: Should governments spend more on public transportation than on roads and highways?

View 1 – Yes, public transport benefits everyone.

Investing in subways, buses, and trains reduces **traffic congestion, air pollution, and carbon emissions**. Efficient public transportation improves **urban mobility** and **economic productivity**, especially for lower-income citizens who rely on it daily. Moreover, such systems encourage **social equality** and lessen dependence on private vehicles.

View 2 – No, roads are still necessary for growth.

Critics argue that highways and roads remain **essential for logistics, agriculture, and trade**. Many regions lack basic infrastructure, making road investment more urgent than public transit. In rural or developing areas, car-based travel is often **the only practical option**.

TOEFL Writing Note:

Contrast **sustainable urban policy** vs. **infrastructural necessity**. Use connectors *while, nonetheless, consequently*. Vocabulary: *urban mobility, public infrastructure, emission reduction, equitable access*.

Topic 2: Should governments provide financial support to artists and musicians?

View 1 – Yes, art enriches society.

Public funding sustains **cultural heritage, creative innovation, and national identity**. Many artists cannot survive in a purely commercial market, yet their work **educates, inspires, and unites communities**. Supporting the arts is an **investment in national culture**, not a luxury.

View 2 – No, art should survive in the market.

Opponents claim that public funds should prioritize **healthcare, education, and infrastructure**. Creativity should be rewarded through **public demand**, not taxpayers' money. State-sponsored art risks **political bias and inefficiency**.

TOEFL Writing Note:

Balance **cultural investment** vs. **economic priority**. Include vocabulary: *artistic innovation, cultural preservation, public expenditure, creative autonomy*.

Topic 3: Should governments limit the amount of money spent on election campaigns?

View 1 – Yes, it ensures fairness.

Limiting campaign spending prevents **wealthy candidates and corporations** from dominating elections. Caps promote **equal opportunity** and **reduce corruption**. Citizens can then make decisions based on **ideas, not advertising power**.

View 2 – No, it restricts freedom of expression.

Critics argue that **political communication** requires resources. Limiting spending might **undermine democracy** by restricting how candidates share their platforms. Transparency, not limitation, should be the government's focus.

TOEFL Writing Note:

Contrast **electoral fairness** vs. **free speech rights**. Use vocabulary: *campaign finance regulation, democratic transparency, political influence, electoral equality*.

Topic 4: Should governments prioritize economic growth or environmental protection?

View 1 – Growth ensures national progress.

Economic expansion generates **jobs, innovation, and global competitiveness**. Without strong economies, countries cannot afford environmental projects. Prosperity creates the means for **long-term sustainability**.

View 2 – Protection safeguards the future.

Opponents argue that unchecked growth causes **irreversible ecological damage**. Protecting nature ensures **clean water, healthy air, and food security** for future generations. Sustainable development is the only responsible form of progress.

TOEFL Writing Note:

Compare **short-term gain** vs. **long-term sustainability**. Vocabulary: *sustainable policy, ecological preservation, economic resilience, natural resource management*.

Topic 5: Should governments provide universal basic income (UBI)?

View 1 – Yes, it reduces poverty and inequality.

A guaranteed income ensures **financial security** for all citizens, helping them afford **housing, education, and healthcare**. UBI could simplify welfare systems and stimulate the **economy through spending**. It also provides stability during **automation and job loss**.

View 2 – No, it discourages productivity.

Critics claim that guaranteed money without work **reduces motivation** and increases dependency. Funding such programs could **overburden taxpayers** and cause **inflation**. A targeted welfare approach may work better than universal payments.

TOEFL Writing Note:

Contrast **social equity** vs. **economic risk**. Use transitions *however, consequently, in contrast*. Vocabulary: *economic redistribution, welfare efficiency, financial sustainability, labor participation*.

Topic 6: Should education be completely free for everyone?

View 1 – Yes, education is a right.

Free education promotes **equal opportunity** and social mobility. When schooling is accessible, societies develop **innovation, civic responsibility, and productivity**. A well-educated population strengthens **democracy** and **economic competitiveness**.

View 2 – No, costs ensure responsibility.

Critics argue that completely free systems strain budgets and may **reduce educational quality**. Tuition encourages students to **value their studies** and helps institutions remain **financially independent**.

TOEFL Writing Note:

Compare **social inclusion** vs. **financial accountability**. Vocabulary: *educational equity, public funding, institutional autonomy, civic development*.

 Topic 7: Should governments control media content?

View 1 – Yes, for public safety and accuracy.

Regulating media helps prevent **misinformation, hate speech, and harmful content**. Governments can protect citizens from **manipulation** and promote **national security**.

View 2 – No, it threatens freedom of expression.

Opponents believe censorship undermines **democracy and transparency**. Independent media ensures **government accountability** and **citizen awareness**. Public trust depends on open discussion, not restriction.

TOEFL Writing Note:

Balance **public protection** vs. **freedom of information**. Use connectors *while, on the other hand, moreover*. Vocabulary: *media regulation, censorship, democratic accountability, information freedom*.

 Topic 8: Should the government support public housing programs?

View 1 – Yes, it reduces homelessness and inequality.

Affordable housing improves **social stability, public health, and safety**. It allows low-income citizens to live with **dignity** and participate in the economy. Public housing fosters **inclusive communities**.

View 2 – No, it's economically inefficient.

Critics argue that housing projects often suffer from **corruption, poor maintenance, and high costs**. Governments should instead provide **subsidies or incentives** for private construction to ensure efficiency.

TOEFL Writing Note:

Contrast **social welfare policy** vs. **market efficiency**. Vocabulary: *affordable housing, socioeconomic equity, urban planning, public expenditure*.

Topic 9: Should national governments or local communities make more decisions?

View 1 – Local governments understand needs better.

Local decision-making promotes **efficiency, participation, and community trust**. Local leaders know **regional problems** and can respond **quickly and specifically**.

View 2 – National governments ensure equality.

Centralized control prevents **inequality among regions** and provides **uniform standards** in education, healthcare, and infrastructure. It also strengthens **national unity**.

TOEFL Writing Note:

Compare **local empowerment** vs. **central coordination**. Vocabulary: *decentralization, governance, public administration, policy consistency*.

Topic 10: Should countries spend money on space exploration or domestic issues?

View 1 – Invest in space for global progress.

Exploring space advances **science, technology, and international cooperation**. Space research often leads to **innovations** that benefit medicine and the environment.

View 2 – Focus on Earth's problems first.

Critics argue that billions spent on rockets could address **poverty, climate change, and education**. Prioritizing space over people's basic needs is **morally questionable**.

TOEFL Writing Note:

Contrast **scientific ambition** vs. **social responsibility**. Vocabulary: *technological advancement, humanitarian priority, research investment, ethical allocation*.

Topic 11: Should the government control the prices of basic goods?

View 1 – Yes, it protects consumers.

Price controls prevent **inflation and exploitation** during economic crises. They guarantee affordable access to **food, housing, and fuel**, safeguarding low-income families.

View 2 – No, the market should decide.

Critics claim price control disrupts **supply and demand**, causing **shortages** and discouraging producers. Long-term stability comes from **free-market regulation**, not intervention.

TOEFL Writing Note:

Contrast **consumer protection** vs. **market efficiency**. Vocabulary: *price regulation, economic intervention, inflation control, supply chain stability*.

Topic 12: Should military service be compulsory?

View 1 – Yes, it builds discipline and unity.

Mandatory service teaches **responsibility, patriotism**, and teamwork. It also ensures **national defense readiness** and **equal contribution** from all citizens.

View 2 – No, it limits freedom and choice.

Critics argue that forced service violates **individual liberty** and may waste resources training **unmotivated recruits**. Voluntary service produces **stronger, more dedicated forces**.

TOEFL Writing Note:

Balance **national solidarity** vs. **personal freedom**. Vocabulary: *conscription, civic duty, military readiness, voluntary enlistment*.

Topic 13: Should governments increase taxes on the wealthy?

View 1 – Yes, for fairness and redistribution.

Progressive taxation reduces **income inequality** and funds **public services** like education and healthcare. Wealthier citizens can contribute more to promote **social justice**.

View 2 – No, it discourages innovation.

Opponents claim high taxes drive **investment and talent** out of the country. Economic growth depends on **entrepreneurial incentive**, not punishment of success.

TOEFL Writing Note:

Contrast **economic equality** vs. **entrepreneurial motivation**. Use vocabulary: *progressive taxation, wealth redistribution, fiscal policy, economic competitiveness*.

Related Vocabulary (Government & Policy)

public expenditure | fiscal responsibility | social welfare | civic participation | equitable access | national security | democratic governance | regulatory framework | economic redistribution | sustainable development | policy reform | public accountability | social equity | political transparency

Subject 8 — Society & Culture

Topic 1: Should people be required to do unpaid community service?

View 1 – Yes, it builds civic responsibility.

Supporters believe that voluntary service promotes **empathy, cooperation, and social awareness**. When citizens contribute time to helping others, they develop **a sense of belonging** and **shared responsibility**. Such experiences can strengthen **social unity** and encourage **active citizenship**. Governments could integrate community work into schools to promote these values from a young age.

View 2 – No, it must remain voluntary.

Opponents argue that mandatory service **contradicts the idea of generosity**. Forcing people to serve may cause **resentment** and reduce motivation. True community engagement should come from **personal choice**, not government obligation.

TOEFL Writing Note:

Contrast **social cohesion** vs. **individual freedom**. Use connectors like *while, consequently, however*. Vocabulary: *civic engagement, volunteerism, social solidarity, altruism*.

Topic 2: Should cultural heritage sites be open to tourists?

View 1 – Yes, tourism supports preservation.

Entrance fees from visitors fund **maintenance, restoration, and education programs**. Tourism also promotes **cultural exchange** and raises awareness of historical value. Properly managed access encourages **global appreciation** of shared heritage.

View 2 – No, tourism causes damage.

Critics warn that mass tourism leads to **pollution, overcrowding, and wear on ancient structures**. Over-commercialization can **disrespect cultural traditions** and turn heritage into entertainment. Preservation should come before profit.

TOEFL Writing Note:

Balance **economic sustainability** vs. **cultural preservation**. Vocabulary: *heritage conservation, cultural authenticity, over-tourism, preservation ethics*.

Topic 3: Should people be encouraged to live in multicultural societies?

View 1 – Yes, diversity enriches communities.

Multicultural societies promote **tolerance, creativity, and broader perspectives**. When

individuals from various backgrounds interact, they share ideas and **reduce prejudice**. Cultural diversity stimulates **innovation** and strengthens social harmony.

View 2 – No, it may cause social tension.

Opponents claim that cultural differences can lead to **conflicts and misunderstandings**. Without integration policies, diverse communities may experience **fragmentation** rather than unity. Shared values and communication are essential for success.

TOEFL Writing Note:

Compare **cultural enrichment** vs. **social friction**. Vocabulary: *integration, intercultural dialogue, social cohesion, cultural pluralism*.

 Topic 4: Should governments promote traditional festivals in modern societies?

View 1 – Yes, traditions preserve identity.

Festivals help people **remember history**, **celebrate values**, and **strengthen community ties**. Supporting them promotes **cultural continuity** and **national pride**. Traditional events can also boost **tourism and local economies**.

View 2 – No, traditions should evolve naturally.

Critics argue that state promotion can **politicize culture** or waste public funds. Societies should allow customs to **adapt organically** rather than preserving them artificially.

TOEFL Writing Note:

Contrast **cultural preservation** vs. **natural evolution**. Vocabulary: *cultural identity, heritage celebration, public funding, generational adaptation*.

 Topic 5: Should people be punished for not recycling?

View 1 – Yes, penalties encourage responsibility.

Fines motivate citizens to **reduce waste** and adopt **eco-friendly habits**. Recycling laws make environmental protection **collective and enforceable**. Strict policy ensures **sustainable living** for future generations.

View 2 – No, education works better.

Critics argue that punishment can create **resistance** rather than cooperation. Governments should focus on **public awareness campaigns** and **accessible recycling facilities**, making it easier for people to choose sustainability willingly.

TOEFL Writing Note:

Balance **enforcement** vs. **education**. Vocabulary: *environmental regulation, sustainable behavior, civic duty, ecological awareness*.

Topic 6: Should celebrities be considered good role models for society?

View 1 – Yes, they influence youth positively.

Famous figures can inspire **ambition, discipline, and creativity**. Many use their platforms to promote **charity, education, and social causes**. Their visibility can raise awareness about **global issues** such as climate change or equality.

View 2 – No, fame doesn't equal morality.

Opponents note that many celebrities display **irresponsible behavior**, promoting **materialism or unrealistic lifestyles**. Society should admire **teachers, scientists, and doctors**, not entertainers, as role models.

TOEFL Writing Note:

Contrast **public influence** vs. **ethical reliability**. Use connectors *however, whereas, nonetheless*. Vocabulary: *social influence, moral example, media idolization, public image*.

Topic 7: Should people spend more time helping others or improving themselves?

View 1 – Helping others strengthens society.

Acts of service build **compassion, empathy, and collective well-being**. Contributing to others' happiness creates **emotional fulfillment** and reduces inequality. Societies thrive when citizens **support one another**.

View 2 – Self-improvement is the foundation of help.

Critics believe individuals must first achieve **personal stability and education** before assisting others. Self-improvement leads to **competence**, enabling people to contribute more effectively to society later.

TOEFL Writing Note:

Compare **collective altruism** vs. **personal development**. Vocabulary: *philanthropy, self-cultivation, emotional intelligence, social contribution*.

Topic 8: Should museums be free to the public?

View 1 – Yes, knowledge should be accessible.

Free admission ensures **equal access** to **education and culture**. It encourages learning for all ages and promotes **intellectual curiosity**. Museums serve as **public institutions**, not businesses.

View 2 – No, entrance fees are necessary.

Critics argue that museums need funding for **maintenance, staff, and exhibitions**. Modest fees ensure **financial sustainability** and allow for **better preservation** of collections.

TOEFL Writing Note:

Contrast **cultural access** vs. **financial sustainability**. Vocabulary: *public enlightenment, institutional funding, cultural inclusivity, preservation management*.

Topic 9: Should people be encouraged to donate to charity or pay higher taxes for welfare programs?

View 1 – Charity is more flexible.

Private donations allow citizens to **choose causes they care about**. It builds **personal responsibility** and **community involvement**. Charities are often faster and more **innovative** than government programs.

View 2 – Taxes ensure fairness.

Critics argue that charity depends on **individual wealth and mood**, leading to inequality. Tax-funded welfare ensures **universal coverage** and **long-term support**. Social justice requires collective contribution, not voluntary generosity.

TOEFL Writing Note:

Balance **voluntary philanthropy** vs. **systematic welfare**. Vocabulary: *social equity, civic contribution, redistributive justice, community engagement*.

Topic 10: Should countries protect their cultural traditions from globalization?

View 1 – Yes, identity must be preserved.

Globalization can lead to **cultural homogenization**, erasing local customs, languages, and art forms. Protecting traditions maintains **diversity and historical depth**. Cultural protection strengthens **national identity and pride**.

View 2 – No, openness leads to progress.

Opponents say cultural exchange promotes **innovation and tolerance**. Cultures naturally evolve through interaction, creating **hybrid identities** that reflect modern realities. Isolation weakens cultural vitality.

TOEFL Writing Note:

Contrast **cultural preservation** vs. **global integration**. Vocabulary: *cultural resilience, global interdependence, heritage erosion, intercultural adaptation*.

Topic 11: Should wealthy nations be responsible for helping poor countries?

View 1 – Yes, global cooperation is a moral duty.

Supporters argue that rich countries have both **ethical and practical reasons** to assist poorer ones. International aid promotes **global stability, peace, and shared prosperity**. When developed nations provide **financial and technological support**, they help others combat **poverty, disease, and climate challenges**. Such cooperation builds trust and reduces **migration pressure and global inequality**.

View 2 – No, each nation must solve its own problems.

Opponents claim that foreign aid often leads to **dependency and corruption**. Donor countries might use it to gain **political influence** rather than genuinely help. Sustainable development requires **self-reliance**, not constant assistance. Instead of aid, partnerships that encourage **education and trade** are more beneficial.

TOEFL Writing Note:

Contrast **moral obligation** vs. **self-sufficiency**. Use transitions *while, in contrast, moreover*. Vocabulary: *foreign aid, international development, dependency, humanitarian cooperation*.

Topic 12: Should people be required to vote in national elections?

View 1 – Yes, voting is a civic duty.

Compulsory voting increases **participation and legitimacy** in democracy. When everyone votes, governments better represent the **will of the people**. Mandatory voting also encourages **political awareness** and discourages **extremism**, since moderate citizens' voices are heard.

View 2 – No, freedom includes the right not to vote.

Critics say forcing citizens to vote **violates personal liberty**. Political disengagement is sometimes a form of **protest or apathy**, and forcing it may lead to **uninformed decisions**. Instead, governments should improve **trust and education**, not impose rules.

TOEFL Writing Note:

Compare **democratic participation** vs. **individual freedom**. Vocabulary: *civic engagement, electoral participation, political coercion, democratic legitimacy*.

Topic 13: Should rich people be taxed to support cultural and social programs?

View 1 – Yes, wealth carries social responsibility.

Progressive taxation ensures **equal opportunity** and supports the **arts, education, and healthcare**. Wealthy citizens benefit most from stable societies, so they should contribute proportionally. This promotes **social justice** and **shared prosperity**.

View 2 – No, it punishes success.

Opponents argue that excessive taxes discourage **entrepreneurship and investment**. Wealth creation drives innovation, which benefits everyone. Voluntary charity is preferable to forced redistribution.

TOEFL Writing Note:

Contrast **social fairness** vs. **economic motivation**. Vocabulary: *progressive taxation, social contribution, redistributive policy, entrepreneurial incentive*.

Topic 14: Should cultural differences be respected even if they conflict with human rights?

View 1 – Yes, cultural diversity deserves respect.

Every culture has unique values that shape its **identity and traditions**. Imposing external judgments risks **cultural imperialism** and **loss of heritage**. Respectful dialogue encourages **mutual understanding** rather than confrontation.

View 2 – No, human rights are universal.

Critics argue that practices violating **equality, freedom, or dignity** cannot be justified by culture. Protecting human rights ensures **justice and moral progress** across all nations. Respect must never excuse harm.

TOEFL Writing Note:

Balance **cultural relativism** vs. **universal ethics**. Use connectors *however, nonetheless, therefore*. Vocabulary: *moral universalism, cultural relativism, social justice, ethical governance*.

Topic 15: Should people be more loyal to their family or to society as a whole?

View 1 – Family comes first.

Family loyalty represents **love, gratitude, and moral duty**. Supporting relatives builds **trust and emotional security**, the foundation of strong communities. People learn values like **honesty and empathy** from close relationships first.

View 2 – Society must take priority.

Opponents argue that excessive family loyalty can cause **nepotism and inequality**. Citizens should prioritize **public responsibility and fairness** over personal ties to maintain **social justice and progress**.

TOEFL Writing Note:

Compare **personal loyalty** vs. **civic ethics**. Vocabulary: *familial obligation, social fairness, nepotism, collective integrity*.

Related Vocabulary (Society & Culture – Complete)

civic responsibility | multiculturalism | cultural heritage | moral universalism | social justice | diversity | empathy | solidarity | altruism | equality | heritage conservation | global citizenship | civic participation | intercultural understanding | collective welfare | social inclusion | heritage preservation | cultural evolution | social solidarity | ethical awareness | community engagement | intercultural dialogue | civic participation | altruism | diversity | social unity | global citizenship

Subject 9 — Art, Media & Entertainment

Topic 1: Should governments fund art and cultural programs?

View 1 – Yes, art enriches national identity.

Art preserves **heritage, creativity**, and **collective memory**. Public funding ensures that artists can produce works that **educate and inspire** rather than simply appeal to commercial markets. Culture strengthens **social cohesion** and attracts **tourism**, benefiting the economy indirectly. Without funding, many important art forms and traditions could disappear.

View 2 – No, the market should decide.

Opponents argue that taxpayers' money should go to **healthcare and education**, not subjective artistic projects. Art should be supported by **private sponsors or ticket sales**, not government intervention. Public funding risks **politicizing culture** or supporting works that don't reflect the majority's interests.

TOEFL Writing Note:

Balance **cultural preservation** vs. **economic efficiency**. Vocabulary: *public subsidy, cultural heritage, creative autonomy, state patronage*.

Topic 2: Should public money be used to build museums and theaters instead of sports facilities?

View 1 – Yes, cultural centers offer lasting value.

Museums and theaters promote **education, reflection, and artistic appreciation**. They preserve **history and creativity** for future generations. Such venues foster **critical thinking and empathy**, enriching society beyond entertainment.

View 2 – No, sports benefit the majority.

Critics believe that sports facilities encourage **health, teamwork, and community spirit**. They attract more visitors and promote **active lifestyles**, reducing public health costs. Art spaces serve fewer people and may not justify high expenses.

TOEFL Writing Note:

Contrast **intellectual enrichment** vs. **mass participation**. Vocabulary: *cultural infrastructure, social engagement, public recreation, civic investment*.

Topic 3: Should art be taught as a compulsory subject in schools?

View 1 – Yes, art develops creativity and empathy.

Art education nurtures **emotional intelligence, imagination, and innovation**—skills essential in all careers. It teaches students to express themselves, appreciate beauty, and understand cultural differences. Compulsory art builds **balanced, thoughtful citizens**.

View 2 – No, it distracts from academic goals.

Opponents argue that schools should focus on **core subjects** like science and mathematics. Mandatory art may **consume time and resources** better used for technical learning. Students interested in art can pursue it **voluntarily**.

TOEFL Writing Note:

Compare **holistic education** vs. **academic focus**. Vocabulary: *artistic literacy, creative development, expressive learning, curriculum design*.

Topic 4: Should traditional art forms be preserved in the digital age?

View 1 – Yes, tradition connects us to history.

Traditional arts carry **cultural identity**, **craftsmanship**, and **intergenerational wisdom**. Preserving them ensures **continuity and authenticity** amid modernization. They represent the soul of a nation.

View 2 – No, modern art reflects progress.

Critics say art must **evolve with technology** to stay relevant. Digital forms allow **innovation**, **accessibility**, and global collaboration. Clinging to tradition may prevent creative growth.

TOEFL Writing Note:

Contrast **heritage preservation** vs. **modern innovation**. Vocabulary: *cultural continuity, digital transformation, artistic evolution, craftsmanship*.

Topic 5: Should governments control media content for accuracy and morality?

View 1 – Yes, regulation prevents harm.

Governments should monitor media to prevent **misinformation**, **hate speech**, and **offensive material**. Responsible oversight protects **youth and social harmony**. Ensuring truthful reporting strengthens **public trust** and stability.

View 2 – No, media must remain free.

Critics argue that control leads to **censorship and propaganda**. Independent journalism is vital for **democracy and accountability**. People should decide what to believe, not the state.

TOEFL Writing Note:

Balance **public protection** vs. **press freedom**. Vocabulary: *media regulation, freedom of expression, journalistic integrity, censorship policy*.

Topic 6: Should social media platforms be responsible for users' content?

View 1 – Yes, platforms must ensure safety.

Social networks spread **misinformation and harmful content** quickly. Companies should filter **hate speech**, **fake news**, and **harassment** to protect users. Digital responsibility is essential for **social stability**.

View 2 – No, users must take responsibility.

Opponents claim that online platforms cannot monitor billions of posts without violating **free expression**. Individuals must learn **digital literacy** and think critically before sharing information.

TOEFL Writing Note:

Contrast **corporate accountability** vs. **personal responsibility**. Vocabulary: *content moderation, online ethics, digital citizenship, media accountability*.

Topic 7: Should advertisements for unhealthy products be banned?

View 1 – Yes, ads influence public health.

Restricting promotions for **junk food, alcohol, or tobacco** protects children and encourages **healthy lifestyles**. Governments must regulate industries that endanger **public welfare**.

View 2 – No, people should decide freely.

Critics argue that consumers must use **personal judgment**. Advertising supports the **economy and employment**. Education, not censorship, should shape healthy habits.

TOEFL Writing Note:

Balance **public health** vs. **consumer freedom**. Vocabulary: *regulatory ethics, commercial influence, responsible marketing, public welfare*.

Topic 8: Should reality TV shows be restricted for young audiences?

View 1 – Yes, they promote unhealthy values.

Many reality programs encourage **materialism, competition, and humiliation**. Children may imitate **toxic behaviors** seen on screen. Limiting access protects **mental health and morality**.

View 2 – No, they reflect real society.

Opponents believe young people should learn to **distinguish entertainment from reality**. Such shows can also teach **confidence and teamwork**. Parental supervision, not censorship, is the best solution.

TOEFL Writing Note:

Compare **media influence** vs. **media literacy**. Vocabulary: *youth exposure, cultural representation, entertainment ethics, cognitive development*.

Topic 9: Should governments support local film industries?

View 1 – Yes, it promotes national culture.

Funding domestic films protects **language, values, and national identity**. Local cinema also creates **jobs** and strengthens cultural **diversity** against global dominance from Hollywood or similar industries.

View 2 – No, films should compete freely.

Critics argue that artificial support reduces **competition and innovation**. Quality should determine success, not government funding. Market-driven creativity ensures **authentic storytelling**.

TOEFL Writing Note:

Contrast **cultural protectionism** vs. **creative competition**. Vocabulary: *cinematic heritage, film subsidy, cultural export, creative industry*.

 Topic 10: Should violent movies and games be censored?

View 1 – Yes, they increase aggression.

Exposure to **graphic violence** can desensitize audiences, especially children. Governments should regulate harmful content to prevent **social imitation** and **psychological harm**.

View 2 – No, censorship limits expression.

Critics say violence in art reflects **real human emotion and conflict**. Adults can choose responsibly, and parents should guide children. Restricting such media **violates artistic freedom**.

TOEFL Writing Note:

Compare **public protection** vs. **creative freedom**. Vocabulary: *media violence, age restriction, expressive liberty, behavioral influence*.

 Topic 11: Should newspapers and magazines publish private information about public figures?

View 1 – Yes, the public has a right to know.

Supporters argue that politicians, celebrities, and leaders influence society and therefore must remain **transparent and accountable**. Investigative journalism exposes **corruption, hypocrisy**, and abuse of power. Media scrutiny ensures **ethical conduct** and **public trust**, keeping powerful people responsible for their actions.

View 2 – No, everyone deserves privacy.

Opponents believe that publishing private details invades **personal dignity** and distracts from real issues. Even public figures have the right to a **private life** unless it directly affects their professional duties. Sensational reporting can lead to **mental distress** and **social harm**.

TOEFL Writing Note:

Contrast **transparency** vs. **personal privacy**. Use connectors *while, nonetheless, in contrast*. Vocabulary: *press freedom, public accountability, media ethics, personal boundaries*.

Topic 12: Should famous artists and performers earn extremely high salaries?

View 1 – Yes, talent deserves reward.

Supporters argue that artists, musicians, and athletes **generate massive revenue** and bring **joy and inspiration** to millions. Their income reflects **market demand**, years of practice, and the **economic value of entertainment**. High salaries also motivate young talent to pursue creative careers.

View 2 – No, income inequality is unjust.

Critics claim that paying entertainers millions while **teachers and doctors** earn modestly reflects **distorted social priorities**. Excessive wealth in entertainment encourages **materialism** and widens the **income gap**. Talent should be respected, but not overvalued.

TOEFL Writing Note:

Balance **economic merit** vs. **social fairness**. Vocabulary: *market valuation, economic disparity, cultural influence, remuneration ethics*.

Topic 13: Should governments restrict foreign media to protect local culture?

View 1 – Yes, local identity must be preserved.

Foreign media can dominate domestic markets, replacing **native languages, traditions, and cultural values**. Restrictions encourage **local creativity** and protect **national identity**. Supporting domestic media strengthens **cultural sovereignty**.

View 2 – No, global media promotes understanding.

Opponents argue that exposure to international content promotes **openness, innovation, and cross-cultural awareness**. Restricting it limits **freedom of choice** and artistic exchange. Blending global and local perspectives enriches societies.

TOEFL Writing Note:

Contrast **cultural protectionism** vs. **global exchange**. Use connectors *however, on the other hand, as a result*. Vocabulary: *media globalization, cultural sovereignty, soft power, intercultural communication*.

Related Vocabulary (Art, Media & Entertainment — Complete)

cultural heritage | artistic freedom | censorship | mass media | cultural sovereignty | digital transformation | media ethics | artistic expression | global communication | journalistic integrity | cultural diversity | creative industry | public accountability | market valuation | visual culture | cultural identity | creative autonomy | artistic innovation | freedom of expression | censorship |

digital media | artistic heritage | public funding | mass communication | visual literacy | cultural diversity | media accountability | expressive freedom | entertainment ethics

Subject 10 — Science & Space

Topic 1: Should governments invest more in space exploration or solve problems on Earth first?

View 1 – Space exploration drives progress.

Supporters argue that investing in space programs fuels **scientific innovation, technological advancement, and international collaboration**. Discoveries made for space often lead to breakthroughs in **medicine, communication, and energy efficiency**. Exploring beyond Earth expands human knowledge and may ensure **long-term survival** through planetary colonization.

View 2 – Earth’s challenges come first.

Critics say billions spent on rockets should instead fight **poverty, hunger, and climate change**. While space research is fascinating, it cannot justify ignoring urgent human suffering. Governments should prioritize **sustainability, education, and public health** before exploring distant planets.

TOEFL Writing Note:

Contrast **technological innovation** vs. **humanitarian priority**. Vocabulary: *aerospace research, scientific advancement, sustainability, humanitarian responsibility*.

Topic 2: Should cloning be allowed for medical purposes?

View 1 – Yes, it can save lives.

Supporters claim that cloning organs or tissues could solve **transplant shortages** and revolutionize **medical treatment**. Therapeutic cloning enables scientists to study **genetic diseases** and develop personalized medicine. With strict regulation, it can improve **quality of life** ethically.

View 2 – No, it raises moral and safety concerns.

Opponents warn that cloning could **violate ethical principles** and blur the line between **science and humanity**. It might lead to exploitation, genetic inequality, or unforeseen health consequences. Natural life should not be **replicated artificially**.

TOEFL Writing Note:

Balance **medical innovation** vs. **ethical boundaries**. Vocabulary: *bioethics, regenerative medicine, genetic manipulation, scientific ethics*.

Topic 3: Should governments fund scientific research even if it has no immediate benefits?

View 1 – Yes, knowledge builds the future.

Basic research often leads to **unexpected discoveries** that transform society decades later. Funding science shows commitment to **intellectual growth, education, and technological leadership**. Investing in research today ensures **innovation tomorrow**.

View 2 – No, funds should go to urgent needs.

Critics argue that public money must address **pressing issues** like healthcare and infrastructure. Research without direct results can appear **wasteful** when citizens face economic hardship. Governments should encourage **private funding** for speculative projects.

TOEFL Writing Note:

Contrast **long-term investment** vs. **short-term practicality**. Vocabulary: *fundamental research, innovation pipeline, scientific curiosity, fiscal responsibility*.

Topic 4: Should scientists be allowed to experiment on animals?

View 1 – Yes, it is necessary for progress.

Animal testing has contributed to **vital medical breakthroughs** in vaccines, drugs, and surgical techniques. Supporters argue it is essential for ensuring **safety and reliability** before human trials. With strict regulations, such research can remain **ethical and humane**.

View 2 – No, it is morally unacceptable.

Opponents believe animal testing causes **suffering** and violates animal rights. Modern technology now offers alternatives such as **computer modeling** and **cell cultures**. Science should evolve toward **compassionate innovation** that respects all forms of life.

TOEFL Writing Note:

Compare **scientific necessity** vs. **ethical compassion**. Vocabulary: *animal welfare, biomedical testing, experimental ethics, humane alternatives*.

Related Vocabulary (Science & Space)

scientific innovation | bioethics | experimental ethics | sustainability | technological advancement | fundamental research | genetic engineering | animal welfare | international collaboration | regenerative medicine | space exploration | human survival | ethical responsibility | medical breakthrough

Subject 11 — Urban Life & Community

Topic 1: Should governments focus more on improving cities or developing rural areas?

View 1 – Cities should remain the priority.

Urban areas generate most of a nation's **economic growth**, **innovation**, and **job opportunities**. Investing in cities strengthens **infrastructure**, transportation, and housing for millions. Well-developed urban centers attract foreign investment and drive **national competitiveness**.

View 2 – Rural development is equally important.

Critics argue that neglecting the countryside increases **inequality and migration**. Improving **education, healthcare, and internet access** in villages can reduce overcrowding in cities. Balanced development ensures **social harmony and sustainability**.

TOEFL Writing Note:

Contrast **urban efficiency** vs. **rural equality**. Vocabulary: *regional development, urbanization, infrastructure, socioeconomic balance*.

Topic 2: Should governments invest more in public parks and green spaces?

View 1 – Yes, green spaces improve quality of life.

Parks offer citizens a place for **exercise, relaxation**, and **community interaction**. They reduce **air pollution**, lower stress, and promote **public health**. Green areas also increase **biodiversity** and make cities more attractive to residents and tourists alike.

View 2 – No, there are more urgent priorities.

Opponents believe governments should focus on **transportation, housing, and safety** first.

Parks are beneficial but not essential, especially in developing nations with **limited budgets**. Urban growth requires practicality, not aesthetics.

TOEFL Writing Note:

Balance **environmental well-being** vs. **economic necessity**. Vocabulary: *urban ecology, environmental sustainability, public welfare, civic planning*.

 Topic 3: Should tall buildings be encouraged in modern cities?

View 1 – Yes, they save space and promote progress.

High-rise buildings allow **efficient land use**, especially in crowded cities. They create **architectural identity**, attract investors, and support **vertical communities** close to workplaces. Tall buildings symbolize **modernity and ambition**.

View 2 – No, they damage city character and environment.

Critics argue that skyscrapers cause **traffic congestion**, **wind problems**, and block natural light. They may also harm **historic skylines** and reduce **social connection** among residents. Low-rise planning encourages **human-scale interaction**.

TOEFL Writing Note:

Contrast **vertical urbanization** vs. **cultural livability**. Vocabulary: *architectural density, skyline aesthetics, sustainable design, community cohesion*.

 Topic 4: Should historic buildings be preserved or replaced with modern structures?

View 1 – Preserve history to maintain identity.

Historic architecture represents a city's **heritage and memory**. Preserving it fosters **tourism**, **education**, and **cultural pride**. Renovating old buildings also promotes **sustainability** by reusing materials instead of new construction.

View 2 – Replace them for modern efficiency.

Opponents claim that old buildings are often **unsafe**, **costly to maintain**, and energy inefficient. Modern structures provide **technology**, **accessibility**, and **space efficiency**. Cities must evolve with progress.

TOEFL Writing Note:

Compare **heritage preservation** vs. **urban modernization**. Vocabulary: *architectural conservation, adaptive reuse, urban renewal, cultural heritage*.

Topic 5: Should cities limit the number of private cars?

View 1 – Yes, it reduces pollution and congestion.

Car-free policies improve **air quality**, reduce **traffic jams**, and promote **public transport**. Limiting private cars creates **quieter, cleaner, and safer streets**. Some cities succeed with **car-sharing** or **cycling incentives**.

View 2 – No, it restricts personal freedom.

Critics argue that cars provide **convenience and independence**, especially for families or workers with long commutes. Instead of limits, governments should **improve fuel efficiency** and invest in better **public infrastructure**.

TOEFL Writing Note:

Balance **environmental reform** vs. **personal mobility**. Vocabulary: *urban mobility, emission control, traffic management, sustainable transport*.

Topic 6: Should governments build affordable housing in city centers?

View 1 – Yes, it ensures equality.

Affordable housing keeps **low-income citizens** close to jobs, education, and healthcare. It prevents **social segregation** and creates **diverse, inclusive neighborhoods**. Central housing reduces commuting and boosts **economic participation**.

View 2 – No, it may reduce property values.

Opponents argue that city centers should attract **business and tourism**, not low-cost residences. Governments could instead build affordable housing in **suburbs with good transport links**.

TOEFL Writing Note:

Contrast **social inclusion** vs. **economic optimization**. Vocabulary: *housing policy, urban inclusion, real estate dynamics, socioeconomic diversity*.

Topic 7: Should public transport be free in large cities?

View 1 – Yes, it encourages eco-friendly travel.

Free public transit reduces **traffic congestion, pollution**, and fuel consumption. It promotes **equality** by ensuring mobility for everyone, regardless of income. Such systems also attract **tourists** and improve **urban efficiency**.

View 2 – No, free transport is unsustainable.

Critics argue that maintaining buses and trains costs **billions annually**. Free systems risk **overuse and poor service**. A small fare ensures **responsibility** and financial stability.

TOEFL Writing Note:

Balance **environmental accessibility** vs. **economic sustainability**. Vocabulary: *mobility equity, transportation subsidy, operational cost, commuter efficiency*.

 Topic 8: Should governments control rent prices in big cities?

View 1 – Yes, rent control prevents inequality.

Rising housing costs force citizens out of urban centers. Rent caps ensure **affordability, stability, and social diversity**. They protect vulnerable groups from **exploitation and displacement**.

View 2 – No, rent control harms the market.

Critics claim rent caps discourage **investment and maintenance**. Landlords may reduce housing quality or build less. A free market ensures **supply and demand balance** naturally.

TOEFL Writing Note:

Contrast **housing fairness** vs. **market efficiency**. Vocabulary: *tenant protection, real estate regulation, economic intervention, affordability crisis*.

 Topic 9: Should tourism be limited in popular cities?

View 1 – Yes, it prevents overcrowding and damage.

Overtourism harms **local culture, environment, and public space**. Limiting visitors preserves **authenticity** and ensures **quality experiences** for both residents and travelers.

View 2 – No, tourism drives the economy.

Critics say tourism creates **jobs and revenue** essential for many cities. Instead of limits, governments should promote **sustainable tourism** and diversify attractions.

TOEFL Writing Note:

Compare **preservation** vs. **economic dependence**. Vocabulary: *overtourism, cultural sustainability, local economy, environmental management*.

 Topic 10: Should people be encouraged to live in smaller towns instead of large cities?

View 1 – Yes, smaller towns offer better life quality.

Small towns provide **clean air, safety, and community connection**. Encouraging relocation reduces **urban crowding** and **housing pressure**. Technology now enables **remote work**, making small-town living practical.

View 2 – No, cities offer more opportunity.

Critics argue that big cities provide **education, jobs, and cultural experiences** unavailable elsewhere. Encouragement should focus on **urban reform**, not migration.

TOEFL Writing Note:

Contrast **decentralization** vs. **urban opportunity**. Vocabulary: *regional migration, lifestyle balance, digital mobility, demographic planning*.

Related Vocabulary (Urban Life & Community)

urbanization | infrastructure | community planning | sustainable design | mobility equity | housing policy | civic engagement | decentralization | overpopulation | cultural preservation | traffic management | inclusive development | regional growth | urban renewal
